

Appendix F

Public Scoping Comments

Priorities Exercise Results
Public Comments

Reeds Springs Question # 1

- Water Quality (12)
- Recreation
- Ban Oversized Boats (5)
- In 20 Years a Public Drinking Water Supply
- Access to Land Development and Docks
- More Places to Eat (4)
- Safe Drinking Water
- Public Use of Kimberling City
- Improve Access To Boat Ramps
- Water Quality (16)
- Lack of Tournament Fishing
- Over Saturation of Boat Docks in Kansas City
- Limit Size of Boats (12)
- Second Story Docks
- Maintain Water Level (18)
- Maintain Shorelines Natural State (3)
- Become Nothing Like Lake of the Ozarks (3)
- Use Lake Water for Fire protection
- Flexibility of Boat Design
- Remain an Environment for Snakes

Reeds Spring Question # 2

- Clean Water (9)
- Quality of Life
- Water Quality (12)
- Protect Adjacent Private Property from Abuse by Illegal Use of Restricted Areas
- Limit Discharge Into Lake
- Clean Shores (8)
- Restrict Boat Size (9)
- Opportunity for Land and Dock Development
- Consistent Water Levels (5)
- Drinking Water Supply (2)
- Tree Management to Improve Wildlife
- No Water Out Take Stations
- Handrails for Handicapped (2)
- Replace All Old Septic Tanks (2)
- Stop Pollution From Resorts
- Maintain Docks And Shoreline (10)
- Fishing (5)
- Scuba Diving
- Work With State for Water Safety
- More Campsites for Public
- Free Access for Veterans
- Control Access to Lake

Reeds Springs Question # 3

- Why Are There Different Rules For Commercial, People and Resorts
- Heavy Fines For Abuse of The Lake
- Control Noise (11)
- Boat Inspections Before going On Lake
- Maintain Boat Size (6)
- Honor Red Zone Locations
- Remove Dead Trees (3)
- Stop Discharge of Sewage Into Lake (2)
- Get Rid of Marina Buffer Zones (3)
- Do Not Waste Money Hiring Consultants
- Maintain Lake Levels (9)
- Control Rainwater Runoff
- No Over Building
- Kimberling City Waste Treatment Needs to Be Moved Higher
- Program to Identify Pollution Sources
- More Shoreline Clean Up (6)
- Regulate Motor Size And Speed (2)
- Marina Regulations And Oversight To Assure Reasonable Expenses For Visitors

Shell Knob Question # 1

- No Red Zones In Campbell Point
- Manage Driftwood
- Retain Mowing Permits
- Do Not Stock Otter In The Lake
- No Alligators, No Piranhas
- Naturally Preserved (5)
- Stable Lake Levels
- Recreation Oriented (6)
- Tourism (6)
- Find Who Is Dumping Trash
- Water Park
- Improve Launch Facility
- Clean Water (28)
- Water Quality (19)
- Remove Dead Trees (3)
- Less Pollution (2)
- Free of Logs
- Sewage And Chemical Restrictions (6)
- No Lake of The Ozarks
- Look The Same As Today (12)
- Safety (13)
- Remove Debris
- More Jobs For Young People
- Residential Property Development

- Stricter Zoning
- Restrict Boat Size (15)
- Commercialization Kept To A Minimum
- Control Human Population
- Better management

Shell Knob Question # 2

- Water Quality (18)
- Clean Water (22)
- Boat Size (16)
- Boat Noise (29)
- Quietness (6)
- Wildlife Habitat (3)
- Safety of Water Activities
- Fishing (7)
- Water Sports (4)
- Control Water Levels (10)
- Stop Dumping of Phosphates And sewage (9)
- Swimming Not Boating
- No Commercial Development
- No More Resorts
- More Recreational Activities (16)
- Limit Shoreline Erosion
- Preserve Slower Pace of Life
- Public And Private Access To Lake
- Economic Growth And Development (17)
- Flood Control
- Property Owners Clean Dead And Down Trees

Shell Knob Question # 3

- Better Maps With Locators
- Change Dock Usage Rules
- Water Levels (18)
- Maintain , Replace Plants
- Monitor Runoff
- Keep EPA Away From Lake
- Get Rid Of Party Coves
- Remain Family Vacation Area
- Increase Commercial Development
- More Water Patrols
- Less Zoning
- Limit CA70's (2)
- Clean Water (21)
- Water Quality (11)
- Boat Size (16)
- Boat Noise (11)
- Fish Habitat (2)
- Shoreline Erosion Control (3)
- Clean Septic System
- Boat Speed (7)
- 50 MPH Speed Limit
- Let People Clean Dry Lake Beds (6)
- Flooding (3)
- Clear Directions From Corp Of Engineers

- Dredge Lake
- Phosphate Removal (4)
- Residents and Corp Of Engineers Work Together
- Homeowners More Flexibility In Cleaning Their Yards (3)
- Enforce Laws And Rules Fairly
- Control Development (3)
- Install Fish Cleaning Pumps
- No Ski Boats (3)
- Remain Family Vacation Area (3)
- Better Marking of Dangerous Or shallow Areas
- Additional Boat Launches
- More Restaurants With Entertainment (4)
- More Restaurants In The Water (3)
- More Boat Docks And Slips

Branson Question # 1

- Keep As Pristine As Possible
- Limit Commercial Activity
- Provide For The Needs of All People
- Preserve Quality of The Lake
- Control Boat Size (13)
- Upper River Access
- Controlled Lake Open To All
- Fishing (5)
- More Campgrounds
- More Restaurants (5)
- Recreation (10)
- Clean Water (21)
- Habitat For Fish (4)
- Resorts
- Expand Boy Scout Program
- Look the Same as Today
- Clean Shoreline (13)
- Less Cedar Trees (6)
- Preserved And Unchanged (8)
- Water Quality (16)
- No More Building (3)
- Flood Control (3)
- Control Development (3)
- Communication Between Seasonal And Permanent Residents

- Trails (2)
- New Docks In New Areas When Appropriate
- More Like Lake of The Ozarks (2)
- Balance Dock Use With Property Owners And Vendors
- Boat Noise (12)
- Maintain Shoreline Quality
- Maintain Water Levels (6)
- Tourism (3)
- Shoreline View Should Be Wild
- Economic Development To Give It National Recognition
- Limit Commercial Use
- Over Development of Resorts
- Not Like Lake of The Ozarks (4)
- More Private-Less Commercial
- Environmentally Safe (2)
- Pollution Free (3)
- Not Crowded With Homes
- Same As It Is Now (4)
- Poultry Waste Run-Off Regulated

Branson Question # 2

- Water Quality (20)
- Maintain Beauty
- Clean Water (12)
- Recreation (4)
- Better Fishing (5)
- Quality of Access To Lake
- Clean Shoreline (5)
- Like Lake of The Ozarks
- No Condos
- Safe For Boating
- Preservation of Shoreline (7)
- Water Levels (11)
- Restrict Private Sewage (4)
- Limit Boat Size (10)
- Fish Habitat (6)
- Control Lake Levels More Effectively (19)
- Wild Life Habitat
- Restrict Boat Noise (5)
- Allow Private Docks in Red Zone
- Preserve For Grandchildren
- Keep Costs Reasonable
- Maintain Natural Look
- Safety (5)
- Handicap Accessible (3)

- More Boating Opportunities
- Not Like Lake of The Ozarks (2)
- See More Water Than Forest
- Conservation
- Less Commercial (5)

Branson Question # 3

- Recreational Opportunities
- More Pumping Stations
- Limit Boat Size (19)
- More Shoreline Markers
- Flood Control (7)
- Remove Dead Trees
- More Trails (2)
- Close Bass Fishing During Spawning Season
- Stop Closing Campsites
- Look For Park Sponsors To Help With Clean-Up
- Allow Clean-Up of Overgrown Areas By Government
- Better Water Level management (12)
- Financial Impact On Regulations
- Open To Public Opinions Locally On A Regular Basis
- Find Cause of Electrical Deaths And Injuries
- Trees In Lake Cut 20ft Below Pool Levels
- Less Commercialization (5)
- Clean Water (22)
- Limit Boat Rentals
- Coordinate Development With Surrounding Counties
- More “No Wake” Buoys around Private Docks
- Minimize Diseased or Unfriendly Crustaceans from Other Waters
- Control Sewage Input (4)
- More Water Patrols

- Ease Shoreline Management
- Additional Amenities (5)
- Minimize Number of Large Docks Owned By Condos
- Remove Underwater Fiber Optics Cables
- Stop Micro-Managing Community Boat Docks
- No More Government Corp Restrictions
- Strengthen Water Control On Arkansas side
- Active Public Education

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I would like to see the ~~the~~ more HANDY CAP FRIENDLY.

What about Table Rock Lake is most important to you? HANDY ACCESS

What is one thing that could be done to improve the lake? A SURVEY THE WHOLE LAKE GIVE BACK FREE CAMPING to THE HANDY CAP.

Additional comments on the Master Plan Revision or about issues that should be studied: I would like to see the CORE to HAVE A 504 PLAN to include the HANDY CAP to INSURE FREE ACCESS TO THE LAKE FOR FISHING

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

CLEAN WATER, GOOD MANAGEMENT OF SHORELINE (RETENTION OF UNDEVELOPED AREAS.)

What about Table Rock Lake is most important to you?

CLEAN WATER, GREAT FISHING, RECREATION OFFERINGS, WATER LEVEL CONTROL

What is one thing that could be done to improve the lake?

LIMIT SPEED LIMIT FOR LARGER OCEAN-GOING BOATS WHICH REALLY CHURK UP WATER, DAMAGE DOCKS AND IMPEDE RECREATION OF AVERAGE BOATS/BOATERS

Additional comments on the Master Plan Revision or about issues that should be studied:

ESTABLISH NO-WAKE ZONES IN COVES TO LIMIT SPEED. SPEED DAMAGES DOCKS AND DISRUPTS RECREATION

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

LIKE IT IS NOW but without large CRUISERS
and Fast Speed Boats, causing shoreline erosion

What about Table Rock Lake is most important to you? _____

Keeping the water clean of dirt & sewage

What is one thing that could be done to improve the lake? _____

Limit the size of large CRUISERS
more lake patrol during weekends and holidays
LIMIT JET SKIES Boating around Dock and making wakes

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Shoreline management

Appears lot of home mow all the way to the lake

Need to establish rules For moving Boats
to Dock clearances.

More Public dedicated Boat Ramp ~~For~~ To eliminate People
From using private access roads,

Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Very much like it is now
clean water, Family friendly, good fishing and keep the
usable for all visitors. Make sure that business on the lake
can survive. most important water quality keep it from
becoming a lake at the beach

What about Table Rock Lake is most important to you? water quality and property
value

What is one thing that could be done to improve the lake? Consistent manage and
control like rules always change

Additional comments on the Master Plan Revision or about issues that should be studied:
This meeting should have much more information value to it

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the

How would you like to see Table Rock Lake in 20 years?

clear - clean water

minimal use of boats on lake

What about Table Rock Lake is most important to you?

No strict rules. Don't let us look like Lake of the Ozarks, which does a nice job of it.

What is one thing that could be done to improve the lake?

Engage more people in the process - Have Lake Patrol be more visible

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean water,
not overly developed, wilderness areas,
left in place. Campgrounds, for camps
and tents as well as RV's. Areas for non-motorized
vessels like kayak, canoe, & sailboats & would
like to see trails along adjacent to shoreline
(willing to help construct; like @ Pinney Creek)

What about Table Rock Lake is most important to you? Clean water and
wilderness areas left intact.

What is one thing that could be done to improve the lake? Control sewer
and septic systems.

Additional comments on the Master Plan Revision or about issues that should be studied:

environmental impact on wildlife and
water quality. For example does
Cape Pine Marina (gasoline, etc)
impact Pinney Creek wilderness

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

When I moved here and came to Table Rock
was very clear. Know with so many big boats
and water has hurt lake. Water quality
very important. A lot of moss has formed
over the last few years. Because of big run off not
contained that flows into the lake

What about Table Rock Lake is most important to you?

Fishing is my
important reason I moved & retired here. Fishing
has been good but if not contained will hurt the
fishing

What is one thing that could be done to improve the lake?

Sewer septic tank that leak into lake
and tributaries that flow into the lake
they need to keep shoreline cleaned every year

Additional comments on the Master Plan Revision or about issues that should be studied:

Table Rock Lake is pretty lake & we
need to keep improving it. Run off is real
hurting the lake and this should be contained
better

Table Rock Lake Master Plan Revision and Environmental Assessment

Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

AT A LEVEL EQUAL TO OR BETTER THAN IT IS NOW

KEEP BOAT DOCKS OFF MAIN LAKE AREAS AND RESTRICT TO SMALLER OFF-TRACK COVES

INCREASED STRUCTURE/ARTIFICIAL HABITAT FOR FISHES

What about Table Rock Lake is most important to you? _____

WATER QUALITY, FISHERIES

What is one thing that could be done to improve the lake? MORE FISH HABITAT

IMPROVE FISHERIES - INCREASE STOCKING OF WALL EPIKE

BETTER CONTROL OF LAKE LEVELS

BETTER CONTROL OF RUNOFFS & SEWAGE TREATMENT

Additional comments on the Master Plan Revision or about issues that should be studied: _____

WATER QUALITY SHOULD NOT ONLY BE MAINTAINED, BUT IMPROVED. THE LEVEL OF TURBIDITY (?) HAS DRASTICALLY INCREASED OVER LAST 10 YRS.

ABILITY TO RESTRICT A COVE TO "WAKE ONLY" TRAFFIC - RECREATIONAL BOATERS & PWC DO NOT SEEM TO RESPECT PRIVATE DOCKS IN SMALL COVES

ALLOW REMOVAL OF JUNIPER (CEDAR) TREES FROM CORPS PROPERTY

How would you like to see Table Rock Lake in 20 years? _____

BALANCE OF NATURAL AND BUILDING ~~OR USE~~
~~OR~~ BALANCE ALL TYPES OF RECREATION
BOATING, SWIMMING, FISHING,

What about Table Rock Lake is most important to you? _____

FISHING & BOATING

What is one thing that could be done to improve the lake? _____

USE MORE NO WAKE & SKIING AREAS
IN COUCH. *

Additional comments on the Master Plan Revision or about issues that should be studied: _____

WORK WITH COUNTIES IN CONTROLLING SEPTIC
AND WASTE AROUND LAKE.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? CLEAN, PURE, WITHOUT
A LOT OF UN-NEEDED BOAT DOCKS.

STOP DUMPING CABLES FROM DAMAGED ANCHORS BEING DUMPED
INTO LAKE AFTER MAKING REPAIRS

KEEP GAME FISHING UP.

SHORELINE TO BE CLEANED FROM DEBRIS.

CONTROL HIGH TRAFFIC AREAS

What about Table Rock Lake is most important to you? WATER QUALITY, WATER
DEPTH AND AMOUNT OF BOAT DOCKS.

CONTROL LAKE HEIGHT 915 AT MIN.

What is one thing that could be done to improve the lake? CONTROL BOATERS DUMPING
BOTTLES, CANS, GARBAGE INTO LAKE. MORE SHORELINE CLEANUP

Additional comments on the Master Plan Revision or about issues that should be studied:

THANK UN-USED PROPERTY INTO NEW PURPOSES - DON'T LET
GET IDLE - REDEVELOPED UN-USED CLOSED PROPERTY.

KEEP ACCESS TO LAKE AS A MINIMUM. DO NOT OVER
POLLUT CROWDED AREA'S.

STOP SWAMP INTO LAKE -

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? _____

Sustain or improve water quality

Maintain aesthetics of shoreline - maintain natural areas

Improve/Add beach and swim areas

Cleaner shoreline by removing dead fallen trees and trash

What about Table Rock Lake is most important to you? _____

Water quality

Shoreline mgmt. to prevent over development

Quiet

What is one thing that could be done to improve the lake? _____

Prevent over development and commercialization

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Concerned about the amount of logs and debris that causes damage during flood conditions.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years? _____

Just as it is now.

What about Table Rock Lake is most important to you? Water Quality
& Fishing opportunities - Private Boat Docks

What is one thing that could be done to improve the lake? Limit High Speed
Boats - Particularly Those with High noise levels

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

So far the Corp has done a good job with the restrictions on the lake but we need more control on boats than the hull exhaust needs to be set down. (70 hp) better pollution control, speed limit control etc. fishing clubs or Bass Pro haul the fish to Springfield to weigh in 30 meters mostly dead or dying fish to lake. Better system require +

What about Table Rock Lake is most important to you?

recreation + beauty, flood control

What is one thing that could be done to improve the lake?

Limit noise thru the hull exhaust + speed control.

Additional comments on the Master Plan Revision or about issues that should be studied:

Boat control pollution
control spread of unwanted muscova + fish.
Red in Stockton Lake
control boat speed
limit out of boats in coves - extend no wake zone in coves with boat docks
limit boat length + HP.
common thru Corps control thru other state lakes

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? Quieter boats - no
thru the hull exhaust - the lake is like a dragstrip
on weekends. Why would this high noise level be
allowed on the lake when one can not run vehicles
on roads & highways at this noise level. More control
of erosion as development continues or expands.

What about Table Rock Lake is most important to you? Water & Shoreline quality
Need to educate the public on how to enhance
water quality.

What is one thing that could be done to improve the lake? More consistent enforcement of rules.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? clean, clear + safe

What about Table Rock Lake is most important to you? Access - shore + boat ramp
Water quality especially clarity. Location for shore scuba diving which is
protected from boat traffic
Protected shoreline

What is one thing that could be done to improve the lake? Provide a location for
scuba diving from shore that would have easy access, parking, bathrooms, close
to deep water, safe, protected from boat traffic. Replace what we lost
with the closing of Dewey Short

Additional comments on the Master Plan Revision or about issues that should be studied: _____
We have a great resource!

Loss of revenue from closing Dewey Short to diving + divers no
longer coming to Table Rock. Dewey Short used to attract divers from
as far as Kansas City, Tulsa, St. Louis, Fort Smith. These divers now go
to Beaver Lake or other places.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

- 1.) Cleaner water - too much water contaminated by [redacted] High levels of bacteria - sickens swimmers. No macro invertebrate activity.
- 2.) Shoreline restrictions/enforcement - Illegal camping, fire boat loading is damaging shore + adjacent private property.
- 3.) Corps presence, clarity, enforcement of lake use, shore use. Boat dock permit fees have risen 500% w. no Corps protection.

What about Table Rock Lake is most important to you?

Protection of adjacent private property from lake users. Out of state tourists, illegal activities are misusing shore line + lake for illegal activity. No Corps, local authority protection with increased dock fees.

What is one thing that could be done to improve the lake?

Trace [redacted] sources of septic pollution + shore erosion from illegal use of shore line.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203. Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

More fish in the lake, Clean water
More Free public Access you can't enjoy it if you can't get to it.

What about Table Rock Lake is most important to you? Keeping the lake clean
the quality of the water so swimming is safe

What is one thing that could be done to improve the lake?

Encourage more volunteers in the community to keep shore line
clean up a priority. Encourage people to report illegal dumping
in the lake

Additional comments on the Master Plan Revision or about issues that should be studied:

The recession has hit this community very hard, the residents
should be able to at least enjoy their lake as a no expense
together time with family

The concern about dock builders being shut down
from building new docks and doing additions
for 18 months will put us out of business!
Unacceptable

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? As nice as it is

What about Table Rock Lake is most important to you? Shorelines, gravel, water quality
Maintain the size of boats -- especially "speed boats"
Have tight control of water levels -- keep away
There are people that are letting crap water into the lake

What is one thing that could be done to improve the lake?
I like the way that the lake has done --
No problem with channel, limit the amount of boats

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

Water Quality as good as it was in 60's & 70's

What about Table Rock Lake is most important to you?

Recreation: swimming, boating
Limiting size (horsepower) of boats

What is one thing that could be done to improve the lake?

Sewage control. Even if it means higher cost for home + business owners. Maybe some type of ^{collection} septic system for ~~water~~ ^{water} collection from septic tanks.

Additional comments on the Master Plan Revision or about issues that should be studied:

Water level management. Lower water level in winter to allow for higher rain fall in spring. The primary reason for T.R. Dam was flood control.
Keep boat size limited.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean lake - great fishing
Having a safe lake for our kids & grandkids
and not to become like Lake of the Ozarks

What about Table Rock Lake is most important to you? Clean water for recreation
& fishing. Keeping our boat launch ramps
safe & clear

What is one thing that could be done to improve the lake? keep out sewage from
up river & trash from Flat Creek & river tributaries

Additional comments on the Master Plan Revision or about issues that should be studied: noise controls - speed of lg. boats
water safety
Make it easy for us to get a No Wake Buoy
in front of our 20 slip docks. for safety
The sign we ~~used~~ put on our dock can not be seen
by boaters as they speed by.
I maintain a more stable water ~~level~~ level

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years?

- Keep the same or better quality water, no lose of quality.
- Flood control kept at or lowered from 936 elevation.

What about Table Rock Lake is most important to you? High quality water -

What is one thing that could be done to improve the lake?

Enforcement of "Corps" rules needs to be consistent. Now it is not.

Additional comments on the Master Plan Revision or about issues that should be studied:

Keep the public in the process and informed OR
the plan will never work!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Recreational area - many new
family recreational activities -
(fishing, boating, kayaking, hiking) -

What about Table Rock Lake is most important to you?

- 1) Maintain - improve lake water quality.
- 2) Control boat size + speed.
- 3) Environmental control for fishing -
swimming - safety - health -
- 4) Education opportunities for adults + children
regarding environmental issues.

What is one thing that could be done to improve the lake?

Program to identify pollution sources -

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Able to handle more tourism for increased tax revenue

What about Table Rock Lake is most important to you? cleanliness, family friendly

What is one thing that could be done to improve the lake? more marinas, too many visitors to keep up w/wal & you have to travel too far to fill & it would make gas prices more competitive & more restaurants on the lake.

Additional comments on the Master Plan Revision or about issues that should be studied: Lake levels need to be more constant, how about letting a little water out before it's so high you can't get to your dock. The predictability of the weather forecast is more reliable & you should be able to anticipate & start to let water out before we are flooded for months. We have many trees dying on the shoreline because of the length of time they were under water.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clear water like the old days
No more 12-20 stall boat docks
Restaurants on the water

What about Table Rock Lake is most important to you?

Clear, Clean Water

What is one thing that could be done to improve the lake?

Stop the large developers who get away with
breaking the rules.

Additional comments on the Master Plan Revision or about issues that should be studied:

Rules should apply to everyone, not just the small guy.
Enforce the rules you have now; enforce the
rules for everyone

Fluctuation of lake levels need to be updated.
(A small town in Ark on the White River now
regulate the water level; this is a joke!)

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/zrmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? preserve water quality
and shoreline beauty, and recreation accessible.

What about Table Rock Lake is most important to you? We live here lakefront on
Cow Creek lake access, dock permit, and beauty is all
important. Keeping lake accessible for boating, fishing, canoeing
Kayaking - all recreation is important.

What is one thing that could be done to improve the lake? Not necessarily new
private docks but allow improvements or changes to
accommodate modern boating equipment. Restrict size + speed
of large boats in smaller areas like Cow Creek.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. How would you like to see Table Rock Lake in 20 years? _____

Clean water

What about Table Rock Lake is most important to you? That it doesn't become like Lake of the Ozarks.

What is one thing that could be done to improve the lake? Allow some selective clearing to the shore on residential properties to maximize views and property values.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

get rid of PARK BUFFER ZONES.

DO NOT MAKE SUCH STRICT RULES FOR SEPTIC + RUN OFF THAT WILL DISCOURAGE DEVELOPMENT OF FUTURE SINGLE FAMILY HOMES.

LESS CONDOMINIUMS.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

- 1) Source for recreational boating & fishing
- 2) Shoreline preserved in a natural state with minimal commercial build up
- 3) Continue with water quality
- 4) Maintain more consistent water table

What about Table Rock Lake is most important to you? _____

- 1) The Lake! It is the reason we are here.
 - Quality of water / level of water table
 - Limited commercial businesses on the lake itself
- 2) maintain our property value because of the above.
- 3) Maintain fish population for sportsmen

What is one thing that could be done to improve the lake? _____

- 1) Cut down / clear dead trees from shoreline - ugly!
- 2) Keep level of lake consistent
- 3) Mark areas where trees are shallow so we don't hit them when boating - tubing - swimming

Additional comments on the Master Plan Revision or about issues that should be studied: _____

- This lake is the reason that we invested in a second home here! Without this beautiful Lake we would not be here. We enjoy our dock, our condo on the lake front, the minimal commercial build up, and the fabulous quality clear water. We have begun to fish - brought our boat here. We bring our family & friends here & they all love it. We spend money here because of all of the above.

How would you like to see Table Rock Lake in 20 years?

More restaurants + recreation areas

What about Table Rock Lake is most important to you?

Uncrowded beautiful environment
Control size of boats allowed - not too
big - not too fast.

What is one thing that could be done to improve the lake?

Keep lake levels more stable

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Clean, useful for recreation, fishing, more access points,
Slow down in dock construction

What about Table Rock Lake is most important to you? _____

Clean clear water, fishing, boating

What is one thing that could be done to improve the lake? _____

lake level control

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

a few more places to
out and drink on the lake, west of Kimberling City

What about Table Rock Lake is most important to you?

that boats are under
40 ft. Please don't let bigger boats on the lake or
erect my water displacement.

What is one thing that could be done to improve the lake?

managing the lake levels
to keep it more consistent.

Additional comments on the Master Plan Revision or about issues that should be studied:

I assume water quality. It's like healthcare, we
assume that most hospitals have a level of quality
same for water quality. That should be a given.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Just like it is today
but less floating trees in the water. If you would
clean up the mess up around Galena, we wouldn't get
a lot of the fill that enters our waters when it rains
when we moved here we had a gravel reach behind us. After
the first flood we had 2 to 3" of dirt + junk in our water

What about Table Rock Lake is most important to you? I love to see it +
play on it.

What is one thing that could be done to improve the lake? Keep lake fronts cleared
of dead trees + brush

Additional comments on the Master Plan Revision or about issues that should be studied: The properties that are cleared to water's edge should
be allowed to stay that way - lots of people boating
pull in + let their children play + eat lunch.
They don't have to worry about snakes + ticks like they
do in trees + dead timber, also it is a lot easier
to do lake clean up.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years? _____

Beautiful Shore line

wild life

CLEAN WATER

Quiet - RESTRICT EXHAUST

Fishing

limited PRIVATE BOAT docks

What about Table Rock Lake is most important to you? _____

Quiet, peaceful, clean,

What is one thing that could be done to improve the lake? _____

Regulate level Be proactive about flood levels

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Why wait until lake is flooded before water is let out

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

More pristine
than it is today - clean water - good fishing

What about Table Rock Lake is most important to you?

Water quality

What is one thing that could be done to improve the lake?

lake level stability

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

It should continue to be managed. Don't let individuals ruin it. Rules should apply to all.

What about Table Rock Lake is most important to you?

Water quality. If that goes it all goes.

What is one thing that could be done to improve the lake?

Walking trails

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203. Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? WATER CLARITY AT CURRENT LEVEL OR BETTER. NO DUCKS ON MAIN CHANNELS.

More restaurants on water for boaters -

What about Table Rock Lake is most important to you? BEAUTY, FISHING, BOATING, NOT OVER CROWDED

What is one thing that could be done to improve the lake? TAKE AWAY MARINA BUFFER ZONES.

Additional comments on the Master Plan Revision or about issues that should be studied:

MORE CONSISTANT WATER LEVELS. MAKE MARINAS MORE RESPONSIBLE FOR THEIR DOCK & ADJACENT SHORLINES. WE WALK SHORLINES IN TWO AREAS AROUND MARINAS, RESORTS AND THEY ARE NOT CLEANING UP AREAS AROUND DOCKS.

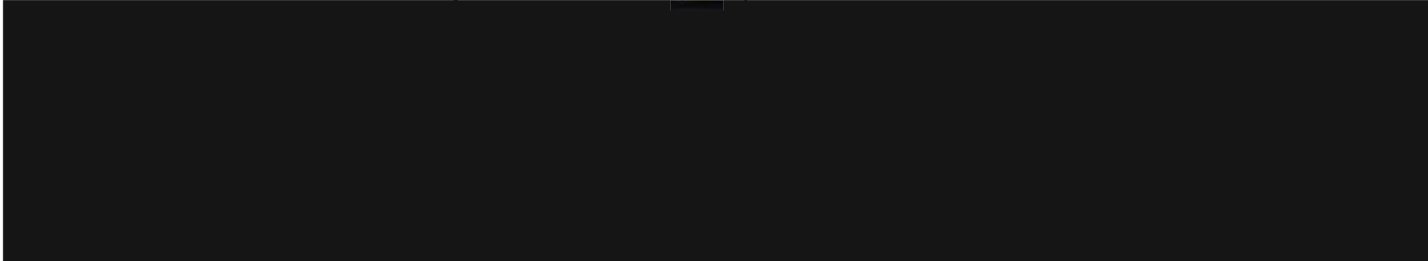

RESORT OWNERS DO NOT TAKE CARE OF THEIR DOCKS SOME ARE IN GREAT NEED OF REPAIR.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years?

I WOULD LIKE TO SEE MORE COMMERCIAL DEVELOPMENT WHICH WOULD INCLUDE PRIVATE HOMES, CONDOS, FLOATS OR SIMILAR BUSINESSES IF RESTAURANTS, HOTELS AND MAYBE EVEN SOME WATER BASED CASINOS, ALL OF THESE WOULD NEED TO BE ENVIRONMENTALLY FRIENDLY

What about Table Rock Lake is most important to you?

CLEAN WATER + THE ABILITY TO OPERATE MY BUSINESS ON TABLE LAKE

What is one thing that could be done to improve the lake?

MAKE DEALING WITH THE CORPS EASIER + MORE USER FRIENDLY - ~~MAKE A FINE~~

Additional comments on the Master Plan Revision or about issues that should be studied:

THE REVENUE THAT A CASINO COULD GENERATE FOR THE CORPS ENOUGH REVENUE TO FINANCE ANY PROJECTS YOU WANT TO UNDERTAKE. ALSO BE VERY REASONABLE ABOUT HOW YOU CONTROL WATER QUALITY, DON'T IMPLEMENT ANYTHING THAT WOULD DESTROY RECREATION.

Table Rock Lake Master Plan Revision and Environmental Assessment

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clean, but with as many limited restrictions as possible for maximum pleasure of visitors & community.

Add staffing at corps office to handle more needs & requests for information.

What about Table Rock Lake is most important to you?

Water quality & safety

What is one thing that could be done to improve the lake?

Allow topping of trees to minimize temptation to "clear cut" but still allow buyers to expand woods & keep vegetation for habitat.

Additional comments on the Master Plan Revision or about issues that should be studied:

Please consider that a year of undefined rules or regulations will have a negative impact on buyers considering investing in the lake area which could have a negative impact to our local economy further.

How would you like to see lake 20 years
from now? - clean, clear water and
debris free banks

What about table rock lake is important?
(power, fishing, recreation) (activities)

What is one thing that could be done to improve
lake? - Upper end Allow land owners
to maintain that that is already open

Issues that can be done and should be
studied - washed in hypodermic needles
plastic container, tires unmountainal debris

(I live on upper end of James' when river
gets high, tons of debris washed down and onto
shore line you know in past don't touch it
leave for environment which is snakes, etc)

Remember during

Revision to think

about disabled

access for

trails, camping,

docks, etc.

Rocks that block trails
needs to be wheel chair
accessible.

11-28-12

Q1 Stacked w/ more fish.

Q2 Less pollution + better fishing keep the lake open for all types of Boating except ↓

Q3 No Jet skis ☺

- ① How SEE LAKE IN 25 YRS?
- ② How IMPROVE THE LAKE ?
- ③ WHATS MOST IMPORTANT ABOUT LAKE?

① WE Feel strongly the lake should include drinking water supply storage as a priority use. Allowing storage for drinking water will only enhance the other uses i.e. power generation, flood control, water quality, + fish and wildlife. ^{to overall economic} If there is no drinking water for the future - there is no future. Drinking water is required to sustain the population that buys tourism, that needs/buys power, + that needs protection in the form of flood control + water quality. If this population is not supported + sustained w/ adequate drinking water, the other ~~needs~~ uses will not be needed. Water supply is critical to the SW ma region that ^{feeds into} sustains the Table Rock area.

- Regional water supply will be a huge asset that sustains life + drives the economy.
- ③ Allocate storage for drinking water
 - ② Drinking water supply storage.

Question 1 -

At least as good water quality as today.
Not another Lake of The Ozarks. Same
share management. Doing great job now.

Question 2 -

Water quality, flood control &
recreation. Pulls people to our
area.

Question 3 -

Re open Joe Ball Park - Huge need

Question 4 -

I believe the Corp is doing a great
job ensuring we have a clean safe
lake to enjoy. Often, the public
forgets the lake is for flood
control.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? would like to see lake level raised to 917' at normal pool, would like to see more shoreline zoned for docks with requests for private dock permits (less than 12 slips) handled on limited basis instead of not at all

What about Table Rock Lake is most important to you? water clarity, not becoming as crowded or trashy as Lake of the Ozarks and a better rule of reason on granting burn and down tree disposal to property owners.

What is one thing that could be done to improve the lake? Raise the lake level to 917'.

Additional comments on the Master Plan Revision or about issues that should be studied: Tell us what we need to do to expedite the process of getting funding to hold Shoreline Management plans update meetings. Why do we need to contact in Congress, the White House etc? Also communicate more regularly with your constituents via e-mail etc.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Clean water with limited docks.

Shorelines cleaned up by removing dead trees

What about Table Rock Lake is most important to you? No overcrowding keep the # of new docks allowed limited.

What is one thing that could be done to improve the lake? Keep the water level higher and remove dead standing trees under water
Better access to docks allowed.

Additional comments on the Master Plan Revision or about issues that should be studied:

Many of the paths are not user friendly. They are dangerous to walk on. Path improvements should be allowed to the existing docks

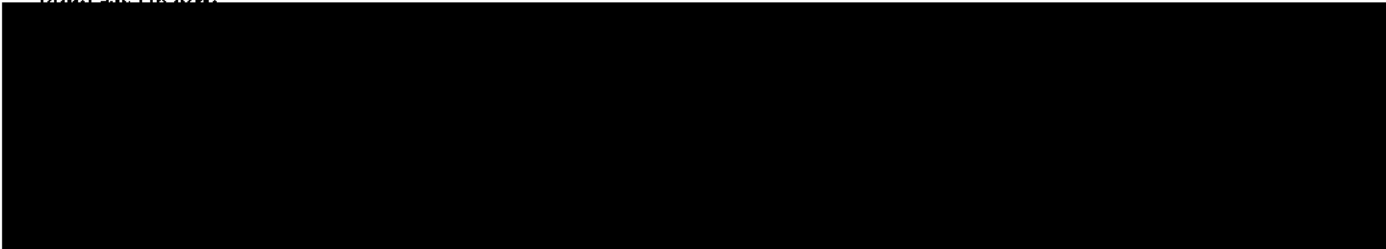

Keep the sizes of the boats smaller. No large boats that make big wakes. Keep speeds lower (personal watercrafts)

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years? Keep hog farms
and other industries from destroying our water quality
- size of boats so we don't become the lake of the
Ozarks where only cabin cruisers can use it

What about Table Rock Lake is most important to you? Water quality
Clean water. It is the number one item that causes
people to return here and visit the area

What is one thing that could be done to improve the lake? Improve and enforce
the raw sewage restriction especially on cities
and businesses located around the lake

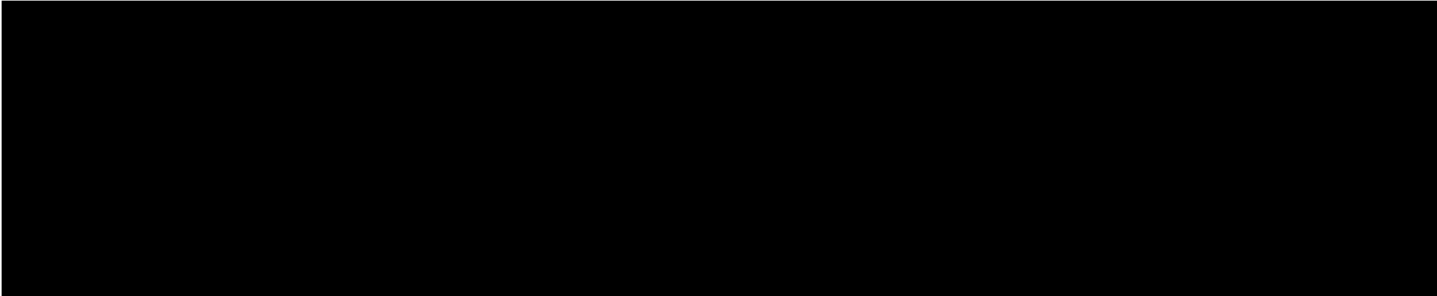

Additional comments on the Master Plan Revision or about issues that should be studied:
Make sure that the Master Plan keeps
Table Rock water clean and pretty and that
businesses on and off of the lake should meet
all DNR and other sewer treatment standards.
DO NOT allow hog farms or other types of
businesses that regardless of what they
say will pollute the lake

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should

How would you like to see Table Rock Lake in 20 years?

Less big boats, loud noise reduction and more NO WAKE areas. Emphasis on safety for swimmers, boaters and skiers. Protect the environment.

What about Table Rock Lake is most important to you?

Keeping the lake clean! The water and the land needs to be protected.

What is one thing that could be done to improve the lake?

Information and training sites for "NOVICE" boaters, cameras and home air quality.

Additional comments on the Master Plan Revision or about issues that should be studied:

Better designated land uses.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

- improved water quality - unpolluted & clean water
- keep the lake clean - trash free
- noise control
- natural looking shore line
- no change to launch a boat at the marinas

What about Table Rock Lake is most important to you?

Wake zones enforced
Restrict wake boards to the main channel
A natural look - no building on the shore line, especially commercial.

What is one thing that could be done to improve the lake?

Restrict the size of boats & the noise level from the boats. Keep the wake boards in the main channel & out of the coves.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Clean Water
Easy lake access
Limit size of big Boats

What about Table Rock Lake is most important to you? _____

Water quality

What is one thing that could be done to improve the lake? _____

Clean shoreline dead trees

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

More Restaurants + marinas
Beautiful + clean water

DON'T allow Big Boats - over 40' SPEED Limits

What about Table Rock Lake is most important to you? _____

Safe boating, jetskiing, water skiing, wake boarding + other water sports like tubing + diving. Also fishing + shoreline beautification

What is one thing that could be done to improve the lake? _____

① "NO WAKE" Buoys provided by Corp for any small cove with 2 or more boat docks.

② Allow "rail ramps" on main lake channel for boat launch + haul out for private residents with lake front property

Additional comments on the Master Plan Revision or about issues that should be studied: _____

2a) By allowing rail ramps reduces the need to add more boat dock causing lake cove congestion

2b) This would also generate more income for permits/renewals

③ Allow private residents to plant shrubs + flowers at shoreline

④ Allow chairs or park benches on shoreline

**⑤ Allow stairs + handrails placement for ease of access to docks

**RAIL RAMP PERMITS - VERY IMPORTANT
LESS BOAT DOCK!**

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>, Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I want to see the lake stay the same. I want the water quality to remain good, so that future generations have a place to enjoy just as we do.

What about Table Rock Lake is most important to you?

Water quality! I want clean water not only for us, but the wildlife.

What is one thing that could be done to improve the lake?

Restricting the size of boats in certain areas. Large boats in small areas are just a trouble, not only for home owners on the lake, but also the safety of boaters.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

STAY AS A CLEAN LAKE WITH TREE LINES IN COAST.

DO NOT WANT TO SEE LAKE BECOME LIKE "LAKE OF THE DARKS"

What about Table Rock Lake is most important to you?

CONTINUED USE FOR RECREATIONAL ISLANDING... SKIING, FISHING

What is one thing that could be done to improve the lake? MORE SANDY SHORE LINES

FOR PULLING UP BOATS FOR BEACH ACTIVITIES
1) MORE RESTRICTIONS ON LAKE

Additional comments on the Master Plan Revision or about issues that should be studied:

ALLOW SOME SORT OF STAIRS OR STEPS TO GAIN EASIER ACCESS TO DOCKS ON STEEPER CORE LINES.

REINSTATE PERMITS FOR RAIL LAUNCHES FOR PRIVATE RESIDENTS, WHERE INCLINE ALLOWS.
(THIS WOULD REDUCE THE AMOUNT OF DOCKS THAT CONTEST OUR WATERWAY)

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clean Water

Shore lines need to be cleared up. Areas from home to water should be cleared somewhat for walking to the lake. Mowing should be allowed.

Take care of the parks. I noticed Eagle Rock park allowed a worker to park his rig in the best camping spot. Why? Terry question on this - call me. I will take you on a tour.

What about Table Rock Lake is most important to you?

Freedom! Some regulations but they MUST be the same for all. So far, I have seen that "Money Talks". Example: a boat camp in MA No was for use of the community but someone allowed a huge dock to be placed in front so now the community members have to go elsewhere to get in their boat - AT A COST of course. Common sense for those in power is gone!

What is one thing that could be done to improve the lake?

One speaker said it's a public lake. Why do they place huge docks in front of an access for example. I know of one @ the Kimberling City Bridge (south/west side).

Additional comments on the Master Plan Revision or about issues that should be studied:

Someone needs to monitor your agents - several are not nice. Actually I believe we are your CUSTOMERS our tax \$ help keep you in your jobs.

Regular folks should be able to have their own dock. They should not have to pay thousands of \$ to have a slip for their boat. The Corps making money off the large docks??

I'm sure my indignation of how the Corps treats regular people will just flow off your back & comments tossed.

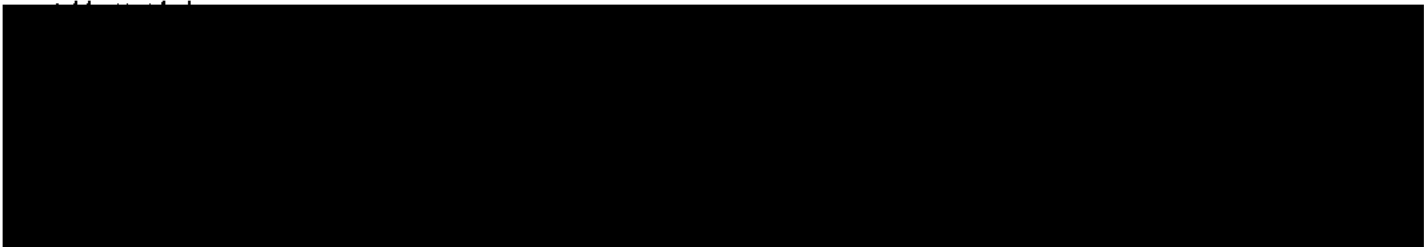

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Yes, Stone & Toney Co. need the visitors - but do not forget about Barry Co.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

Want the lake to be clean & the landscape to be there - not commercialized except in special areas. Limit large boats.

What about Table Rock Lake is most important to you? clean water

boat traffic is not congested with big boats
Adequate boat traffic is sustained
No commercial or other use of lake

What is one thing that could be done to improve the lake? Limit speed of large boats.

* Let shoreline of lake more home-like and scenic
* Better spacing of boat docks - not all crammed into one cove.
* Concerned about water quality getting worse from sewage going into lake.

Additional comments on the Master Plan Revision or about issues that should be studied:

Too many docks put in one area causing congestion +
safety for those swimming at the docks. With the water
level so low row-docks are almost against each other
& this is dangerous

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Limited multi-story commercial buildings. No quality houses near waterways. Lots of empty shoreline - unlike Lake of the Ozarks.

What about Table Rock Lake is most important to you? Clean potable water! Safe boat ramp areas. Public shoreline access.

What is one thing that could be done to improve the lake? Clear cedar and other noxious trees and plants - allow residents to clear them.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? clean, pool level at 915,
still a lot of trees along the shore, any development permitted
well maintained, no trash along shore line or in the water, minimum
increase in number of docks, dock that do exist well maintained
no racing jet boats (NOT a lake of the Ozarks), strong fish population

What about Table Rock Lake is most important to you? clean,
Water levels less extreme,
safe recreational activities, peaceful (not excessive development),
any development/construction occurs ~~at~~ in accordance with rules
that protect lake quality and the value of our investment not have
water "wall to wall" but docks

What is one thing that could be done to improve the lake?
allow clean up of trees that are dead/dying along the shores
from recent years, extended high water levels - seasonal restaurants
that are environmentally responsible

Additional comments on the Master Plan Revision or about issues that should be studied:
Restrict the number of jet boats
Decibel output
Current privately owned property that should be monitored for
future acquisition where public use may be
appropriate i.e. location for marina
water-quality trend over the term of the previous master plan

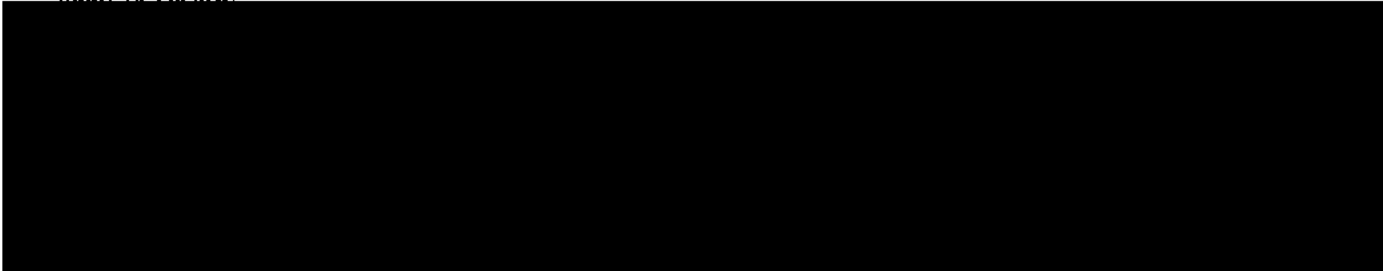

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? A clean place for my grandchildren to enjoy for many years to come
"Sewer Control"

What about Table Rock Lake is most important to you? Water quality
Keep this a family lake not like lake of the Ozarks
Control Zebra Mussels

What is one thing that could be done to improve the lake? Slow down skiers and wake boards and jet skis to idle speed in narrow coves
Big creek small end of the cove

Additional comments on the Master Plan Revision or about issues that should be studied:
Keep from bulding close to the Lake

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I would like to see the lake basically remain the same. I believe that is a great deal of the appeal. Maintenance of shoreline control and quality is a must.

What about Table Rock Lake is most important to you? Water quality

What is one thing that could be done to improve the lake? More no wake zones in the coves including the west end of Big Creek Cove. This will improve public safety immensely.

Additional comments on the Master Plan Revision or about issues that should be studied:

Residents living around the west half of Big Creek (from the bell to the west) have asked as a group to make the area a "no wake zone" due to the many submerged trees that are in the middle of the boat path between the north + south shorelines. There is also a safety issue from the large wakes left behind surfers, wakeboarders + skiers because there are multiple docks close together. We have had numerous near misses with boats almost clipping the swim decks on the docks

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years? ^{Pure,} Clean water, clean shores & people enjoying the resource

What about Table Rock Lake is most important to you? clean water - limit housing areas - clean up sewage issues! PH content is rising!!
* Corion stable water levels!! How low can it go?

What is one thing that could be done to improve the lake? Increase law enforcement of existing laws & rules
ENFORCE LAWS & RULES Equally & fair -

Additional comments on the Master Plan Revision or about issues that should be studied:

Erosion along shore line due to very large boats and wake board boats

? possible no wake zones specified at most smaller inlet & coves - Our dock is on point 2 which is now called a "party cove" - people run their boats in & about full speed causing erosion & have on private dock.

? possible limit ^{speed} large boats and wake boats to the main channel? at speed?

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Restricting number
size of Super large Boats on the Lake

Quality of water maintained and NOT allowing
over development for the "Quiet Side"
of the lake. Protect the environment for
our wildlife that I so much enjoy.

What about Table Rock Lake is most important to you?

Stable lake levels - Big Creek area seems
to be either flooded or dry. The concrete
bridge has been underwater 3 times since
we bought our house in 2007. Now the lake
is dry in my area.

What is one thing that could be done to improve the lake?

Make it easier
for boat slip disabled owners to get
to the boat dock so they can enjoy this
beautiful lake.

Additional comments on the Master Plan Revision or about issues that should be studied:

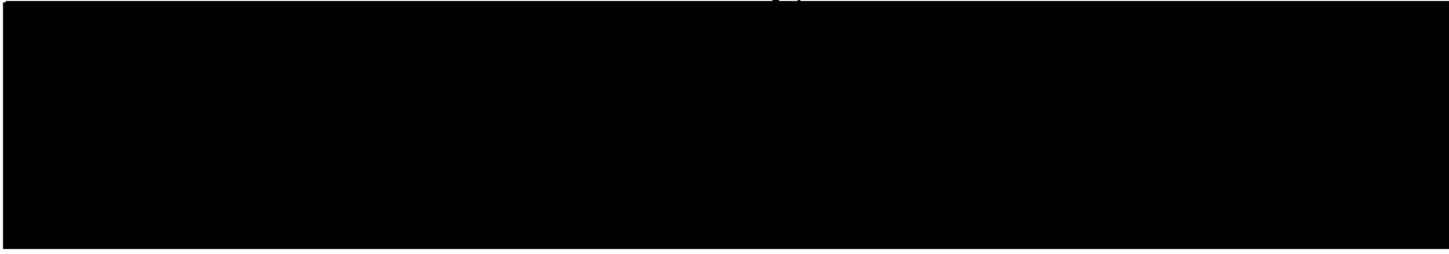

- ① Raise Big Creek Bridge above flood level
- ② Clean up shore lines of overgrown
cedar trees blocking the public's view
of the water and dead brush that is
a fire hazard in the Big Creek area.
- ③ Community of government working
together to clean up lake & shoreline.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

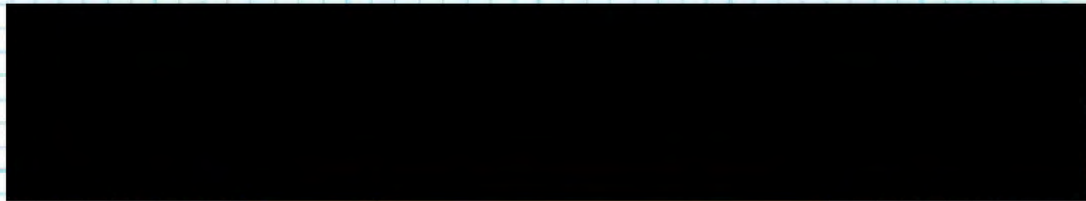

1. How would you like to see Table Rock Lake in 20 years? _____
From Above ground
Actually, Not All Commercialized.

What about Table Rock Lake is most important to you? _____
THE NATURAL BEAUTY.
Keep the CHICKEN PRODUCERS AWAY FROM THE LAKE.
SEWAGE
Easiest on getting dock permits for Lake front property.

What is one thing that could be done to improve the lake? _____
Reduce the NOISE - Boat motors AND Loud SPEAKERS.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

1. Do not want to see commercial mixed in with residential.
2. I worry about pollution.
3. Cigar Bents and some boxes that substrate so much it prevents outside venting.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

I would like to see the water quality & clarity improved from its current condition.

What about Table Rock Lake is most important to you?

Good Water Quality

What is one thing that could be done to improve the lake?

Regulate septic systems to ensure that water quality will not deteriorate further.
Improve Sprayfield's sewage treatment discharge into the James River.

Additional comments on the Master Plan Revision or about issues that should be studied:

I have been told that I will have to remove my PVC lift that is currently attached to the shore side of my dock. I currently have Corps approval for this lift. I am asking you to reconsider the ruling. Please allow us to continue what has already been approved. If people are abusing the privilege & renting or selling space for PVC lifts to non-dock owners, please enforce this at the time our permits are renewed. In summary, please allow ship owners to attach a PVC lift on the shore side of the dock, as you have previously allowed us to do. Thank you.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I would like to see the water quality we had 20 years ago. I would like to see a size limit on the size of boats allowed on the lake. Every year boats get larger, faster, and more of them.

What about Table Rock Lake is most important to you? Fishing, boating, swimming, natural beauty.
I love here because of the lake.

What is one thing that could be done to improve the lake? Allow more boat slip or dock zoning

Additional comments on the Master Plan Revision or about issues that should be studied: _____

I would like to see monthly water quality ~~reports~~ sampling and the reports published on the internet.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Similar to the way it is now - not heavily populated and not a lot of commercial development right on the lake shores.

What about Table Rock Lake is most important to you? Keeping the shorelines themselves free from development as they are now. It's nice to be boating & see the immediate shore natural.

What is one thing that could be done to improve the lake? Allow some clean-up of the shore - trash & debris

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

- Preserve the water quality so we can continue to swim, fish and play in the lake. This contributes to the overall economic feasibility & growth of the lake.
- Sewer management to preserve the water quality

What about Table Rock Lake is most important to you?

- Flood control so the unexpected rains don't wash roads & property away.
- Clean water for recreation - even if that means stringent vegetation control, sewer control, boat w/gasoline engines limits, etc.

What is one thing that could be done to improve the lake?

Limit the size of boats so that big boats - bigger than 28' - are not allowed. or 36'

Additional comments on the Master Plan Revision or about issues that should be studied:

- Sewer control is critical to maintain water quality
- If there is a way to monitor or control the water quality from feeder waterways - James River, Kings River, Roaring River, Flat Creek
- Campgrounds should be updated (and have been) to allow for more camping at reasonable prices

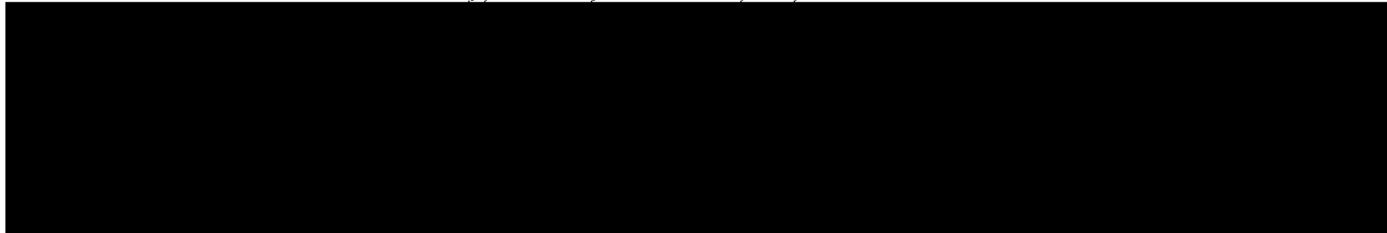

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/lrmasterplan.htm>. Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

NO larger boats than present now?

Clean water, clear banks & more trees

What about Table Rock Lake is most important to you?

Clean water

No Flooding or extreme level changes.

Resorts are important and need help controlling.

What is one thing that could be done to improve the lake?

More effort to stop party circles & 20 to 30 boats
in coves.

Additional comments on the Master Plan Revision or about issues that should be studied:

To make a master plan that is not just "how shall
we fill"

How about guidelines & solutions not just rules

Allowing more input from Resort people

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I would like to see Table Rock Lake remain a people's/public lake and not become so commercial that low economic income families can't afford to enjoy these "public" recreational areas. Keep the cost down so everyone can participate.

What about Table Rock Lake is most important to you?

- 1) Balance of public and personal property rights such that both entities are served.
- 2) Balance of wildlife/fish conservation with people's needs; not major preferential usage for one or the other.

What is one thing that could be done to improve the lake?

access to better emergency medical care. (EMT and above skill sets) increased accessibility of emergency care @ high density water use areas. "Safety"

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

② Balance of public and personal property rights such that both entities are served.
③ Balance of wildlife/fish conservation with people's needs, not major preferential usage for either one.

① I would like to see - Table Rock Lake to remain a people's / Public Lake and not become so commercial that low income families can't afford to enjoy these "public" recreational areas.

③ access (more) to emergency medical care, especially in high density water recreational areas
"safety"

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I would like to see
Table Rock Lake stay unchanged as for the lake itself.
I feel tourism will be steady but some changes to the
rules need to happen for tourism to be maintained

What about Table Rock Lake is most important to you? To keep the water
clean!

What is one thing that could be done to improve the lake? Let the dock owners
private and commercial use their docks as they see
fit instead of controlling and fining them.

Additional comments on the Master Plan Revision or about issues that should be studied:
The usage of docks. It seems that as tourism
increases people are looking for other means of
lodging. Vacation rentals (private homes) is on the increase.
As it stands now no one is allowed to be on a dock
except for the slip owner. This needs to change! Folks
come here to enjoy the lake. If they have a boat and a
dock with a slip is at the property, it is a private dock
they should be able to use it at no charge. And the
owner should not be fined or lose his permit
because of it. The corp is not a dictatorship!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean water. This means
keeping thousands of trees clogging up the waterways. The
Corps should be responsible of the cleaning of the debris
that floats down the Lake (King River). There has been
time that the whole River is full of trees, and junk
clogging the Lake (King River).

What about Table Rock Lake is most important to you? Allowing the land owner
that live next to the Corp property to clean up the
debris on the water shore lines that And not require to
get permits, just to clean the shore line.

What is one thing that could be done to improve the lake?
Allow land owner to clean up the shore without
having them jump thru hoops just to clean up
property.

Additional comments on the Master Plan Revision or about issues that should be studied:
Land owners next to the Corp line, to have some leeway
to protect our value of our property.

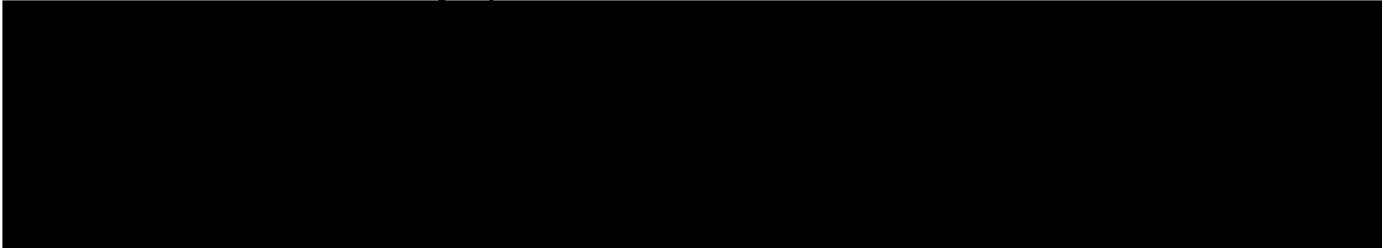

I can take my neighbor to court when they don't keep
up there property, You should keep your property clean
too.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below:

How would you like to see Table Rock Lake in 20 years? As clean or cleaner than it is now. Some way to help us deal with logs & trash that float down the river and end up in our lake.

What about Table Rock Lake is most important to you? Cleanliness, more options for those of us who own property adjacent to corp. property to allow access & views of the lake. A review of some of the state locations would be nice. Some are so far away from any flood danger that valuable real estate is being kept from good use.

What is one thing that could be done to improve the lake? Log control. Dangerous for boats and unattractive. We would be willing to help pay for "spring" cleaning of lake.

Additional comments on the Master Plan Revision or about issues that should be studied:
The corp property lines need to be reviewed for reasonableness. Allow leasing of corp property that is not being used by adjacent property owners

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? *Honestly, I would like to see very few more homes on the lake, but I know that isn't fair. I certainly want strict enough zoning restrictions to prohibit less than desirable housing frontages on the lake.*

What about Table Rock Lake is most important to you? *The natural beauty of the environment and more importantly, the cleanliness of the water.*

What is one thing that could be done to improve the lake? *More water establishments (aside from the marinas) would be welcomed (accessible from lake). Boats are getting bigger and noisier. At some point there needs to be some limits.*

Additional comments on the Master Plan Revision or about issues that should be studied:

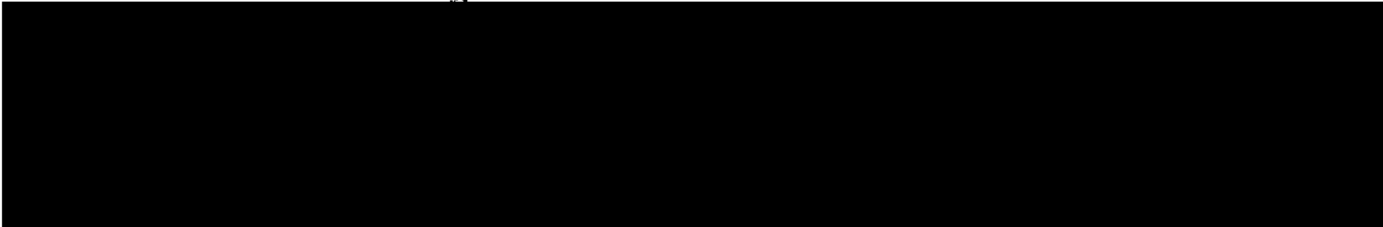

I started coming to the lake as an adolescent with my parents and have always been taken by the natural beauty of the lake.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?
than it is right now. Not much difference

What about Table Rock Lake is most important to you?
The water and shore lines. Clean water is the most important thing's we need for rec. & sport.

What is one thing that could be done to improve the lake?
Getting the water that runs into the lake cleaner.

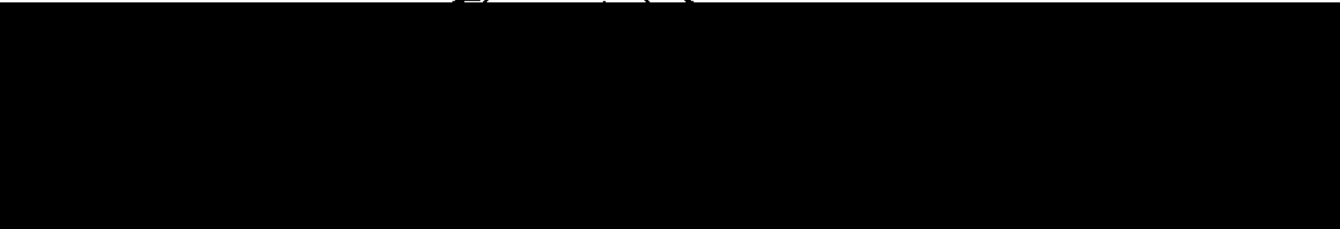

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years? Clear up a master plan that understands the industry, and the economy drives the people coming to the lake - they all have to work hand in hand.

What about Table Rock Lake is most important to you? A place to provide a place for recreation, industry, wildlife, etc. Tourism is the biggest industry in the Table Rock Area - thousands of households make a living with the lake - these people also tend to be the best stewards of the lake as well. Keep the sewer regulations in place.

What is one thing that could be done to improve the lake? • More launch ramps - Repairs to existing • Restaurants • Increase number of build sites west of Shell Launch Bridge - Cap off area for dock builders

Additional comments on the Master Plan Revision or about issues that should be studied:

- More flexibility in Dock Suspension
- Like Comparison / Definitive answers to dock regulations from lake to lake
- Verbal answers backed by written policy + procedures
- Understanding that dock Builders, dock repairs are a "Natural" liason between the COE + individuals - please keep us informed - Dock Builders meetings must be consistent!

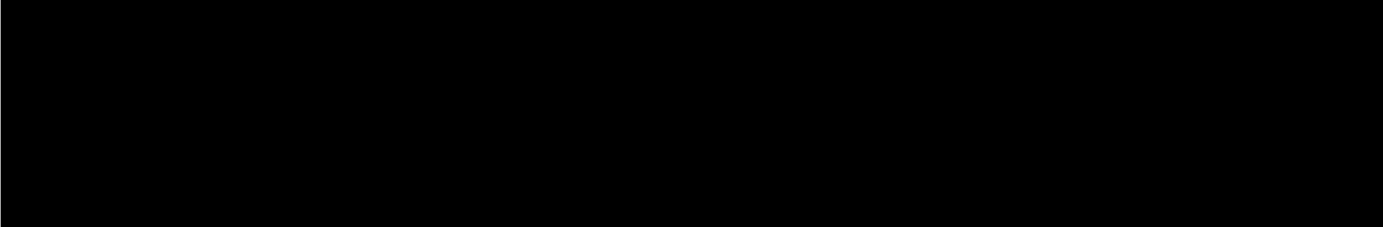

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Nov 29, 2011
Cassville, Mo

To Whom It May Concern:

I am writing this letter because of the frustration I have experienced for the past 16 years trying to run a business. I purchased 17 acres of land in 1976 with approximately 800 foot of Table Rock Lake frontage. I had been in the process of developing a resort for many years and opened it on a permanent basis in 1996. I now have a full basketball court, a volleyball court, a batting cage, golf carts, other land facilities and access to water sports. We have a lodge where at times as many as 42 individuals have resided for vacation time. We do not have individual units but the lodge is divided so that seven individual families could have their area. As a retired teacher my income is not great but I have paid taxes on between \$15,000 and \$20,000 each of the 16 years of the resorts existence.

My concern is with the access that is provided by the Corp of Engineers for my resort. It is my understanding that a resort is entitled to 1 ½ slips per unit. I have never inquired as to how many slips would be provided because there is not a place for me to have a private dock because Big M marina has all the areas in Rock Creek tied up with their satellite areas. I have done the following to try and cope with these existing rules.

1. I loaned Denver Dixon money to build a dock that could be used for the resort.
2. I have tried to rent enough slips to accommodate the resort.
3. I have contacted the Corp about the problems.

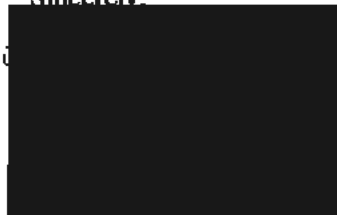

Below are some of the problems that have impeded the development of my resort.

1. The resort has been limited to two slips by Big M.
2. The resort was not able to access its slips from the shore because of high water for a period of more than three weeks.
3. Big M has received many complaints about the large numbers of people from the resort using the dock.

Since the inception of the resort in 1976, individuals have become more involved. Some of these individuals have purchase lots on the 17 acres of the resort and will serve on a board of directors for a trust set up to run the resort upon my death. Five of these individuals rent a total of 8 slips from Big M on a boat dock in Rock Creek. It is my contention that the rule that an individual can't have a boat dock within 3 road miles of a marina devalues my land and causes undue hardships. There are several boat docks closer by water to Big M than the one we have to rent in Rock Creek.

I realize that this meeting is for a more general public and that my situation is much more unique. Please let me know who I can contact to further discuss my problems.

Sincerely,

November 25, 2012

Army Corps of engineers, little Rock District
P.O. box 867
Little Rock, Ark. 72203
Attention: Dana Coburn

To Whom It May Concern:

I would like to make the following comments concerning the scoping of the Table Rock Lake master plan revision project.

1.

As stated in the current plan, the Table Rock Dam project was authorized by a public law according plans contained in other congressional documents. In order to understand the original legislative purpose and intent for which the project was being approved, those documents should be provided for public review, either electronically, or in person at corps offices. Reviewing this original information should be within the scope of the master plan revision plans in order to prevent regulatory creep.

2.

It is clear from Table Rock Lake design plans, and the current master plan, that maintenance and public access requirements were intended to be met by the large area by the Dam and the other 24 or so designated public use areas and the state park. 16 U.S.C. 460d authorizes the Corps to construct and operate recreational facilities (parks) at its projects, but most certainly does not authorize the Corps to operate the Table Rock project as a park. It would seem that current law specifies that new parks be developed and maintained by non federal entities under a mandatory 50% construction cost share.

3.

I believe there is a well established right of an adjoining land owner to go from his property to the navigable waters of the US and moor his boat next to his property. Since 3050 acres were claimed in the riverbed, there is no doubt that the waters of the project were considered navigable. Absent a designation that project waters are no longer navigable, and there exists a prohibition against public use of the average 100 foot strip of government land along the shore line, this right must remain.

4.

In a prior case against the Corps(United States v. Richardson, 204 F.2d 552 (1953)) petitioners alleged that the Corps had a "Field Practice" of taking more land then was authorized in order to create land for purely recreational use. Concerning this practice

General Sturgis, former Chief of the Corps, admitted to a congressional subcommittee that “it would have been very embarrassing to have justified his [the secretary’s] certification of public need for all this particular taking.

Hearings on Army-Interior Reservoir Land Acquisition Policy before a Subcommittee of the House Committee on Government Operations, 85th Cong., 1st Sess., 422 (1957).

It is absolutely clear from this case, that no one in 1957 believed that the Corps was authorized to take property from unwilling sellers for purely recreational use. On this point, it is believed that the Corps plan for the acquisition of real estate for the Table Rock Lake project stated that because of the dual purposes (electricity generation for the production of nitrates and recreation) the take line established for electricity generation should be and was extended inland 200 horizontal feet. It should be within the scope of the master plan revision to investigate and correct past errors.

5.

The regulation used to establish the current shoreline use permit system originally applied only to public works projects where the land surrounding the project was entirely owned by the government. A case study of land use for recreation etc. by the Coastal Zone Resources Corp, D.25.25 concluded that virtually all of the land lying contiguous to the 936 isoline (top of the flood control pool) is held by the private sector. This study certainly indicates that the current Corps regulatory scheme may not be appropriate. However, were the Corps to implement similar standards and safe guards(standardized administrative appeals process etc.) used in it’s navigable waters permitting system, any harm would be inconsequential.

6.

Preparation of the current shoreline management plan was obviously not guided by the current master plan and is clearly not consistent with it. The master plan establishes designated areas (zones color coded red) allocated for recreation high-intensity use by the visiting public. This zoning classification includes areas for parks, and marinas and presumably, large community type docks. Only private docks are allowed in the areas allocated for recreation low density (zones color coded yellow) classified areas. Therefore, the shoreline management plan’s inconsistent zoning scheme and community docks only policy should be considered as arbitrary and capricious from the start.

7.

It seems pretty well settled that the government cannot demand, as a condition for issuing a private dock permit to an adjoining land owner, that the land owner must allow public access across his property, unless and until the government provides just compensation. Further, the requirement that an adjoining land owner must construct a dock larger than is needed for his own equipment is contrary to the Corps own regulations concerning private shoreline use. Corps personnel and documents often say that every member of the

public has the opportunity to own a boat dock or slip on table Rock Lake and that there is no private property on the shoreline of the Lake. The problem with this position is that the 100 or so feet of Corps property along the shoreline is completely surrounded by private property. Once again, if the government wants to guarantee a slip owners right to access his slip, it must pay for it.

Sincerely:

November 16, 2012

To whom it may concern:

I am writing this letter in response to the email from the U.S. Army Corps of Engineers regarding the updates for TableRock shoreline maintenance and regulations.

My husband & I purchased a small lakefront resort just south of Point 21 on the lake in November of 1999. In the years to follow the boats have become larger and larger and so have the waves that go with these large boats. Our most serious concern is the erosion of the shoreline on our beloved lake, caused in large part by the newest recreational water sport called wake surfing. This sport causes 2 or 3 foot waves that has eroded our shoreline and has surfaced boulders that were not on the shoreline when we purchased our resort. In the spring of 2008 we had flood waters that were much higher than normal. Along with the water being so much higher than usual, wake surfing was increasing in popularity. With the 3 foot waves that come with the "wake surfing" the our shoreline was severely eroded & our topsoil washed into the lake. We had to haul in soil to replace what we lost to erosion before we could replant grass. This happened a second time with the flood in 2011.

The large waves make it dangerous for our customers to swim off our swim deck. When incoming waves are 2 foot high, children and small adults are often thrown into the deck. Our new swim deck is 20" above the water and at times the waves wash across. **We would like to see this water sport prohibited in small coves & kept in the main part of the lake, or prohibited completely.** In order for this to be feasible, it would be necessary for the lake to have more water patrol available to enforce the water rules. I realize this would open a new "can of worms".

Another suggestion we have is to put new restrictions on the distance from the docks that we can put our no wake buoys. (we realize this is a Water Patrol issue). As a resort owner, we feel somewhat responsible for our customers boats, which are continually pounded with the large wakes in our cove. We would like to see the rule for buoys to be rewrote to our keep boats, swimmers and dock safe. If the rule was changed to buoys being **200 feet from the dock**, it would certainly help. When this rule was made back in the 70's the boats were much smaller and less powerful. This change would allow us to protect our customers boats and pwc's. Thanks.

Respectfully,

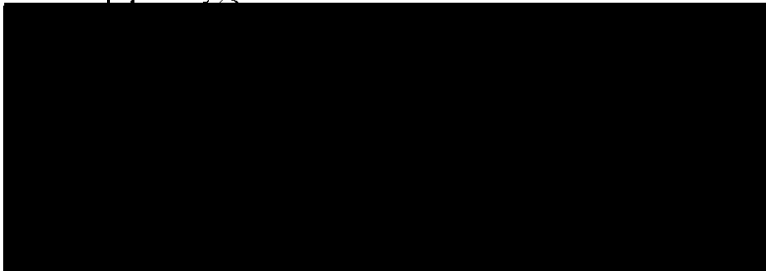

Table Rock Lake Master Plan Revision
and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

Cleaner and full of water. But not flooded.

Cleaner and full

What about Table Rock Lake is most important to you?

Be able to not be afraid that the lake level will be low, so that I can run my floating restaurant @ full capacity, during high season @ summer time. It creates jobs and helps till my retirement so I can provide for my children & grand children so they can enjoy the lake years to come.

What is one thing that could be done to improve the lake?

Keep the lake @ an appropriate level so that coxs aren't dry-docked - during the summer mainly -

Additional comments on the Master Plan Revision or about issues that should be studied:

1. Better flood control!!!!

2. Better drought control!!!!!!

3. Better sewage control!!

- When we call in to you all, to receive positive attitudes - not snobby or indifferent attitude.

Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

As an affordable place for people to enjoy. What will hopefully be a clean lake that does not have a shoreline that can't be seen through all the docks.

What about Table Rock Lake is most important to you?

that we maintain public access to both the water and land around the lake.

What is one thing that could be done to improve the lake?

Allow the people that live on the shore to clean up the debris left from high level flooding and the subsequent tree kill. Most of these trees can't handle being under water!

Additional comments on the Master Plan Revision or about issues that should be studied:

Please clean up the launch pier. The camp grounds are great and overnight charges are fine - kill the day use charges! Night time speed limit is worthless. ~~and~~ If it's foggy or no moon, 70 mph is too fast - if it's a full moon or a clear night, it's a joke. During heavy spring rains, it certainly "appears" that Beaver & Table Rock are plugged up to protect Beaver Landing / Pagan Cove - What else are we supposed to think when Bull Shoals is below stage at that time?

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

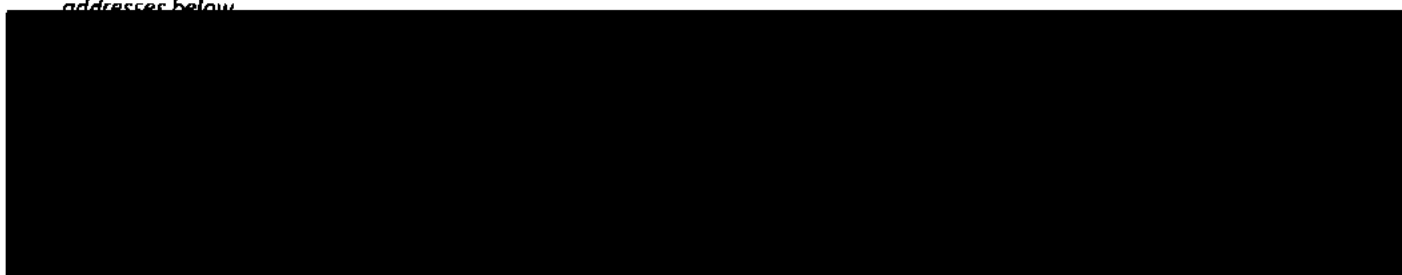

Vegetation permit before SOL to maintain land by docks Shoreline Management plan to follow.

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

① How would you like to see Table Rock Lake in 20 years? I want to see it
as clean or cleaner than it is today. kept free of herbicides
used on golf courses and lawns.
Not ruined with docks as Lake of the Ozarks is.
Open and maintain campgrounds

② What about Table Rock Lake is most important to you? a clean and pure lake
for the enjoyment of people with no danger. keep dock numbers down.
Water level control.

③ What is one thing that could be done to improve the lake? Keep dock numbers down.
Keep poultry and pig farms from causing run-off into the lake

Additional comments on the Master Plan Revision or about issues that should be studied:
Limit the size of BIG boats on the water.
Water safety -

How would you like to see Table Rock Lake in 20 years?

PRISTINE CLEAR WATER, VERY CLEAN SAND
LINE, NON FLOATING LOGS WHILE WATER IS DOWN
MORE FREEDOM UP IN TREE TO CLEAN THOSE AREAS
1st Class Vacation Hotels that will draw you around
activity. Further business developer could to
support more young people who would like to live
in this area

What about Table Rock Lake is most important to you?

WE LIVE HERE AND EXPECT THIS TO BE THE
BEST LAKE IN THE US - WE ARE PROUD OF THIS LAKE
AND EXPECT IT TO BE BETTER - MEET WITH US
ON REGULAR BASIS AS A PARTNER, NOT A DICTATOR

What is one thing that could be done to improve the lake?

MAINTAIN A CLOSER TOLERANCE ON LAKE LEVELS
NOT OVER 915 NOT UNDER 905 FOR EXAMPLE.

Additional comments on the Master Plan Revision or about issues that should be studied:

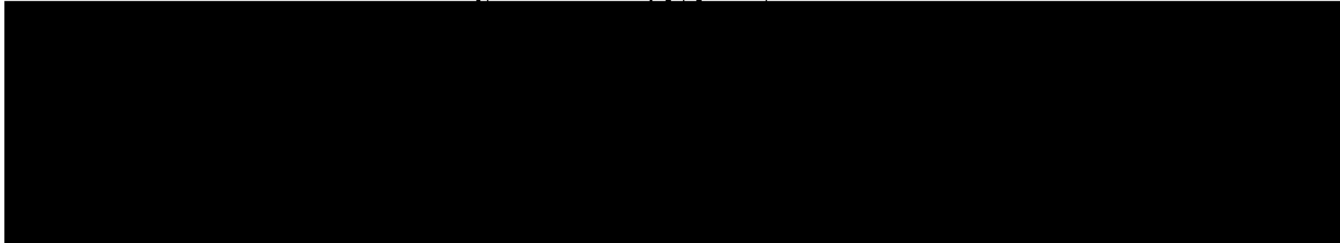

Better Highway to and from the shallows and
west end of lake

How would you like to see Table Rock Lake in 20 years?

Crystal clear, free from logs - Shoreline cleaned or fallen
trees - No more (garbage) inside lake carefully monitored
Excellent control of drugs & alcohol on users on the
lake -

What about Table Rock Lake is most important to you?

Clear and sunny all year
all time logs removed. There is close control
of boaters

What is one thing that could be done to improve the lake?

Better drought control
Better flood control -

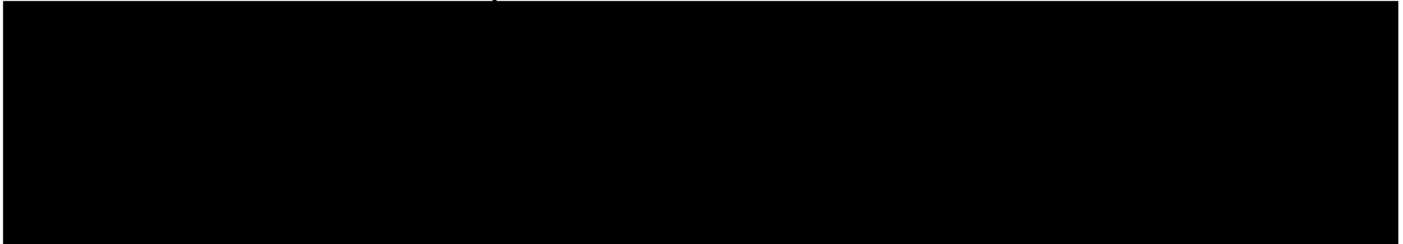

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

As pristine as possible - eg water clean enough that I can feel comfortable letting my grandchildren swim in it.

Not as crowded, congested, commercial as Lake of the Ozarks.

What about Table Rock Lake is most important to you? The natural beauty of the area (without being overwhelmed by commercial buildings etc)

What is one thing that could be done to improve the lake? Better control of the water level; commercial docks held to the same standards as private docks - eg foam flotation underneath docks encapsulated

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

1. How would you like to see Table Rock Lake in 20 years? continuing vegetative permit,
good water quality, no trash on the shore
We would like the same privileges we have now regarding
vegetative permits, living on the Kings River that we love.
no more docks in our area are needed.
2. What about Table Rock Lake is most important to you? Being able to have the vegetative permit,
good fishing & boating.
enjoying walking down to shoreline to walk along the shore.
Now we can not clean fish at the dock because of new regulations
3. What is one thing that could be done to improve the lake? restrict Big boats.
Stop dumping trash into ditches that wash into lake.
Tell us how or who can install a ~~filter~~ pump that meets new
regulations on the dock

Additional comments on the Master Plan Revision or about issues that should be studied:

The new regulations regarding pumps at fish cleaning stations
is an inconvenience.

The dumping of trash that ends up on our shore.
Find out where it is coming from (not boating trash)

Mowing should be allowed close to docks
Parking should be allowed close to docks. We use golf carts

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Water clarity improved
Rivers/flooding - trees be removed quickly

What about Table Rock Lake is most important to you? _____

Easy access - Fun places to go by boat
↳ steps to boat houses if needed -

What is one thing that could be done to improve the lake? _____

Better parking - more gas / restaurants

Additional comments on the Master Plan Revision or about issues that should be studied: _____

* Many Community docks fudge on other docks for parking - therefore, parking is congested and blocks up on other property owners - blocking exits & entrance
Underwater electricity is Dangerous + we were required to do it

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean like it was
in the 70s limit commercial development
Safety Look the same as today, but cleaner
limit Big & fast boats

What about Table Rock Lake is most important to you? Keep the shoreline-
On the Banks - there are a lot of large boats that are
eating away at the shore line
Keep it safe No commercial development
water quality

What is one thing that could be done to improve the lake? Do not make Table Rock
Lake like Lake of the Ozarks.
Public safety

Additional comments on the Master Plan Revision or about issues that should be studied:
Do not let Marinas become too large
Eating Places, bring more litter
Do not let chicken farms run into the waterway

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

The same as it is now with less run off pollution from Chickaboose area

What about Table Rock Lake is most important to you?

That the lake is there for my family and me to enjoy.

What is one thing that could be done to improve the lake?

SHORELINE Management! I live right on the lake, but the closest boat slip available for me to buy is over 7 miles away - There is no boat dock zoning in my area.

Additional comments on the Master Plan Revision or about issues that should be studied:

I funding for shoreline evaluation is a problem, raise the price of marinas, camping, access to the lake, and every thing (permits, etc.) to finance.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Continue to improve Springfield's Sewer System so that James River is cleaner than today.

What about Table Rock Lake is most important to you? Recreation.
We love living on the lake and enjoying boating fishing etc.

What is one thing that could be done to improve the lake? I am worried about wild fires due to too much dead fuel along the shore. I hope we could better manage the woods, as to eliminate the over abundance of fuel for fire.

Additional comments on the Master Plan Revision or about issues that should be studied:
I do not understand why the Corp would stop the activity of approving or not approving request while the new Master plan is being developed. ? ? Makes no sense!! why not continue under ~~the~~ ~~plan~~ ~~with~~ current plan until new plan is finalized.

Comments may be submitted via mail, email, fax with attention to Dara Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? AS A PLACE THAT YOU COULD ENJOY FUN, SAFE RECREATION WITHOUT THE RISK OF BEING THROWN OUT OF MY BOAT, OFF MY DOCK, OR CAPSIZED BY BOATS THAT THROW OUT LARGE, DANGEROUS WAKES, ALSO WHERE MY BOAT DOCK WOULD NOT BE DAMAGED OR DESTROYED BY THESE VESSELS.

What about Table Rock Lake is most important to you? RECREATION & SAFETY

What is one thing that could be done to improve the lake? MAKE ALL COVES & SMALL TRIBUTARIES NO-WAKE ZONES, THIS WOULD ELIMINATE A HUGE AMOUNT OF EROSION, AS WELL AS GIVE PEOPLE A SAFE PLACE TO ENJOY THEMSELVES.

Additional comments on the Master Plan Revision or about issues that should be studied: WE HAVE HAD SMALL CHILDREN WITH LIFE JACKETS ON BE SLAMMED AGAINST THE DOCK AND SHOVED UNDER THE ENCAPSULATED FOAM BECAUSE OF LARGE WAKES. OUR WATER ALONG THE SHORELINE BECOMES MUDDY 30 FEET OFF OF THE SHORE FROM EROSION BECAUSE OF THE HUGE WAKES, MAKE ALL ~~THE~~ CREEKS AND COVES NO WAKE ZONES, KEEP THE BIG WAKES ON THE MAIN CHANNEL.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Make sure all septic tanks are safe and not leaking. There is continuing tension between seasonal and incoming permanent residents. Communities need tools to be able to deal with that kind of issues.

What about Table Rock Lake is most important to you? _____

Continuing water quality excellence - keep future developments as low impact as possible

What is one thing that could be done to improve the lake? _____

Walking trails and more nature education and ecology education sites

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Keep the lake focus on - safety, a park - a place for people to relax and learn about the area in which we live, so we can better care for it.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clean - Visible from Primary

What about Table Rock Lake is most important to you?

Cleanliness - Accessibility -

View of the lake - Boating

What is one thing that could be done to improve the lake?

Trash containers well

Maintained @ all access sites

Additional comments on the Master Plan Revision or about issues that should be studied:

What do you see your friends for this? How will it affect the economy?

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Better water quality = less phosphorus, cleaner water like 20-30 yrs. ago. Maintain quieter environment banning "cigarette style" boats. Reduce light pollution by reducing unnecessary lit advertising signs, reducing parking lot lights after business hours to return to a natural nighttime environment. Safer boating - again banning/restricting ocean-type watercraft, require 16 yr old min. age for jet skis! Restrict commercial development along shoreline to prevent disaster of Lake of the Ozarks. And easier access to Corps of Eng.

What about Table Rock Lake is most important to you? water quality & water pollution. Had our cabin since 1965. Have observed continuous increase of use w/o adequate awareness of commercial impact & preventative land management practices. Water is green not blue. Educate agriculture to reduce fertilizer runoff. Dev-master plan for watershed. Hold more public meetings to again raise public awareness - communication via every media is mandatory.

What is one thing that could be done to improve the lake? Educate public to raise awareness of complexity of environmental factors to maximize natural health of area coupled with consistent active enforcement of rules/regs.

Additional comments on the Master Plan Revision or about issues that should be studied:
Dev. consistent guidelines for future developments, specifically addressing potential pollution to reduce future impact = light, water, and noise pollution affect the natural beauty which is of course the reason we are all attracted & affected.
- Please be aware of how corporate interests historically dictate rules/regs to increase their goals and decry any opposition as a "restriction of commerce." The good of many need overrule the profit of a few.
Please do what is good for those that cannot speak - the water, trees, plant and animal life that we, by the Grace of God, were given dominion over and are tasked with defending & preserving.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

The Ozarks attracts people due to it's clean, small-foam, natural/country charm. Need to balance this with planned growth. Would like to see an average income person being able to use the lake for enjoyment. Be able to look out & see trees, seers houses and Condos. Better water quality. Promote family-oriented activities.

What about Table Rock Lake is most important to you?

- Ability to boat & swim without worrying about being contaminated.
- Keep large, noisy boats off the lake.
- Keep the Ozarks charm and natural habitat. Keep commercial entities to a minimum.

What is one thing that could be done to improve the lake?

water quality

Additional comments on the Master Plan Revision or about issues that should be studied:

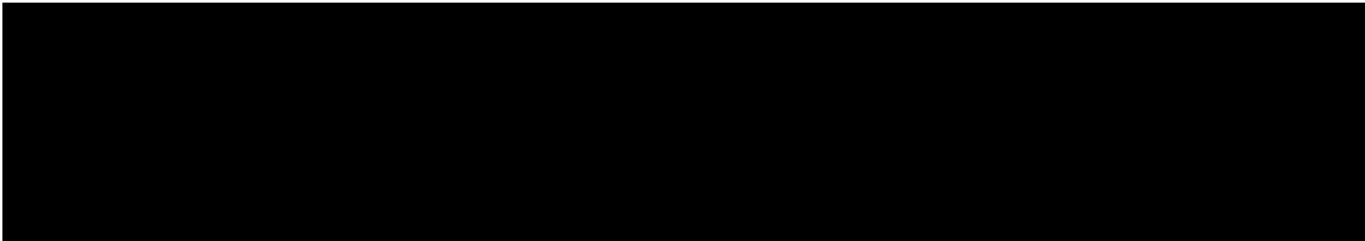

- Each dock association and home/land owner should look to upgrade/improve existing structures and land with a focus on environmental quality. That means clean up, trimming, good septic systems, dock upgrades, tree management, etc.
- Become a positive entity (Corps) vs negative. Right now the Corps is seen as a road block? not a helpful agency. Use some common sense and not go forward as if it's "black or white." There's a lot of "gray" to deal with when working with people.
- How many visitors are enough to the lake areas to maintain environmental quality.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I would like to see Table Rock Lake continue to be a family recreational destination. Allowing for all activities, without over crowding which would cause the quality of the lake to decrease. I would like the lake not to turn into a heavily commercialized place.
Continued improvement of fishing habitat

What about Table Rock Lake is most important to you?

Water Quality is the most important aspect to the continue success of the lake.

What is one thing that could be done to improve the lake?

Controlling of sewage runoff into lake, and it tributaries

Additional comments on the Master Plan Revision or about issues that should be studied:

Possibility of limiting the ~~size~~ maximum size of boats operating on the lake. Maybe @ 35' - these longer boats not only cause damage to docks, shoreline from large waves, there is also a big safety factor for other boaters.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? CLEAN AND IMPROVED
WITH LAKE ACCESS TO COMMERCIAL ENTITIES SUCH AS
DINING FACILITIES, ALONG THE WATER.

What about Table Rock Lake is most important to you? ABILITY TO ENJOY BOATING
AND OTHER WATER SPORTS IN CLEAN WATER ON TRL

What is one thing that could be done to improve the lake? CUT ALL TREES WITHIN THE
LAKE BOUNDARY TO 20' BELOW POOL LEVEL.

Additional comments on the Master Plan Revision or about issues that should be studied:

THE LIMIT OF SPACE ALLOWED FOR DOCKS IN
THE CURRENT PLAN IS SUPPRESSING HOME AND PROPERTY
VALUES. WHILE A LIMIT IS NECESSARY TO ENSURE A
SAFE AND UNCONGESTED ENVIRONMENT, THAT LIMIT
SHOULD BE EVALUATED TO ALLOW ADDITIONAL SLIP &
DOCK SPACE TO ALLOW ADDITIONAL, CONTROLLED
DEVELOPMENT OF LOW-DENSITY RESIDENTIAL PROPERTY.
NO DOCK SPACE IS FORCING DEVELOPMENT TOWARD TIME-SHARE
AND OTHER HIGH-DENSITY, TRANSIENT-USE PROPERTY.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? POLLUTION-FREE AS POSSIBLE.

What about Table Rock Lake is most important to you? CLEAN WATER -- WITHOUT THAT, ALL WE HAVE IS A HUGE SEWER SYSTEM.

What is one thing that could be done to improve the lake? STOP THE DISCHARGE OF ALL SEWERAGE - RAW AND/OR TREATED - INTO THE LAKE FROM PRIVATE AND/OR BUSINESS/COMMERCIAL FACILITIES.

Additional comments on the Master Plan Revision or about issues that should be studied: WE BELIEVE THE USAGE IS TOO RESTRICTIVE CONCERNING THE ISSUANCE OF PERMITS FOR DOCK FACILITIES.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE of the addresses below.

How would you like to see Table Rock Lake in 20 years? I WOULD LIKE TO SEE THE NATURAL QUALITY OF THE SHORELINE RETAINED, THE BUFFER OF TREES AND VEGETATION IS IMPORTANT FOR AN ENVIRONMENTAL, AESTHETIC, AND SUSTAINABILITY REASONS I WOULD LIKE TO SEE RECREATION CONTINUED TO BE SUPPORTED BUT CONTROLLED, C.O.E. CAMPGROUNDS AND STATE PARKS ARE MORE IMPORTANT TO ME THAN PRIVATE MARINAS AND CAMPGROUNDS. BOAT SIZE LIMITATIONS SHOULD CONSIDERED. BOATS OVER 30' ARE DANGEROUS TO OTHER BOATERS AND DAMAGING TO DOCKS AND SHORELINE, PROTECT THE WATER QUALITY, ENFORCE OR ELIMINATE PRIVATE PACKAGE PERMITS FOR COMM. DEVELOPMENTS.

What about Table Rock Lake is most important to you? WATER QUALITY, SCENIC BEAUTY OF THE SHORELINE, WILDLIFE ALONG THE SHORELINE, LOW CONGESTION OF DOCKS AND MARINAS

What is one thing that could be done to improve the lake? LIMITED DOCK ZONING - BUT MORE IMPORTANTLY LIMITATION OF BOAT SIZE, BOATS OVER 30' ARE DANGEROUS TO OTHER BOATERS AND DAMAGING TO DOCKS AND SHORELINE. FINALLY - WATER QUALITY - PRIVATE PACKAGE PLANTS AND SEPTICS ARE DETRIMENTAL TO THE WATER QUALITY/FISH & WILDLIFE.

Additional comments on the Master Plan Revision or about issues that should be studied:

- PROTECTION OF THE TRIBUTARIES AND OUTFALLS INTO TABLE ROCK, THE OZARKS REGION HAS AND THE KARST TOPOGRAPHY OF AREA IS EXTREMELY SUSCEPTIBLE TO GROUND WATER CONTAMINATION.

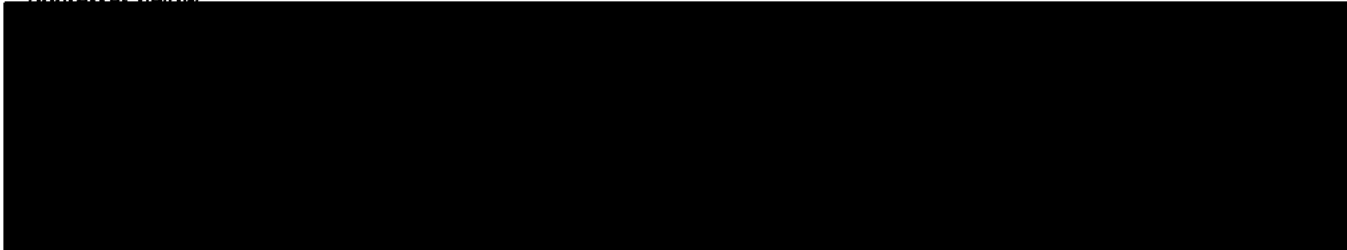

- PRESERVE THE EXISTING SHORELINE BUFFER (TREE LINE) IT IS THE ONE THING PROTECTING THE SCENIC BEAUTY AND WILDLIFE OF THE LAKE.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Good ~~to~~ balance
between recreation & natural habitat - Clean water
No large boats on smaller parts of lake

What about Table Rock Lake is most important to you? Clean water safe water
level at least 910' so Recreation is safe - Recreation very
important to us

What is one thing that could be done to improve the lake? Ability to remove dead
trees (standing or lying) from shore line so they are not washed
into lake causing boating hazards.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

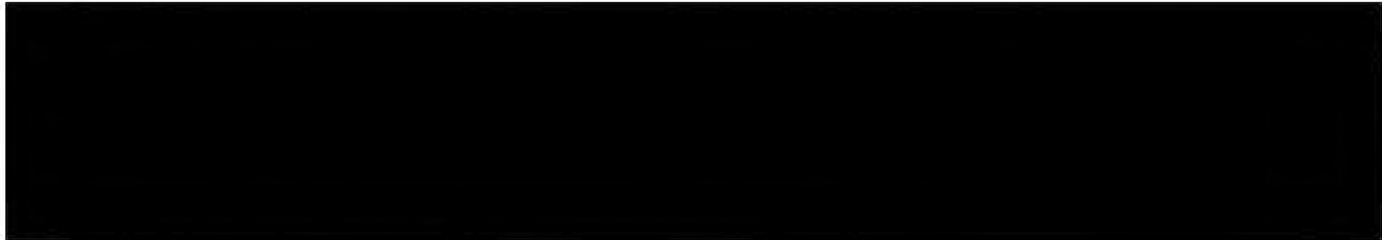

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

MORE CAMPING + EATING PLACES

What about Table Rock Lake is most important to you? KEEPING THE WATER CLEAN FOR MY KIDS + FAMILY AND FOR ALL OTHERS TO ENJOY.

What is one thing that could be done to improve the lake?

BEtter SAFE ON THE LAKE WHEN BOATS ARE OUT AND ABOUT.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm> Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

as clean as it was 20 years ago.

What about Table Rock Lake is most important to you?

~~Recreational~~ Recreational and physical fitness and the preservation of its "NATURAL STATE"

What is one thing that could be done to improve the lake?

If they are not going to allow more docks, then maybe in highly populated areas they could allow more boat ramps.

Additional comments on the Master Plan Revision or about issues that should be studied:

Hiking, Biking, and running trails are an important part of my everyday life. Funding for these usually are met through volunteer work and fund raising, I would like to see more of this.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below:

How would you like to see Table Rock Lake in 20 years?

Clear
and beautiful

What about Table Rock Lake is most important to you?

Keeping Clean and Keeping some of the B16
rack boats limited. When the lake is full of
boats they are to fast and the wake is dangerous
to smaller boats.

What is one thing that could be done to improve the lake?

More water patrols
during summer. Skiers and tubing when they
should not be on the lake. Wave redners going behind
your boat on your wake or the boat in front of you!

Additional comments on the Master Plan Revision or about issues that should be studied:

I think issues need to be delt with.
But people are upset with the Corp because
they do what they want anyway! They really
don't care about the people and what they think
decisions have been made about property and
docks and we were NEVER told. The meeting we great
thinking, we just DON'T have much faith in the Corp.
It's not lake too. We don't want it to look like
it of the Ozarks yes But listen to us too!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? • clear water (again)!

• less LARGE WAVES
• Retain a lot of undisturbed shoreline

What about Table Rock Lake is most important to you? Water quality
aesthetic " " ie. natural beauty

What is one thing that could be done to improve the lake? Control or limit erosion & siltation from development around the lake. ie. "Nantucket"

Additional comments on the Master Plan Revision or about issues that should be studied: Corps should strive for positive attitude/interface with the public/ users/area owners/ developers. Many view it as negative.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P. O. Box B67, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. How would you like to see Table Rock Lake in 20 years? TABLE ROCK LAKE IS SUCH A
LARGE THAT CAN SUPPORT ADDITIONAL COMMERCIALIZATION. THIS
COMMERCIALIZATION MAY BE LIMITED TO BEACHES, SWANSON LANDING
THIS ECONOMIC DEVELOPMENT WILL BE IMPORTANT TO LOCAL ECONOMY & TOURISM
TOURISM I SEE TABLE ROCK AS A DESTINATION VACATION SPOT WITH ALL
AMENITIES.

What about Table Rock Lake is most important to you? I LIKE THE WATER QUALITY
THE PROXIMITY TO SWANSON AS WELL AS THE SCENICITY

What is one thing that could be done to improve the lake? I WOULD LIKE TO SEE A
PROMENADE DOCK NEAR THE DAM TO ALLOW TRANSPORTATION FROM THE LAKE TO
THE SWANSON LANDING AREAS.
ALLOW BOATING RENT SHOPS TO BE LOCATED NEAR SO' IN LENGTH

Additional comments on the Master Plan Revision or about issues that should be studied:

WITH THE IMPROVED INFRASTRUCTURE OF EMPORIA, MO, TABLE ROCK LAKE
CAN SUPPORT ADDITIONAL COMMERCIAL BUSINESS & RETAIL & RESORT
FACILITIES

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. How would you like to see Table Rock Lake in 20 years? PRESTINE AS POSSIBLE

What about Table Rock Lake is most important to you? BEING ABLE TO SEE & LIVE NEAR THE WATER, BEAUTY

What is one thing that could be done to improve the lake? RESTRICT SIZES OF BOATS FOR SAFETY ISSUES, FOR SHORE LINE PROTECTION

Additional comments on the Master Plan Revision or about issues that should be studied:

NO TOWNAHENTS (FISHING) DURING MAIN SPAWNING SEASON.

BETTER RESPECT WITH CORP & GENERAL PUBLIC.

MANY PEOPLE FEEL THAT THERE IS TOO MUCH "ARROGANCE" WITH CORP IN GENERAL

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

① How would you like to see Table Rock Lake in 20 years? Like it is today
UNCROWDED + FAIRLY CLEAN - IT COULD BE CLEANER WITH WORK
TIGHTER RESTRICTIONS + ENFORCEMENT ON SEPTIC SYSTEMS - UPDATED OR
REMOVED FROM AT LEAST 500 FT FROM THE LAKE
RECYCLING STATIONS SET UP PROHIBIT BURIAL OF TRASH
LIMIT THE NUMBER OF BOAT DOCKS + INITIATE SPEED LIMIT ON LAKE

② What about Table Rock Lake is most important to you? CONSERVATION OF WILDLIFE
QUALITY OF GROUND + WATER
LIMIT HUNTING ON CORPS PROPERTY TO UNOCCUPIED / NON RESIDENTIAL AREAS.
WE ARE ADJACENT TO CORPS LINE + CONSTANTLY HAVE HUNTERS WITHIN 100 FEET

③ What is one thing that could be done to improve the lake? TREAT IT LIKE (YOU) HAVE TO
EAT + LIVE IN IT - Limit Commercial Access + Visitor Access
Limit Size of Boats / Speed
Limit Building

Additional comments on the Master Plan Revision or about issues that should be studied:
LOOK AT LAKES THAT HAVE ALREADY FAILED + WHAT SHOULD HAVE BEEN DONE
TO PREVENT IT FROM BEING LIKE LAKE OF THE OLARKS.
LOOK AT LAKE LOUISE IN CANADA + OTHER LAKES IN OTHER COUNTRIES
TO SEE WHAT THEY DID RIGHT / WRONG.

LESS IS MORE.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Cleaner, Dead trees removed from shore line

What about Table Rock Lake is most important to you?

Clean water, Recreation opportunities, Beauty,
Water supply to towns and cities

What is one thing that could be done to improve the lake?

Limit speed on lake.
More marinas - not bigger ones. State park marina
is too big!

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I LIKE HOW THE LAKE IS NOW. IT SHOULD BE MANAGED TO KEEP IT THE SAME AS 2013, FROM A QUALITY STANDPOINT.

What about Table Rock Lake is most important to you? WATER QUALITY, ACCESS TO BOAT RAMPS.

What is one thing that could be done to improve the lake? BOAT SPEED CONTROL AND SIZE.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

a clean pristine lake similar to Lake Powell

What about Table Rock Lake is most important to you?

Water clarity

Limitation of Boat docks

What is one thing that could be done to improve the lake?

Water level regulation - no more 933'!

Additional comments on the Master Plan Revision or about issues that should be studied:

no wake areas - reflectors needed on the booms - They are not visible on very sunny days

more restaurant access

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

What about Table Rock Lake is most important to you? Clean, clear water
Minimize housing development (ie: Condos/Townhouses)

What is one thing that could be done to improve the lake? Allow removal of
dead trees and debris on shore line.

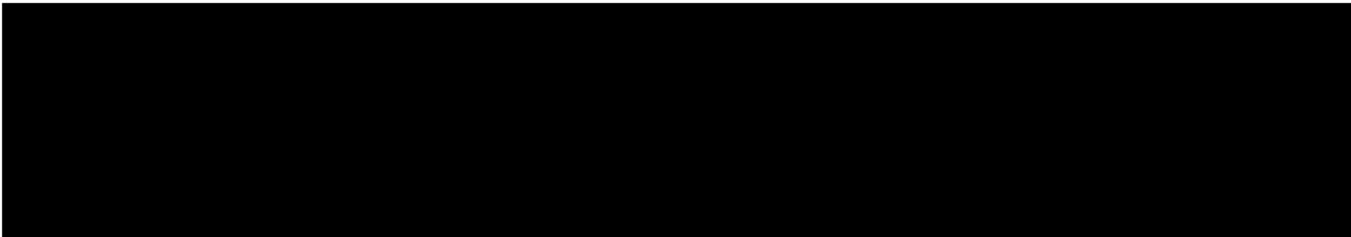

Additional comments on the Master Plan Revision or about issues that should be studied:
• I would like to eliminate all above water exhaust
systems in boats
• I would like to see a maximum size for power boats. Like
a 30 FT maximum. Houseboats would be OK.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? The best non-polluted
Lake in the U.S.

What about Table Rock Lake is most important to you? Recreational Fishing &
boating. Keeping the fishing good and the lake from becoming
polluted. Limiting dock construction and preserving the
lake's natural beauty.

What is one thing that could be done to improve the lake? More public beaches
like Moonshine around the lake. Also, making heavily used
coves, like Big Cedar Cove, idle space only for entire cove. It
is getting dangerous in the cove and on the docks.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

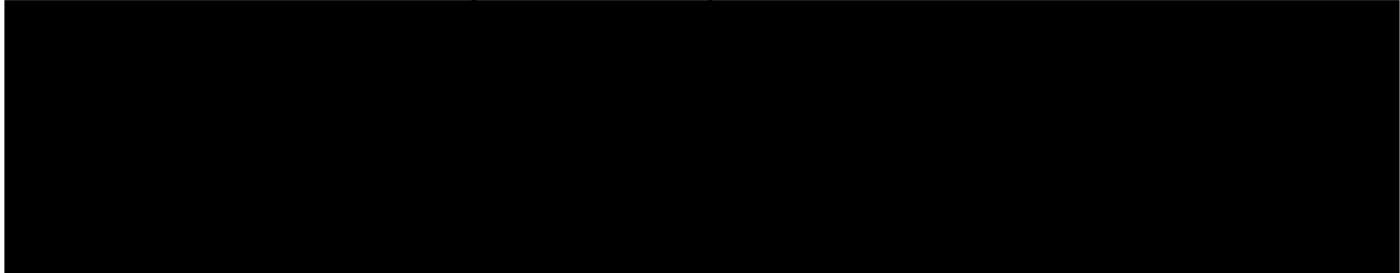

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Make the lake line at a constant elevation for the entire lake (say 930-940 feet) to allow fair access to the lake for all. Open SS camp area - add a marina

What about Table Rock Lake is most important to you? _____

Good, clean water & fish. Enforce rules/management security.

What is one thing that could be done to improve the lake? _____

Allow more private docks on properties with lake shore front footage of 500+ feet (500 ft?, 400 ft?)

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

w/without well to well docks + primitive water quality. lets
not destroy our natural resource for the advent of commerce
+ manage ecotour + pressure.

What about Table Rock Lake is most important to you? THE LAKE, ITS WATER
QUALITY, BOATABILITY, (wave control) and controlled levels.

What is one thing that could be done to improve the lake? Restrict boats to 30-35
feet with max speed of 35 mph

Additional comments on the Master Plan Revision or about issues that should be studied:

- we've lost the water quality we had just a few years ago. - how can we regain or surpass that quality.
- Keep docks at the current quantity
- Attach resistant to wave
- Restrict ~~boat~~ boat dock assembly points
- Enforce rules on the lake as far as wave + wind restriction and speed to keep erosion of shoreline at a minimum and to protect the docks of private citizens + commercial organizations

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Same AS Today

Best Lake For Boating and Fishing

What about Table Rock Lake is most important to you?

Clear - Clean - Water

What is one thing that could be done to improve the lake?

Maintain Lake Level
we have seen about 25 Feet high to Low in the past
Few Years.

Additional comments on the Master Plan Revision or about issues that should be studied:

Large Deep V boats that could be used in the Ocean
ARE ON table rock. wakes are dangerous and damage
docks and shorelines. Houseboats even 80 ft long
ARE NOT A PROBLEM.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

As more shoreline is developed, the lake will become more stressed than current levels. Development of shoreline should be closely scrutinized to minimize impact to lake.

What about Table Rock Lake is most important to you?

Maintain the lakes natural state, especially with the increased usage over the next decade.

What is one thing that could be done to improve the lake?

1) Water clarity
The water continues to degrade

Additional comments on the Master Plan Revision or about issues that should be studied:

1) Prohibit boat engine exhaust discharge above water line. Require exhaust below water to minimize noise level.

2) Limit speed to 60 mph

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Controlled access that allows recreation but doesn't disturb residential areas.
More restaurant/retail opportunities, but not ~~at~~ ^{on} ~~the~~ ^{the} ~~lakes~~ ^{lakes}.
Continued boat patrol/safety visibility to maintain safety and out of control boating.

What about Table Rock Lake is most important to you?

Water quality. We love this lake because it's not a cesspool like the Ozarks and other lakes. Clean water that is safe is great.

What is one thing that could be done to improve the lake?

Ensure residential/commercial sanitation is taken care of. Don't want a repeat of Lake of Ozarks.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

We would like to see the LAKE cleaner and clearer.
We have lived on the LAKE for almost 20 years
and every year the LAKE seems to get more
alga and cloudier.

What about Table Rock Lake is most important to you? Quality water is
a high priority. A clean pristine

What is one thing that could be done to improve the lake?

If possible take a closer look at the Resort's Septic System
that are on the LAKE

Additional comments on the Master Plan Revision or about issues that should be studied:

Limit the size of boats - cruisers, etc.
There are still a huge number of rusting
metal septic tanks that need to be replaced with
more up to date product - concrete, etc.
Scuba Divers are saying that the LAKE is so
cloudy they can't see their hands in front of their faces.

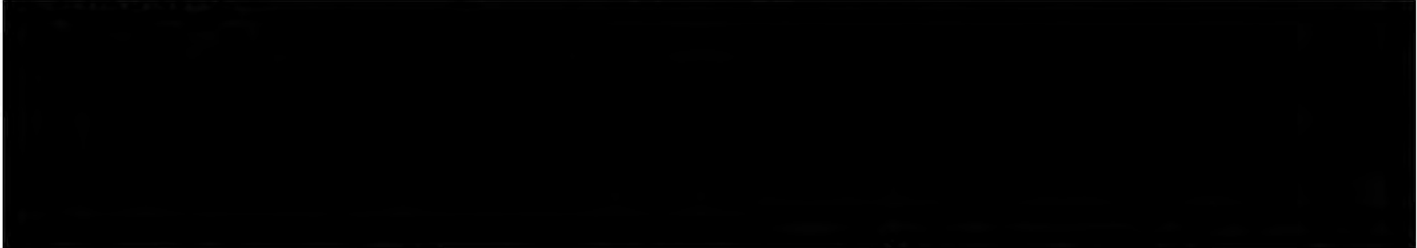

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? Clean and not over populated with new docks, housing or business. More people "more trash". Example "Lake of Ozarks" nationally known for dirty water and accidents.
Camp grounds are not full now - why build more???

What about Table Rock Lake is most important to you? Clean water and natural state - not so populated. Keep clutter of docks off - you take away natural beauty.

What is one thing that could be done to improve the lake? Keeping off huge boats not made for this size of lake - makes it tough for families who can not afford luxury boats.

Additional comments on the Master Plan Revision or about issues that should be studied:

With flooding issues so common as 5 yr - 1, (flood) recommend that shore lines can be cleaned (with dead trees & debris) can be cleaned and burned - Dead trees lying down on shoreline does not look clean or attractive - Looks trashy. I agree live trees should not be touched. To look at rocky shoreline is more pleasing to the eye than a dead tree lying down.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Clean water
and O&R crowding
with people-boats
or docks.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clean, controlled enough to protect its current beauty. Would like to see it full! Would like to see shoreline be able to be cleared of some dead trees but still protect wildlife needs. Would like cedar trees allowed to be cleared since they are killing out other trees. Would like to see rules applied →

What about Table Rock Lake is most important to you?

Cleanliness to maintain the enjoyment for others for years to come. Would like distances between marinas & private boat dock permits be looked at & possibly reduced - perhaps on a case by case basis.

What is one thing that could be done to improve the lake?

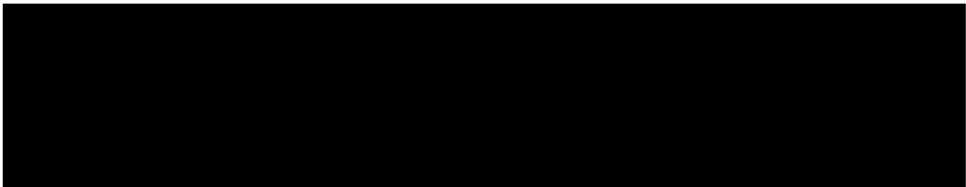

Allow land owners to clear more on corp land - remove cedar trees & old trees that are dead. Allow more access to restaurants on the lake.

Additional comments on the Master Plan Revision or about issues that should be studied:

Thank you for the opportunity

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

NO MORE DEVELOPMENT ESPECIALLY
COMMERCIAL DEVELOPMENT

What about Table Rock Lake is most important to you?

NO TRAILS ON OR ALONG SHORELINE
LIMIT BOAT SIZE AND NO MORE DOCKS
ESPECIALLY COMMERCIAL

What is one thing that could be done to improve the lake?

MONITOR WATER QUALITY FROM
COMMERCIAL SEWAGE OUTPUT
LIMIT BOAT SIZE TOO MANY GIANT
CRUISERS

Additional comments on the Master Plan Revision or about issues that should be studied:

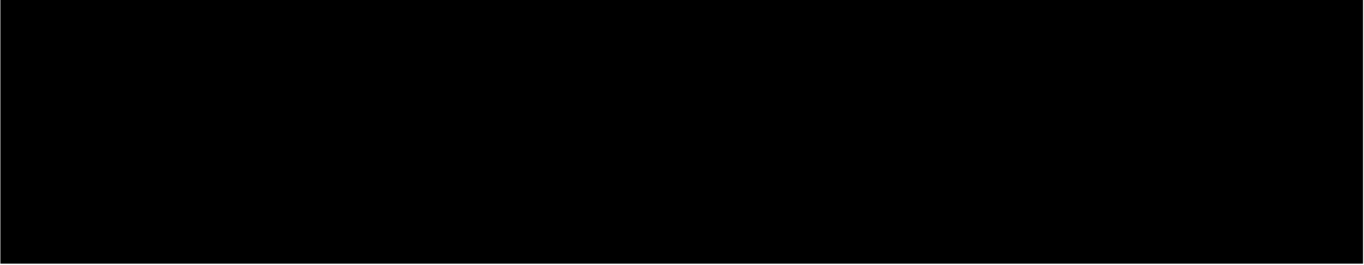

LONG TIME RESIDENTS CARE ABOUT THE
WATER AND QUALITY OF THE LAKE.
VISITORS JUST WANT TO COME IN AND ABUSE
IT. DO NOT PUT TRAILS ON THE SHORELINE

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years?

CLEAN !!

What about Table Rock Lake is most important to you?

Water Quality / Useability

What is one thing that could be done to improve the lake?

Increase the effort to reduce pollution from Commercial enterprises, Chicken Bums, Public sewer systems, Resort Properties, and private septic tanks.

Additional comments on the Master Plan Revision or about issues that should be studied:

- Increase the # of no wake zones near private docks, especially on the main channels.
- Restrict the total number rental boats on the lake. The number of inexperienced boat operators has already reached a dangerous level.

of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Not Like Lake of the Ozarks.

Large wake creating boats present dangers + due damage.
Size is not the issue, as much as large waves that
threaten small boats, and damage docks.

What about Table Rock Lake is most important to you?

Water quality, maintenance
of wildlife, quiet enjoyment of fishing, hunting, and
family water sports

What is one thing that could be done to improve the lake?

Improve quality of water
coming in to the Lake from municipalities.

Additional comments on the Master Plan Revision or about issues that should be studied:

Can we be informed about the plans of the Corps prior to
draft of the proposed master plan?

Will the Master Plan contemplate rezoning the lake?

Are current owners grandfathered in their zoning + use?

What changes are now known to the Corps that will be
recommended to be part of the Plan.

How would you like to see Table Rock Lake in 20 years?

BALANCED USE OF COMMERCIAL DOCKS
PROPERTY OWNER DOCK USAGE
RECREATION FOR VISITORS AND PROPERTY OWNERS

What about Table Rock Lake is most important to you?

Water quality of the lake, floating trash, and shoreline trash and
Be able to continue having a dock in the cove
area of property. As a native of this County I would like
to see the continued use of property owned as well as the
visitors to this area. The beauty of the lake is important to everyone.

What is one thing that could be done to improve the lake?

allow the dock owners to maintain the shore lines in
front of their docks. IE: Cut the grass, weeds and any
small trees that can damage a dock during high water.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years? Cleaner than today -
with more RECREATION opportunities including restaurants

What about Table Rock Lake is most important to you? RECREATION

What is one thing that could be done to improve the lake? MORE COOPERATION
between the Corps & LANDOWNERS

Additional comments on the Master Plan Revision or about issues that should be studied:
we need a better way to provide Lake Safety (example: NO USACE
ZONES IN HIGH TRAFFIC AREAS), for boat dock inspections
we need INSPECTION TO CONCENTRATE ON SAFETY (proper electric
service), NOT POTENTIAL plants AND TV ANTENNAS.

for homeowners we need MORE COOPERATION regarding
MOORING - with PERMITS - and tree replacement.

We need softer rules regarding vegetation.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? much like it is today, clean;
more restaurants available dockside accessible by boat.

What about Table Rock Lake is most important to you? Recreation in a clean lake

What is one thing that could be done to improve the lake? Not so stringent regulations
on mowing property; fewer regulations on boat docks, i.e. decorative
lights, potted plants, antenna, ice machines; more no-wake zones
severe fines for dumping sewage, trash in the lake.

Additional comments on the Master Plan Revision or about issues that should be studied:
Better lake level management to keep the level more
constant; better & more co-operative shore management

Additional Comment: We own property in Caps Cove on Table Rock. On
some previous owner cut down some trees (not us). We have
a mowing permit but have been required to plant 4 trees twice.
We tried to water the 1st 4 which all died. The 2nd 4 died in high
water. How many times are we going to have to do this?!? One of
your agents even told us we didn't have to water & the trees would probably

How would you like to see Table Rock Lake in 20 years? _____

I APPRECIATE THE PARTNERSHIPS THAT HAVE BEEN MADE FOR GOOD RECREATIONAL OPPORTUNITIES

- THE BOYS SCOUTS SHOULD BE ABLE TO EXPAND THEIR LOW CREEK CAMP
- THE OZARKS RIVERS HARVARD FOUNDATION SHOULD CONTINUE THEIR STEWARDSHIP OF OTHER PARKS FACILITIES

What about Table Rock Lake is most important to you? _____

IT IS CRUCIAL TO PRESERVE WATER QUALITY. IF WE HAD AN INCIDENT OF E-COLI LIKE THAT OF THE OZARKS HAD IN 2009 - THAT COULD HAVE US FOR YEARS TO COME.

What is one thing that could be done to improve the lake? _____

DE-CENTRALIZED RECREATION IN PARKS PROPORTION (SEE Q. 1)

Additional comments on the Master Plan Revision or about issues that should be studied: _____

THANK YOU FOR YOUR FLOOD CONTROL EFFORTS IN 2008 AND 2011. I KNOW THE METHOD WAS CONSIDERABLY MISUNDERSTOOD, BUT WE AT THE CITY OF BRANSON KNOW THE LOGIC BEHIND WHATS YOU DID (TIMING OF WATER RELEASES, ETC).
THANK YOU

Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years? _____

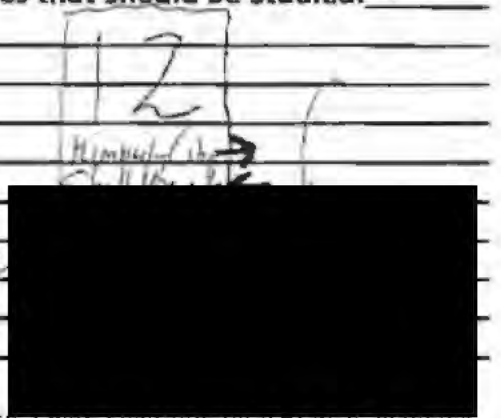

- 1. better public opinion of the Corp.
- 2. even cleaner water
- 3. fabulous camp grounds
- 4. even better flood control

What about Table Rock Lake is most important to you? Clean water, natural beauty, water/recreational activities for boats fishing, wildlife preservation fox, eagles, etc.
our dock,

What is one thing that could be done to improve the lake?
Continue to monitor those pushing the guidelines & regulations ex. driving vehicles down to the shore clearing lake front land, ATV paths/erosion, more "approved" marinas/restaurants

Additional comments on the Master Plan Revision or about issues that should be studied: _____

- 1. Mile Markers with directional info visual at night/solar lights
- 2. update regulation for better lighting for watercraft at night/safety
- 3. more paterys/marinas easy access on lake

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MATRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

Less big boat traffic - more pristine. I scuba dive. Used to be able to see 12 to 20'. Now visibility is so poor we can hardly see our hands without lights in some areas. We must control the water quality some how!!

What about Table Rock Lake is most important to you?

Safety of Big Cedar Cove is the busiest & narrowest cove on the lake. Needs to be "NO WAKE" like every other marina. Our cables have been snapped 3 times from heavy traffic. On weekends & holidays home owners & dock owners don't come to the dock because Big Cedar rental boaters have no boating skills & no boating etiquette. Why is BC exempt from what other marinas abide by?

What is one thing that could be done to improve the lake? more water patrol officers. Present staff is not adequate to cover the lake. We see numerous violations all day long - speeding - drinking - over loaded boats. Accidents waiting to happen.

Additional comments on the Master Plan Revision or about issues that should be studied:

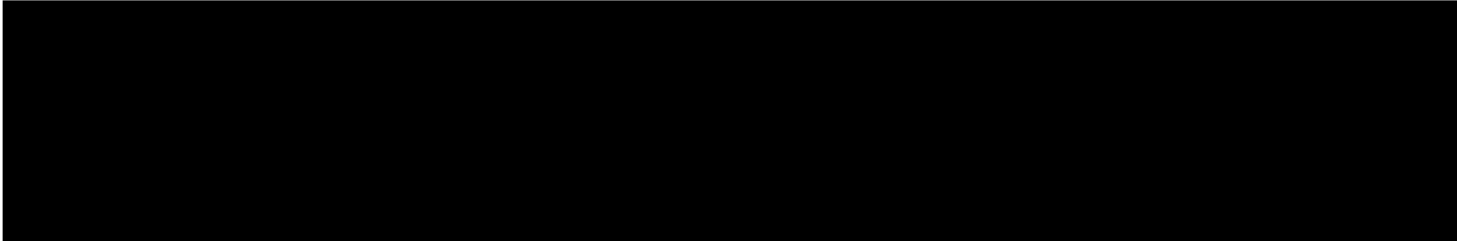

Do not let Table Rock become another Lofo. I'm a Realtor & have sold homes to former owners at Lofo parks - moved here for quality & now say we're getting more like Lofo parks. Master plan should NOT allow this to happen.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Clean water. Family recreation oriented - Boating & Camping.
A centerpiece to enjoy the Ozarks - hills & water based activities

What about Table Rock Lake is most important to you? _____

Boating & swimming in clean water.

What is one thing that could be done to improve the lake? _____

Restrict or control large, high speed boats. Lake on the Ozarks has this affliction (big wakes, rough water generated) + we need to prevent decaying in this direction. Smaller boat + houseboat friendly.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

I think private neighborhood docks are fine for our lakes. It should not be near impossible to get dock access for homeowners around the lake. (private or commercial)

I think some rethinking of property owners ability to utilize Corp take line property between the homeowner & lake should be considered. Controlling & eliminating trees + creating additional lawn is necessary. Better decriminalizing some limited pruning + maintenance should be a goal. Permitting process or pre-approval of plans in advance might work.

Comments may be submitted via mail, email, fax with attention to Dana Colburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Continued Cleanliness
of the water & shoreline. It should be kept
Natural looking with management of shoreline
and development. Would like for the lake to
still be a natural reserve for fish & wildlife.

What about Table Rock Lake is most important to you? what I always
appreciated was the cleanliness of the water in
comparison to other lakes. It is important to
keep the lake in this state.

What is one thing that could be done to improve the lake? more evenly spaced access
to the lake. We have to drive 10 miles round trip to put our
boat in the water even tho we own property with lake access.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? AS NATURAL AS POSSIBLE WITH LIMITED EXPANSION OF SHORELINE DEVELOPMENT. WATER QUALITY MAINTAINED AND IMPROVED IF POSSIBLE. LESS TRASH ALONG AND WASHING INTO THE LAKE. HUNTING AND FISHING ACCESS FOR THE NEXT GENERATION

What about Table Rock Lake is most important to you? THAT IT NOT TURN INTO A "LAKE OF THE OZARKS" WHERE AREAS ARE CLOSED DUE TO WATER QUALITY. BOATS THAT ARE SMALLER, CAN NOT NAVIGATE WITH THE LARGER VESSELS. CONTINUED MAINTENANCE OF BOAT RAMPS AND CAMPGROUNDS. HUNTING AND FISHING ACCESS.

What is one thing that could be done to improve the lake? BOAT RAMP MAINTENANCE / WATER CLARITY IMPROVEMENT

Additional comments on the Master Plan Revision or about issues that should be studied: LIMITED COMMERCIAL SHORELINE EXPANSION CONSIDERED SLOT LIMITS ON BASS (BUCK) FOR IMPROVED QUALITY OF FISH. MORE RESTRICTIONS OF FISH AND WILDLIFE SANCTUARIES. EX ("THOMPSON HOLLOW AREA")

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>, Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? to still be beautiful! :)

We do not want to see it over-developed like Lake of the Ozarks w/ shoreline crowded w/ Boat Docks + HUGE watercraft making it dangerous for smaller boats. We want it to be relaxing for fishing + boating.

Fish, fowl + wildlife habitats need to be protected so Lake remains beautiful.

What about Table Rock Lake is most important to you? Clean, clear water!

→ water quality must be #1 priority so No Septic system in new developments + mandatory updating of existing older septic systems.

What is one thing that could be done to improve the lake?

- ① RESTRICT SIZE OF WATERCRAFT + RESTRICT BOAT DOCK PERMITS
- ② BUILD PUBLIC FISHING PIERS - ie, along Meadsline, Coombs Ferry, Old 86 Camp.

Additional comments on the Master Plan Revision or about issues that should be studied:

OPEN UP COOMBS FERRY AREA FOR HOUSE BOAT OVERNIGHT PARKING ALONG SHORE. ADD HIKING TRAILS TO C.F. AREA + OPEN UP FOR DAY USE - SWIMMING, PICNIC ETC. ADD FISHING PIERS ALONG C.F. AREA. IT CURRENTLY SITS VACANT YET IT'S HUGE AREA NOT BEING USED.

OPEN UP OLD 86 CAMPGROUND AGAIN + ALLOW HOUSE BOATS TO PULL UP ALONG SHORE FOR OVERNIGHT PARKING.

ALLOW DOCK ACCESS AROUND COOMBS FERRY AREA (LOW DENSITY / CC AREA) (EAST/WEST SIDE OF PENINSULA)

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I WANT TO STILL BE ABLE TO TAKE A BOAT RIDE AND NOT LOOK AT CADDIS AFTER. COULD BUT BE ABLE TO ENJOY OUR BEAUTIFUL SHORE LINE. A SUSTAINABLE FISHING ENVIRONMENT MEANING SEWAGE & HABITAT MANAGEMENT

What about Table Rock Lake is most important to you?

LIMIT BIG BOATS, SPEED OF BOATS WAKE BOATS TO CERTAIN AREAS

What is one thing that could be done to improve the lake?

PUT IN PUBLIC FISHING PLOTS TO ATTRACK MORE VISITORS BUT W/ MINIMAL IMPACT ON THE LAKE. THE COASTS DO THIS VERY EFFECTIVELY.

Additional comments on the Master Plan Revision or about issues that should be studied:

WHAT WE DON'T WANT TO SEE IS A QUESTION THAT SHOULD HAVE BEEN ASKED. WHAT I DON'T WANT TO SEE IS LARGE FAST BOATS SUCH AS THOUGHES ON THE LAKE OF THE OZARKS. PLEASE DON'T ALLOW THE SHORE TO BE OVER DEVELOPED LIKE THE LAKE OF THE OZARKS.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Appendix F

Public Scoping Comments

Public Comments (continued)

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years? Good fishing,
Scenery, leaving trees on camp property.

What about Table Rock Lake is most important to you? Water quality, families
enjoying the water sports.

What is one thing that could be done to improve the lake? Limit speed & boat size,
Limit commercial of large quantity,
Get the water quality & tributary runoff
under control.

Additional comments on the Master Plan Revision or about issues that should be studied: To watch
& finish identify the natural resources. Water quality studies
periodically, tributaries, shoreline erosion, septic and
to better control the high wakes from the large traffic
of boats & large size boats.
It is not enjoyable to ski with younger children when
you are getting swamped!
We do not want another lake of Ho Oaks water quality!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2017.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I like the way
The Lake is and would like to keep it that way.
I hope it doesn't get too crowded.

What about Table Rock Lake is most important to you?

Water quality, Good Fishing,
Water level control.

What is one thing that could be done to improve the lake?

Flood control.
I know it depends on up & down stream levels how much
you can let in & out, but you have at this a long time
you know how long it takes to raise above the lake a foot.
(Corps of Engineers)
You can do it

Additional comments on the Master Plan Revision or about issues that should be studied:

Mowing reports; I am no longer able to mow
across the road from my place at lake. It keeps
snakes down & insects at a comfortable level. you have
A lot more cotton mouths than when it was mowed.
Kids & children at lot higher risk of being in
big trouble.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Address:

We Love Table Rock Lake

Event:

Keep up the Good Work

Phone:

How would you like to see Table Rock Lake in 20 years?

Less development and maintain clean, clear water for recreational use. Also more patrolling for unsafe Boating and use of alcohol, etc on Lake.

What about Table Rock Lake is most important to you?

The Low density, clean water for our watercraft use and overall enjoyment of the Natural setting.

What is one thing that could be done to improve the lake?

Keep all BOAT RAMPs well maintained and safe. Provide more trash cans at Ramps, docks. Directional signage and mile markers.

Additional comments on the Master Plan Revision or about issues that should be studied:

We are former Residents of Arizona and we originally moved there to enjoy Lake Mead. Unfortunately Lake Mead suffers from decades of Drought and overuse due to a combination of Greedy Investors in Las Vegas that deplete the water and a very poor master Plan and unrealistic use of the Lake and Dam. Property values are Horrible in L.V. and areas with access to

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Lake Mead, causing a Terrible Economic Downfall in the Lake Mead Region.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clear & Clean

What about Table Rock Lake is most important to you?

The Clean Clear Water.

What is one thing that could be done to improve the lake?

Strick Patrol or ATV on the Shore line. Cutting tree on the shore line stand on the lake property so people can see the lake better.
No cutting or burning on the lake line.

Additional comments on the Master Plan Revision or about issues that should be studied:

Better checking in the lake lake for their protection.

I see no more deer because of the cutting on the landowner cut all the trees so they can see the lake.

Better patrol of the shore line.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Open access roads to
Waters edge to allow handicapped Veterans and other
handicapped access to the Waters edge. Restricting Vehicle
access roads restricts and denies the handicapped.

What about Table Rock Lake is most important to you? Keep it accessible to
the public without ~~change~~ more restricted public
usage. Some commercialization, but not over done.

What is one thing that could be done to improve the lake? Open closed access
roads to the lakes edge to allow handicapped opportunity
to fish and enjoy themselves. Rock or asphalt access roads
to limit soil ~~erosion~~ erosion.

Additional comments on the Master Plan Revision or about issues that should be studied:
Veterans week brings 10's of thousands of Veterans (many are
disabled) to Branson. Vehicle access to Table Rock has been a
complaintive received. Possibly you could rock or blacktop a
few water's edge locations to allow disabled fishing and
camping. When completed you could advertise their
availability.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? *I think the lake is in pretty good shape as it is now. Would like to see the water level keep at a better level throughout the year. I realize you can't do anything about the lack of rain but you can control what you release.*

What about Table Rock Lake is most important to you? *The water quality. Had some people here from Lake of the Ozarks and they just couldn't believe how clean the water was.*

What is one thing that could be done to improve the lake? *Trying harder to keep the water level at a more constant level... weather permitting*

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Shoreline and water clean. No clearing of shoreline.

What about Table Rock Lake is most important to you?

Maintaining Shoreline, No Clearing, Limited Boat Docks

What is one thing that could be done to improve the lake?

Keeping Vegetation on Corps property. Do not want to be on lake and look at docks and houses.

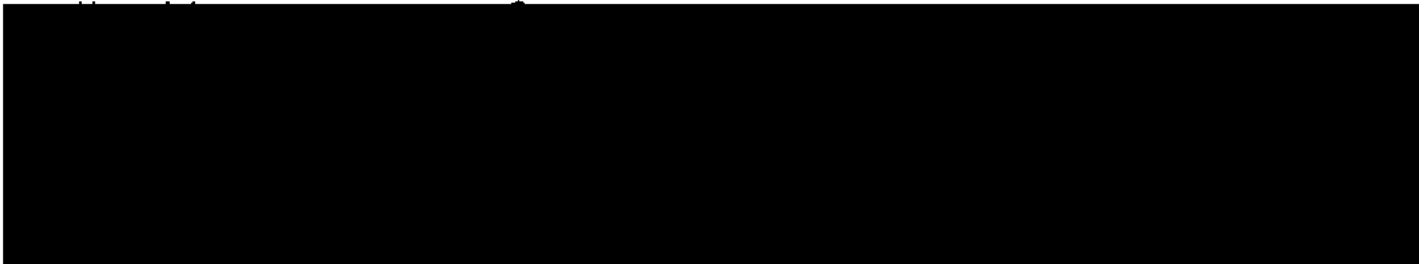

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years?

Responsible residential and Responsible Tourism development along with protecting the water quality and surrounding forests.
Allow existing docks to expand and limit number of new docks. Better to have 1 large dock with several slips than it is to have many small docks.
Add natural trails & expand existing

What about Table Rock Lake is most important to you?

clean water, beautiful surroundings,
accessability,

What is one thing that could be done to improve the lake?

More trails done working with the terrain & forests to allow access but not removing trees.

Additional comments on the Master Plan Revision or about issues that should be studied:

Allow existing residential and business docks to expand protecting both residential & commercial needs while limiting the impact of more docks. This will serve many current and future needs. New docks should be allowed but limited to areas that are underserved such as newly developed regions. The beauty and environment/clean water must be protected.

*Allowing existing dock expansion will often avoid a need for new docks while still addressing commercial & residential growth. Allow new docks in new areas or developed areas.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Thank you for going through this process. It is a long and difficult one.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

What about Table Rock Lake is most important to you?

maintain the water for fishing & recreation

What is one thing that could be done to improve the lake?

*Consistency by the Corp in managing and applying rules
and spending time efficiently rather than on down - more essential
to improve the lake*

Additional comments on the Master Plan Revision or about issues that should be studied:

Consistency in managing the lake by the Corp:

Example:

- 1) Individual dock owners request to incorporate steel frame
marinas got a pass - it's important for the
lake lit by Condorant.*
- 2. Motor houses are allowed in parks, but
not on Corp property other wise.*

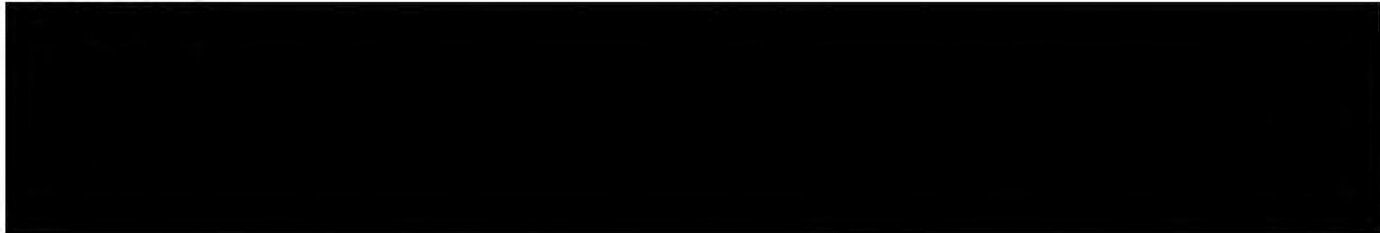

There are only two items of record

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

LIKE IT WAS 40 YRS AGO WHEN YOU COULD SEE THE WATER - TOO MANY CEDER TREES - WE DO NOT COME HERE TO SEE FOREST IN FRONT OF OUR HOMES - WE WANT TO SEE THE LAKE.

What about Table Rock Lake is most important to you? THE VIEWS AND EASY ACCESS TO THE WATER.

What is one thing that could be done to improve the lake? TELL THE "CORE" TO LIGHTEN UP ON SHORELINE MANAGEMENT. WE ARE SURROUNDED BY FORESTS - IT'S THE OZARKS - WE DON'T NEED ~~SUCH~~ SUCH THICK FORESTS BY THE WATER.

Additional comments on the Master Plan Revision or about issues that should be studied:

TOO MANY DEAD TREES ON SHORELINE - FIRE HAZARD - TOO MANY CEDER TREES - FIRE HAZARD.

NEED MORE PLACES TO EAT ON THE WATER
NEED MORE BOAT DOCKS - A BETTER MIX.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Maintain current
LAKE CLEANNESS, Less Corp Rules & Regulations
listen to the people

MORE BOAT RAMPS - DEEPER AND HAVE DOCKS
NEXT TO THE RAMPS,

What about Table Rock Lake is most important to you?

MAKING Private Docks
MORE AVAILABLE TO PEOPLE ESPECIALLY IF
PEOPLE ALREADY HAVE THE RED DOCK ZONE,

LET PEOPLE BE ABLE TO CLEAN THE SHORELINE
MORE - GARAGE & DEAD TREES - ALLOW TO REMOVE WEEDS
IN ORDER TO BE ABLE TO REMOVE TRASH.

What is one thing that could be done to improve the lake?

Prevent sewer/septic
from Springfield and other communities going
into LAKE DURING FLOODS AND ALL TIMES!

Additional comments on the Master Plan Revision or about issues that should be studied:

REOPEN CLOSED PARKS
NO WAKE AT NIGHT
HIGHER WATER LEVEL
STOCK LAKE WITH MORE BASS/CATFISH

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

I am interested in participating in a or some focus groups as a representative of the general public.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Cleaner water;
septic tank restrictions (sewer system); more
green space around shoreline with trails;
campgrounds; limit on size of motors;
limit number of fishing tournaments

What about Table Rock Lake is most important to you? Clean water

What is one thing that could be done to improve the lake? Stricter guidelines
on septic tanks

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Is the Corps responsible for cutting down
trees that died during recent floods & that
are located below Corps line on shores?

Thank you for letting home owners & lake users
the opportunity to provide suggestions.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MTTRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I appreciate the quality of life at Table Rock. There are restrictions in place for shoreline invasion so that vegetation masks much of the development around the waters edge. I hope that it is possible to maintain this quality and balance knowing that there will be an increase in popularity of this beautiful area.

What about Table Rock Lake is most important to you? Water quality and water pool levels. As development increases so do the demands on the water supply and electrical demands with the increase in droughts throughout the country. The decrease in rivers & lake levels across the nation it is important for a forward thinking process for balance or expanded development vs taking water levels and water quality. Improved guidelines for septic systems have helped with water quality however still concern with sewage and farm pollution.

What is one thing that could be done to improve the lake? Shoreline needs some TLC with trash clean up and downed trees from past flooding.

Additional comments on the Master Plan Revision or about issues that should be studied:

Many areas the Eastern Red Cedar has crowded out other species of trees and vegetation. A forest fire would be devastating to the area. Better management of these trees.

Limitation of size of boats. The wake created by boats is damaging to the shoreline.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/lrmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clean water

What about Table Rock Lake is most important to you?

The beauty and peaceful environment of the Ozarks. And the beautiful lake

What is one thing that could be done to improve the lake?

Limit the use of Surf boarding in narrow channels of the lake. Surfing not only is damaging to boat docks it is washing in to the shore line.

Additional comments on the Master Plan Revision or about issues that should be studied:

Due to the floods of 2008 + 2011 a lot of trees have died and will eventually wind up in the lake. the next time we have high water these dead trees should be allowed to be cut down and burned to keep them out of the lake.

I know this is hard to control, I live on King River arm of the lake and during high water we get a lot of trash as well as chicken litter coming down the lake.

I have pulled tractor and truck tires as well as a 6' cable reel out of the lake.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/ablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the

How would you like to see Table Rock Lake in 20 years?

As close to like it is now, with 2 exceptions: (1) Dead trees + dead, rotting bug infested brush home owners should be allowed to remove without penalties as long as shown to be dead. (2) Large CRUISER boats should not be allowed to create wakes that can capsized smaller boats like on LOZ, this is dangerous. (3) Home's right on water like LOZ should not be allowed.

What about Table Rock Lake is most important to you?

Water clarity that is safe for swimming + water use and good for fishing.

What is one thing that could be done to improve the lake?

Continue fish habitat planting. (Anything to help fishing) but at a reasonable limit on number of fishing contacts the many clubs do each year.

Additional comments on the Master Plan Revision or about issues that should be studied:

Why do organizations/businesses/resorts etc get by with more freedom to circumvent the rules than anyone else - like home owners? I know money talks but if rules are established against home owners to protect the lake even, then the same rules should apply to those with the money.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Like it is now
but with better water clarity

What about Table Rock Lake is most important to you? Boating and swimming

What is one thing that could be done to improve the lake? Improve the water
clarity

Additional comments on the Master Plan Revision or about issues that should be studied: _____

I would like to see more restaurants/ice cream
shops on or near the water.

Ways to minimize cruiser wakes

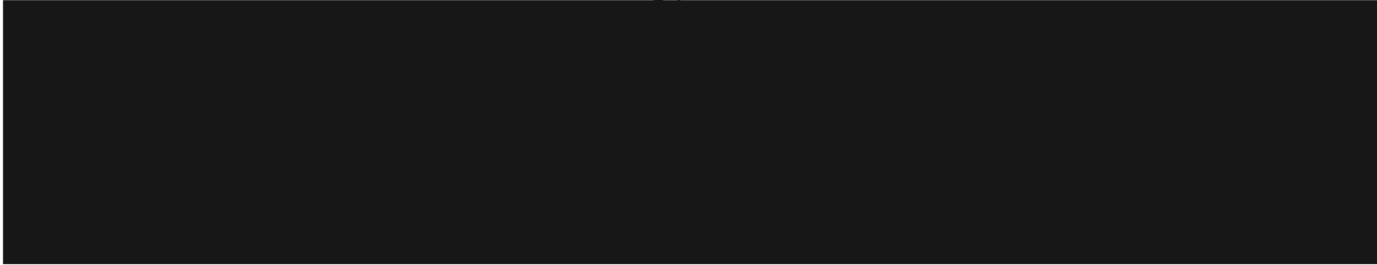

Shoreline management allowing mowing to the lake

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? THE WAY IT WAS IN
TERMS OF WATER QUALITY 20 YEARS AGO. I WOULD LIKE TO
SEE FISHING AS ABUNDANT AS IT WAS 20 YEARS AGO.

What about Table Rock Lake is most important to you? WATER QUALITY WHICH ENABLES
TO BETTER, SAFER, HEALTHIER HUMAN ACTIVITIES SUCH AS SWIMMING, FISHING
AND BOATING.

What is one thing that could be done to improve the lake? IMPROVE WATER QUALITY.
EVERYTHING ELSE TAKES NEXT TO THAT ISSUE, AND EVERYTHING POSITIVE
AND FEASIBLE STEMS FROM THAT ISSUE.

Additional comments on the Master Plan Revision or about issues that should be studied:
WHAT ARE THE PRINCIPAL CONTRIBUTORS TO WATER QUALITY DEGRADATION
IN THE "REGION" NOT JUST ON OR NEAR THE WATER'S SURFACE AND
PERIMETER OF THE LAKE ITSELF.

HOW CAN THE REGIONAL & TRIBUTORY CONTRIBUTION TO WATER QUALITY
DEGRADATION BECOME ENAGED IN UNDERSTANDING THE ROLE THEY PLAY
IN DEGRADING THE LAKE. AS WELL AS TO THE DEGREE TO WHICH IT IS IN THEIR
BEST INTEREST, IN BECOMING ACTIVE PARTNERS, IN LOSSING AND DEMONSTRATING
THOSE FACTORS IN SEEING THE LAKE AS A REGIONAL ECONOMIC ENGINE AND ACTIVITY
AND ECOLOGIC JEWEL TO BE PRESERVED AND PROTECTED FOR FUTURE GENERATION.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years?

Cleaner water -
shoreline - not too much boat traffic

What about Table Rock Lake is most important to you?

Clean water - boat traffic - SAFETY

What is one thing that could be done to improve the lake?

Limit boat speed - wake boarding - tubing
allow home owners to clean up
shoreline after flooding - dead trees

Additional comments on the Master Plan Revision or about issues that should be studied:

I appreciate the opportunity to provide
input. We have lived on the lake for over 20 years
and the natural setting and beautiful
water & vistas have been very important to
us.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District. P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? *By keeping the beauty of the lake as is. Not much development, clean water, less pollutants, boat friendly - small boat friendly. Not to have our lake turned into a lake of the Ozarks. Limited fishing tournaments, especially in the spring.*

What about Table Rock Lake is most important to you? *Each year it seems like the clarity of the water is getting less and less. It's being the water standard back to where it used to be. I don't want this lake to turn into a lake of the Ozarks.*

What is one thing that could be done to improve the lake? *If you could impose a regulated boat length, 40 ft maximum and one that have small boats are tired of being swamped with big boat wakes. This is a fishing & pleasure lake, not a lake for ocean going vessels.*

Additional comments on the Master Plan Revision or about issues that should be studied: *Avoid access to spawning areas in the spring. These fishing tournaments are getting out of hand. I know it's all about the money, so the fish have to suffer for greed. Keep the land areas beautiful. Limit boat deaths and development. Preserve the beauty of the Ozarks is being so fast. Maybe add a few more water friendly restaurants.*

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? AS BEAUTIFUL AN AREAS IT IS NOW WITH CAREFUL MANAGEMENT AND CONTAINMENT OF THE PEOPLE PLACES AND SERVICES ON THE WATER AND THE WATERFRONTS SO THE POPULATION AS IT GROWS KNOWS THE RULES AND WILL PROTECT THEIR AREAS AS THEY BECOME MORE FRAGILE WITH THE EXPECTED GROWTH.

What about Table Rock Lake is most important to you? THE QUALITY AND THE LEVEL OF THE LAKE AND ITS WATER SOURCES.

What is one thing that could be done to improve the lake? WITH THE IMPROVED WEATHER SERVICES AVAILABLE LAKE LEVELS COULD BE HELD TO MAXIMUM AND MINIMUM LEVELS TO PROVIDE FLOOD AND DROUGHT CONTROLS WITHOUT LOSING THE ABILITY TO GENERATE POWER AND MAINTAIN CLEANER WATERS.

Additional comments on the Master Plan Revision or about issues that should be studied:

- SIZE AND HORSEPOWER LIMITS (AS WELL AS NOISE) ON POWER BOAT USAGE.
- MORE INFORMATION MONTHLY ON THE CORPS WEB SITE ABOUT EVERYTHING.
- ANNUAL FUNDING INFORMATION FOR PARKS & CAMPSITES ON THE WATER.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Just as it is today - I really don't want another Lake of the Ozarks.

Bars - restaurants in abundance and star the party scene.

What about Table Rock Lake is most important to you?

Keeping the water as clear as is possible. Table Rock is a beautiful lake let's just keep it that way.

What is one thing that could be done to improve the lake?

Additional comments on the Master Plan Revision or about issues that should be studied:

We have been noticing the size of boats on the lake. It seems to us if a boat is large enough to put on the ocean - it's too big for Table Rock. We feel that it is dangerous for smaller boats and jet skis.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? MORE STABLE LAKE LEVEL.

ALLOW MORE WAYS FOR STAIR ACCESS TO ROCKS - NOW ACCESS LIMITS OLDER PEOPLE'S ABILITY TO GET TO ROCKS

What about Table Rock Lake is most important to you? ACCESS TO ROCKS!

What is one thing that could be done to improve the lake? MORE STABLE LAKE LEVEL

Additional comments on the Master Plan Revision or about issues that should be studied:

TABLE ROCK IS A FEED LAKE BUT BANKS ARE STEEP. IF YOU HAVE A PROBLEM WITH STAIRS BELOW FLOOD LEVEL DESIGN SOME THAT WOULD BE ACCEPTABLE - YOU WOULD

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Cleaner water with controlled access.

Please do not let it become "Lake of the Ozarks"

What about Table Rock Lake is most important to you? _____

Safety! It is becoming too wild, due to the numbers of fast, motor operated, jet propelled craft and very large cruisers.

What is one thing that could be done to improve the lake? More control over who operates all pleasure craft. Most operators do not understand the basic "rules of the road" Too many operators under the age of 16.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

The Water Patrol Dept. is stretched too thin. Establish an auxiliary, volunteer, force to help teach a basic boating course and help maintain order on the lake. Twice this past year I was forced to drastically change speed or course to compensate for a non-attentive young operator.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take on extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? More beautiful and environmentally safe than what it is today!

What about Table Rock Lake is most important to you? Septic tank emptying into the lake and not being maximized to "strict enforcement." Retiring here 16 years ago because of the lake's beauty, how unfair of others not holding to land requirements for the lake's full potential resources. This matter should be in the fore front of all ecological managements identified with.

What is one thing that could be done to improve the lake? Not one, but many starting with the most important one above.

Additional comments on the Master Plan Revision or about issues that should be studied: The cutting of trees along the lake. Even higher taxes to hire more enforcement officers to protect land stewardship, and over seeing no building on corp property. The clearing of land along the lake to beautify homes along the lake is a sad sight to see, knowing that they will probably never get caught.

"P.S." How is this "Master Plan," going to take place with corp and many being so understaff?

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MATRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

maintain shoreline
buffer zone as in today
and enforce anti-protection regulations

What about Table Rock Lake is most important to you?

Water quality
and maintain the shoreline by not
allowing encroachment on natural
appearance

What is one thing that could be done to improve the lake?

Limit size
of boats west of Kasperling area bridge
due to reduced width of lake -

Additional comments on the Master Plan Revision or about issues that should be studied:

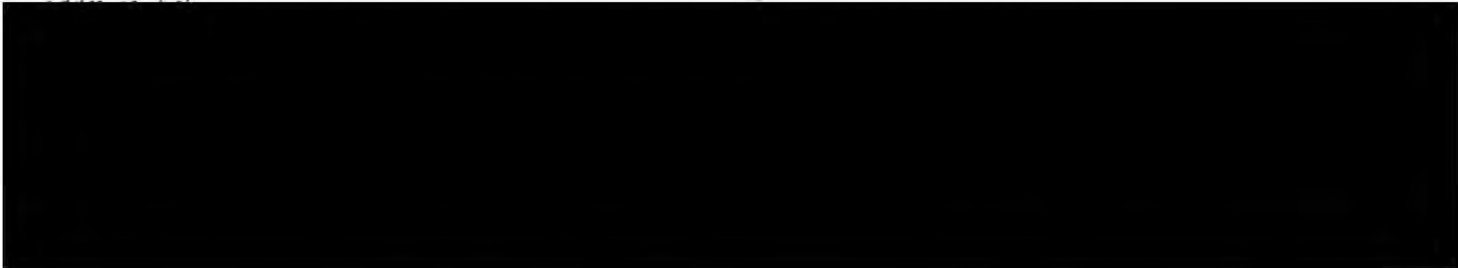

Reasonable speed limits on all types
of watercraft -

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

I'm 78 in 20 years I will be 98. I would like to see some changes right now. Mainly, water level should not go below 9.10 so we could have fishing in Flat Creek area year around. I have a slip in a dock on Flat Creek by the bridge and can't get my boat off the slip and can't even fish off the dock.

What about Table Rock Lake is most important to you?

Clean water so Springfield don't dump their sewage in it anymore. Keep water level at 9.10 or above. Other than these two complaints, I think the corps has done a great job.

What is one thing that could be done to improve the lake?

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203. Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

IT IS VERY GOOD NOW CLEAN WATER
CONTROL SHORE DEVELOPMENT. GIVE SOME UNDEVELOPED BIRDS.

What about Table Rock Lake is most important to you?

ITS ACCESSIBILITY AND
RECREATIONAL USE ALLOW BETTER ACCESS TO DOCKS BUT
CONTROL AND LIMIT THE NUMBER OF DOCKS. ALLOW US TO BUILD
A CONCRETE SURFACE TO THE DOCK

What is one thing that could be done to improve the lake?

LIMIT SPEEDS OF BOATS

Additional comments on the Master Plan Revision or about issues that should be studied:

GET RID OF THE CEDARS ON SHORE LINES, THEY ARE TAKING OVER
CUT OFF OR DOWN THE TREES IN THE WATER, THEY ARE A SAFETY
HAZARD

ALLOW US TO ESTABLISH NO WAKE ZONES IN SMALL Coves

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Large areas of natural forest, well managed, possibly whole mountain ranges left undeveloped. It will be MUCH MORE expensive to UNDO bad development and possibly some areas would NEVER recover. I would like our grandkids enjoy the lake as much as we do.

What about Table Rock Lake is most important to you?

We do pleasure boating with friends and family. We are respectful of other boaters. We would like to see a lake patrol established especially during summer season. This should limit problems with people trashing the lake and drunk boaters.

What is one thing that could be done to improve the lake?

Possibly some aeration. It is my understanding - oxygenated water is healthier for wildlife and health of the lake.

Additional comments on the Master Plan Revision or about issues that should be studied:

We are new to the area, however Fox Lake, IL is an area we are from. It is a crowded, congested, abused lake system. Communities are doing their best to control and improve the lakes. But is a much more developed area, and an hour from Chicago so the lakes get overused in the summer and drunk boaters is always a challenge. We can prevent over crowding and keep safety by limiting development, imposing STIFF fines for pollution (garbage dumping) and drunk boaters. Lets keep the lake more rural and enjoyable.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterolan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Less polluted & no more congested than it is now.

What about Table Rock Lake is most important to you? Beauty - especially undeveloped shoreline

What is one thing that could be done to improve the lake? Limit boat speed & size of "muscle" boats

Additional comments on the Master Plan Revision or about issues that should be studied: Number of docks/slips should be particularly restricted in small coves. Also, fishing is becoming more difficult over all due to boat congestion & wakes.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? IN TWENTY YEARS I WOULD LIKE TO SEE TABLE ROCK LAKE A CONTROLLED LAKE OPEN TO ALL. IT WOULD HAVE RULES & REGULATIONS THAT INSURE GOOD WATER QUALITY.

What about Table Rock Lake is most important to you? CLEAR CLEAN LAKE WITHOUT POLLUTION.

What is one thing that could be done to improve the lake? ONE THING THAT I BELIEVE WOULD IMPROVE THE LAKE IS TO HAVE REGULAR YEARLY MEETINGS ABOUT THE LAKE WHERE PUBLIC INPUT AND OPINION WAS WELCOMED.

Additional comments on the Master Plan Revision or about issues that should be studied:

I HAVE BEEN IN THE AREA THIRTY THREE YEARS AND WATER QUALITY AND CLARITY APPEAR TO BE GETTING WORSE. I WAS ABLE TO SEE THE BOTTOM WHILE SWIMMING. NOT ANYMORE! I HAVE BEEN A REAL ESTATE APPRAISER FOR TWENTY FIVE YEARS AND I BELIEVE THE SEPTIC SYSTEMS AND RUNOFF FROM SUBDIVISIONS BEING BUILT ON ROCKY AREAS ARE THE BIGGEST PROBLEM.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision
and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Clean water, Good fishing, Parks, MORE
Areas for Public Day Use - for Family Fishing
ON SHORE / Dock for fishing only. WALKING TRAILS, LIMIT
THE SIZE (LARGE) BOATS & 20' MORE BOAT ACCESS
Ramps IN THE KUMBERLY CITY AREA, WATER LANDRY, SKIING LIM,
TO A SPRING SAFE AREA

What about Table Rock Lake is most important to you?

WATER RECREATION, FISHING, SHORELINE BEAUTIFUL
Economic Impact on The Area, The Kindness of
All The People in The Area - People Move (CRATING) HERE BECAUSE
of THE BEAUTY of WATER USE.

What is one thing that could be done to improve the lake? MORE PUBLIC USE AREAS
IN KUMBERLY CITY - PROVIDE AN AREA FOR FISHING TOURNAMENTS
TO BE HELD (Economic Fulfillment would be great) - SEPTIC TANK
CONTROL / IMPLEMENT

Additional comments on the Master Plan Revision or about issues that should be studied:

How THE PART of KUMBERLY CITY IS OPERATED - WITH NOT
KNOWLEDGE PARK PASSES FOR RAMP USE - MORE PROTECTED
CO-OPERATION w/ CITY - They Care Less About The CITY.
OMIT THE MARINA BUFFER ZONE - PROVIDE A FACILITY
OR LOCATION FOR A PERMANENT FISHING TOURNAMENT RAMP, PAVILION,
WOULD BRING BIG MONEY INTO THE AREA - MAJOR IMPROVEMENTS
TO INDIAN POINT MARINA.

* Let Local Staff Have more input on How The Lake is Run. NOT

How would you like to see Table Rock Lake in 20 years? Clean, clear water
Clean shore line Trash dumpsters available in "hard" use
areas (also more water than it has right now ☺)

What about Table Rock Lake is most important to you? Fishing & Kayaking quality

What is one thing that could be done to improve the lake? Put trash containers
where there is heavy use — levy hefty fines for people
who break the trash laws

Additional comments on the Master Plan Revision or about issues that should be studied: I live
across the flat creek bridge, to the northeast (north side of creek). In the spring/summer
fall months, people camp on this beach area next to the bridge. They bar up the beach with
their cars — get stuck in mud + not a lot of us have to listen to the revving up of the engines etc.
+ they get them out. The beaches are a trash dump — everything from broken glass
to dirty diapers along the lake shore. The stench is just plain awful. Surely this area
could be monitored. A dumpster might help? but a camera + lines might be
better. I love this lake, but this problem is on going + I really don't
know what I can do about it — except move.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

AS IS

What about Table Rock Lake is most important to you?

1) THE WILD LIFE IN AND AROUND IT

What is one thing that could be done to improve the lake?

WAKE DISTANCE FROM DOCKS IN REST
WILD LIFE HABITAT AREAS

Additional comments on the Master Plan Revision or about issues that should be studied:

- 1) INSPECTION OF SEPTIC SYSTEM AROUND THE LAKE
- 2) SPEED LIMIT ON LAKE
- 3) LIMIT ON SIZE OF MOTORS ON BOATS.

NO HUNTING ON CAMP GROUND!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Not crowded like Lake of the Ozarks - Large Boats create several negative issues. - They create large waves that are dangerous to fishing boats in coves. - They increase shoreline erosion. - They Rock Boat Docks causing stress damage to structure + safety issues to people on the dock causing falls to elderly + small children - I've seen it happen. -

What about Table Rock Lake is most important to you? SAFETY - It's hard to see around large boats not being able to navigate the water I have to navigate. - Compare Accident Records between Table Rock Lake and Lake of the Ozarks. - Again, limit the size + number of large boats. - Even the Arabian Belle doesn't leave large wakes to deal with. -

What is one thing that could be done to improve the lake? I Enjoy the shore line clean-up concept. - Keep it active. +/or Increase the number of teams to help clean up. - Send out trail leaders and have several drop-off spots on the lake.

Additional comments on the Master Plan Revision and on issues that should be studied: I would like to see more Boat inspections on Floating "meal wagons" available to boaters. - This could also be a way to check on Boat Safety + offer inspections by placing a Water Patrol Officer on the Front Venue every week + then to Evaluate Rules of Boating, i.e. Equal # of Life Vests per people on Boat, Fire Extinguishers Available, etc. -

Thank You

To: Coburn, Dana O SWL

Subject: FW: [FWD: Table Rock Lake Master Plan Revision--Please Save the Date for Agency Scoping workshop, 28 November 2012 (UNCLASSIFIED)]

Dana, Please see my comments in RED in your original email below.

Three questions we would like to ask to help us focus on concerns and issues around the lake:

How would you like to see Table Rock Lake in 20 years?

We should position Table Rock to be the cleanest lake in America, recognized for exceptional recreational activities, world class fishing, camping and marina facilities. This will require lots of work to clean up old septic systems around the water, continued control of docks and shoreline management and upgrading and addition of camping facilities.

What about Table Rock Lake is most important to you?

I like to feel safe when going on the water. This means exceptional water quality where I don't have to worry whether my family will become sick after swimming. I also want to be able to swim/boat/fish without worrying about larger, faster boats creating huge wakes and lots of noise. Simply, we cannot allow Table Rock to become Lake of the Ozarks where it's life-threatening every time you go out. Table Rock should remain Family Friendly.

What is one thing that could be done to improve the lake?

Limit the size and speed of some boats - especially the cigarette-type boats which create noise, endanger other boats and are of little use other than going fast.

Nov 29, 2011
Cassville, Mo

To Whom It May Concern:

I am writing this letter because of the frustration I have experienced for the past 16 years trying to run a business. I purchased 17 acres of land in 1976 with approximately 800 foot of Table Rock Lake frontage. I had been in the process of developing a resort for many years and opened it on a permanent basis in 1996. I now have a full basketball court, a volleyball court, a batting cage, golf carts, other land facilities and access to water sports. We have a lodge where at times as many as 42 individuals have resided for vacation time. We do not have individual units but the lodge is divided so that seven individual families could have their area. As a retired teacher my income is not great but I have paid taxes on between \$15,000 and \$20,000 each of the 16 years of the resorts existence.

My concern is with the access that is provided by the Corp of Engineers for my resort. It is my understanding that a resort is entitled to 1 ½ slips per unit. I have never inquired as to how many slips would be provided because there is not a place for me to have a private dock because Big M marina has all the areas in Rock Creek tied up with their satellite areas. I have done the following to try and cope with these existing rules.

1. I loaned Denver Dixon money to build a dock that could be used for the resort.
2. I have tried to rent enough slips to accommodate the resort.
3. I have contacted the Corp about the problems.

Below are some of the problems that have impeded the development of my resort.

1. The resort has been limited to two slips by Big M.
2. The resort was not able to access its slips from the shore because of high water for a period of more than three weeks.
3. Big M has received many complaints about the large numbers of people from the resort using the dock.

Since the inception of the resort in 1976, individuals have become more involved. Some of these individuals have purchase lots on the 17 acres of the resort and will serve on a board of directors for a trust set up to run the resort upon my death. Five of these individuals rent a total of 8 slips from Big M on a boat dock in Rock Creek. It is my contention that the rule that an individual can't have a boat dock within 3 road miles of a marina devalues my land and causes undue hardships. There are several boat docks closer by water to Big M than the one we have to rent in Rock Creek.

I realize that this meeting is for a more general public and that my situation is much more unique. Please let me know who I can contact to further discuss my problems.

Sincerely,

Table Rock Lake Master Plan Revision and Environmental Assessment

Thank you

Request for a Shoreline Inspection

To: M4TRMP <M4TRMP@usace.army.mil>

Subject: Request for a Shoreline Inspection

Date: Sat, Dec 1, 2012 5:50 pm

Attention: U.S. Army Corps of Engineers
Table Rock Lake

To Whom It May Concern:

We are submitting this formal request for a shoreline inspection of our property for the purposes of installing a boat dock. Our 25 acre property is located in the town of Golden, Missouri, in the Southeast section of Barry County, approximately three miles due south of Shall Knob. It is the same property scheduled to be utilized for the Carroll Electric power station crossing.

We very much appreciate your consideration.

For assistance in locating the property more precisely, the Legal description is as follows:

EXHIBIT "A"

Tract 036-001R1

A tract of land, 100 feet in width, located EXCLUSIVELY in and being a part of the Southwest Quarter of the Northwest Quarter of Section 36, Township 22 North, Range 25 West, Barry County, Missouri, the center line of which is described as follows:

Commencing at the West Quarter corner of said Section 36; thence North 02°23'31" East along the West line thereof a distance of 326.50 feet; thence South 87°36'29" East along Grantor's South property line a distance of 30.43 feet to the Point of Beginning; thence North 03°01'10" East a distance of 270.47 feet to a point designated as and hereinafter referred to as Point "A"; thence North 88°38'00" East a distance of 421.37 feet to a point designated and hereinafter referred to as Point "B"; thence North 26°31'53" East a distance of 755.74 feet, more or less to a point on the North line of said Quarter, Quarter Section, containing approximately 139,089 square feet or 3.19 acres, more or less, EXCEPTING THEREFROM any part of said described 100 foot tract not in and being a part of said Quarter, Quarter Section.

It is further stipulated and agreed that the outer boundaries of the above-described 100-foot tract of land shall be lengthened or shortened as necessary to begin and end on Grantor's property lines as does said centerline.

Also the additional rights to install down guys and anchors within that part of a circle with its center at said Point "A", and extending in a Northerly direction a distance of 75 feet.

Also the additional rights to install down guys and anchors within that part of a circle with its center at said Point "B", and extending in a Southwesterly, Southerly, Southeasterly and Easterly direction a distance of 75 feet.

ALSO:

Tract 036-003R2

The West 74.00 feet of the South 978.60 feet (1008.16 feet per deed) of the Northwest Quarter of the Southwest Quarter of Section 36, Township 22 North, Range 25 West, Barry County, Missouri, containing approximately 72,356 square feet or 1.66 acres, more or less

Please feel free to contact us via email, telephone or U.S. mail.

Thank you.

4600 State Highway 165
Branson, MO 65616

[Redacted]

I appreciate the US Corps conducting the meetings in regard to the Table Rock Master Plan Revision. I was not able to attend any of this week's meetings.

I own three lots and have a home at 249 hunters Glen Court in Stone County. The lake frontage and my home are on T-22 - R23 6 Red Zone 126.

Red Zone 126 contains two 20 slip docks. There is not enough red line shore space for more docks in this cove. In addition, currently the only land access to this cove is through our gated community.

Increasing or adding another red zone to this cove will cause some unnecessary erosion, added boat noise, and destroy shore line beauty for those that own land around this cove.

Thank you,

[Redacted signature block]

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Much as it is today
with limited commercial development

What about Table Rock Lake is most important to you? peacefulness

What is one thing that could be done to improve the lake?

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: [\[redacted\]](#), Website: [\[redacted\]](#), Written

How would you like to see Table Rock Lake in 20 years? _____

*Preserve the natural resource and shoreline
and provide recreational opportunities.*

What about Table Rock Lake is most important to you? _____

Good water quality

Water sports

Preserve fish habitat

Keep shoreline clean

What is one thing that could be done to improve the lake? _____

Improve and maintain more launch facilities

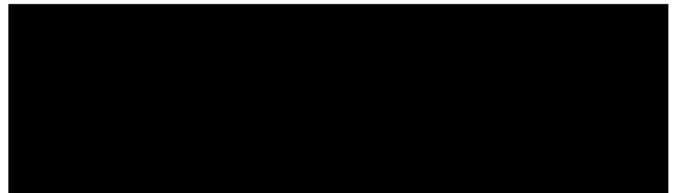

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Continuously monitor water purity

safety

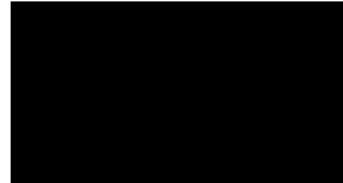

Type of fish and their habitat

Attached please find a **Table Rock Master Plan Revision and Environmental Assessment** form.

Thank you,

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I would like to see Table Rock maintain quality while still allowing it to be accessible. The increased usage does not have to damage the ambiance of the lake if the Corps of Engineers will restrict certain activities which are excessively disruptive and damaging:

a) **Loud Boats** – There appears to be a trend to add "Captain's Calls" to boats which bypasses the muffler. These boats disproportionately interfere with the enjoyment of the lake. Many times you can hear one of these boats coming five miles down the lake. Captain's Calls should be prohibited and the Corps should set a decibel limit on noise coming from water craft.

(b) **High Speed** – I would suggest that the Corps place a speed limit on the lake of 50 mph at least in the smaller areas of the lake west of Kimberling.

What about Table Rock Lake is most important to you? Water Quality and Noise Levels.

What is one thing that could be done to improve the lake? Place decibel limits and speed limits on the lake.

Additional comments on the Master Plan Revision or about issues that should be studied.

I believe the concession contracts which don't allow community docks within a distance of the commercial boat docks and the rules by which satellite docks are established are unfair and operate to grant monopolies which under the rules generate excessive profits. The concessionaires to build a dock for \$6,000.00 per stall which they then rent for \$1,200.00 per year. Even considering expenses this could amount to a 20% rate of return that is created by the Corps regulations. I would suggest that the rates being charged for satellite docks have some reasonable correlation to the investment.

The Corps should allow boat slips to be rented to individuals so long as the owner does not own more than two slips and they are rented for a reasonable amount. In the community dock I am in, we have three retired individuals who because of their age and infirmity are unable to utilize their boats. They don't want to sell their slip because if they do they will have a problem selling their home without a slip. The dock assessments are \$400.00 per year. This is a large amount for these individuals. If they could rent their slip to recover their assessment that would be helpful.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? More tourist development in the Branson/Dam area - but restricted development in the up-river areas (Kings and White).

clean and un-polluted with limited amount of large boat traffic. Quiet in up-river areas.
In other words - NOT like Lake of the Ozarks!

What about Table Rock Lake is most important to you? clean water, well-managed shorelines void of erosion, wildlife habitat protection.
Diversified tourist & visiting opportunities - bustling entertainment in Branson areas for those that desire that, yet areas of peace & quiet for those that desire that as well (up-river areas).

What is one thing that could be done to improve the lake? Revise policies for lake level management - which affect shorelines and private & commercial properties and businesses.

Additional comments on the Master Plan Revision or about issues that should be studied:

I think the Corps should show more concern for citizen's property - during the last flood it was personally told on the phone, as water inched closer to our home, that people's personal property was not a primary concern. This lake depends on the people who live around it to keep it safe and natural - and - the whole economy of the region depends on the quality of the lake and its surrounding land areas and property.

How would you like to see Table Rock Lake in 20 years? I would like to see more growth of the areas around Table Rock Lake. Growth in businesses - homes - to become one as a whole - Lake - recreation = Growth. Less Government restrictions to invite Growth. There's not really anything that promotes Table Rock Lake - It's just left to stand on its own, promoting it would bring more people - families - Say from Kansas City - St. Louis - Oklahoma City - Wichita - more people = more income for area = Corp.

What about Table Rock Lake is most important to you? What brought us to TRL for years and to eventually buy a home is the beauty of the lake - the clear water - recreation for family: friends - boating - eating - fellowship.

What is one thing that could be done to improve the lake? make it more accessible to having docks!

Additional comments on the Master Plan Revision or about issues that should be studied: There's quite a racket on owning a dock or even a dock permit. We have tried for years to find a dock (ownership). There is even a dock close to us - not being used - deteriorating and the owner knows he has a premium asset. Docks sell for \$25,000.. that's ridiculous - only because there is such a high demand due to the Corps not issuing permits - due to a master plan back in the last 20 yrs. Times have changed and dynamics have changed - Would like to see less issues in obtaining a dock. Would like to see areas open up so families could have dock & swim platform - fellowship on the dock.

Thank you for your time! interest!
Jan

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? The same as it is now -
Clean, safe & less crowded than Lake of the Ozarks

What about Table Rock Lake is most important to you? the natural beauty &
protection of wildlife

What is one thing that could be done to improve the lake? Can't think of anything

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203 Fax: (501) 324-5605 Email: _____

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

We would like to see it all it is now, beauty wise

What about Table Rock Lake is most important to you?

The cleanliness of the water & shore lines - The security of the enforce ment of traffic law compliance.

What is one thing that could be done to improve the lake?

Better jet-ski controls & defined rules which are clear to & consistent for boat & dock owners

Additional comments on the Master Plan Revision or about issues that should be studied:

Although we don't live full time at the lake, it seems that it is difficult to accomplish tasks when dealing with the lake as there is always "another step" which needs to be taken that was never explained initially. If there was written step by step protocols, it would surely make it easier for those trying to accomplish their objectives.

Table Rock Lake Master Plan Revision
and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? The delight of being a Table Rock lake is that, although many people live near it, their substance is minimized by terrain & forest. Hopefully, in 20 years, those forests will continue to guard the shoreline and the water in the lake will continue to have the quality it has now.

What about Table Rock Lake is most important to you? Most important is that water quality is maintained as demands on the area continue to increase. The lake is being victimized as much by the effects of global warming, caused more by humans, than by natural cycles. Maintaining balance against the demands on the ecosystem will be extremely difficult, but might be achieved.

What is one thing that could be done to improve the lake? Demanding that those with lake front property police their properties and remove trash and the effects of flooding (if it ever happens again). Dead timber that could return to the lake & do damage, should be removed from the shoreline.

Additional comments on the Master Plan Revision or about issues that should be studied:

The Quivern Road Cedar should be studied in various uses. The removal of these trees should be allowed unabated.

Also, there should be limits on the size of boats on the lake. Boats in excess of 70' belong on the ocean, not Table Rock Lake.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? NOT MUCH DIFFERENT
THAN IT IS NOW. WE DO NOT WANT IT TO LOOK LIKE LAKE OF THE OZARKS (BROWN
WATER, OVER-DEVELOPED, HIGH WAGES TOO BIG OF BOATS).

What about Table Rock Lake is most important to you? WATER QUALITY.

What is one thing that could be done to improve the lake? RESTRICT THE SIZE OF BOATS.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 374-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Limited additional docks added as the natural beauty of the lake is already being compromised.

Some coves need mandatory "no wake" restrictions imposed for safety and shoreline preservation. In Emerald Pointe specifically.

What about Table Rock Lake is most important to you? Beauty (Natural) Water Quality Safety for all users of the lake.

What is one thing that could be done to improve the lake? Limit the use of (or prohibit) wake boats on Table Rock. Any boat with ballast water added is a safety issue for all boaters and a threat to the shoreline from increased wakes.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRVP@usace.army.mil Website: <http://www.swl.usace.army.mil/pa/parl/s/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision

How would you like to see Table Rock in 20 years?

For sure water quality is important.

Fishing and wild life

I would like to see the lake used by tourist and the residents. Fishing, Recreation and sightseeing. The area attractions and businesses are here because the lake is here and needs to continue to grow with the area.

What about Table rock Lake is most important to you?

Growth must continue for the area to stay complete with other lakes and recreation areas. The US Corps of Engineers need to continue to restrict and monitor the dock and vegetation.

Fire department access for drafting and fire suppression

What is one thing that could be done to improve the lake?

I'm not sure if it is on the federal level, but one thing that Stone County has, when a house sells the septic must pass a flow test, so as long as it is really checked properly. Should help to keep water quality in the right direction, all towns and cities up stream need to be tracked as well!

Additional comments on the Master Plan Revision or about issues that should be studied:

The country is struggling! The goal should be to help the tourist and lakes area economy not put it in a tail spin.

We may have a plan in 12 months does not help our economy as the fed's state they are going to start printing billions of money to stimulate. Please work with us.

I think government agency are doing great at protecting their jobs and programs.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? *Clean water, good fishing & hunting, nice parks for general public. To Leach Creek clean up closed Corp parks. Many of these are beautiful pieces of property and would make a great park or parkway. The water is not very nice when you go by on the water.*

What about Table Rock Lake is most important to you? *Water quality and the natural beauty around the lake. Respect for boaters & rocks / others property.*

What is one thing that could be done to improve the lake? *Better regulations by the County etc. for septic systems. No boats dumping sewage in lake instead of dumping it. Not allowing developers to knock down all the trees & vegetation on private property overlooking the lake.*

Additional comments on the Master Plan Revision or about issues that should be studied:
Don't know why permits cannot be issued during this study as Corps has all existing zoned areas mapped & plotted. This action may put many people in the work but it will have positive implications in many areas of our local economy.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the

How would you like to see Table Rock Lake in 20 years? A great place to visit
work or live with as little change to the surroundings as
possible.

What about Table Rock Lake is most important to you? Water quality improvements

What is one thing that could be done to improve the lake? set rules
set reasonable rules, publish them for all to see and
follow them.

Additional comments on the Master Plan Revision or about issues that should be studied:

1. Work with counties around the lake to set and enforce
waste water discharge from private land owners systems.
2. Reduce cost to dock owners for electric easements
3. Set a standard noise level that would require all boat engines
to be exhausted under water.
4. Use the help of volunteers to assist Corp employees in monitoring
lake use and report to the proper personnel.
5. Provide trash collection containers at all camp locations.
6. Work with law enforcement for their input.
7. Communicate with permittees by e-mail any known problem that is a
problem they need to be aware of.

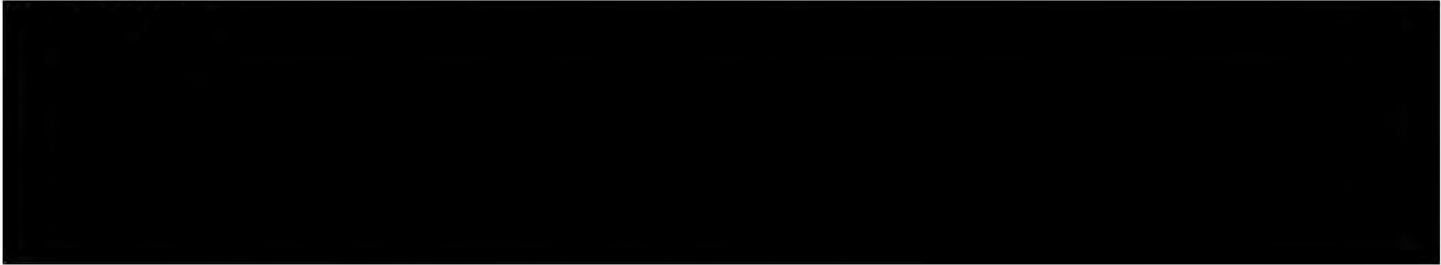

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

What about Table Rock Lake is most important to you? Clear Water. In the 25 years that I have lived here the quality of the water has become cloudy. It was very clear when we first moved here.

What is one thing that could be done to improve the lake? Have the Conservation Dept. to start stocking the lake. 25 yrs ago we could always catch fish. Now I can go out for hours and never get a bite. Specially Bass.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision
and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clear water, minimal
invasive species, not overcrowded with large boats
that create damaging wakes. I would also see a lake
which is family oriented without lewd & drunken gathering
of boat in any case. I would like to see a lake whose shoreline
is not overdeveloped with gaudy & outlandish architecture
that does not fit into the setting of these Ozark hills

What about Table Rock Lake is most important to you? The quality of the water and a health environment for
fish and life & people. Unlike lake of the Ozarks, I don't
want Table Rock become known for gathering of people
who display obscene behavior, offensive to family recreation.

What is one thing that could be done to improve the lake? Much greater control over
style of architecture that is appearing on the shoreline. Some kind
of standards should be established that new home builders and
developers must comply.

Additional comments on the Master Plan Revision or about issues that should be studied: I think more study should be made on wake control
across the lake, especially with proximity to docks and
ports. Upgrading of small boat as a real issue

*P.S I attend the public info meeting, 11/28/12, and concluded
that the moderator/opinion solicitor from Carlsbad was a huge failure.
He seemed unable to handle crowd size, lake information, or even
process of gathering inputs. He is an example of wasting limited tax
dollars to well or deluding the expectations of the crowd that night.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? about the same, maybe
a little more commercial use in areas.

What about Table Rock Lake is most important to you? It is usable by most
people. Clean water. Allow people to rent or let someone use
unused boat slips. A little less regulation on safety rails on decks.
Some of the required railings and other regulations just make boating
harder for no reason. In the case of some railings it makes it more
difficult to get in a boat and therefore less safe.

What is one thing that could be done to improve the lake? Keep a limit on large boat
slips. The large semiplaning cruisers, like SeaRay, Carver, Blowerboats
are the boats that make the lake rough. This in turn pushes people
to bigger boats. The cruisers are what destroyed Lake of the Ozarks.

Additional comments on the Master Plan Revision or about issues that should be studied: I
attended the RSHS meeting. It was a complete waste of time. I did
not hear one positive comment from the crowd. There was no info given
about possible changes, so that we could comment. If we don't know what
you are thinking about, even in general terms, we can't give input. All we saw
was another government agency wasting time and money. We had to listen
to a consultant from out of state ask us about our feelings. Members of the
Corps could have passed out or mailed these questionnaires. It sounds
like another waste of our tax money. Have someone work
on this who is from here and knows this area.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203. Fax: (501) 324-5605. Email: TRMMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmmp/plan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Pristine lake with great water quality protected by increased discharge requirements for municipalities, more stringent and limited private dockage regulation, more cooperation between Corps of Engineers and lake front property owners all resulting in improved fisheries habitat, recreational lake use and protection of downstream property.

What about Table Rock Lake is most important to you?

The place where all can be in touch with nature and yet have great recreational opportunities for residents and tourists. This must be protected with water quality and shoreline management programs.

What is one thing that could be done to improve the lake?

Water quality can be assured with: more stringent municipal controls and restrictions on watercraft size (length) and horsepower restrictions.

Additional comments on the Master Plan Revision or about issues that should be studied:

Shoreline Management.

Table Rock lake is 54 years old - Nothing has been done to manage shoreline. Corps should enter into working agreements with lake front owners to manage their shoreline. Removal Dead trees, remove undesirable vegetation and manage the existing forest. This should be a cooperative action not an adversarial one. Corps can't budget to manage all shoreline with the lake front owners.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I would be 90 yrs old but would like to see a cleaner lake. To realize you are working on this with other environmental agencies and yet much more can be done.

What about Table Rock Lake is most important to you? Keep its natural beauty and limit the size of boats (watercraft). Table Rock is not the ocean. Shoreline beauty is very important. Keep improving water quality.

What is one thing that could be done to improve the lake? Cut back on the enormous amount of Bass Tournaments. These sports are out of control. Fish are being killed for sport and many participants are ~~not~~ disregarding NO/wake zones in love.

Additional comments on the Master Plan Revision or about issues that should be studied:
I appreciate the work of the Corps and I'm glad we are not like the lake of the Ozarks.
The large marina's control of what once was our public access (Hickory Marina) we now have to pay to put a boat in or pull out. That is a sore subject for all in this area. We now have to travel to Bitter Milk access. NOT GOOD!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean water quality
trumps all other needs (tourism, economy, recreation, water storage, etc.). All the lakes in Ark. now look like chocolate milk. Also, safety should be a high priority. Sometimes, at busier times, the water is so rough from boat traffic that we've nearly been knocked out of the boat! Boat size & speed may need to be addressed? Number of boats in an area?

What about Table Rock Lake is most important to you? Natural resources & clean water. I mostly like fishing and swimming, but spent most of my life (before we retired here) camping at Big Bay (Forest Service campground). We had tried all other campgrounds on lake & liked it best because more trees & more natural. Also won over other lakes. Also important are hydroelectric power, boating, fishing, & tourism.

What is one thing that could be done to improve the lake? Allowing easier access (on Corp. property) to docks & waterfront. Corp doesn't allow steps or improvements on waterfront without lots of money or jumping thru hoops to get permits! Dock permits should come with easier rules for shoreline alterations/access.

Additional comments on the Master Plan Revision or about issues that should be studied:
When you ask about rules for what is & is not allowed on a path toth water or dock, you get different answers depending on who you ask. The policy as written is too open to interpretation & needs to be clearer, with some specific examples included, on what is or is not allowed. I understand the reasons behind some of the policies, and am all for preservation, but the rules need to be more clear & consistent, and reasonable from both a preservation and ease of use/safety standpoint (rocky & treacherous access areas).

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? A place where you can
SAFELY take your family & enjoy the GREAT outdoors. Boating &
Fishing HAS been IN our family for years. Family Homestead LAND
NEXT to Lake ~~is~~ before there was a lake. Corp Land goes about 1/2 mile
which Big Indian Creek runs into. I would like to make Improvement
Along creek but Red tape Regulations prevent landowner from taking
any Actions - Over grown Brush & wash down, creates great Fire Hazard

(I overheard 1 MAN say, he just wants to be alive, 70 yrs.)
What about Table Rock Lake is most important to you? (LEAN (Family Friendly Area)

Where we ARE NOT over regulated. Great Fishing & Hunting
2) Put Boat into water at my property - NOT A problem now - ...
3) Sub Division Housing is a concern - Overcrowding could cause a problem

What is one thing that could be done to improve the lake? Where creeks Rivers Run into
Lake there is a lot of silt & Gravel Build up - During Low water times
Allow excess to be removed - If not, Fish spawning will be on
dry ground in time. I can make this happen at no cost to Corp. Engine

Additional comments on the Master Plan Revision or about issues that should be studied:

- 1) Open ~~Sexual~~ Sexual Behavior by Homosexuals should be banned on
Table Rock Parks Waters (This is not Family Friendly)
If they have the right to parade it, I have ^{the} right to protest it!!
- 2) Over size boats need to be limited - This is a SAFETY ISSUE.
- 3) We like to camp also. Seems like there is limited camp space.
possible to Reopen some of ~~skit~~ skit down campsite parks
- 4) Properly maintain corp property between water & my property.
is a Big Issue - How can we enjoy it, if we can't touch it.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5505, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tabierock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Good Luck! & THANKS for ASKING!

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to address below

How would you like to see Table Rock Lake in 20 years? IMPROVED WATER QUALITY,
LIMITED BOATS OVER 26 FT IN LENGTH (EXCLUDING
PONTOON BOATS & HOUSEBOATS),
MORE FISH HABITAT AREAS WITH "CEDAR REEFS", IMPROVED
PUBLIC ACCESS POINTS

What about Table Rock Lake is most important to you? PRISTINE VIEWS, CLEAN
WATER, ABUNDANT FISH, CONTROLLING WATER LEVELS
BETWEEN 908 FT TO 925 FT. FLOODING IN 2011 WAS
INEXCUSABLE!

What is one thing that could be done to improve the lake? MORE COMMUNITY DOCKS.
BUT LIMIT NUMBER OF MARINAS TO CURRENT LOCATIONS.

Additional comments on the Master Plan Revision or about issues that should be studied:
CHANGE CLOSED CAMPGROUNDS ZONING, SPECIFICALLY THE
COW CREEK BSA CAMP, FROM HIGH DENSITY USE TO LOW
DENSITY USE.
REDUCE RESTRICTIONS ON SWIMMING AT BOAT RAMP AT
COW CREEK PUBLIC RAMP. WE ARE NOT IDIOTS AND KNOW
HOW TO YIELD TO BOAT RAMP TRAFFIC. ALLOW USE OF
ELECTRIC AND GAS POWERED VEHICLES (I.E. GOLF CARTS) AT
PUBLIC RAMP AREAS. I CAN SEE RESTRICTING 4 WHEELERS
AND DIRT BIKES, BUT LOW SPEED VEHICLES ARE NO HAZARD.
UNLICENSED

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Cleaner water

What about Table Rock Lake is most important to you? The fact that it is a good recreational facility for families and the dam provides electricity to a great number of people.

What is one thing that could be done to improve the lake? Please Please while the water is low - for safety sake - cut off some of the dead trees sticking up everywhere - some cones are almost a hazard - esp for kids on jet skis. Also stop sewage from being dumped into the lake.

Additional comment on the Master Plan Decision or about issues that should be studied? Thank you for limiting the number of boat docks around the lake. Take of the docks is just ruined with one dock after another - it looks horrible. Also please limit the number of condos that can be piled up around the lake if possible.

Thank you also for your ruling of ownership of only two slips on the lake. So many greedy people try to buy them all up for investment and that limits the number of people who live here and want to own one to use.

Dana Coburn,

FYI: The meeting of November 28 was a disaster. Poorly planned for what should have been an anticipated turn out for a subject, so important, that it required the hiring of consultants. And, speaking of the consultants.....He/ they were a joke! That's why people got up and walked out!

The report's on the focus groups earlier that day was stupid and unprofessional, and frankly unbelievable!

But you asked for comments and here are mine which not only reflect myself but many others who are concerned but don't believe their comments will have any impact on your organization!

1. How would I like to see Table Rock Lake look in 20 years?

I would like to see the lake be as clean and pristine as it was before all the unchecked development of the last 20 years. I want its natural beauty unscarred by over development of both commercial and residential facilities. I want to make sure it doesn't look like Lake of the Ozark's presently looks.

2. What about Table Rock Lake is most important to you?

- a. Water quality (no brainer)
- b. Its natural beauty
- c. Its fishing & wildlife

3. What is one thing that could be done to improve the lake?

IMPROVED SAFETY! 1. Limiting the size of boats on the lake. An exception would be house boats. 2. Designating areas for skiing, wake boarding and tubing to nonresidential & commercial parts of the lake.

4. Additional comments:

Commercial Marina owners (not small resorts) have too much power and influence with your organization and it shows blatantly in many of your rules and regulations.

Hunting on the "take line" between the lake and commercial & residential areas should not be allowed! I have found hunters with 300 Winchester Mag's & 30.06's less than 20 yards from my home shooting at deer directly in line with my home and/or dock!

I have had shotgun pellets rain down on my home and dock from duck & goose hunters. No one seems to care as long as the hunters are on Corps ground!

Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?
I would like to see it with a lot of water and a lot of fish. I would like to see it with a lot of water and a lot of fish. I would like to see it with a lot of water and a lot of fish.

What about Table Rock Lake is most important to you?
The amount of water in the lake is the most important thing to me. I would like to see the water level stay high and the water clear.

What is one thing that could be done to improve the lake?
I would like to see more water in the lake. I would like to see more water in the lake. I would like to see more water in the lake.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clearer water, clear,
No huge boats, clean shores, walk ways to the
water and boat docks for older people without permits.

What about Table Rock Lake is most important to you? Peace and Quiet,
clear beautiful water, animals and birds, being
able to boat, jet ski, fish, etc.

What is one thing that could be done to improve the lake? People having control
over shoreline by their house and dock, to be able
to keep under house cleared, grass cut and trees down
and trimmed to look beautiful.

Additional comments on the Master Plan Revision or about issues that should be studied:
Corp needs to clean up closed camp sites, or open them up
again.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. RANGERS! THANK YOU FOR THIS OPPORTUNITY TO SHARE SOME THOUGHTS. I HAVE LIVED ON THE LAKE FOR 26 YEARS AND HAVE ENJOYED A GOOD WORKING RELATIONSHIP WITH MEMBERS OF YOUR ORGANIZATION. I APPRECIATE THE WORK YOU DO AND UNDERSTAND YOUR DIFFICULTIES AND ENVIRONMENTAL ASSESSMENT. THANKS FOR YOUR GOOD WORK.

Table Rock Lake Master Plan Revision

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

1. Much as it is now but with WATER QUALITY RESTORED TO EARLIER CLARITY.
2. LESS RESTRICTIONS ON MOWING PERMITS SO THAT HOMES BORDERING THE LAKE COULD MOW TO WATER'S EDGE.
3. Better use of common sense in shoreline mgmt. ie positioning docks & removal of debris after floods.

What about Table Rock Lake is most important to you? 1. Water Quality

2. Less fast traffic. Boats should be speed limited according to size so that big boats go slower & little ones - such as PWC's - slowed down.
3. Fishing limits set to best increase size & number.

What is one thing that could be done to improve the lake?

1. Reduce size of boats to 25' & 30 mph speed limits
2. Allow some flexibility for Rangers in spotting dock locations. YOUR ABSOLUTE RULE TO STAY WITHIN THE REDLINES, RESULTS IN SOME REALLY SILLY, DANGEROUS, & DUMB PLACEMENT OF DOCKS.

Additional comments on the Master Plan Revision or about issues that should be studied:

The concept of "NATURAL GROWTH" ON THE SHORELINE IS A FALSE ONE DUE TO THE NECESSARY RISE & FALL OF THE WATER LEVEL ACTUALLY RENDERS THE SHORELINE UNNATURAL WITH SO MANY DEAD TREES. A BETTER WAY WOULD BE LET ADJACENT PROPERTY OWNERS MAINTAIN THEIR SHORELINES REQUIRING THEM TO KEEP THEM IN GOOD ORDER AND BEAUTY. THIS WOULD RESULT IN MORE BEAUTY & LESS EFFORT ON THE PART OF THE CORPS.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? BASICALLY THE SAME
NO MAJOR CHANGES - MAYBE ADD A FEW
MORE RAMP AREAS

What about Table Rock Lake is most important to you? MAINTAIN WATER
QUALITY - REDUCE POLLUTION

What is one thing that could be done to improve the lake? MORE NO WAKE ZONES - SMALLER COVES - 100-150 YDS.
WIDE - TO SMALL FOR WATER SKIERS ALWAYS DEADEN -
BOATS CAN'T TURN AROUND - SLOW DOWN - START BACK UP MAKE
WAVES

Additional comments on the Master Plan Revision or about issues that should be studied: NOT INCREASING THE NUMBER OF TOURNEYS
OR NOT MANY MORE - FROM SOMEONE WHO
FISH A LOT OF TOURNEYS IN HIS LIFE TIME
OR MAYBE LIMIT THE NUMBER IN THE
SUMMER IN THE MAJOR SUMMER
USE AREAS

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/lrmasterplan.htm>. and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

*Cleaner + with
as little commercialization as possible.*

What about Table Rock Lake is most important to you?

*Cleanliness of
shoreline + water.*

*Access to the lake - more boat ramps
not necessarily tied to marina - ex - like the
one on south side of Shell Knob bridge*

What is one thing that could be done to improve the lake?

*Limit the size
of boats + motors - ex: no banana boats -
they're way too noisy + the huge waves really
erode the shoreline*

Additional comments on the Master Plan Revision or about issues that should be studied:

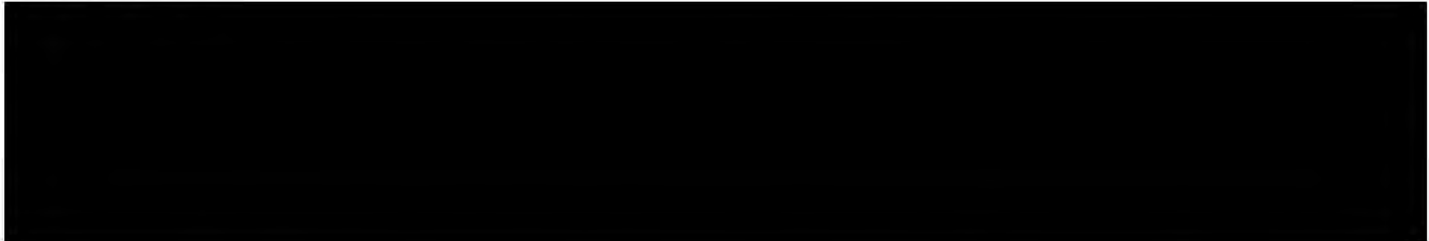

*Flood control - so that unlike 2008 - our
road will not be flooded for about 6 months.*

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Water as clean, if not
cleaner than it is today - recreational use, limit
the size of boats & speed to prevent injury & erosion
of shore line body

What about Table Rock Lake is most important to you? Fishing & Boating -
Swimming & make sure visitors enjoy our
lake so they come back

What is one thing that could be done to improve the lake? get rid of
old wood docks & styrofoam floats - make
sure all house boats go to a pump out & not
dump in the lake on early Sunday morn.

Additional comments on the Master Plan Revision or about issues that should be studied:
keep existing boat ramps & allow fire dept to
use them for water draw to fight fires -
allow dry hydrants to be installed at
accessible location per fire dept.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. TABLE ROCK LAKE MASTER PLAN REVISION

The Army Corps of Engineers, Little Rock District, plans to revise the Table Rock Lake Master Plan. The Master Plan guides the classification and management of government-owned or leased lands around the lake and may affect future recreational opportunities and natural resource management.

Pursuant to the National Environmental Policy Act (NEPA) an Environmental Assessment of potential impacts of the draft plan will also be prepared.

We want to hear from you!

Please attend a meeting or visit
<http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>

for current information.

To: CESWL-TR Master Plan SWL
Subject: Table Rock lake plan

Dear Ms. Coburn,

My family has been visiting Table Rock Lake ever since the dam was built. Please, whatever changes you make, DO NOT turn the lake into another Lake of the Ozarks.

The appeal of Table Rock is the fact that is more serene and less busy for those folks who enjoy getting away from all the commotion.

There are already enough boats and watercraft and people on and around the lake. Please don't make it any worse.

Subject: master plan input regarding Eagle Rock Campground

We have camped at Eagle Rock Campground for many years. It is in a prime location for our motorcycling in the Arkansas and Missouri hills and we also notice lots of use with boats and fisherman. It's even close enough to Eureka Springs for a nice dinner and shopping. However, the last couple years the park has closed its facilities in mid-September which is very disappointing to us. Summer is so very hot that camping is almost unbearable, but then, just as the weather turns fabulous for any outdoor recreation you would choose, the campground closes. I would really like you to consider at least having the facilities open until November 1 as in the past. Roaring River is now staying open until Dec 31 in campground #1, and with these mild winters, we will be camping there right up until it closes.

In another regard, for years the Eagle Rock Park was kept immaculately clean and mowed. The last few times we have been there the attitudes of the hosts have reflected laziness and apathy. Things are not clean, the yards definitely have needed mowing and there seemed to be several "interesting" individuals just hanging around the office. I know it must be very difficult to get someone to commit to that job every day of the summer, but it is really necessary to have the right person to encourage more use of the facility.

I have been wanting to express my concerns on this for some time. We love Eagle Rock and would camp there several times a year if it were open longer and more welcoming. Thank you for the opportunity to have input.

Subject: Indian Point COE Park

In October, we stayed at Indian Point COE Park. This is our favorite park near Branson and we have stayed there many times in the past years. This year the tree limbs had grown out over the roadways and we scratched up the upper sides of the motor-coach. It is 43 feet long and 13 ft tall. We decided we will not return until this is corrected. This is the first time we have had a problem with the limbs.

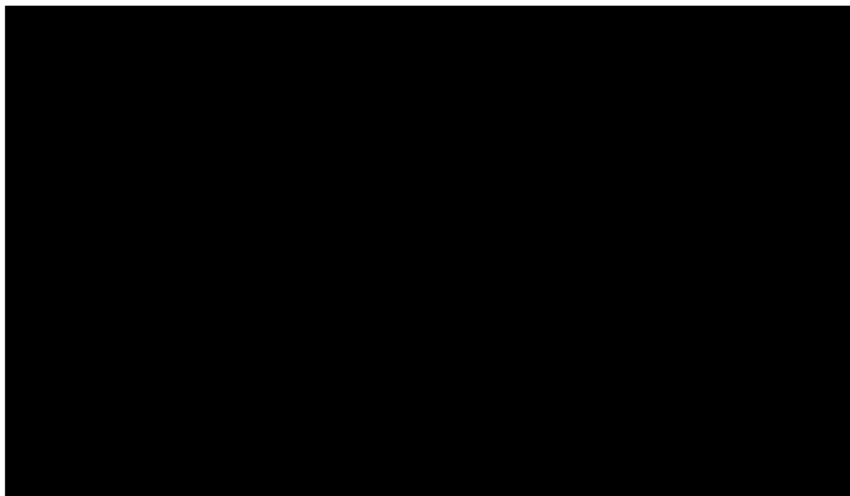

Thank you,

To Whom It May Concern:

I recently received an invitation to comment on the upcoming Table Rock Master Plan revision. Thank you for the opportunity. My wife, [REDACTED] and I retired in 2009, and since then, have spent the winter months in southern Texas. On two occasions we were able to spend some time at your Mill Creek Park, owned and operated by the Army Corps of Engineers at Table Rock Lake. We have found this to be the most anticipated leg of our trip from our home in Michigan to Texas, and back. We look forward to staying at this facility many more times in the future. [REDACTED] and I only ask that other than normal improvements, you not consider making any changes to the park. It's perfect just the way it is!

Sincerely,

[REDACTED]

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? more restaurants
on the lake with bath rooms, more places to get
gas out go to bath room
boat docks not being built at boat ramps or
public swimming areas

What about Table Rock Lake is most important to you? boat dock zoning
in cove at mile marker 19 on south side
our prop boat Sec-21 - Township 22 - Range 24
smaller docks permits for large prop owners

What is one thing that could be done to improve the lake? Less bass fishing
tournaments & more pump out stations for boats
less boating and swimming hazards

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

More Restaurants on water and Entertainment
through out all of the Lake area.

We need to keep up with the times and the public to have not
such negative thoughts on this area has nothing to offer
and is the middle of nowhere.

What about Table Rock Lake is most important to you?

Private Boat Docks when you own large acreage
on the water that property owners should be entitled
to have this facility available to them. They should
NOT have to have 12 Slip Docks. Many of us east afford
it and the ones that do and sell our getting Rich quick.

AND I can't even use the facility, NOT FAIR

What is one thing that could be done to improve the lake?

Public Bathrooms on the water ^{close} by people do NOT
protect the Lake MAKE SURE ITS EASY FOR SENIORS
TO GET TO BY LEAD & WATER.

Additional comments on the Master Plan Revision or about issues that should be studied:

Lake is OVER FISHED BY EVERYONE BUT TOURNAMENTS ARE
WAY TO MANY. TOO MANY THOSE IN LAKE VERY DANGEROUS
when children & adults jump in water they dont know
there. ALSO DO NOT put Trees in on Concrete Blocks and
PARKS people are getting caught in them
Nothing is ever posted about the dangers.

Appendix F

Public Scoping Comments

Public Comments (continued)

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean & pristine water where recreational use and enjoyment of lake sports are allowed for the benefit of the public as well as zones allowed whereby businesses could lease and individual home owners can have lake access and docks.

What about Table Rock Lake is most important to you? Maintaining clean water while continuing to allow economic growth.

What is one thing that could be done to improve the lake? Enforce septic tank regulations and also monitor & prohibit any kind of discharge into the lake from any detrimental source.

Additional comments on the Master Plan Revision or about issues that should be studied: Table Rock Lake is the "jewel" of the Ozarks and should be maintained in pristine for generations to enjoy. Equally important is to use a common sense approach w/ local people as well as promote future development around the lake to be good economic partners w/ local business & government who all depend on area revenue to survive. Also, the release of water during a flood event should be reviewed & revised to better control flooding instead of releasing all at once or shutting down all at once. Also, Turkey Creek in Hollister needs to be dredged maybe to 1982-1993 levels as it has silted in due to water flowing from both ends. Permitting should not be shut down

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written

comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012. because you don't have funds to "rewrite" a plan. The plan as it is needs to continue until you have funds to do something else!

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

Clear Clean water
Healthy Fish

What about Table Rock Lake is most important to you? _____

Fishing
Swimming
Safe boating

What is one thing that could be done to improve the lake? _____

Limit boat size
Limit noise levels of engines
Ban Jet Skis

Additional comments on the Master Plan Revision or about issues that should be studied: _____

STOP FARMERS FROM USING DOUNTRY LITTER ON FIELDS IN THE WATERSHED
The COE & Fed Gov Should purchase ALL property within
Fema's Flood plain & Return that property to its natural state
MAINTAIN WATER ELEVATION TO PREVENT SPRING FLOODING

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

We would like to see a beautiful lake with good water quality, a fun place to play, but a safe place, perhaps limiting the size of large boats, limiting the number of boat docks, We would want the shoreline to be kept clean, enforcing the same standards that we now have.

What about Table Rock Lake is most important to you?

Water quality - helping homeowners that have septic problems get things corrected.

What is one thing that could be done to improve the lake?

Educating individuals -- maybe offering incentives to replace septic systems and other run-off

Additional comments on the Master Plan Revision or about issues that should be studied:

We have seen an improvement in water since Springfield has made some changes to their discharge, but every little bit we all can do will keep the lake the way we love it.

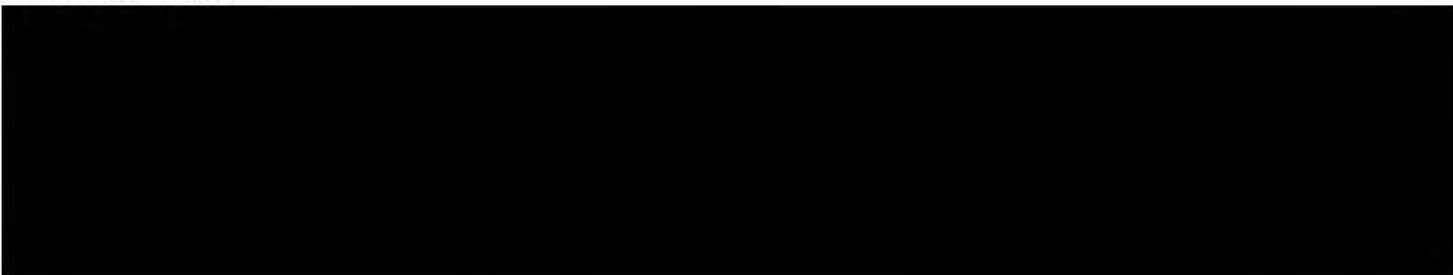

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324 5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers -
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I would like to see it stay the nice clean lake that it is. I would like to see the improvements along the shore kept to a MINIMUM. I enjoy that the lake is surrounded by lots of TREES and NOT High Rise buildings

What about Table Rock Lake is most important to you?

Clean, Quiet, friendly to small breeders

What is one thing that could be done to improve the lake?

Let owners mow grass along lakeshore.
NOT cut down trees, just mow grass

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MLRMP@usace.army.mil, Website: <http://www.sw.usace.army.mil/parks/lake/erola/crmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the

How would you like to see Table Rock Lake in 20 years?

1. Clean water
2. Limits for size of boats on Kings River
3. No "wake boats" on any river
4. Consider safety issues before, US Army Corps approves large slips added to docks
5. Control the high + low water levels, when possible.

What about Table Rock Lake is most important to you?

- Clean water and more stable water levels.
Continue water safety patrol.

What is one thing that could be done to improve the lake?

- Limit size of boats, limit speed of boats, limit parts of Kings River access for large boats

Additional comments on the Master Plan Revision or about issues that should be studied:

1. No farm animal access to rivers
2. "Wake boats" erode the shore and damage docks
3. The largest dock slip added to Kings River Marina, on the south dock, blocks the view for boats turning around that river bend. It, the added dock, creates a hazard for skiers, tubers, and boaters.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environment, Branch Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: 501-824-8809, Email: MATRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock> or <http://www.usace.army.mil>. All comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2002.

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

*Cleaner and less
large boats*

What about Table Rock Lake is most important to you?

*Clean water and
good fishing*

What is one thing that could be done to improve the lake?

*Better control of
septic tanks - inspections are so important with
follow-up of problems*

Additional comments on the Master Plan Revision or about issues that should be studied:

*The large and loud boats must be addressed.
They are a danger to folks in smaller boats.
Crash the shore & damage docks.
What we are seeing is a huge problem like
they have at Lake of the Ozarks -
we don't want their problems!!*

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.svl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? UNREALISTICALLY THE
SAME WATER QUALITY AND BOAT TRAFFIC AS
10 YRS AGO - IN REALITY IMPROVED WATER
QUALITY, PUBLIC ACCESS TO ALL OF THE LAKE,
SPEED AND SOUND LIMITS, AND LIMITED
AND CONTROLLED JUNK GROWTH

What about Table Rock Lake is most important to you? FISHING AND RECREATION

What is one thing that could be done to improve the lake? REOPEN THE 15
PUBLIC MARINAS TO FISHING - YOU CALL
THEM PUBLIC BUT IN SPITE OF THE PUBLIC
AGREEMENT CLOSED THEM TO FISHING - A POLITICAL
DECISION

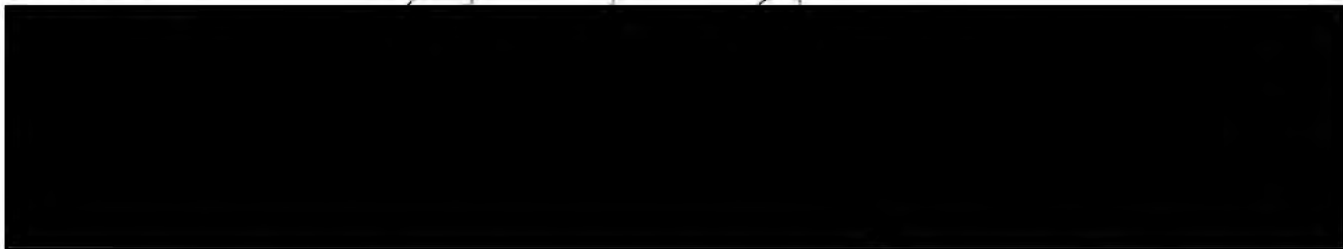

Additional comments on the Master Plan Revision or about issues that should be studied:
WHEN YOU ALLOW PRIVATE COMPANIES TO
BUILD DOCKS ON PUBLIC LAND (COOKS FERRY)
THESE NEEDS TO BE MAINTAINED FOR CLEAN UP
SUPPER MISSION - THERE NEEDS TO BE BETTER
COMMUNICATION TO THE PUBLIC ON WHAT SERVICES
THAT ARE AVAILABLE - 1. BETTER AND MORE
INFORMATIVE SIGNAGE FOR REG. AREAS 2. PUT ALL
REG. AREAS IN CAMPING CATALOGS (WOODALE)
3. REOPEN JOE BALD, COOKS FERRY, COW CREEK

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Very SIMILAR Electricity

AS IT IS NOW = Be the center for advanced hydro power
STATE OF ART - fish hatchery,
museum / visitors center + D.A.M. Tower
"Aquaarium"
keep the history alive! work w/ landowners on boat ramp LAK

What about Table Rock Lake is most important to you? THAT IT IS CRYSTAL CLEAR

Enjoy shell knob fireworks from boat + Campbell Point restaurant

What is one thing that could be done to improve the lake? More full service MARINAS w/ DUMP STATION + fuel

Additional comments on the Master Plan Revision or about issues that should be studied:

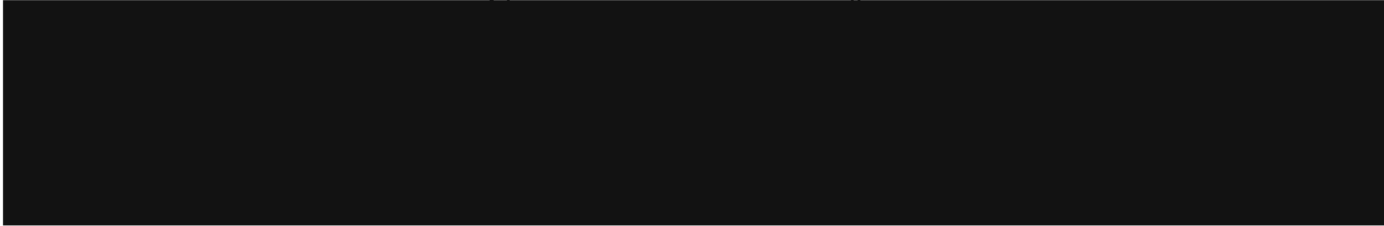

Invest in US Corp parks for boating, fishing + camping + more state parks.
ALSO INVESTING in the upkeep of public boat ramps.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

_____ My initial answer, though a selfish one, would be to say "just like it is" However, It is a beautiful recreation destination that increased access, for public, private and commercial purposes, should be allowed to meet an expected increasing future demand. _____

What about Table Rock Lake is most important to you? _____

_____ Safe water being a given, access to pleasure boating and swimming activities via private and public docks is of the utmost importance to our family. _____

What is one thing that could be done to improve the lake? _____

_____ More boat accessible restaurants _____

Additional comments on the Master Plan Revision or about issues that should be studied: _____

_____ Eliminate park entrance toll/check-in stations as they cause unnecessary congestion resulting in long lines to gain entrance into public areas Private dock owners should be allowed more flexibility in making improvements and changes to their docks as they see fit where water quality or public safety are not compromised. _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Good lake management
with reasonable re-structures. Want to keep the
body of the lake but be able to use it also

What about Table Rock Lake is most important to you? Water quality & fishery

What is one thing that could be done to improve the lake? Better boat launching
sides. Many boat ramps are broken & topainted
Campbell Point is almost unusable at normal water level
grade of ramp is not acceptable

Additional comments on the Master Plan Revision or about issues that should be studied: Survey to keep hanging about Campbell Point launch ramp
but I buy my use permit each year and can't launch boats
at normal lake levels. One person finds it almost impossible
unless he wades. Many of my customers have left the
area so they can get their boats off trailers. This ramp
has been pro. since it has been put in. Effort was made
to help - end of 2010 but the didn't change the grade
enough to work - and a lot of money was spent for nothing
We need help!!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I would like to see a more clean shore line. Free of dead timber and brush. Not being able to take dead trees and brush from shore line doesn't make any sense.

What about Table Rock Lake is most important to you?

Being able to fish and boating.

What is one thing that could be done to improve the lake?

I would like to see the no wake areas enforced. A lot of boaters don't go by idel speeds they slow down to place big wakes.

Additional comments on the Master Plan Revision or about issues that should be studied:

I would like to see the people who come out to inspect be more friendly. I own property on the lake I should have some respect.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean & quiet so people can enjoy its natural beauty. Free of waste, that is entering the lake by area farms.

What about Table Rock Lake is most important to you? 1) Keeping water levels as close to normal pool as possible. When you own, maintain, & pay taxes on a dock & boat, you want to be able to get it in & out of the slip. 2) Also, keeping the lake natural. 3) Too many large boats in the west end of lake - low levels = washed out shore & docks from wakes.

What is one thing that could be done to improve the lake? With the technology of this time, being proactive with weather forecasts concerning lake levels. Levels are too extreme. Flooding produces debris, drought causes other problems.

Additional comments on the Master Plan Revision or about issues that should be studied:

Thank you for this opportunity to share my views.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

CLEAN WATER / SAFE
BOATING WITH A SIZE LIMIT ON BOATS / GREAT FISHING / ~~AND~~
A SHORELINE MANAGEMENT POLICY THAT IS FLEXIBLE / PROVIDES A
COOP WORKING RELATIONSHIP WITH PRIVATE ENGINEERS
(EXAMPLE: ADDRESS DEAD TREES ON THE SHORELINE, ETC.)

What about Table Rock Lake is most important to you?

WATER QUALITY IS FIRST.
PROVIDING AN OPPORTUNITY FOR ALL CITIZENS TO ENJOY BOATING, FISHING, &
ALL WATER ACTIVITIES IN A SAFE & SCENIC ENVIRONMENT.

What is one thing that could be done to improve the lake?

PROVIDE MORE FLEXIBILITY
IN THE SHORELINE MANAGEMENT. DURING THE EXTREMELY HIGH WATER
PERIODS WE NEED THE ABILITY TO KEEP THE SHORELINE (PRISTINE) ALLOWING
EVERYONE TO ENJOY ITS NATURAL BEAUTY.

Additional comments on the Master Plan Revision or about issues that should be studied:

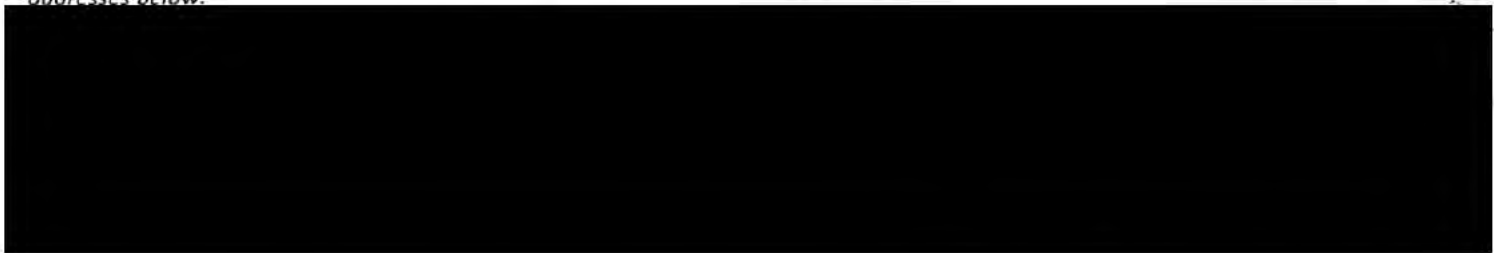

THE MEETING I ATTENDED IN KEEDS SPRING WAS DISAPPOINTING IN
THAT NO REAL FEEDBACK WAS GIVEN. POSTIT NOTES WERE NOT THE WAY TO GO.
WE NEED BETTER COMMUNICATION FROM ALL PARTIES INVOLVED IN THE
FUTURE OF THE LAKE. CONCERNING DOCK PERMITS ETC: I FEEL SLIP OWNERS
SHOULD HAVE THE RIGHT TO LEASE THEIR SLIPS. IT WOULD BENEFIT THE
WORKUP ON DOCKS IF THERE WERE MANY INVOLVED NOT ONLY IN THE PURCHASE
BUT ALSO THE OPTION TO LEASE SLIPS.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203. Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years? JUST AS NICE AS TODAY
WITH MORE SHORELINE VEGETATION PEOPLE NOT CUTTING
SO YOU CAN SEE SOME MANY HOUSES NATURAL JUST
IS TO NICE. (KEEP THE SHORE LINE IN ANOTHER NATURAL
HANDS) WE CAN GET A NEW SOME

What about Table Rock Lake is most important to you? SEEING IT
WALKING WITH FRIENDS THE LAKE FISHING BOATING
HUNTING BIRD WATCHING, AND JUST THE BEAUTY OF THE LAKE
AS A WHOLE

What is one thing that could be done to improve the lake? SPEED BOATS
SPEED BOATS

Additional comments on the Master Plan Revision or about issues that should be studied: NEED MORE PEOPLE TO HELP (PEOPLE THAT LIVE ON
THE LAKE WORK ON IT)
WHEN PEOPLE SEE THING WRONGS OR SOMETHING
WANT TO DO THE OTHER WAY PLEASE LET US HELP
IT'S OUR LAKE TOO

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Maintained in much the same manner as it is today. Place a limit on large motorized as well as some restriction on the type of watercraft can use the lake.

In most cases the Lake is too narrow to allow for a boat built for speed.

We don't need another Lake of the Ozarks here!

What about Table Rock Lake is most important to you? Recreation & water quality.

What is one thing that could be done to improve the lake? Ensure water quality is maintained & those living near the lake maintain the proper waste disposal systems. Human waste especially.

Additional comments on the Master Plan Revision or about issues that should be studied:

What with the Farmers building water storage ponds - how has this or will this limit the amount of runoff that finally gets to the lake.

Algae Monitoring in Spec. Fin. Places.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

a lake with clear water, fewer huge boats, less high water / flooding that kills our oak trees and modest shoreline

What about Table Rock Lake is most important to you?

1. water quality / clarity

What is one thing that could be done to improve the lake?

Limit "wake boats" that create huge wakes for "surfing" which erode shore line and damage docks

Additional comments on the Master Plan Revision or about issues that should be studied:

1. Limit wake boats on the Kings River area south of Kings River Marina.
2. The new huge boat dock by Kings River Marina is a safety hazard as its "chocks" water traffic. (Remove it if possible!)
3. Try to eliminate huge high water levels and low levels in drought if possible

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

CONTINUED RESTRICTIVE ACCESS TO THE LAKE BY LARGE DEVELOPMENTS IN ORDER TO PREVENT OVER COMMERCIALIZATION OF THE SHORELINE. RESORTS AND CONDOS SHOULD LOOK LIKE THEY BELONG IN THE PARKS IN NEW YORK CITY AS THEY DO BETWEEN INDIAN POINT AND PARADISE POINT.

What about Table Rock Lake is most important to you?

CLEAN WATER AND PRESERVING THE PRISTINE APPEARANCE OF THE LAKE. ALSO MORE CONSISTENT LAKE LEVELS

What is one thing that could be done to improve the lake?

KEEP THE LAKE IN TUNE WITH NATURE BY SETTING DECIMAL LEVELS TO GOVERN THE SOUND NOISE PRODUCED BY BOATS + WATERCRAFT ON THE WATER.

Additional comments on the Master Plan Revision or about issues that should be studied:

ALLOWING SHIP OWNERS MORE LEEDS ON HOW OR TO WHAT ~~THEIR~~ THEIR SHIPS CAN BE USED SHOULD ALLOW 'TEMPORARY' USE BY FAMILY AND FRIENDS

NO LONGER REQUIRE PRIVATE COMMITTEES TO MAINTAIN 'PUBLIC' RAMP AND ACCESS BOARDS !!

You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Improved water quality and keeping development from shoreline. No condos along shoreline. Do not want large condo developments coming in and taking down trees to put up building after building.

What about Table Rock Lake is most important to you?

The beauty of the lake to be maintained.

What is one thing that could be done to improve the lake?

Restrict further boat docks especially in main channels

Additional comments on the Master Plan Revision or about issues that should be studied:

Don't know if anything can be done about large boat wakes. Have been out in small boat when they pass at high speed and have almost capsized in runabout and pontoon.

Timbering was mentioned by a Corps person at Rents Spring Meeting. Whatever that means need to explain. Do not want to see trees downed around lake!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

As pristine as possible.

What about Table Rock Lake is most important to you?

It's natural beauty.

What is one thing that could be done to improve the lake?

1. Reduce agricultural and city ~~runoff~~ chemical and nutrient runoff into tributaries.

Additional comments on the Master Plan Revision or about issues that should be studied:

2. Twice yearly shoreline cleanup drives.

3. Additional underwater cover for fish.

4. Preserve as many non-commercialized areas around the lake as possible such as Piney creek and National forests.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision
and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I WOULD LIKE THE WATER CLEAN + CLEAR. I'VE BEEN LIVING ON THE LAKE FOR 10 YEARS, FIRST UP THE KINGS RIVER ARM AND NOW ON THE MAIN LAKE SOUTH WEST OF THE SHELL KNOB BRIDGE. I DON'T KNOW IF THE TWO FLOODS CAUSED IT, BUT I HAVE NOTICED THAT THE WATER IS NOT AS CLEAR AS IT USED TO BE.

What about Table Rock Lake is most important to you? THE MOST IMPORTANT ISSUE TO ME IS CLEAN WATER, I LOVE TO FISH AND WHEN I CATCH A SMALL MOUTH THAT MEANS THE WATER IS PRETTY GOOD. CLEAN WATER MAKES FOR GOOD FISHING!

What is one thing that could be done to improve the lake? RESTRICT THE SIZE OF BOATS AND REDUCE THE OR LIMIT THE SPEED FOR SAFETY OF THE SMALLER BOATS. I HAVE NEARLY BEEN THROWN OUT OF MY BOAT BECAUSE OF THE WAKE CAUSED BY LARGE BOATS. THE NOISE THAT SOME OF THE BOATS MAKE, WAY TO LOUD, DURING THE SUMMER THERE IS A BOAT THAT RUNS FROM CAMPBELL POINT TO THE SHELL KNOB BRIDGE AND YOU CAN HEAR IT ALL THE WAY. THERE IS NO NEED FOR THAT LOUD NOISE. THE LARGE BOATS ALSO MAKE A BIG WAKE THAT POUNDS THE SHORE LINE WHICH CAUSES EROSION.

THANK YOU FOR THE OPPORTUNITY FOR OUR INPUT

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I would like to see Table Rock Lake as it is today and even more pristine. With regular scheduled shoreline cleanups and anything else necessary to keep the beauty of this area.

What about Table Rock Lake is most important to you?

The water quality is extremely important to me. I have lived here 33 years and this lake is not anywhere near as clean as it used to be. We must work to save the quality of the water and make it better than it is now, if that is possible.

What is one thing that could be done to improve the lake?

Continue to limit the addition of new docks, and limit the size of boat launch usage of the lake. Let us also have storage berths added, rather

Additional comments on the Master Plan Revision or about issues that should be studied:

Some people think that these meetings are just an appearance of the Corps will do whatever to Table Rock Lake. I hope this is not true and these meetings are a way for local and non-residents to work with the Corps for the mutual betterment of Table Rock Lake. I would love the opportunity to travel many places in the world and Table Rock Lake is still the prettiest lake in the world to me and I want to help keep it that way forever! Thank you for reaching this far. (Jana J.)

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

From above ground (Ha! Ha!)
Pristine - Restrict more Community & Private
Docks - the Shoreline is already cluttered in
some areas.

What about Table Rock Lake is most important to you?

Clean water

What is one thing that could be done to improve the lake?

Limit size of
Watercraft - also noise level on some
boats.

Additional comments on the Master Plan Revision or about issues that should be studied:

~~Watercraft - good job this year~~
Algae on docks needs to be controlled
Control water levels - good job this year.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

MORE GENERAL STORE (CONVENIENCE)
OUTLETS, GAS STATIONS, HARDWARE STORES, PHARMACIES
MORE UP-SIDE HOMES TO INCREASE PROPERTY VALUES
MORE ATTENTION TO SOUTH SIDE: LANE, CAR LANE & SIDE KNOB

What about Table Rock Lake is most important to you?

BOAT WASHES, FISHING
CLEAN WATER - CONTROL OF ABANDONED TRAILERS & HOMES (FIRE
HAZARD + POLLUTION FROM OLD CARS/TRUCKS)

What is one thing that could be done to improve the lake?

REMOVING TONS OF DOGWOOD AT
SHORELINE + CUTTING DEAD TREES + BRANCHES TO REMOVE RISK OF
FIRE + INJURY - OWNERS OF LARGESIDE LAKE NEED MORE
PERMISSION TO CARE FOR ABOVE PROBLEMS

Additional comments on the Master Plan Revision or about issues that should be studied:

ABANDONED TRAILERS + OTHER SOURCE OF LEAKING SEPTIC TANKS +
CAR WASHES - GASOLINE/OIL
INCREASED CELL PHONE TOWERS - NO SERVICE IN LOW AREAS (I WOULD
CONSIDER JOINING AGENCIES TO THIS COMMERCIAL PROJECT)
THINKING OF UNDERPASS AT VEHICLE/ROAD INTERSECTIONS
REMOVAL OF POTENTIAL METH-PRODUCING SITES

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

I would like to see Table Rock Lake have a Master Plan that is more of a cooperative partnership arrangement with the visitors and land owner around the lake rather than an adversary position. The Corps of Engineers attitude is not highly revered and could improve which will induce more visitors to Table Rock Lake.

I would like to see Table Rock Lake as beautiful as it is today and complemented with more information about the geology of the area, who lived here before the settlers and water that is clear and clean.

What about Table Rock Lake is most important to you? _____

As a photographer the most important element of the Table Rock Lake is to maintain the beauty and being able to access all areas to be recorded digitally. To be more specific the water quality is the most important.

What is one thing that could be done to improve the lake? _____

Restrict the size of large boats to lessen the size of the wakes

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Additional comments.

As the Table Rock Lake is a generator of hydropower electricity could a study be made to explore using the lake water as the heat and cooling source for heat pump usage that could supply heat and cooling for homes on the lake shore. This cooperative partnership could be an income source for the Corps as well as provide inexpensive heat and cooling source for home owners on the lake. This suggestion fits one of the main objectives of the master plan and that is to maximize the use of the resources of the lake.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

A CLEAN QUITE LAKE WITH MULTIPLE RECREATIONAL OPPORTUNITIES

What about Table Rock Lake is most important to you?

- (1) CLEAN WATER
- (2) TIGHT SHORELINE MANAGEMENT
- (3) ALTHOUGH MINOR, CONTROL OF NOISE FROM BOATS
- (4) BETTER ENFORCEMENT OF REGULATIONS
- (5) HIKING TRAILS ALONG SHORELINE

What is one thing that could be done to improve the lake?

CONTINUE OF VISUAL IMPACT OF DOCKS, AS SEEN FROM THE LAKE.

Additional comments on the Master Plan Revision or about issues that should be studied:

CLEAR REGULATIONS AND OPPORTUNITIES FOR THE MULTIPLE RECREATIONAL USES OF THE LAKE

- WATER SKYING
- FISHING
- "HOUSE BOATING"
- SWIMMING
- GENERAL BOATING - TRANSPORTATION

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/lrmasterplan.htm>. How would you like to see Table Rock Lake in 20 years?

CERTAINLY NOT LIKE LAKE OF THE OZARK!

CLEAN, CLEAR WATER AND SERENE SURROUNDINGS.

What about Table Rock Lake is most important to you?

THE QUALITY OF LIFE; WATER QUALITY AND PLEASANT SURROUNDINGS

What is one thing that could be done to improve the lake? (1) RESTRICT LARGE CABIN CRUISER

TYPE BOATS! IT'S A SAFETY & SHORE LINE ISSUE: (A) THEIR WAVES CAN SWAMP SMALL PLEASURE & FISHING BOATS (B) THE DAMAGE THOSE LARGE WAVES DO TO THE SHORELINE. RESTRICT "STRAIGHT" EXHAUST BOATS, THE NOISE LEVEL IS TERRIBLE.

Additional comments on the Master Plan Revision or about issues that should be studied:

"DO AWAY WITH MARINAS "BUFFER" ZONES.

"ALLOW RENTING OF PRIVATELY OWNED SLIPS.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

I would like to see the lake no different than it is right now. I don't want to see a Lake of the Coonets

What about Table Rock Lake is most important to you?

the water quality and being able to find secluded areas

What is one thing that could be done to improve the lake?

I don't think there is anything that any one could do to improve the lake.

Additional comments on the Master Plan Revision or about issues that should be studied:

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

With the water as clear as it was
30 years ago.

What about Table Rock Lake is most important to you?

Being able to see the water every
morning.

What is one thing that could be done to improve the lake?

Change the size (length) of Kentucky Bass that can
be kept. They don't grow to 15 inches.

Additional comments on the Master Plan Revision or about issues that should be studied:

I've never seen a Master Plan - so don't know
what needs to be changed.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? PRESERVED AS IT IS TODAY, WITH CARE GIVEN TO THE ENVIRONMENT AND THE NATURAL HABITAT FOR FISH AND ANIMALS.

What about Table Rock Lake is most important to you? CLEAN WATER, PRESERVE FOR FISH AND ANIMAL LIFE, QUIET RECREATIONAL LAKE, RESTRICTIONS ON SHORE LINE AND WATER TO PREVENT TABLE ROCK FROM BECOMING POLLUTED, OVERCROWDED AND OVERDEVELOPED LIKE LAKE OF THE OZARKS.

What is one thing that could be done to improve the lake? BETTER MANAGEMENT OF LAKE LEVELS.

Additional comments on the Master Plan Revision or about issues that should be studied:

THERE SHOULD BE GREATER RESTRICTIONS ON BOATS, SUCH AS PERMITTED SIZE, SPEED AND NOISE LEVELS.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

- * CLEANER WATER (E. SEPTIC SYSTEMS ON OLDER HOMES)
- * ENHANCED FISHERIES
- * NO SELLING CORP OR FEDERAL LAND FOR DEVELOPMENT

What about Table Rock Lake is most important to you?

- * SCENIC SHORELINES
- * "NO" LAKE OF OZARKS OVER DEVELOPMENT OF SHORES
- * FAMILY ATMOSPHERE
- * FEDERAL LANDS AROUND CORP PROPERTY (HUNTING) HIKING

What is one thing that could be done to improve the lake?

- * LIMIT MINIMUM FLOW TO STABILIZE LAKE LEVELS IN DROUGHT

Additional comments on the Master Plan Revision or about issues that should be studied:

WATER QUALITY COMING FROM JAMES RIVER DRAINAGE AREA
I.E. (PHOSPHORUS) DITLES

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? I AM A LAKEFRONT PROPERTY OWNER IN STONE CO., SO THE FUTURE OF TRL IS OF VITAL IMPORTANCE TO ME.

I WOULD LIKE TO SEE THE QUALITY OF THE LAKE AND THE SHORELINE IMPROVE, NATURE HAS NOT DONE A GOOD JOB OF MAINTAINING THE SHORELINE

What about Table Rock Lake is most important to you? THE QUALITY OF THE WATER, IT IS OUR DUTY AND YOURS ALSO, TO KEEP AND IMPROVE THE WATER BECAUSE IN THE FUTURE WATER WILL BE EVEN MORE IMPORTANT THAN IT IS TODAY.

What is one thing that could be done to improve the lake? INSTALL MORE MILE MARKERS, WHICH WOULD MAKE IT EASIER TO NAVIGATE THE LAKE

CONTROL POLLUTION AND RUN-OFF INTO THE LAKE

Additional comments on the Master Plan Revision or about issues that should be studied:

EVERYTHING THAT EVERYONE DOES ON OR AROUND THE LAKE HAS AN EFFECT ON THE LAKE.

WITH WATER QUALITY BEING THE PRIMARY CONCERN IT WILL BECOME CLEAR AS WHAT IS TOO MUCH OF A GOOD THING AND LIMITATIONS WILL NEED TO BE SET FORTH TO ACHIEVE THE MOST IMPORTANT ASPECT OF THE LAKE, THE WATER!

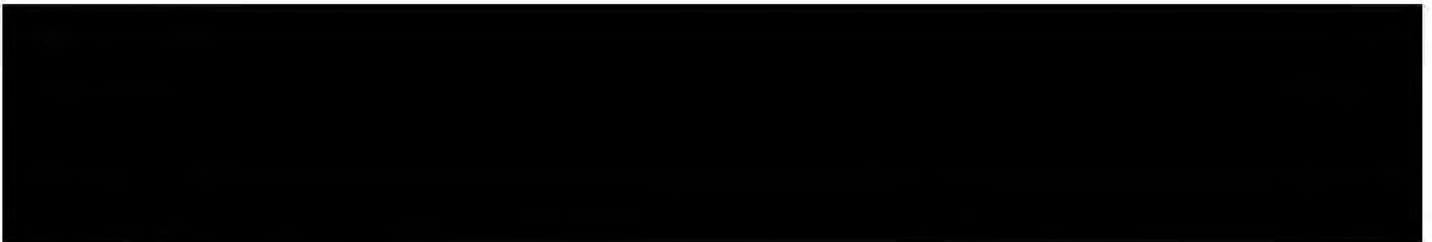

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean Water
Just like today or better. No high rise condos to block
peoples view.

What about Table Rock Lake is most important to you? Clean water. keep as
natural as possible.

What is one thing that could be done to improve the lake? Allow a certain amount
of cutting trees on shore line that get under docks when
high water occurs.

Additional comments on the Master Plan Revision or about issues that should be studied: _____
Treat everyone the same as far as lake front property
is concerned. Some seem to be able to cut trees to
enhance their view & others are severely scolded or
fined. Motoring on the lake is evident not all have
the same rules
We have had property since 1958 & we love the
lake & try to follow all rules & regs. We want
it there for our grandchildren & others to
enjoy. For the most part you do a good job.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203. Fax: (501) 324-5605. Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Like it is now
but cleaner water. Enforce ~~the~~ SEPTIC TANK Rules.
Inspect ALL septic tanks & require repair or
replacement.

What about Table Rock Lake is most important to you? Beauty, clean
water, safe boating. Enforce safe boating, jet ski
control.

What is one thing that could be done to improve the lake? Additional
gas and dock space (commercial marina), Enforce
mowing, trimming, tree cutting. Some close to the water and
we cannot, not fair or equal treatment.

Additional comments on the Master Plan Revision or about issues that should be studied: _____
Do not try and sell off Mark Twain Forest Land.

How would you like to see Table Rock Lake in 20 years?

Cleaner than it is now and public accesses controlled and maintained by public groups like buttermilk springs org or Joe Bald community. Basically organize community parks and accesses maintained by local lake groups to take pressure off of Army Corp. Just give us some guidelines

What about Table Rock Lake is most important to you?

Keeping the lake limited to moderate boating (not another Lake of the Ozarks)

What is one thing that could be done to improve the lake

Better monitoring of lake quality and EPA enforcement maybe assisted by local agency's Fire, police, coastguard groups Etc. (But give them the education and the teeth to do so)

Additional Comments:

The largest problem as I see it is that whoever enforces the water quality laws have no teeth and are going about it totally wrong .

Example: The city of Springfield dumps sewage in the rivers then there is some kind of breakdown in the system and it dumps even more in. so we are told all we can do is fine less than copious amounts of money but that does not clean the water!! At the time of the infraction discovery there is absolutely no question about who is to blame. Can only come from one place, Springfield. At the point of discovery call a cleanup org or company and ship them in here now!! Start the cleanup and give the bill for doing so to the city of Springfield No fines for politicians or bureaucrats to pocket just solutions to water quality.

I don't want them to be guilty I want to do the right thing and fix it.

Comment # 2 you told the media that you were disappointed at the response to the questions given at the Branson West meeting. You gave no criteria to the public in advance to prepare for the questions and then chastise them because they had no answers for you. Whose cheap ploy was this to make organizers look good at a meeting that they were not prepared for? I don't mind helping out but I do mind being made out a fool when I am trying to help. 

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. How would you like to see Table Rock Lake in 20 years?

CLEAR & CLEAN WATER

Good FISHING SUSTAINING

Develop SOURCES OF INCOME FOR DEVELOPMENT

What about Table Rock Lake is most important to you?

Fishing + Boating

What is one thing that could be done to improve the lake?

Speed limits, fast lanes marked K+L (POLISHING SEPTIC SYSTEM
MORE DEVELOPMENT TO THE WEST. (USE VOLUNTEERS
LIMIT + RESTRICT TROPHIMENT FISHING

Additional comments on the Master Plan Revision or about issues that should be studied:

BETTER (PUBLICATIONS) PUBLIC RELATION

The public feels that the ATAF is RUDY.

PERHAPS MOVE LAKE MANAGEMENT AWAY FROM COOP

This meeting was a good START TO GATHER INPUT

How would you like to see Table Rock Lake in 20 years?

Active to Recreation -
clean water - continue use for Hydro power
Something for my Grand Kids to enjoy.

What about Table Rock Lake is most important to you?

Like to see water
patrol out in summer more than once a
month. Also more regulation on neighbors
around area cutting out trees etc. Right
down to shoreline. Causes erosion!

What is one thing that could be done to improve the lake?

Limit boat size
at this end of lake. More "NO WAKE"
zones.

Additional comments on the Master Plan Revision or about issues that should be studied:

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Like it was in the 60's
A lake open to everyone with free use of campgrounds, boat
loading facilities and pristine clear blue water.

What about Table Rock Lake is most important to you? Water quality I know the
Corps doesn't control the run-off from the large watershed
area but they have the facts and the access to the media. If the
people knew they would support the cleanup procedures. We
have shown the Corps open sewage running directly into the
lake and was told they could do nothing about it. This is an unacceptable
attitude.

What is one thing that could be done to improve the lake? Free camping and boat
loading and swimming areas. These facilities would not need to
provide showers and camper hookups. I am talking about an area
where people could pitch tents, unload their boats and play in the lake
like my family did until the existing master plan went into effect.

Additional comments on the Master Plan Revision or about issues that should be studied:
Every decision the Corps has made has enriched a politically connected
few and denied use to the very people who pay for the lake.
I think each commercial operator should have to provide and
maintain a campground open to the people at no charge.
This is the least they can do to pay back. The Corps needs to
understand they represent all of the people.

How would you like to see Table Rock Lake in 20 years? Clean.

What about Table Rock Lake is most important to you?

What is one thing that could be done to improve the lake?

Additional comments on the Master Plan Revision or about issues that should be studied:

The Corp should monitor all of the resorts & gas docks on the lake regularly. In 2010 I called the DNR on Ozark Mt. Resort's treatment facility & they sent me a letter on all the unsatisfactory features which he should have been attended to way before having to call attention to it & there were many. My husband & I attended the last meeting which was several years ago which was at the Kimberling Bowling Alley. We were told then that the Kennel Branch Cove was to narrow & any future docks would have to be in the little cove where the existing dock was. Now we have 3-20 state dock in the channel the central clearing on the bank is good, but why are so many homes close to the lake & trees trimmed up. It seems there is no equal control on clearing & paths. By the number of people at your meeting should tell you something. People aren't happy, we don't want to be another Hobby De Ozarks.

TABLE ROCK LAKE MASTER PLAN REVISION

The Army Corps of Engineers, Little Rock District, plans to revise the Table Rock Lake Master Plan. The Master Plan guides the classification and management of government-owned or leased lands around the lake and may affect future recreational opportunities and natural resource management.

Pursuant to the National Environmental Policy Act (NEPA) an Environmental Assessment of potential impacts of the draft plan will also be prepared.

We want to hear from you!

Please attend a meeting or visit
<http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>

for current information.

To: CESWL-TR Master Plan SWL
Subject: Boat slip regulations

To Whom It May Concern:

I wish to address some recent rules being enforced by the corp in hopes they will be reviewed along with the master plan. My wife and I have owned a boat slip on Table Rock Lake for about 20 years. Over the years our boat length has increased from 17.5 ft to 29 ft. and by necessity so has our slip length. Years ago we had a V installed on the dock. This was to allow easier and safer docking of the boat. It also allowed safer ingress and egress by my family and guests. Yrs ago I obtained a larger boat (Cobalt 252). I then enlarged and lengthened the V on the dock again for easier docking, safer boarding and safer egress from the boat. Now we have a Cobalt 272 which is about 29 feet in length. There are 2 ways to enter and leave this boat. At the stern is a platform which one might be able to reach by stepping. However, if the boat is wet or the dock is damp both are slippery. The second way to enter and leave the boat is at the front from the side. The v shape at the front makes this easier and safer to enter the boat, leave the boat and cover the boat so one does not have to lean so far towards the boat. This part of the V also allows one to get to the rear of the boat as one can reach the boat for stability.

This V has been in place for several yrs. The dock has been inspected many times. Other issues brought to our attention have been corrected I believe. At no time was this ever addressed until recently when we were told that the V will need to be shortened considerably soon. We were told that this rule has been on the books for a long time and was now being enforced. Again this V has been there for years and been through many inspections.

During the time I have had a boat slip and have been part owner of a dock, the Corp has stressed safety for the public which is good. However, some owner slip modifications can also be for safety. Our dock has many young children and these V modifications make it safer. We have elderly visitors and owners who need the V modification to be safe and to enjoy the lake.

Now I have a situation and asked for a variance which was denied. I was diagnosed with a CANCEROUS brain tumor 3 yrs ago. I have had 3 operations on my brain to resect this. I have had 2 courses of chemotherapy and am taking some now and I might need it for yrs to live. I have had 2 courses of radiation. Surgery, chemotherapy and radiation can have major side effects such as difficulty walking, increased chance of falling and weakness of the legs, arms and episodes of pain making it hard to BEND and do things. The V allows me to use my hands to reach the stern and to enter the boat at the bow. The state of Mo allows me to drive but it is much easier to get into and out of a car. Most of the time my wife will drive unless I am having a good day but she still will need to get me safely in and out of the boat. A fall where I hit my head could be catastrophic. I have offered to bring my medical records as well as note from my tumor doctor but was told not to do that.

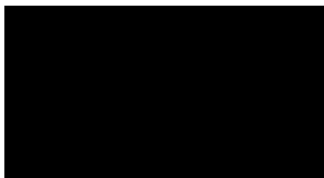

I would respectfully ask that my situation be reviewed soon as I must make the change soon or I WILL NOT BE IN COMPLIANCE AND RISK retribution. If my disability cannot be accommodated I will change my slip to be in compliance and accept the increased risks reluctantly. It would make sense to allow my requested changes and when I sell the slip require the owner to change it unless there is the question of a disability,

Subject: Revisions to master plan

My opinion for what it's worth.

1) a decibel limit for boats along with a size limit would be a great topic for discussion as some boats are causing shoreline damage. Our lake hasn't the width to accommodate these water crafts.

2) Please don't add any more boat docks to our lake it is resembling Grand as it is.

3) Core take line should be revisited as it has no continuity as it stands. Picking a number be it 920 or whatever makes more since.

To: CESWL-TR Master Plan SWL
Subject: Tablerock Master Plan

To whom it may concern:

I have read that you are taking comments on a proposed new master plan for Tablerock Lake. I have a few comments even though I do not live in the near vicinity of the Lake. My background is one of being a past Ranger with the KC District at Pomona Lake in Kansas. I went to school in Emporia Kansas and majored in biology with emphasis in Aquatic Ecology. I served in the Army for 3 years as an aircraft mechanic with 18 months in Vietnam. I also worked on heavy lift helicopters for the Kansas National Guard in Topeka, Kansas. I spent 15 years as a fisheries biologist with the US Fish and Wildlife Service and I am now retired from government service.

I started fishing on Tablerock Lake with my dad back in the 50's and moved to this area in the early 80's. I spent quite a bit of time fishing Tablerock and Beaver Lake and noticed in the mid 90's that algae was beginning to increase. Fortunately you have started to address this by having improved septic systems put in place and having municipal systems upgraded. As to future plans I would suggest several items that are imperative to protect the water quality of the lake. First I would vigorously enforce the shoreline habitat protection. I have noticed many violations over the years at both Beaver and Tablerock where the vegetation had been removed by the landowner to "improve" his/her vista of the lake. While I can understand wanting to enjoy this scenery it is never the less a violation that has taken place and needs to be enforced to the letter. We know that sedimentation is critical to water degradation and is a keadubg detrimental factor to the lesser water quality. One problem we had at Pomona was the quality of the boat docks and the number allowed. We were in the process of having many of the older, in need of repair docks, removed and I applaud the Corps for restricting the number placed on these reservoirs. Do not allow pressure on your permitting process to increase the number of individual docks and I encourage you to go further in the number of owners only allowed per dock. I mean that a dock should only be allowed if 10 or 20 landowners are incorporated into a single dock. That said I wish you to remember that the Lake and its waters belong to all taxpayers and citizens of this country and that adjacent landowners do not have any more rights to specifics when it comes to waters of the United States of America. The water entering the reservoir should leave in the same or better state of quality or else you and your agency have failed to protect a natural resource that is so precious to humans and in my thinking more so to the aquatic life that depends on it for survival.

Thank you for your time in this matter.

Sincerely,

Coburn, Dana O SWL

Subject: Tablerock Lake Master Plan

I am thrilled to see that the Corp is being proactive in updating the master plan for Tablerock Lake. I whole heartedly agree with you established goals and objectives of the new master plan and would encourage you to revise the master plan at least every 10 years based on need as there are many changes on the horizon.

There are two areas that I believe need to be included in the master plan. 1) Water quality in the lake and 2) Campground updates.

Over the past 20 years, the water quality in Tablerock has gone down hill and has gotten to the point where it is no longer healthy to even be in the water in some area of the lake. Septic tanks continue to drain into the lake, run off from creeks and streams are carrying pollutants from surrounding areas and boating activities are still introducing more and more petroleum products into the water. If something is not done soon to control these situations as well as others, the lake will never recover and be a clear water lake as it once was. I hope this subject will on your agenda as it is a paramount concern for all who use the lake for recreational activities.

Secondly is the public Corp campgrounds. Due to recent flooding over the past several years, several of the campgrounds received serious damage and have not yet recovered. Old 86 comes to mind as it has been closed for some time now. The campgrounds need to be updated not only for the increased use from visitors but also from an equipment point of view. Camping rigs these days are much bigger than they once were. Not only in length but also in width considering that the majority of rigs these days are equipped with 1 to 5 slide-outs which required great width in camp sites. Motor homes are becoming more popular and consideration should be given to motor home maneuverability within the parks. Dump stations also need to be improved to provide more than 2 stations at a campground. At check out time, the lines get very long and we personally have had to wait up to 1 1/2 hours to gain access to a dump station.

Thanks for the opportunity to voice my opinion via email. I hope my suggestions and comments don't fall on deaf ears as we all need to do whatever we can to maintain the lake and protect it from further damage.

To: CESWL-TR Master Plan SWL
Subject: Docks in Woodridge Estates

To Whom It May Concern ,
Please consider allowing a dock to be put in at the cove by Cow Creek .
There are many economic benefits to the area if this occurs . Adding more dock spaces to the southern shoreline of Table Rock Lake would foster future land sales , home construction , business development , and jobs . Adding more Red Zones along the shoreline benefits further economic development for residents , tradesmen , and business owners .

From: [REDACTED]
Sent: Wednesday, November 21, 2012 4:54 PM
To: CESWL-TR Master Plan SWL
Subject: Table Rock Lake Master Plan Revision

Ms. Coburn,

I've recently learned about the Table Rock Lake Master Plan Revision initiative and want to applaud the Corps for taking time out to ask what can be done to improve the Table Rock Lake area. First, the new visitors center at Dewey Short is great. Unfortunately, as a scuba diver this took away a great place for divers. We certainly understand the need for safety and the reasons why scuba diving has been eliminated around the visitors center, but this was the only real place we could shore dive on the lake.

I live about 3 hours away from the lake and when scuba diving was allowed at Dewey Short I typically made a weekend trip monthly to the area to dive in the lake. I spent money on hotel rooms, in restaurants, and with the local dive centers along with taking in a show or two. Since shore diving has been all but eliminated, I have been to the area once. Divers are a close network of friends that I know many personally and who traditionally came from Missouri, Arkansas, Kansas, Texas, Illinois, Oklahoma and in some cases as far north as Michigan and Ohio to dive in the lake. Since diving has been all but eliminated in the lake, this has been a huge topic of discussion amongst divers.

Over the years I have traveled to the lake frequently to dive at Dewey Short. Each and every time I would meet up with friends from all around the Midwest who were there to dive. We would typically meet up for dinner at the many local establishments and in general have a great time enjoying the lake and the attractions. Today, divers are not traveling to Table Rock simply because there is limited accessibility to shore dive. Historically, Dewey provided this. We are not asking for the Corps to change their mandate on no diving around Dewey Short and the Visitors Center. We divers would love for the Corps to consider establishing an area on the lake for divers. I know this may seem like a lot to ask and the payoff none existent. But, if you consider the many people that have traditionally traveled to the lake for the sole purpose of diving and spending money on hotel rooms and food the return on investment is there. I personally would love to see an area that had drive up access close to the lake, an area for divers to gear up, and a safe method of entering the water (steps). In addition, if the Corps would allow underwater training platforms and maybe even a underwater attraction such as a sunken boat or plane would be totally awesome. These types of things is what draws divers to various lakes and quarries. We will travel and we don't mind spending money on our passion. The Midwest has many great lakes and if Table Rock would consider working with the divers it would make Table Rock the Mecca of the Midwest for diving.

I appreciate your time and consideration.

Subject: Table Rock Lake Diving Spots

Good evening. I have visited Table Rock Lake on many occasions in the last 16 years I have lived in the region. I have even camped on its shores and swam in the water. In July of last year, I decided to finally get SCUBA certified, and the thought diving in Table Rock was one of the reasons I decided to take the plunge. However, shortly after I was certified I found out that the most popular shore-diving spot on the lake was now off-limits to divers. As central a location that Table Rock Lake is in the region, it would be great if a new shore-accessible diving area was developed for SCUBA divers (certified AND students) to come enjoy.

Thank you.

My input would be you need to allow more boat docks and things to do around the lake i have owned a lot there for about 5 years. I have been going to lake of the ozarks because they offer so much more for the boater. It would be nice to have a choice of restaranuts and bars to pull up to by boat. It would be nice to have a boat dock that you dont have to travel so far to get to. Iam from salina kansas most of the people around here prefer the lake of the ozarks for thast reason they would rather buy a house ther than at table rock and have they say the ozarks is way more fun it would be nice for table rock to offer alot more for adults and kids thank you [REDACTED]

Subject: Tablerock Master Plan

Dear Dana Coburn,

I was wondering if there is a document available that simply compares the previous rules/plans and the proposed changes to the Table Rock Lake Master plan?

Thank you,

Coburn, Dana O SWL

Subject: Table Rock Lake Master Plan Revision

We have several elderly slip owners who find it very difficult to negotiate the shoreline between our parking and the dock.

How long of a gangway can we have attached to the dock?

How can we change the path to the dock to help the handicapped?

Why don't your inspectors check the distance between docks and the location of the docks?

Looking forward to your response

Coburn, Dana O SWL

Subject: Table Rock Lake Master Plan Revision

Hi,

I will not be able to attend the public meeting regarding the Table Rock lake master plan, but I would like to suggest improvements at the Dewey Short area that take into consideration the needs of the Scuba diving community. Such as easy access to the water and the placement of underwater attractions, such as sunken boats, etc.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? CLEANER SHORE LINE

What about Table Rock Lake is most important to you? RESTRICT BOATS LARGER THAN 28-30' (EXISTING BOATS COULD BE GRANDFATHER IN)

What is one thing that could be done to improve the lake? * CLEANER WATER

Additional comments on the Master Plan Revision or about issues that should be studied:

* PUT A WATER TREATMENT PLANT IN THE JAMES RIVER BEFORE IT GOES INTO THE LAKE.

• POINT SIGNS TO BE REFLECTIVE, FOR BETTER GUIDANCE AT NIGHT.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

I believe the Lake should be maintained basically at the same level as it is today

What about Table Rock Lake is most important to you? _____

the quality of the lake water is probably the most important because of the health of the patients but also for the beauty of the Lake.

What is one thing that could be done to improve the lake? _____

so many of the restrictions that have been imposed as to the access to the lake should be reevaluated and more liberal policies need to be implemented

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Shorelines cleaned up from the flood debris. Before the floods the shore's were clean from dead limbs and trees some of limbs to the lake where mowed. It was clean and said to new comers please enjoy our lake know the people say it is the dirtiest wildest camping and lake area.

What about Table Rock Lake is most important to you? That you provide shore line for people to get to the lake. Paths ~~and~~ mowed so it invites you to come to the lake. Public boat ramps and free areas for families to swim and play. It doesn't cost anything if people who uses here wants to mow or clean. (Below)

What is one thing that could be done to improve the lake? Clean it up. It looks like we don't care. Allow the public to make some mowing choices. Make some fire pits for camping.

Additional comments on the Master Plan Revision or about issues that should be studied:

But No you want to charge. If you would allow people to mow and burn the dead stuff maybe we would have more people visit our beautiful lake. I know you have areas for wild life that should stay in the forest. This is a lake for families to have fun and play. If they want to see wild life they will go to the zoo.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? MUCH AS IT IS NOW.

What about Table Rock Lake is most important to you? THE WATER QUALITY AND WATER SAFETY ARE THE MOST IMPORTANT ISSUES.

What is one thing that could be done to improve the lake? STOP THE EROSION OF THE BANKS AND SHORES FROM DAMAGE CAUSED BY WAKE BOARDING AND WAVE SURFING. THE 2 TO 3 FT WAVES ARE VEYRY DESTRUCTIVE, ESPECIALLY IN THE COVES.

Additional comments on the Master Plan Revision or about issues that should be studied: NOT ONLY DO THE 2 TO 3 FT WAVES CREATED BY THE WAKE AND SURFING BOATS CAUSE EROSION PROBLEMS IT DAMAGES THE DOCKS AND BOATS IN THE DOCK SLIPS. AT THE LEAST, WAKE BOARDING AND SURF BOARDING SHOULD BE BANNED FROM THE COVES. I AM ALSO AFRAID THAT SOMEONE MIGHT BE TROWN FROM THEIR BOAT, OR FROM THEIR DOCK BY THESE WAVES.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years? PRETTY MUCH THE SAME WAY
IT IS NOW WITH THE MAIN EMPHASIS BEING TO PRESERVE THE ENVIRONMENT,
DEVELOP MORE ~~CORPSES~~ LOW DENSITY RECREATION AREAS.

What about Table Rock Lake is most important to you? _____

1. KEEP THE LAKE AS FULL AS POSSIBLE
2. DO NOT ALLOW ANY MORE DEVELOPMENT AROUND THE LAKE. KEEP THE
SAME AMOUNT OF SHORE LINE NATURAL AND UNTOUCHED TO PRESERVE
THE BEAUTY OF THE LAND AND THE LAKE.
3. DO NOT LET IT BECOME ANOTHER "LAKE OF THE CRARKS"

What is one thing that could be done to improve the lake? _____

INCREASE THE AMOUNT OF DESIGNATED NO WAKE AREAS IN THE
COVES TO PROTECT SWIMMERS, CANOES, RAFTS, SMALL BOATS
AND DOCKS, SPEED UP AND SIMPLIFY APPROVAL OF NO WAKE AREAS.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

IF GLOBAL WARMING IS GOING TO REDUCE THE AMOUNT OF RAINFALL,
STUDIES AND ACTIONS TO PROMOTE WATER CONSERVATION
SHOULD BE MADE TO KEEP THE LAKE AS FULL AS POSSIBLE.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M:TRMP@usace.army.mil, Website: <http://www.svl.usace.army.mil/parks/tablerock/trmasterplan.htm>. How would you like to see Table Rock Lake in 20 years? With a continued uninterrupted shoreline - that it remain natural NOT like Lake of the Ozarks with an overabundance of docks and floating business! (Stay Green!)

What about Table Rock Lake is most important to you? The Lake Water needs to remain clean! We want to be able to continue to swim and eat fish from clean water.

What is one thing that could be done to improve the lake? When old resorts are sold off as individual residents - they should be mandated to place new septic systems - not be allowed to use old systems - any new building should be required to put in "NEW GREEN SYSTEMS"

Additional comments on the Master Plan Revision or about issues that should be studied:

(1) Limit boat sizes (pleasure boats on Lake) - enforce more boating regulations - speed limits (We don't want another lake of the Ozarks!)

(2) Increase the level of the water where the dam automatically shuts off - we need a more consistent water level for our existing boat docks.

(3) Enforce fines for littering on lake - all docks should be mandated to have new floatation - NO. Foam!

(4) Most important - Clean + Natural Table Rock Lake!!!!

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 374-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasierplan.htm>. Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

- Continued Aesthetic Features
- WATER QUALITY
 - Control of Contamination From Up-Stream Cities & Towns
I.E. S.W.D., Ozark etc.
 - Control of Septic Tank Use Around Shoreline

What about Table Rock Lake is most important to you?

- Fishing - Boating - Recreation
- Would like more restrictions on Boat C. -
LARGE BOAT CREATE SAFETY ISSUE

What is one thing that could be done to improve the lake?

BETTER WATER LEVEL CONTROL - ESPECIALLY DURING SPAWNING PERIOD.

Additional comments on the Master Plan Revision or about issues that should be studied:

I feel that over the years - The Lake Management has been good & would be disappointed to see Shoreline permits expanded for more Boat Docks - This could create another Lake Ozark Problem
The Lake has Great Shoreline Aesthetic Features which I would like to see changed with more Dock Areas
Continue monitoring Boat Dock Maintenance (Existing Docks)
MAINTENANCE

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

A clean body of water, utilized fully: electrical generation; in particular to benefit this area; recreation for youngsters, kids, seniors; lakes; nature lovers, etc. With a vibrant service economy in some places & unspoiled natural areas in others. If this is a tall order, particularly as the diverse population continues to grow; along with the number of annual visitors.

What about Table Rock Lake is most important to you? The best part of the quality of life in this area, aside from natural beauty, is the quality of the casual, peaceful life. I deplore the increase in light pollution - it is a little harder, to see the stars now than it used to be. The quality of life for those who are self-motivated is unparalleled - quiet; unpretentious; friendly.

What is one thing that could be done to improve the lake?

Keep the water clean.

Additional comments on the Master Plan Revision or about issues that should be studied: The above questions are rather superficial. What needs to be looked at is how to manage a growing population in a positive way that will accommodate retirees, families; vacationers, entrepreneurs. I suggest you implement "enterprises zones" along with natural zones. These areas would encourage businesses, marinas, docks, etc. but in contained areas. The size of boats should be limited to areas that can easily hold them - i.e. you need cabin cruisers are popular to those west of Fayetteville City - wakes are too large for the size of the lake. Perhaps the Corps could sponsor the

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Water quality is the most important
Factor under quality is the most important

What about Table Rock Lake is most important to you?

To maintain the water quality
and the lake's natural beauty

What is one thing that could be done to improve the lake?

Keep CAT from draining
the lake and keep the water level up

Additional comments on the Master Plan Revision or about issues that should be studied:

The water level is the most important
factor in the lake's health

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. How would you like to see Table Rock Lake in 20 years? IT SHOULD BE CLEANER
WITH CLEAN SHORES AND IN THE WATER. I HOPE WE
STRIKE A BALANCE ON PUBLIC AVAILABILITY WITH THE NATURAL
NEEDS OF THE LAKE.

What about Table Rock Lake is most important to you? ITS BEAUTY - LOOK AT IT
FROM A DISTANCE AT THE OVERLOOK NORTH OF SHER KNOB.
THE LAKE ALSO HAS GREAT "POTENTIALS" FOR THE AREA.

What is one thing that could be done to improve the lake? AN EDUCATIONAL PUSH
TO TEACH PUBLIC AND RESIDENT PUBLIC WHY THE GROWTH OF
VEGETATION AND TREES SHOULD BE PROTECTED TO KEEP WATER
QUALITY -

Additional comments on the Master Plan Revision or about issues that should be studied: FIRST - WE APPRECIATE AN OPPORTUNITY FOR INPUT - WE
ALSO KNOW YOU CAN'T PLEASE EVERYONE BUT THERE ARE
NATURAL RULES WHICH SHOULD BE FOLLOWED. THERE SHOULD
BE A WAY TO COMPROMISE ON BOAT SPEED AND SPEED
ON THE LAKE - WE WERE SWAMPED ON 4TH OF JULY AT NIGHT
BY A VERY LARGE & FAST BOAT AFTER S.K. FIREWORKS,
THE USE PARALLELS AROUND THE LAKE SHOULD BE
CONSISTANT & ENFORCEABLE

THANK YOU!

How would you like to see Table Rock Lake in 20 years? improved water quality
less cutting on Corps shore line
no more docks or dry docks
smaller boats & motors (boats must fit dock slip)
noise is a problem - big motors & ski do's
ski do behavior

What about Table Rock Lake is most important to you? water quality & level

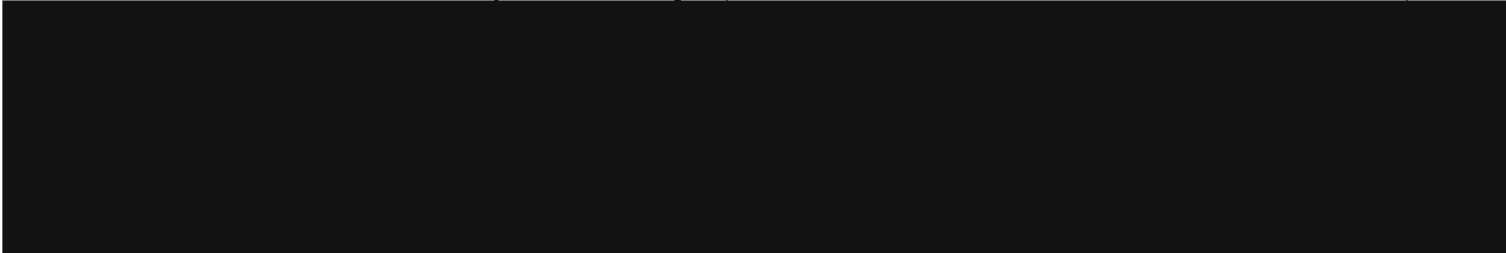

What is one thing that could be done to improve the lake? water, water, water
Get the drunks, strippers, drug users & party
people out, especially at the cliffs. Children
especially should not have to see that.

Additional comments on the Master Plan Revision or about issues that should be studied:

How would you like to see Table Rock Lake in 20 years? No more DOCKS than today. We Don't Need or want this lake to be like Lake of the Ozarks. This will become that if we don't do something to manage the type + quantity of users. More of the coves could be made "No SKI AREAS" so that the DOCKS Don't keep getting pounded by the same boats over & over.

What about Table Rock Lake is most important to you? Clean water with Quiet Coves

What is one thing that could be done to improve the lake? Improve the Fishing. Limit the size and horsepower of boats on the lake.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/table-rock/trmasterplan.html>. How would you like to see Table Rock Lake in 20 years? The Shell Knob area
of Table Rock is distinct in character - Quiet, under-
developed and abundant wildlife - The residents, and
visitors to this area want to keep that quiet side of lake
feeling -
Keep the Shell Knob area, the quiet side of the lake -
Slow speed's, limit boat size -> wake issues, -

What about Table Rock Lake is most important to you? The peace and quiet
we enjoy in the Shell Knob area -
Water quality is a major factor for fishermen and
swimmers -

What is one thing that could be done to improve the lake? Limit boat sizes in
the smaller channels like we have in Kings River / White
River confluence -

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Keep government land as is, - Small resorts in our
area are not over utilized - You can rent a boat slip
at least on all major holidays - Not seeing congestion -

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

- More Commercial Docks to help lower cost of rentals & fuel
- Limits placed on speed - wake
- Breakwaters placed in coves with alot of Docks
-

What about Table Rock Lake is most important to you?

- The lake is kept affordable to the surrounding people and lake users
- Private Docks should be treated just like the commercial docks

What is one thing that could be done to improve the lake?

- Put limits on the size of boat wakes IE Safety

Additional comments on the Master Plan Revision or about issues that should be studied:

- Costs to users
- The 37 supplements to the 1976 M.P. these can be very costly to users / Dock owners and we cannot comment on them
- Trying to maintain lake levels and try to reduce large swings in levels
-

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Similar to what it is now
Continue to maintain cleaner water

What about Table Rock Lake is most important to you?

Boating and fishing

What is one thing that could be done to improve the lake?

Additional comments on the Master Plan Revision or about issues that should be studied: ^① Work with counties to enforce strict laws regarding septic tanks to keep water clean + safe. ^② Make it easier to remove dead trees and logs from shore line before they float when flooding and become a hazard to boaters. ^③ Allow poured concrete steps on steep areas leading to boat docks for the safety of dock owners and guests, especially the handicap.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean, clear,
smooth (no big waves from big boats)
Camping, fishing, boating for families. Not a
party lake for college kids.
Clear shore lines, no clear cutting of trees, clean up
of dead wood.

What about Table Rock Lake is most important to you? I am concerned about
the spread of Zebra Mussels. I know there has
been awareness advertising to try to prevent the
spread of these Zebra Mussels. I feel like Table Rock
is one of the few lakes that they have not taken over.
Can we do more to prevent them in Table Rock Lake? continued

What is one thing that could be done to improve the lake? Keep the lake beautiful
Limit or do not allow the large multi unit (using) condos.

Additional comments on the Master Plan Revision or about issues that should be studied:
I would like to see boats inspected before they are
allowed to launch at Table Rock (for Zebra Mussels)
I would like to see washing stations where high pressure
washing of boats before they launch would be required.
make it a crime to put a boat with Zebra Mussels in
a lake that does not have them.

Work to find a way to get Zebra Mussels out of lakes
that have them now

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Cleaned up for sure.
Take any inactive recreation areas and turn them
into wildlife sanctuaries don't develop them.
We do need more fish and wildlife sanctuaries. Shoreline
management plan needs more regulations and restrictions and
people to follow through w/ them. The best way to put
it is PRESERVE the Lake & habitat.

What about Table Rock Lake is most important to you? Cleaning up the water.
I have lived here 25 yrs on the lake - I am only
52 yrs old and have seen the water quality diminish
immensely. All of it needs cleaned up.
Preserving the land - More building restrictions.

What is one thing that could be done to improve the lake? Restrict building.
(In other words preserve the lake).

Additional comments on the Master Plan Revision or about issues that should be studied:
While maximizing the use of the resources of the lake
make sure it is regulated to preserve the lake.
Spnd more time identifying and protecting cultural
and natural resources.
Monitor more closely the general public on the lake and
around the shoreline to preserve the lake.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Subject: Master Plan Revision Input - Tom and Kathy Hankins

Hello,

I have been coming to Table Rock Lake since the mid-1960's. My wife and I now own property on the lake and two boat slips. Will build in retirement, about 3 years from now.

While much growth has occurred around and on the lake, what continues to attract me and my family is the fact that Table Rock is still a reasonably quite and natural lake environment. The shoreline has remained largely unspoiled, the water quality good, and boat traffic manageable, even on busy summer weekends.

We do not want to see the character of the lake change for the worse - significantly more lakefront building, more boat traffic, more strain on water quality.

The primary control to all of this is dock zoning. The original plan of about 10% of the total shoreline zoned for docks is all that it should be. We ask that in the Master Plan Revision, Dock Zoning be limited to what it currently is - NO expansion in Dock Zoning.

Recreational lake use can be supported by good public launch ramp facilities. Perhaps more of these are required.

And perhaps an additional one or two public marinas.

But NO EXPANSION TO RESIDENTIAL/COMMUNITY DOCK ZONING.

My other request is that the Corps be funded such that it can properly staff to enforce the current rules and regulations. There are too many people that take advantage of the Corps lack of staffing and violate the rules designed to protect the shoreline and government lands around the lake.

Thank you for allowing input to this process.

Dana,
I am primarily concerned about the water quality and feel no new septic tanks should be allowed close to the lake. In addition, I don't want to see Table Rock become another Lake of the Ozarks, so crack down on the size and the speed of boats, please, as well as the number of docks.
Thank you.

Subject: Table Rock Lake

I read the article in the paper about the meetings for vision casting for Table Rock Lake. Since I may not be able to attend one of those meetings, I would like to put my thoughts on paper and forward them on to you. I LOVE, LOVE, LOVE Table Rock Lake and my main concern is KEEPING IT THE QUIET LAKE that it has been. By that I mean, no more boat docks on the Lake and not allowing big hotels to be built on the lake or any kind of "speed boat racing". When I go to Lake of the Ozarks, it is a nightmare. It has become known as the "party lake" through out the state. . .meaning lots of alcohol and late night parties in the coves and on the boats. It is noisy from morning til night. By comparison, Table Rock has been a quiet lake, more for families and children. I have lived here for 40 years and raised my children here. . .with many wonderful memories on Table Rock. The only way to make it better is to have more hiking/biking trails beside the nice one that now exists starting at the marina. We could use another swimming place in addition to "Moonshine beach" plus some hot dog stands along the way for when the kids get hungry.

Our top priority has to be to keep it CLEAN, both below and above the surface. We must watch out for run off from developments that rape the land and then sit undeveloped because of lack of funs. Pollution from septic tanks has to stop. No more dumping into the streams that lead to the lake. We have to watch out for algae growth. 40 years ago, you could see to the bottom of the lake; not today. Pollution is gradual. . .what kind of plan can we develop to stop it?

My other concern is for downstream. In the last ten years we have had TWO "50 year floods". That doesn't bode well for the future. Can we raise the capacities for the spillways, or walls on the dam itself so it can hold back more water in those flood years? Properties that were always "safe" before, have now been declared in a "flood plane". Do you know how expensive flood insurance is? Or how devastating to have everything you own destroyed by water? Or how much EVERYONE'S insurance in that zip code goes up when flooding happens? If we are doing a 50 year plan, I think we need to plan for the "WORSE CASE SCENARIO" and no longer hope for the best case. Mother Nature has a fever and we need to help her get well, while preparing for some major hits.

Priorities for the lake:

1. Improve water quality ie no more septic tanks unless of quality. Encourage/require all the towns around the lake to put in septic systems and require hook-up. No fertilizer use around the lake. No phosphate containing dishwasher or laundry detergents to be sold in the stores around the lake.
2. Size limits on boats and on number of docks--rigidly enforced. ie no permit, no dock or boat.
3. Speed limits on the lake using the water patrol to enforce with significant fines up to and including seizure of the boat.
4. Any additional measures needed to prevent Table Rock from becoming another Lake of the Ozarks.

Thank you,

[REDACTED]

The buyers of the home that you are selling will not incur any issues with the transfer of the boat slip(s) registered to the seller. The Table Rock Project Office will continue to manage its existing permits while we implement a moratorium on Shoreline Management activities beginning 1 December. The moratorium only include new requests for additions/modifications to docks, new docks, new vegetative management (mowing permits), etc.) If your seller is currently mowing on public property without a permit they need to request a site inspection that would allow this activity before 1 December or the new owner will not be able to continue to maintain (mow) this area as the Table Rock Project Office will not issue any new vegetative management permits after 1 December 2012 until the moratorium is lifted. Should you have additional questions please contact Chief Ranger, [REDACTED]

Subject: Table Rock Lake comments

My husband and I saw the article in the Springfield News Leader this morning.

We are very pleased that a "Master Plan" is in works. We certainly do not want to see Table Rock Lake having the same issues Lake of the Ozarks has with too many docks and poor water condition.

We built a house just up the hill from Big Cedar in 2011. Although it was an expensive septic, we were pleased that building codes are strict and extreme caution is used. We have a boat docked at State Park Marina. Some of our concerns are the large size of boats on the lake. These large boats create a ridiculously LARGE wake and travel too fast. Speed boats do the same and travel at dangerous speeds. I have also noticed that when filling the boat with gas the attendants allow the gas to spill over when full. I have actually had them tell me that was normal and no need for concern. I realize its a small amount, but if you consider how many boats get filled during the summer, that can add up. Lastly, I feel there are boating accidents that could be prevented if State Park and other facilities who rent boats would do a more thorough job of giving directions to boat renters. It is a common problem to see pontoon rental boats pulling a tuber and pull directly in the path of other boats, or, a pontoon filled to the brim pulling directly in front of a boat pulling a skier. It never fails, the side reads: State Park Marina,

Here are our concerns in short:

- Oversize large boats with twin engines
- Speed boats
- Speed in general
- Large wakes
- Gasoline spillage while filling up
- Rental boaters lack of boating knowledge

Continue to focus on Table Rock as a public fishery. Support additional habitat enhancement, bush piles for example.

Maintain a buffer zone around shoreline, no new development within this buffer zone to protect scenery for future generations.

Great project!!!

Subject: Table Rock Lake

Thank you for the opportunity to express my thoughts about how Table Rock Lake should look in 20 years. Our family has been on the same point (Cow Creek off point 6 marker) for 48 years. Our kids have enjoyed a life of lake memories for the past 28 and 26 years. My husband's family still owns one of the few wood docks on the lake and we are part owners in a dock close by. My husband and my first boat was a used 16 ft. 1975 Cobalt. We took a plunge and purchased a used 1994 19 foot Cobalt quit a few years ago. Like many families, the lake is more than just a part of our life, it's in our blood!

We have seen changes to Table Rock Lake mostly in recent history, many of those changes make us think of Lake of the Ozarks. Our biggest concern is for the large boat traffic and the speed in which they go. I see our shore line being washed away and eroded by the extremely large wakes. More and more trash is washed up every weekend. Will it be not too long before we have to install concrete wake protection as many of the Marina's have had to do? Our dock gets jostled and the large dock entering our small cove has had boats swamped by the wakes while tied in their slip. The cigarette boats that go racing up and down our cove is not only dangerous, but unpleasant to listen to.

Our next concern is for the party cove that has been set up at the back of Cow Creek. Many times we have counted over 100 boats. Will it take a fatal accident from the drunk boat drivers to have something done about the "Party Cove". It wasn't too many years ago, we could ski, wake board and pull children on inflatable toys. With the amount and size of boats, it is impossible to do that for most of the day. Also, our 19 foot boat is no longer large enough to compete with the wakes. It is becoming more and more difficult to enjoy the lake as a family. As the grossly large boats go up and down the cove, we have to shut our engine down just so we are not thrown around the boat (have you seen the youtube video of the people on Lake of the Ozarks ((LOTO)) being thrown around their boat? Here is a link if you have not http://youtu.be/D0pql_pflgk) Water Patrol is no longer able to control this reckless activity. Is this what Table Rock will look like in 20 years?

I have one more concern to add. Because of the size of the boats on the lake, we have purchased a 23 foot boat. While I understand the need to restrict docks, we needed to raise our roof and extend our dock to accommodate for the extra 4 feet of length and 6 inches of height. We were denied both requests. Because we have been on the lake so long, we came under the "grandfathered clause". We need to enjoy the lake, and that meant we had to purchase a bigger boat just so we are not swamped. This lake used to look like a family playground. Now it looks like a mini LOTO with all the huge community docks and boats. Why not allow dock owners to improve and enlarge their docks so we can at least keep up with the dangerously large boats. There is a reason why all the LOTO boaters/partiers are coming to Table Rock Lake - there are no restrictions on their monster boats and the water is clean.

I believe everyone has a right to fun and recreation, but where does one person's irresponsible activity that they deem fun, infringe on other's safety and fun.

I admire and commend you for addressing this - I believe it is well overdue.

Thank you,

[REDACTED]

Subject: Table Rock Lake Master Plan Revision

November 26, 2012

To Whom It May Concern:

For the past ten years, we have owned lake view property in Shell Knob, Missouri, which includes a boat dock in the cove off Point 21. Although we are unable to attend the meetings regarding the master plan revision for Table Rock Lake, we would like to voice our concerns.

In the past few years, we have become increasingly concerned about two issues. First, the number of boats pulling wakeboarders has been on the rise. The huge waves thrown by these boats in our small cove have caused extensive damage to many boat docks, ours included. Just last summer, we were forced to repair floatation devices under our swim dock. One of the floats had been completely displaced; two others were unseated and needed to be secured. Twice, we have had to repair the gangway when it was wrenched from our dock. We fear our efforts will be in vain, however. As soon as the wakeboarders begin again next summer, the damage will most certainly reoccur. The boats pulling skiers and water tubes do not exact damage because their wakes are so much smaller. We never had these issues when we first bought our dock.

The second issue also concerns recreational boaters who set up "party flotillas" in our cove. These are a concern for two reasons - they are a safety hazard, and they often involve inappropriate activity. Often, the flotillas form just around the bend at the far end of the cove. They are not readily visible until it is almost too late to avoid them. Their position on the lake also obstructs the center of the navigable waters at the end of the cove, meaning that anyone not part of the flotilla does not have easy access beyond the flotilla. Further, the inappropriate activity may be a direct result of the location of the flotillas. Because they are sort of "hidden away," people on the flotillas abandon common sense and propriety. Some of them completely disrobe, drink heavily, and accost other boaters. The first time this happened, we had our young grandchildren on board.

We love Table Rock Lake and the recreational opportunities it affords to residents and visitors alike, but we who own docks on the lake would appreciate safeguards to enable us to maintain our property and ensure a certain level of consideration to all users.

Thank you for the opportunity to give input on this important issue.

Subject: Master plan

We moved to this area in 1979 and started taking our family to Tablerock lake for water sports, boating, fishing and just relaxing. In 2000 we bought a house on the lake and our family enjoys being there as much as we can. We have noticed changes that we would like to address.

1. Yes it is true we do not want our lake to turn into Lake of the Ozarks. Something can be done about speed limits/oversized boats.
2. We are at Longcreek and our water quality is good but we do notice a difference on other parts of the lake. Be absolute bulldogs on water quality especially leaking septic systems.
3. Offer more open on the Lake for game preservation, camping and hiking.

Thank you,

I have been fishing Table Rock since the mid 1960's, shortly after it had filled up. I have had few complaints over the years but this summer, while night fishing out of Aunts Creek, we discovered that the ramp pole lamp, even when working, was so dim that it put out very little light to load our boat by. Then, sometime in July, the light went out and two months later it had never had a new lamp bulb put in. I had reported the outage to the attendant at the guard shack but it did no good. For the safety and convenience of us old fishermen, could new lights be installed at Aunts Creek Public Use Areas' boat ramp & parking facilities? Thank you very much.

Subject: masterplan update

I have been a home owner on Table Rock for 6 years and chose this lake for its relative private setting, clear water and good fishing. I hate to think we would ever see this lake get to the condition that Lake of The Ozarks is currently in. Please keep our shorelines as pristine as possible and still accommodate the future needs of the population. I also would like to see more emphasis on fish habitat creation such as brush piles, shoreline log lay-downs etc. I have no objection to large boats, fast boats or PWC if the laws we currently have are enforced. I am a sportsman and want to keep Table Rock unique as it is today.

Thank you for giving me an opportunity to voice my opinion since I will not be able to attend any of the meetings.

Subject: Table Rock input

Dear Dana -

[REDACTED] and I read the article in yesterday's Springfield News-Leader with great interest. We greatly appreciate your willingness to entertain input from people, like us, who avail ourselves of the lake's amenities on a regular basis.

Our primary concern is with the ability we do not currently have to take substantial hikes on public lands around the lake. Some of the trails that do exist in the area are lovely, but development and noise around the lake itself are increasingly reducing its value as a natural resource for those of us who would like to use it for renewal and health enhancement. Evidence is fairly clear that noise, crowding, and pollution can have a substantial effect on people's quality of life, physical, and psychological health (many scientific study citations available on request). Keeping Table Rock lake a place of "resort" from such unhealthy variables for all of the public (not just landowners) seems to me to be the main priority for using lands in the broader public's interest. Like a public library, everyone should be able to enjoy the most important goods available at Table Rock Lake. And the important goods, in this case, are the lake's "resort" qualities—lack of noise, crowding, and pollution. I hope that future plans will keep opportunities for healthy resort (especially good hiking trails, safe and quiet water sports, and other healthy recreational affordances) in mind during all deliberations about the future use of this wonderful natural resource.

Best regards,

Coburn, Dana O SWL

Planners:

I received a notice of the meetings, but unfortunately will not be able to attend any of them. One item that, if I read the current code, limits the number of permitted, individually owned boat slips on the lake to two per individual or two per "family unit". Is this the correct interpretation? If I read this correctly, two individuals could own rights to two slips each (or four, total), but a married couple, together, could only own two (or one each). Has there ever been consideration given to allowing more per "family unit" or simply allowing all adults equal opportunity to own slips? The current language seems a little unfair and punishes married people. Please let me know if I am reading this wrong.

Please consider changing this language. Please call if you have a question about my request.

Thank you,

To: CESWL-TR Master Plan SWL
Subject: Table Rock Lake Master Plan

Hi,

I'm not able to attend one of the Master Plan meetings but wanted to express my ideas.

I love to take my children and Grandchildren fishing. I have been fishing Table Rock since May of 1974 and am now a fulltime, lake-front resident and am able to fish more frequently than in the past.

Having seen the changes on Table Rock over 38 years I wanted to comment on the unwelcome increase in the numbers and size of enormous boats and their destructive wakes... Everyone, self-included, enjoys water sports but this is getting out of control.

Of particular concern is the increase in the numbers of so-called "Wake-boats" that generate outsized wakes that regularly wash over the bow, gunwales and transom of my Bass boat which is not some tiny little jon boat but a sizeable 21' foot, fiberglass hull. If these wakes are washing gallons and gallons of water into and over the sides my boat I can only imagine how they are affecting others who fish out of smaller craft.

What is so disturbing about these "Wake-boats" is I have only recently learned they generate these huge wakes by pumping hundreds of gallons of ballast (lake water) into specifically designed tanks and bladders situated around the boat to force it to ride lower in the water while under operation. Some boat's manufacturers brag on their websites about being able to pump 1800 lbs of ballast into the hull.

A fisherman can be clear across the main Lake from someone operating one of these ballast-pumping Wake Boats and still get hit with water suddenly coming over the gunwales, bow or transom. Yes, those "Wake-boat" owners have the same right to use and enjoy the Lake as anyone but those wakes are unacceptable especially since they are deliberately seeking to generate the largest wake possible for their sole enjoyment while negatively impacting anyone/everyone else within range.

The other concern is the growth of the numbers and size of exceptionally large/long boats that are completely unnecessary to safely operate and navigate Table Rock's waters. How big is too big ? Start thinking about placing a Grandfathered hull length limit on Table Rock before the Lake becomes another unsafe Lake of the Ozarks. We already are enduring loud,

open exhausts from the multiple engined "Cigarette" type offshore boats that are migrating to Table Rock so let's put a limit on them NOW !

Thank you.

Subject: Table Rock Lake Master Plan - Revision

Hello---

I can't attend one of your meetings, but I have a few comments for your consideration. Please see below:

1. Large Styrofoam blocks float on the lake from time-to-time around Cape Fair and Virgin Bluffs. Where do they come from? While on the lake, they become a water craft hazard. These blocks may breakup, and land on the bank over time. It's great when they are removed, but some just stay on the bank. Docks that still use this floatation option should be forced to upgrade to the newer plastic option within a reasonable time frame.
2. Some older docks are a real eye sore. And, some of these docks might not even conform to current safety standards. Should your plan call for improvements and upgrades to such docks by the owners? I know this would be a problem of developing guidelines, reviewing the docks, and then enforcement. I hope that some grandfather clause doesn't exempt these docks from such improvements.
3. Some boat ramps and nearby parking areas are better than others when it comes to access roads and parked vehicles. However, in some cases boat trailers (etc.) are being stored in bushes and trees for long periods of time by some ramps. This should not be allowed. Such storage should not be allowed near the shoreline either.

Thanks for your consideration.

Subject: QUESTIONS ON TABLE ROCK MASTER PLAN ANSWERED

HOW WOULD I LIKE TO SEE TABLE ROCK IN 20 YEARS?

Much like it is now, clean, a vacation destination. More docks to attract tourists and allow them to enjoy the lake.

WHAT ABOUT TABLE ROCK IS MOST IMPORTANT TO YOU?

My customers, their families and employees. Putting a HALT on new projects on the lake will likely put many of them out of business. I do not want to see good people suffer hard times in a hard economy, losing vehicles, houses, and possibly starving due to this HALT. I like the quality of the lake water and its surroundings, but with no more shoreline construction than is already allowed, I am not sure what a complete HALT will do except completely shut down some of these Dock Builders leaving them with no way to provide for their families.

WHAT IS ONE THING THAT COULD BE DONE TO IMPROVE TABLE ROCK LAKE?

Allow more docks on the lake for tourist income, and not putting a HALT on new construction. Let the lake and its residents prosper. You have many very good Dock Builders, if they cannot provide an income for themselves they will be forced to relocate, leaving the territory open for "shady" Dock Builders that will not provide the quality residents receive now.

I know my answers are extremely one sided but I fear for the wellbeing of my customers and what this HALT will mean to them. As a supplier we have many customers outside this area, not saying we will not feel this as well, but for many of these guys this is where they live and make their money, spend their money, where their kids go to school. The effects of this will be felt throughout the communities in this area. Times are tough enough, why make them tougher?

Table Rock Lake Master Plan Revision

(Comments via Internet)

You have requested comments reference your work on a revision of the use plan for our lake. My wife and I are retired, have two slips on a dock located at Little North Indian Creek arm of Table Rock Lake.

First, let us thank you for the existing Master Plan work, and the controls you currently have in place. Having shoreline that still exists in a natural state is a benefit to all who use the lake. Visitors always comment on the beauty of that feature, which thankfully, still exists. We ask that any revisions to the existing plan continue to protect large areas of the shoreline to avoid having docks in all areas, and the loss of beauty one experiences at Lake of the Ozarks.

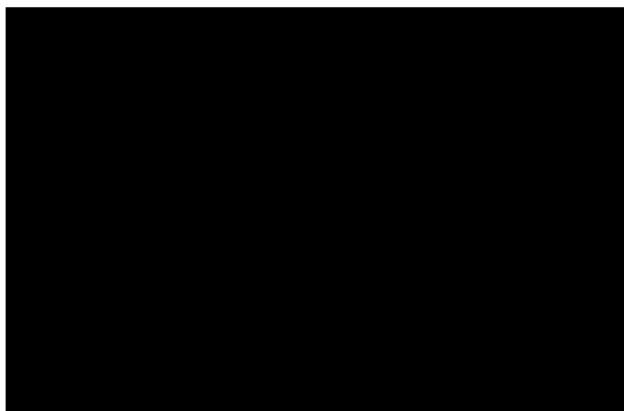

Our use of the lake consists of boating and fishing. We are not of a water ski, or jet ski age. Our boats are an 18 foot Stratos bass boat, and a 19 foot Princecraft aluminum deck boat. Our lake experience, and comments, are based on use of those two boats on Table Rock.

Large houseboats do not seem to be a problem, either with wake, wave, or shoreline damage. They are slow, and do not seem to have a hull design that makes large waves. For that we are thankful. We cannot say the same for some of the larger V bottom type cruisers that seem to be increasing in number on the lake. After having water actually come into my bass boat several years ago, from a wave made by a large boat, I asked a COE staffer about boat size restrictions. At that time I was told size of vessel was not a concern of the Corps. Given the damage to shoreline, docks, and dangers to small, normal size boats, that surprised me then, and it still seems to not make sense. The use of smaller boats for what I understand is called "wake boarding" also creates very large waves, with resulting danger to fishing boats, and stress to dock anchors, cables and platforms.

Thus, we ask you to consider size, and weight restrictions on boats, usage activities such as wake boarding, along with possible activity area limits that would put the larger waves on the main lake and out of the coves. Along with protection for the vast majority of lake boaters from waves, you might also consider speed restrictions to assist with safety.

We thank you for your work on this project.

Sincerely,

Coburn, Dana O SWL

Subject: New Table Rock Lake Master Plan

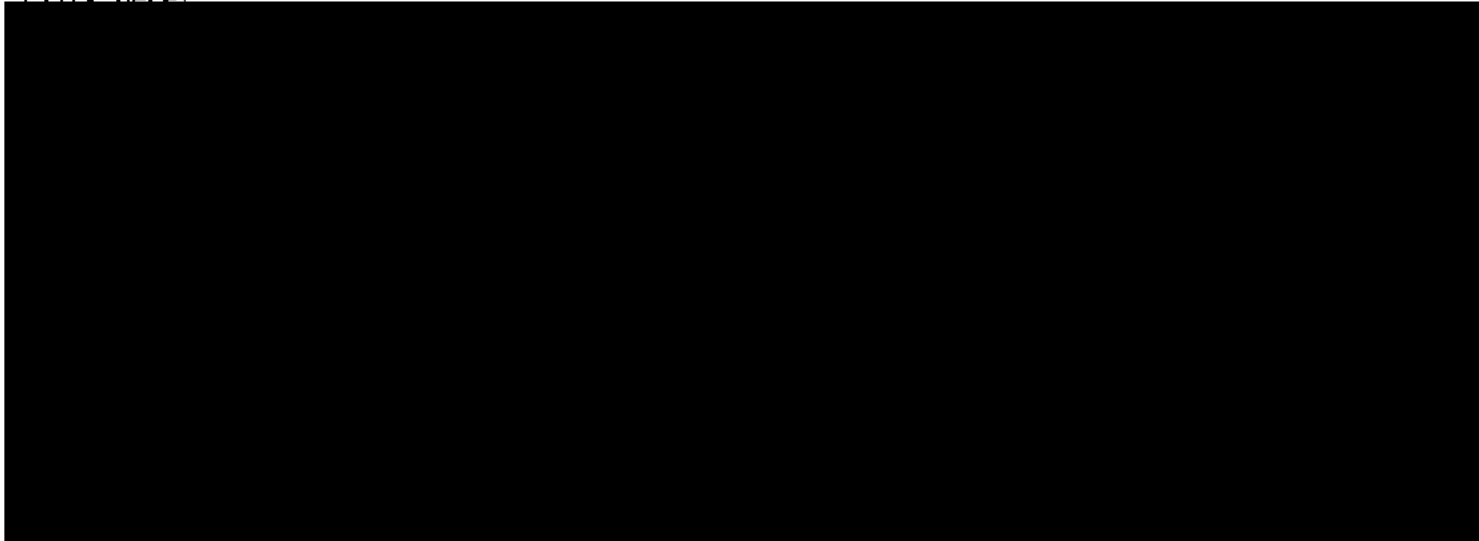

Thank you for the opportunity to comment on your new master plan for Table Rock Lake.

I, and my family, travel to and stay in the Shell Knob area of Table Rock Lake. We plan to purchase a house somewhere in that area and move there full time in the future. We tried to find a public place on the lake where we could fish. The only place we could find was on , I believe, a Forest Service property with about fifty feet of rocky shoreline with brush growing out in the water making it difficult to fish from the bank. We drove to Corps of Engineers managed boat launches and camp sites, but there were no fishing areas and fishing was prohibited from the boat launch and dock areas.

We don't own a boat, and may never be able to afford one, but that seems to be the only way that you can fish on Table Rock Lake. When we move to the area, we may not be able to afford shoreline property either. There are just no public areas from which to fish without a boat. Please, please, please consider some form of public fishing facilities on this lake!

I own a house and 2 boat slips in the Big M area. I have been coming to tablerock from Kansas for over 25 yrs. My biggest concern is with the public marinas. In the past 10 years there has been a huge increase in the number of boats over 30 feet that do nothing but consume gas and create a huge wake that is pounding my boat slip to death. There is no reason to have a boat this large on this size of lake other than the ones that are made to slowly cruise and sleep in. THERE MUST BE A LIMIT ON THE SIZE OF SLIP THAT CAN BE ALLOWED ON TABLEROCK (30FT OR LESS) and must include the public marinas. We are seeing an overflow from lake of the ozarks as these huge boats continue to move in and 99% are being housed at the public marinas. If they do not have a place to keep these boats, they will not keep coming to tablerock. It is rapidly approaching a lake of the ozarks situation where a ski boat and fishing boat will not be able to navigate during the day due to the huge wake and rough water. I love this lake and do not want to see it become DANGEROUS to the average family ski boat or fishing boat because of extremely rough water. As far as new slips go, I do not care if they are limited to only new developers in areas that do not impede boat flow. As far as vegetation permits, there is nothing wrong with the current system. Allow those who had been allowed to clear (grandfather) to keep that area clear, and inform new developers of current laws.

PLEASE AOODRESS THE ISSUE ON THESE HUGE BOATS (OTHER THAN HOUSEBOATS) THAT ARE RUINING OUR LAKE. MARINA OWNERS MUST BE LIMITES IN SLIP SIZE TO STOP THIS TREND. Thank you for your time.

Subject: Master Plan Comments

My wife and I have owned a lake home for 9 years on the shores of Table Rock and have boated on the lake for 30 plus years. We cannot attend any of the three meeting, but wanted to add our comments.

Our biggest concerns for the future of the lake are these:

1. Water quality - including concerns about algae growth and invasive species like zebra mussels. Partner with small subdivisions to assist them with sewer concerns.
2. Water levels - we would like to see new laws that allow the Corps more flexibility in adjusting lake levels in a proactive way and not so much reactive. These laws should allow use of weather forecast science to keep the lake levels more consistent than some of the recent years. The high water levels effect recreation and the debris becomes a hazard to boaters.
3. Development should continue to be watched closely and the number of docks permitted should be limited. The Corps has done a pretty good job of moving us toward multi-slip docks and this is a good thing. Commercial docks should not be allowed to be built without encapsulated foam. What is required for the individual docks owners should also be required of commercial docks. The current exception does not make sense for water quality.
4. Something must be done to move Wake Board boats to areas without docks. These boats are designed to throw four and five feet wakes. These boats come within a short distance of docks and are damaging the docks. We are constantly having to have our dock welded from this beating they are taking. The no wake bouys do not extend out far enough to do any good. When the lake is low and your dock is moved closer to the bouy - the distance is even less. We had numerous Kanakuk camp boats spending eight hours a day driving back and forth in front of our dock two years ago. I believe the Water Patrol was finally able to find a more suitable place for them to operate, but we still have private wake board boats that are not being controlled and the growth of the sport will only add to the problem. The Corps needs to address this issue in cooperation with the Water Patrol.

We are very fortunate to have one of the prettiest lakes in the country right here. We have many friends from other states that just love Table Rock and what it offers. Lets keep it that way.

Thanks for your work.

Subject: Table Rock Lake

I don't know what the longterm plan for Table Rock Lake in Missouri said but maybe it wasn't all wrong. As a 50 year resident/visitor/user to Table Rock I have seen the lake deteriorate from a leisurely boating and fishing paradise to a dangerous, huge boat speedway. It is not as bad as Lake of the Ozarks probably only because it is not as wide in many places but it is nearly impossible to find a quiet area to ski or fish without being swamped by big waves during the week. It is totally impossible on a week-end. I only go to the quieter parts of the lake and would never venture near Kimberling City area. You are beaten to death by boat wake from big power boats. You literally are taking your life in your own hands. That being said, the only way to control that is to restrict the size of boats. The high gas prices and slow economy have not hurt the boat business based on the increase in boaters.

I would hope that there could be restrictions on building so the waters do not become polluted like other lakes. The current septic tanks need to be inspected to make sure there are not leaks. Development near the lake edges needs to be stopped. Lake front access is always the most desirable but there is NO way to prevent septic from getting into the water so a sewage system is the only answer and it isn't failsafe.

Personally, I don't think we need to add hiking trails (I am a hiker) and other things to attract more tourists. We have plenty of tourists and that only brings more environmental damage.....look at Branson and the scenic devastation with all the highways being built. Nature, left alone, should be the attraction. Don't let development in the name of progress destroy our peace and quiet of the Ozarks.

Subject: Future plans

I agree that the lake quality and preservation is an important subject, However the problem most close to my personal interest is the control that the Corps has over the use of my slip. The rule that says that no one can use the slip except me is an infringement on my private property rights. The Corps let the business community write the rules and they put this in to ensure that they had sufficient business renting slips. That might have made since 36 years ago, but now they have a waiting list for space. This is a rule long past its time and needs to be changed.

Subject: Table Rock Lake Master Plan - Revision

Hello---

I can't attend one of your meetings, but I have a few comments for your consideration. Please see below:

1. Large Styrofoam blocks float on the lake from time-to-time around Cape Fair and Virgin Bluffs. Where do they come from? While on the lake, they become a water craft hazard. These blocks may breakup, and land on the bank over time. It's great when they are removed, but some just stay on the bank. Docks that still use this floatation option should be forced to upgrade to the newer plastic option within a reasonable time frame.
2. Some older docks are a real eye sore. And, some of these docks might not even conform to current safety standards. Should your plan call for improvements and upgrades to such docks by the owners? I know this would be a problem of developing guidelines, reviewing the docks, and then enforcement. I hope that some grandfather clause doesn't exempt these docks from such improvements.
3. Some boat ramps and nearby parking areas are better than others when it comes to access roads and parked vehicles. However, in some cases boat trailers (etc.) are being stored in bushes and trees for long periods of time by some ramps. This should not be allowed. Such storage should not be allowed near the shoreline either.

Thanks for your consideration.

Subject: Table Rock Lake master plan

Table Rock Lake in 20 years:

- * Beautiful & Pristine with high water quality

Most important:

- * Water quality & aquatic life
- * Safety - set some reasonable limit on travel speed (day & night).
- * Stronger limits on building docks. Marina's like Cape Fair would be nicer & we wouldn't need all of the private docks around the lake.

One change to improve the lake

- * Improve & maintain the water quality and aquatic life

Additional Comments:

- * 30 mph at night is too high & not often enforced
- * high performance boats & jet skis running 70 mph or higher on the lake create safety issues
- * water level was too low for most of the summer/fall/currently. This creates hazards for those using the lake.
- * better marking of shallow areas

Thank you for holding the meeting at Reeds Spring High School last night. My wife and I attended and were amazed at the turn out. We would like to congratulate the staff for their management of such a big crowd. In an answer to your questions I have attached the below information via word.

Table Rock Lake Master Plan Revision and Environmental Assessment

Attn: Dana Coburn, Chief, Environmental Branch, Planning and Environmental

[REDACTED]

How would you like to see TRL in 20 years?

Clean. Clean Water, clean shoreline, clean expansion.

What about TRL is most important to you?

Water quality. What ever happens on TRL and the surrounding areas is dependent on clean water. COE should move to allowing only cleaner motors (4 cycle) and work with the water shed in reducing pollutants from septic tanks, sewage treatment facilities, and run off from fertilizers and by-products.

What one thing that could be done to improve the Lake?

Cleaner water.

Additional comments on the Master Plan Revision or about issues that should be studied?

Additional docks should only be commercial docks. No new private or community docks. COE could lease the unused parks to vendors to establish commercial docks. This would concentrate docks in specific areas. The vendor would be responsible for maintaining the park and the dock area. Policing these docks for electrical, waste or safety issues would be easier and safer for the public. As I understand most slip owners don't own property near the lake. COE would receive funds from leasing these unused parks. The commercial docks would draw people to these under used areas. I think that private and community docks have moved people from the COE campgrounds to a boat slip.

One purpose of TRL is recreation, not private development. In order not to have a huge adverse impact on the current commercial docks, the leasing of the unused parks and expansion of commercial docks should be phased in over time.

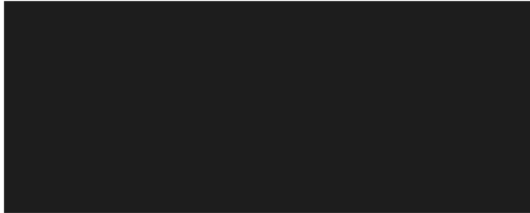

I have been on the lake since my dad purchased two lots at the end of Indian Point Rd for \$500, sometime in the 1950's. I have been at my current location since 1981. The water

quality for the first 10 years was better than today. During the middle 10 years the water quality was so bad that the water visibility was less than 1' at times. We also had algae growth that was very heavy and up to 10' long. The past 10 years the water quality has improved tremendously.

Subject: Table Rock Lake Reeds Spring Meeting Feedback

I sat in on your planning meeting at Reeds Spring High School for the Table Rock Lake planning process.

Actions I would like to see considered in the plan are :

- Control of invasive species
- Nearshore pollution controls
- Upstream pollution feeding into the lake controlled
- Habitat and wildlife protection and restoration
- Ongoing educational programs
- A system for monitoring all quality controls
- Routine evaluation of objectives and level of achievement (disseminate results to stakeholders)
- Routine systematic communication with stakeholders (online newsletter)
- Create partnerships with key groups focused on quality control issues
- Accountability for all users
- As numbers of users of the lake increase how will access be controlled?

Table Rock Lake is a substantial recreational draw for tourist to our area. The hospitality and tourism industry at and around the lake are keenly interested in the long terms development of management features for the lake.

Thank you for considering my inputs.

Subject: Table Rock Lake

Main concern is the sludge from the Springfield Sewer System, and the septic tanks in the area leaking into the lake. I think you'll need some kind of a water purifier at the mouth of the James River if you expect to have pure water. At intervals, Springfield just lets the city's waste bypass their facility to "work on it", and all their raw sewage is let loose into the James.

Put a speed limit on the power boats, and a size limit on the house boats, and cruisers. The lake should be for beauty and pleasure, not a place to show off how cool you are. Limit the business and housing developments. Let us have a pristine lake that can be enjoyed by both fisherman in a dingy, and surfers, too. It is not safe to have speeders pull someone on ski's. I think a portion of the lake should be set aside for canoes and small boats for fishing; much as Smithville lake . I'm certain that would cause a lot of complaining; but the lake is not only for just cruising arund. A lot of locals, as well as tourists, enjoy fishing without heavy waves washing their small boats ashore.

Good luck.

Coburn, Dana O SWL

Subject: Lake input

The plans that have been in place seem to have been adequate. Keeping with the beauty and cleanliness of the lake. Adding more docks would only create another Lake of the Ozarks. Lately we have noticed more boats that are high output motors and large size. In areas where it is narrow it has looked like a freeway and there are some boaters that do not realize there are smaller boats around them causing havoc on the lake. The idea is to have waterways that are safe for everyone and continue the peacefulness of Table Rock, the beautiful shoreline and beauty all around. The Kimberling City and James River arm areas are getting more and more like the Lake of Ozarks. Residents have commented that they feel there are way too many boats that tie together to party coming into the area. This may be something that cannot really be controlled, but with your jurisdiction maybe there is some way for control. If there are many more docks allowed this may really upset the ecology of the lake waters and the cleanliness of the lake. We are tired of picking up after the week enders are here leaving trash along side the shore and along the roadways. It just seems to be getting worse. How can that be controlled? This area has been so beautiful for many years and it seems to be heading to the likeness of 'big city' playground. Nature and beauty of the lake is going by the wayside.

As far as existing docks making them better for owners to add swimming platforms it may be ok. The existing owners, community or resort, know how much they love the lake, to be in the water and enjoy the peacefulness of swimming in clean water or just floating. They really is not adding any problems because they probably have been using the lake in that manner. Although for safer use of water off a dock with 10 or more slips there may be more people using it at one time. With a swim dock there is less of a chance someone could accidentally fall in that is not a swimmer. Or it is just a gathering place. The people of resort docks or community dock and private docks are not the ones who leave trash or a mess or beer cans and other waste, as these are the ones who respect the lake and its beauty. The problem is the visitors coming for a week end who just do not seem to care. Accommodating requests by existing dock owners may be something that could be addressed.

Also, in some cases where slips are at the 20' length taking into consideration people are getting boats that are 22 or 24, such as pontoons they may need to add to the length of the slips. To help accommodate the protection of their boats. Even in a small cove area, maybe they should be allowed to change the entrance to the slip to accommodate longer slips. I am not sure how this would be able to be done but it is just a suggestion. As far as issuing new permits it may be wise to allow them in very remote areas that are not already filled with docks every other mile marker.

Our bottom line is to try to keep this lake as pristine and clean and shoreline as grand as it is now. Don't allow it to change from this. It is more and more evident that when we do shoreline cleanup each year it looks like more and more people are abusing the lake and using it as a dump for tires and old parts from cars or just plain trash. Selling more state land would only increase the likelihood of ruining the lake.

Thanks for including residents in your decision making process. We are the ones who really care about the Table Rock Lake and also work to keep it beautiful.

Last but not least....PLEASE do not let it get like the Lake of the Ozarks with thousands of big big boats with very large or several motors on them spending time on the lake drinking

and tie together for large parties. Not to mention they do not know how to drive a boat on the lake, acting like they are the only ones on the lake.

Our compliments to the Corp for the great job they have been doing at Table Rock Lake for so many years.

Sincerely,

[REDACTED]

Subject: COMMENTS RE MASTER PLAN
Attachments: MASTER PLAN .doc

Attached FYI.

ATTEN: Dana Coburn, Chief,
Environmental Branch,
Planning & Environmental

A recent article in the Springfield News-Leader requested my input on the future of Table Rock Lake in connection with a planned up-date of the USACE's "Master Plan" for the lake. You, as the USACE Project Manager, requested a response to the following three questions:

1) How do I see Table Rock Lake in 20 years? It is a given that there will be a tremendous in flux of people (baby boomers) moving to this area in the next 20 years. That will bring more pressure on the lake in terms of water quality, boating, fishing, private & commercial docks and safety.

2) What's most important to me about Table Rock? Water Quality! There have been countless studies and reports made from various "partnerships" about pollution issues. A lot of venom has been directed at private residences with failing septic tanks and lateral lines. However, not much has been said about municipalities, resorts, and other commercial facilities. There appear to be several government agencies who have jurisdiction over pollution but nothing seems to get done. I have seen little enforcement action and virtually no severe penalties that flow from the violations.

3) What is one thing that should be done to improve the lake? Enforce existing laws and regulations.

My wife and I moved here 23 years ago and we live on a bluff adjoining the "Corps Line" just South of Peach Orchard Cove, in Cape Fair. We also have a slip on a 12 stall dock in the cove and we have been avid boaters. It is our perception that there has been a declining inter-action between Corps Rangers and everyday people. The Rangers appear to be primarily involved as supervisors and managers with the commercial interests and the contract people employed by the Corps. In our view there is less enforcement of "clear cutting" on Corps land and the old, unencapsulated, styrofoam flotation that still remains on private and commercial docks. We realize that water pollution, control of no-wake zones and the prolific explosion of otter populations are the primary responsibilities of other agencies. BUT, if positive action is not being taken by them, it is a Corps lake after all and ultimately a Corps responsibility.

Some friends and I planned to attend your meeting at the Reeds Spring High School last night but were turned away because of the humongous turn out. We suspect that the large turn out was due to negative feelings about the Corps in our area. Frankly, it has been this way for the past 23 years and it has gotten worse and certainly not better.

Sincerely,

[REDACTED]

Coburn, Dana O SWL

Subject: Tablerock Lake Plan

Thank you for reading these comments:

I wish to encourage the Corps to maintain a healthy, vibrant, ecologically sound water system. Many factors have to be weighed when making such a long-term plan. Future growth rates are often difficult to predict but I believe growth in this area will continue to put pressure on the quality of our watershed. I would encourage the Corps to seek the input of demographers and ecologists when developing a plan that may alter the relatively clean conditions of Table Rock Lake. Managing intense developments that can lead to water quality issues will be important in the years to come. Education of people residing in the watershed area will become even more important as our growth continues. Please incorporate programs for education into the master plan. Good luck with all the difficult work and as I usually tell people, "Follow the science".

Sincerely,

I regret that my husband and I will not be able to make your meetings on the revision plan. Our main concerns are that five years ago we bought a house at Eagle Rock, Mo. We drive over five hours and drive right through the Lake of the Ozarks to get to Table Rock as the lake of the Ozarks is in our minds just a pool of crap. So developed and not attractive at all. The crowds are unreal and we love Table rock but am concerned about the amount of traffic that it has picked up in the last couple of years. We would like to see the lake stay a clean lake and some how have more contoll on developing as wall to wall houses will not work for very long. We do our part to keep the lake clean and also maybe cutting out some of the trees in the coves ? I know they are good for fishing but there are so many. Glad you are updating as I am sure that not much is the same as when the lake was created. I want my grandkids to get to enjoy it. [REDACTED]

Thanks Becky. I know you are very busy with the meetings and everything associated with them, but I thought I would make one suggestion and ask how you think I should proceed with submitting it.

First, I heard several disgruntled people last night...not sure what they expected but bad press is not good for this process.

Anyway, here's what I would suggest:

Create a Citizens Advocacy Group. About eight or ten people in the area that would represent "the masses". A couple of the reps would be local businesses, a couple would be lakeside residents, a couple would be from various organizations, i.e. Fishing Clubs, Shoreline Cleanup and Clean Water Group, etc. This group would be established to "stay in the loop" and be the primary contact for citizens with concerns as well as to assist in communications. The primary purpose of such a group would be simply to alleviate the fears and concerns of the citizenry that their interests are being considered in this process. I believe that the meetings being held are a great first step, but it is extremely hard to keep everyone informed as this process proceeds.

That's it and thanks again for your help and for listening. [REDACTED]

I will get your name on the list for a renewal of your mowing permit. A park ranger will be contacting you in the coming weeks to set up an appointment to meet at your property for the inspection.

It has been so encouraging to see and hear so much concern for the lake, and it was very nice to get to speak with you last night. We'll be getting everyone's contact information entered in, but in the mean time, check out our website periodically. We anticipate having a copy of the 1976 plan on the website in the coming week.

<http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>

Let me know if I can be of further assistance.

Subject: Vegetation permit

Hi Rebecca. After the meeting last night and then speaking with you latter, I decided to check my Vegetation Permit and yes, it did expired in Sept. So, please let this email be my request and application for renewal.

I appreciate you taking the time to discuss this with me after the meeting. I can appreciate the task ahead of your team in this process. It is one thing to establish an operating plan for today. It's entirely different making a plan that keeps a focus on what it should look like in 20 years.

I did sign up for email notifications of this process. I truly believe that the more information that the local people are provided will alleviate a lot of fear and mistrust in this process.

Thanks again,

Subject: Table Rock Lake

Dear Dana Coburn: First let me introduce myself. My name is [REDACTED] and I am the Founder and CEO of TRACETS. TRACETS is an acronym for Table Area Conscience Effort Toward Stocking. Incorporated in February of 2001 our mission statement is "Lake Preservation through Restoration and Education". We have 1.4 miles of highway adopted that includes scenic view that overlooks Taneycomo side of Table Rock Dam. The first year we picked up over 100 bags of trash and consistently 30 to 40 each year. We donated a thousand dollars to each Branson and Blue Eye high schools with the agreement fishing would be introduced into their school activities. We have also participated in the annual shoreline cleanup every first saturday in April and are currently working on picking up trash that is left at the end of public access roads. We try to utilize community service individuals to keep our cost down due to recession. We organized a bass tournament in which we gave out trash bags and gave away two nights three day stay at Big Cedar Lodge for heavy trash bag. Also gave cash to 1st and 2nd heavy stringer and big bass. It was fun for all and a good cause. I am currently working with Greg Ohler and Ozarks Rivers Heritage on installing a state of the art Handicap Fishing Facility located on the observation loop road. Submitted blue prints and engineers did a depth study in front of the handicap rail that is in place already. Also submitted a proposal for portable floating restrooms called S.S.Relief. With 40 to 50 million people using the lake we need to be very concerned about our water quality along with the litter. I also would like to propose a full time crew on the lake picking up trash. The 745 miles of shoreline needs major help especially in our high traffic areas. Table Rock Lake is a major resource and we need to treat it that way. Enough about TRACETS. My first guide trip was out of Viola boat dock in 1978 for Ralph Johnston. In later years I guided out of Campbell Point, Baxter, Big M, Eagle Rock, Hwy 13, Indian Point, State Park, Big Cedar and Long Creek. I am still licensed by USCG since May of 86. Have had the blessing to be on Table Rock Lake alot and have a great passion for it. This is a great event in my opinion and hopefully fantastic results are in the making. I have focused my guide service toward fishing with the handicap and underpriveledged free of charge. Due to the recession and lack of donations it has been a challenge to keep my promise to continue my dreams to Table Rock Lake. Would feel very blessed and fortunate to be able to continue my love and passion. Thank you for your time!

Subject: Boat Ramp

Dana

Master Plan

I have spent two years trying to get a community boat ramp in Shady meadows on the Kings river.

I called your office and was told I had to go to Berry County commissioners for approval. Howard and Wayne approved the ramp but said they would have to file directly with your office for permit. I would like this approval before the start of the master plan. Things to improve would be the amount of time it takes to get somethings done. Please let me know.

Thank you

Subject: Shoreline revisions

Since the last Shoreline Master Plan Revision, the U.S. Forest Service has acquired lands that abut Table Rock Lake's shoreline. Some of that shoreline had been red-lined for boat dock zoning. Has any thought been given to revising the Master Plan to make adjustments for red-lined areas that have been lost due to the Forest Service land acquisitions?

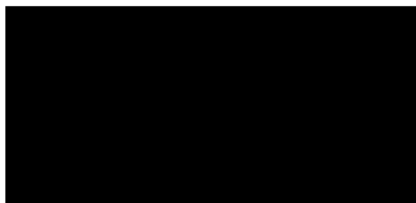

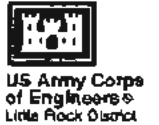

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below

How would you like to see Table Rock Lake in 20 years? _____

good water quality, improve water shed
protect wildlife
Don't want to see it turn into Lake
of the Ozarks
stabilize lake levels if possible

What about Table Rock Lake is most important to you? _____

Amazing views + keeping shoreline clean
Restrict size of boats allowed, water becomes
so choppy becomes a hazard for small boats.

What is one thing that could be done to improve the lake? _____

~~Restrict size of boats allowed on the lake~~
Remove stumps in water or at least put up
indicators.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MATRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Subject: Table Rock Lake concerns

Dear Chief Coburn:

I see you are soliciting thoughts on the future of Table Rock Lake. We have docked a boat at Table Rock for about 20 years.

Obviously, summer weekends are overly busy. I don't know what could or should be done about that. My concern is the size of the wake put out by boats. Our boat has been swamped by boats that were not that big and were not going that fast. So, my suggestion is to limit the size of the wake.

I would be thrilled to see the size of the boat and the size of the motors limited; but limiting the size of the wash is essential for safety.

Thank you for this opportunity to make a suggestions.

Sincerely,

[REDACTED]

Subject: Table Rock Lake Master Plan

Dear Chief Coburn:

I am pleased to see you are asking for comments regarding the future of Table Rock Lake. My family has owned lake front property there since 1992 between the dam and Long Creek Bridge. In that time, the lake has gotten busier and busier on weekends; we try not to go out in a boat on Saturdays or Sundays until the evening.

Apart from crazy boaters and those drinking, the most dangerous and frightening change is the wake put out by some boats. Some of the boats look like ocean-going vessels and are entirely too much boat for our lake. But, if they don't go too fast, they are fine. I would like to see a motor limit, though. I remember the 32' cabin cruiser at Lake of the Ozarks that sunk and the woman drowned.

The dangerous problem comes when these boats put out a large wash. We have been swamped - just sitting, fishing, and swamped a handful of times. That is dangerous.

Because the other boats get bigger and bigger, one is forced to get a bigger boat as defense for safety and comfort. That just feeds the cycle and it limits the pleasure of a boat to those with money.

So, I hope you will institute a wake policy. And, I would really like to see a size limit on either, or both, boat size and motor size.

Sincerely,

Subject: comments: Table Rock Lake future

Re: Table Rock Lake comments

My history: Lake front property owner

I fish southwest Missouri. Even though I own property on Table Rock, I trailer my boat to Pomme and Stockton to catch fish. No fish, comparatively, in Table Rock. So, number 1, I would like to see more fish in Table Rock.

Safety concerns:

Boats have gotten bigger and bigger. My little fishing boat is way out-gunned there. For safety, a wake limit should be instituted at a minimum. Optimally, a boat and motor limit should be instituted.

I would like to be able to mow the grass and up keep the water front/ shore line. This rule is not inforced equally across the lake some places get to mow to the waters edge and others of us get threatened/ fined if we try to beautify our waterfront. Instead you make us have this all natural grown up unkept look in residential areas. I understand in nonresidential areas leave the shore line alone and I am not saying build or improve the shore line other than to mow the grass and trim a few trees. This makes the areas look presentable/nice from the water and from the land/road.

Subject: 20 slip Boat Docks

We could use more boat docks around the Sweetwater Beach subdivision in Golden, MO. That would be just upstream or South from the Kings River access off of RA road in Golden, MO. It has not been allowed due to the Kings River access boat launch is still considered a park. That park has been closed for over 12 years. There are a lot of home owners who would like their own slip. Parking space would not be a problem.

I am writing this email to request that you review the decision of the Table Rock Lake Project Manager to reduce the property contained in our lease (Easement [REDACTED]) of government property adjacent to Table Rock Lake near Branson, Mo. Our not-for-profit corporation CBMC (Clevenger Branch Membership Corporation) took over operation of Big Bear Resort from a commercial company in 1998. We continue to operate the resort in the same manner as the commercial company except that we are non-profit. We use any "profit" we realize from operation of the resort to improve the resort and surrounding government property. In 2001, we signed a lease with the Corps to continue to maintain the areas of government property adjacent to the lake and our resort in the same manner as has been previously done by the commercial company, with the Corps' cooperation, since approximately 1970. That lease was extended for a period of five years in 2006. After the Corps having agreed to lease these areas to the commercial company for more than 30 years and to then take away half of the area simply because we are not commercial is, I feel, discriminatory against us as a not-for-profit corporation.

The members of our corporation have invested heavily in improvements and maintenance of the government property under our lease. We have invested approximately \$20,000 in a rail fence to control access of ATVs and other motorized off-road vehicles, even more money building recreational facilities on the property, maintaining it, keeping it free of trash (providing trash cans and disposal), and providing policing and security for the areas. All of this has, and is, being done at no expense to the government or the taxpayers. If the local Corps officials would just take the time to visit these areas on any weekend in the summer, especially on a holiday weekend, they will find these areas being heavily used by the public, including many handicapped individuals and a large number of veterans. These folks are using the areas for group gatherings, picnicking, ball games, kite flying, model airplane flying, and games of all sorts. The availability of these recreational areas is especially important to the public on holiday weekends when the recreational areas maintained by the Corps at taxpayer expense are often at maximum usage.

To remove these recreational areas from our lease and care and allow it to return to brush is not only a disservice to the public, which heavily uses these areas, but also will be a big fire hazard to the adjacent property owners who have invested a great deal of money in their property with the reasonable expectation that those adjacent recreation areas would continue to be maintained as they have been for more than 30 years. The area on the west side of the resort was removed from our lease by the Corps ten years ago and we invite you to visit to see what a public hazard it has become. Since it is no longer a part of our lease, we are unable to police it or keep it clean and the Corps apparently doesn't have the staff to police it. As a result it has become not only a fire hazard but a haven for illegal drug activity. You would be hard pressed to find any group more supportive of good water quality for Table Rock than the members of CBMC. After all, we are here because of the lake and we care very much for the overall health of the lake. We firmly believe the public's use of the recreational facilities provided at our resort are NOT detrimental to the lake or its water quality. We would challenge anyone to provide evidence to the contrary.

CBMC respectfully requests that property owners be allowed to mow and maintain property to the water's edge. We have been good stewards of this government property for more than

thirty years, making it available at our members' expense, free of charge to the public. We ask for the opportunity to continue to do so.

Sincerely,

Coburn, Dana O SWL

Subject: Table Rock Lake Master Plan

Dear Corps of Engineers Staff:

There are a number of items that the Corp needs to implement that cost the corp and hence the taxpayer little or nothing to implement and are necessary for good lake management. Some will cost the residents some money but the savings and protection of investment will be well worth it. Here are some items that need immediate attention:

1. The issue of wake reduction is not just for shoreline sensitive areas but the entire lake. Boats should be restricted in size, speed and size of wake produced for safety and enjoyment of the lake and this should be implemented post haste. The Lake of the Ozarks is a mess due to large boats, high speed boats and those with huge wakes. Limit boat size now for the good of all. THE ENTIRE LAKE SHOULD BE A REDUCED WAKE AREA.
2. Dock owners should be allowed to concrete the ramps for the ramp access to docks. This would reduce siltation into the lake as the wheels would not be running back and forth on the lake bed stirring up sediment. Regularly traveled access routes also should be allowed to be concreted and or stepped to stop erosion that then ends up in the lake. Now is a good time to do this as the lake level is low and the cost would be minimal to dock owners.
3. Regular and frequent e. Coli checks should be made to assure that sewage runoff is spotted and the homeowners required to make changes for eliminating or reducing their runoff into the lake. This should be coordinated with DNR and immediate action should be taken to aggressively stop raw untreated sewage from entering the watershed. Old septic systems should be removed immediately. There are a lot of low cost treatment methods available and they should be implemented post haste.
4. Every lot sold within 5,000 feet of the lake shoreline should have a water detention system installed to slow water runoff into the lake. The detention should be sized to detain the appropriate amount of water runoff increase due to roads, drives and roof area. All developments should be required to have water detention designed into the development. This should be implemented immediately to save the watershed area of the lake. All cities (incorporated or unincorporated) in the water shed should be pressed for similar rules to detain water and sedimentation for the good of the lake.
5. All docks should be required to be inspected to make sure they are safe. There were two children electrocuted this summer at the Lake of the Ozarks due to improper dock wiring that could and should have been discovered by an inspection. This is a simple matter and before permits are renewed there should be a safety inspection.
6. Give thought as to how all the areas near the lake could reuse gray water for lawns and golf courses as a means of reducing the nitrates that are fed into the lake.
7. Help all lake users rid the lake of invasive series of water life like the zebra mussels and other life not beneficial to lake health.
8. Protect the fish population by managing the fishing times and periods. This has been shown to be best for all fishing based on spawning, migration and other factors.

Dana,

Thanks for your help with this, I mentioned on the comment card and will again here, offer my participation if needed on a public committee to help with the plan. I have a long history at Table Rock Lake, 1st as a vacationer at State Park Marina in my youth from 1965 to 1984. Then as a Springfield resident as a weekender from 1985 to 2006, and now as a Condo owner at Point 1 and Dock Master of 8217 from 2007 to present.

Please let me know if I can help in any way. I would come to the table with an open mind and with ideas that should resonate with the majority of the population.

Sincerely,

[REDACTED]

Hi there-

I bought property a few years back in Snell Knob in the Whitewater subdivision on Tablerock lake. I own 1 of the 15 lots offered there.

Anyway, after purchasing the land, I found out that we were not allowed to have a future community boat dock. I was shocked because the next cove over literally has 6 to 8 small docks on it. We were told that we were too close to Campbell Point boat dock and are in a red zone. Is the Army Corp of Engineers considering to rezone the lake? I was told this was done back in the early 80s and is expensive. Is this the plan? If so, is there hope for us in the Whitewater subdivision in Shell Knob to perhaps have a community boat dock?

Also any updates online or do we have to wait until summer of 2013? Maybe you can refer me to a site I can check back at in the future.

Please advise.

Subject: Request for a Shoreline Inspection

Attention: U.S. Army Corps of Engineers
Table Rock Lake

To Whom It May Concern:

We are submitting this formal request for a shoreline inspection of our property for the purposes of installing a boat dock. Our 25 acre property is located in the town of Golden, Missouri, in the Southeast section of Barry County, approximately three miles due south of Shell Knob. It is the same property scheduled to be utilized for the Carroll Electric power station crossing.

We very much appreciate your consideration.

For assistance in locating the property more precisely, the Legal description is as follows:

EXHIBIT "A"

Tract 036-001R1

A tract of land, 100 feet in width, located EXCLUSIVELY in and being a part of the Southwest Quarter of the Northwest Quarter of Section 36, Township 22 North, Range 25 West, Barry County, Missouri, the center line of which is described as follows: Commencing at the West Quarter corner of said Section 36; thence North 02°23'31" East along the West line thereof a distance of 326.50 feet; thence South 87°36'29" East along Grantor's South property line a distance of 30.43 feet to the Point of Beginning; thence North 03°01'10" East a distance of 270.47 feet to a point designated as and hereinafter referred to as Point "A"; thence North 88°38'00" East a distance of 421.37 feet to a point designated and hereinafter referred to as Point "B"; thence North 26°31'53" East a distance of 755.74 feet, more or less to a point on the North line of said Quarter, Quarter Section, containing approximately 139,089 square feet or 3.19 acres, more or less, EXCEPTING THEREFROM any part of said described 100 foot tract not in and being a part of said Quarter, Quarter Section.

It is further stipulated and agreed that the outer boundaries of the above-described 100-foot tract of land shall be lengthened or shortened as necessary to begin and end on Grantor's property lines as does said centerline.

Also the additional rights to install down guys and anchors within that part of a circle with its

center at said Point "A", and extending in a Northerly direction a distance of 75 feet.

Also the additional rights to install down guys and anchors within that part of a circle with its

center at said Point "B", and extending in a Southwesterly, Southerly, Southeasterly and Easterly direction a distance of 75 feet.

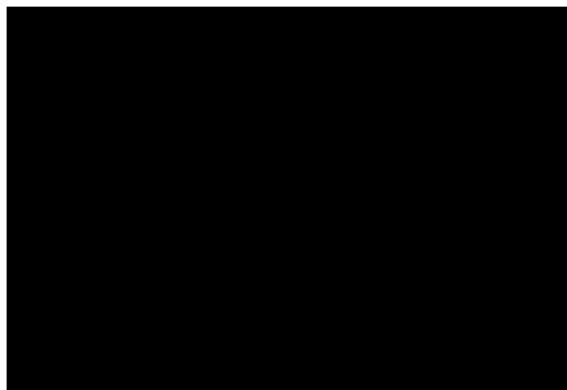

ALSO:

Tract 036-003R2

The West 74.00 feet of the South 978.60 feet (1008.16 feet per deed) of the Northwest Quarter of the Southwest Quarter of Section 36, Township 22 North, Range 25 West, Barry County, Missouri, containing approximately 72,356 square feet or 1.66 acres, more or less

Please feel free to contact us via email, telephone or U.S. mail.

Thank you,

Coburn, Dana O SWL

Subject: I attended Wed Nov 28th meeting in Reed Springs

Dear Dana

I wanted to let you know that I and my neighbor attended the meeting in Reed Spring about the TBR master plan. I was pleased with the turn out and that we were allowed to comment, so thank you.

I do have a concern, however, that the way the presentation was made it would have biased the crowd to vote for their biggest concerns. Several of the leaders that presented on their interactions with focus groups noted the top concerns. One was always water quality. I too and a proponent of making sure our water is clean but for me that is a given. What else would we vote for, bad water??? I thought the presentation was biased in a way that would always lead the public to put down a certain response.

If you wanted everyone's opinion, you would not have led a discussion that already listed what the priorities would be. It is analogous to saying, "how many babies is it ok to drop in a hospital nursery?"

Coburn, Dana O SWL

The lake traffic has increased dramatically in the last ten years. I live on Aunts Creek and the size, speed and noise level of the boats had gotten hard to believe. The boats create extremely large wakes, which damage both the shoreline and docks. A speed limit and noise enforcement would help significantly. I feel a lake use fee should be implemented and the funds used for additional enforcement.

Coburn, Dana O SWL

Subject: Table Rock Master Plan Comments

To Whom It May Concern,

I, [REDACTED] am responding on behalf of my parents [REDACTED] who live at [REDACTED] with regards to the Table Rock Lake Master Plan Revisions. My parents own property in the Crystal Beach subdivision at [REDACTED]

I would like the Army Corps of Engineers, Little Rock District, to consider changes that would allow for zoning of additional docks (community or individual) specifically designed for personal watercraft (waverunners) due to the limited number of docks/slips already imposed on the lake. Since these specific docks would be smaller in design, they could still be placed within existing coves or, in cases where the cove space is limited, placed in the main channel on a restricted basis as approved by the Army Corps of Engineers zoning. If a permanent type dock is not an option, would the Corp consider temporary or shoreline drive up type docks for personal watercraft based on a seasonal schedule (i.e. May through September). After the season, these temporary docks would have to be removed from the shoreline. In our case, we purchased a home on the lake and were restricted to one slip. I would think that it would be possible for lake property owners to have the option to have up to two slips in any combination (one slip for a boat and one for personal watercraft, or two for personal watercraft, at two for two boats, etc.).

I appreciate The Army Corps of Engineers in advance for their consideration of my proposal.

Sincerely,
[REDACTED]

Public Comments (continued)

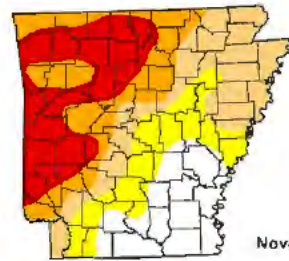

Table Rock Lake Master Plan Revision and Environmental Assessment

How would you like to see Table Rock Lake in 20 years?

I expect to live on the lake that has “clean” water quality . . . and expect the Corps to adopt working practices that also address and adjust appropriately for “Extreme Weather” conditions - floods, winds, drought,, etc.

Unacceptable condition of “no water” caused by draw down for hydro. Photo is Table Rock Lake - White River - San Souci area before 1995 . . . Lake level below 900 MSL.

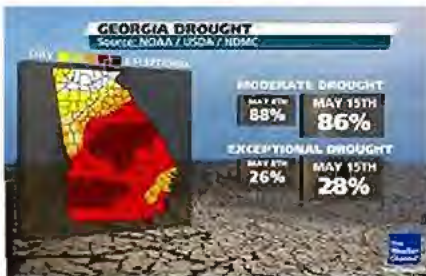

November 27, 2012
V.11.0 7 a.m. EST

U.S. Drought Monitor

Current Corps (12/1/12) draw-down for Hyrdo to 906’ MSL seems unnecessary (with existing area drought conditions being “extreme”). New Master Plan should have “red flag” parameters so hydro and keeping the Mississippi open do not conflict with future depressed area economy if drought continues through next year. My suggestion . . . don’t go below 905’ with drought conditions.

Reminds me of the Corps mistake at Lake Lanier, GA a few years ago.

What about Table Rock Lake is most important to you?

Living, playing and wildlife on-in-near clean water.

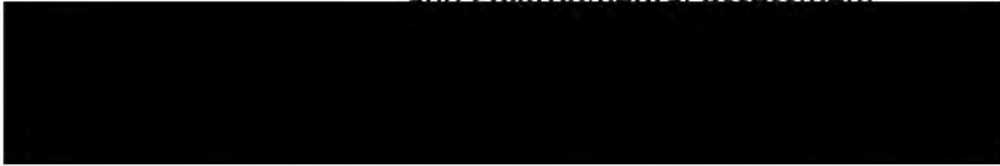

What is one thing that could be done to improve the lake?

Better control of lake levels with regards for the folks who donate to the General Fund!

Additional comments on the Master Plan Revision or about issues that should be studied:

MP “control” needed/changed due to “Extreme Weather”.

Table Rock Lake Master Plan Revision and Environmental Assessment

Additional comments on the Master Plan Revision or about issues that should be studied:

There are two issues, that I believe need study.

Background: We've lived on the White River section on Cedar Branch, East of Turkey Mountain since we bought the property in 1995. Our small 6-slip dock was built in 1987. The shoreline gets direct and scouring waves from the prevailing SW winds that have approx 2 to 3 miles clear shot at the shoreline. I believe that Turkey Mountain also creates a venturie effect intensifying the winds. The waves with white caps slam at the shore. Coupled with the varying heights of the lake, the shoreline shows significant erosion.

1) I would like a special permit to stabilize the shoreline below 916' MSL. It would 2 stone walls/levees. The stone on our shoreline a very unique, soft red sandstone. Many of the rocks have rounded edges that the wave action further erodes. I would need to use colored concrete with steel rods to secure the 2 foot walls. Eventually the earth will fill in behind as more gets washed down from rains and scouring action when lake levels are 920+. This would resolve our area, but the "issue to be studied" appears at the end.

Example of erosion: 4-12-08 Flood. 933.25' MSL photo taken at Shell Knob bridge/Hwy 39.

9-18-08 photo showing 2 large oak trees that are dead. They were OK'd to be removed by the corps

9-18-08 The reason for these photos and the fact that our dock is not in the above picture was the winds from Hurricane Ike that came down Cedar Branch (North/South) and broke our shore anchors. The photo is taken looking to the SouthWest - and shows the direction of the prevailing winds. Turkey Mountain is on the right.

Photo to the right shows the base of one of the Oak trees. Over the years with the varying lake levels and scouring wave action from the prevailing winds, the soil has been removed around the roots so this older tree dies due to shoreline erosion from 30+ years. With extreme weather - winds, rain, etc. it will happen faster.

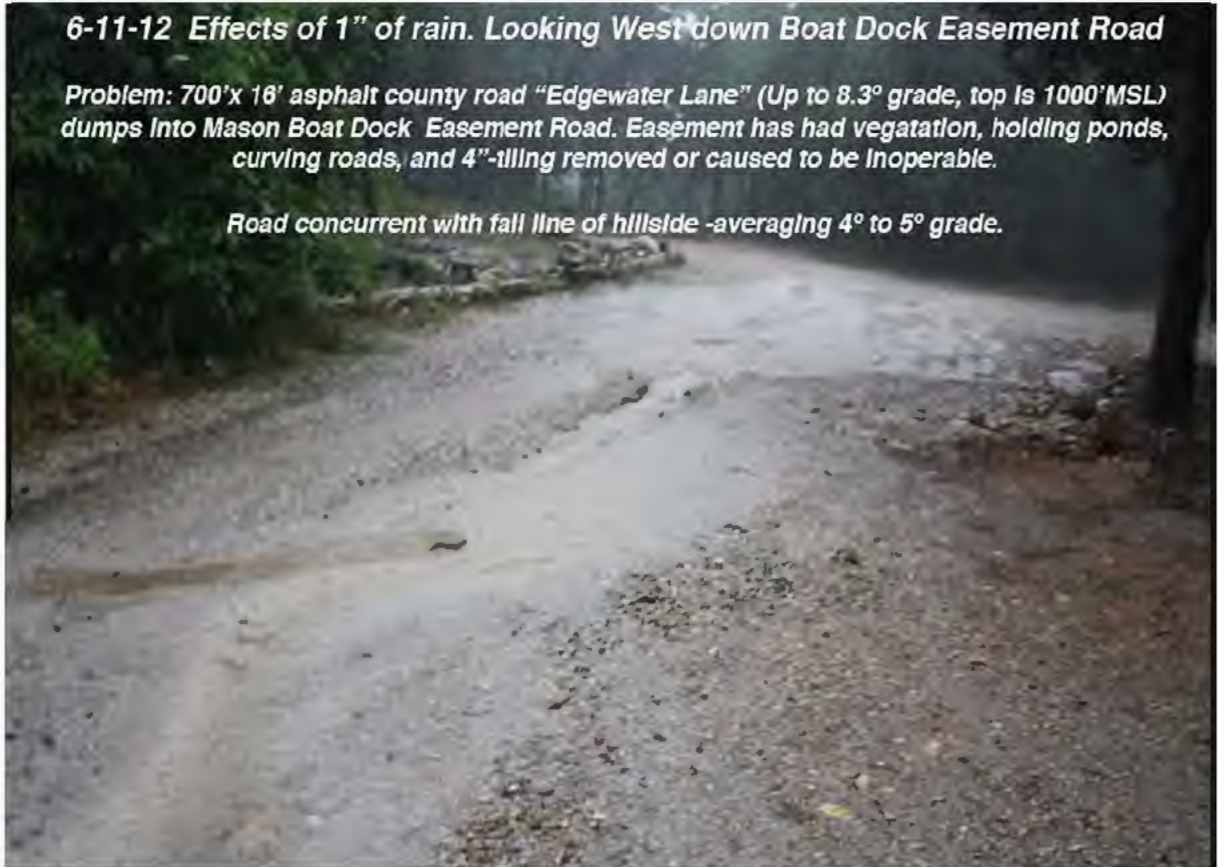

Table Rock Lake Master Plan Revision and Environmental Assessment

2.) (for us the second runoff issue has been resolved by an on-site inspection by a Ranger.) Here is the issue as I presented to the Corps:

6-11-12 Effects of 1" of rain. Looking West down Boat Dock Easement Road

Problem: 700'x 18' asphalt county road "Edgewater Lane" (Up to 8.3° grade, top is 1000'MSL) dumps into Mason Boat Dock Easement Road. Easement has had vegetation, holding ponds, curving roads, and 4"-tilling removed or caused to be Inoperable.

Road concurrent with fall line of hillside -averaging 4° to 5° grade.

Why doesn't the Corps when granting a new dock permit look at the issues created with the mandatory parking areas? While "runoff" is a DNR issue, it should be a consideration for a new easement/parking area is granted when it is superimposed on top of an existing dock road (1987). Road included a winding 6' wide road having 2 holding ponds, 4" tiling, water run, whistles, riprap area and could handle a 5" rain without soil erosion. Corps was alerted to this. But we assumed there were no guidelines to the consequences.

Please examine Corps guidelines for new docks for parking location, terrain considerations regarding runoff, and with respect to existing dock access.

The issue to be studied in #1: Can the corps establish "sensitive shoreline areas" with with regards to wave action, soil composition, rock composition, debris accumulation, ground water run off in consideration of variable lake heights and prevailing winds ie eroding wave action?

Would the Corops allow the dock to have a special permit and create Corps recommendations to stabilize land along the exposed shoreline due to lower lake levels?

Subject: MASTER PLAN REVISION

HOW WOULD YOU LIKE TO SEE TABLE ROCK LAKE IN 20 YEARS? Preserved the way it is, with improvements in pollution, (air,water, land and noise).

WHAT ABOUT TABLE ROCK LAKE IS MOST IMPORTANT TO YOU? 1. Quality and clarity of the water.
2. Preservation of the shoreline from residential and commercial development.

WHAT ONE THING THAT COULD BE DONE TO IMPROVE THE LAKE? Implement a Master Plan, (with all other necessary documents),and follow it

without compromising to Special Interest Groups.

ADDITIONAL COMMENTS ON THE MASTER PLAN REVISION OR ABOUT ISSUES THAT SHOULD BE STUDIED:

1. Maintain or improve fish population.
2. Find ways to accommodate the inevitable growth of the lake without sacrificing aesthetics and safety.
3. When it becomes necessary, implement regulations regarding the number of boats on the lake, size of boats, speed of boats, etc.
4. Maintain COE ownership of land surrounding the lake.
5. Allocate money for education;
 - Seamanship
 - COE rules and regulations
 - Land usage
 - How to be good stewards of the area.
6. To enforce all existing and future rules and regulations equitably for all.

Subject: zoning of a new dock placed in big indian

I have been a resident of table rock for approx. 16 years now and I do not own a dock. I came to the lake over thanksgiving only to find that a new dock has been place in the big indian arm out of the baxter area on the east side of the arm. It currenty stretches accross the deep end of the channel which fisherman and residents use to reach the end of the arm. This creates a hazard for boats to navigate this arm and creates a nuisance for all who currently ski , fish and enjoy the area at a non reduced speed. If a no wake marker is placed at the end of the dock which im sure it will be, ther will be very little room to navigate. Please take a look at this location and see if there are any other small inlets the could have chosen instead of this major channel shut off. Thanks [REDACTED]

Subject: Table Rock Lake Management Plan

There are 4 things that I feel should be addressed in the revised Table Rock Lake Management Plan:

1. The size of the boats on this lake should be restricted. They create large wakes that are destructive to docks, dangerous to smaller boats which make up the majority of the boats on the lake, swimmers, and are designed to be on the ocean not small inland lakes. However, the big boats currently on the lake would need to be grandfathered.

2. There should be some restrictions on the loud boats on the lake with or without captains choice. This is a nice peaceful lake except when the jocks think a loud boat is a he-man thing.

3. All septic systems near the lake should be inspected and if they are leaking into the lake they should be replaced or hooked up to a water treatment plant if available. I live on the lake and there are about 10 homes in our association that are still on septic systems which I'm sure are putting polluted water into the lake and could be hooked-up to our treatment plant. Several years ago we spent \$50,000 to \$75,000 to improve the quality of the treated water from our treatment plant that enters the lake.

4. We need to do what ever is necessary to keep this lake clean and free of pollutants. I don't know the answer to these issues, but I'm sure there are some educated and smart people that could give us some answers.

It takes money to maintain the quality of the water in Table Rock Lake. Several years ago a sales tax item was put on the ballot but was rejected by the voters. I think we need to find some way to generate funds from the people that live near the lake, visit the lake area, or use the lake for boating, swimming and camping.

Subject: master plan ideas

Thanks for the meeting yesterday at the Chateau. Very informative.

A major concern we have, which was not noted on the card submitted yesterday, has to do with the high water levels that the lake has reached twice in the past few years. Our house did not have any flooding, but our yard received extensive damage due to the high water. Much of the topsoil is now gone and we have lots of dead trees.

We have contacted the Corp office and now have a permit to remove some of the dead trees and cleanup the vegetation on our property, we thank you for that. While we are unable to add more dirt to our yard, we've attempted to preserve what we do have.

So, our major concern is that the lake does not reach the high levels as it has in the previous years. Our hope is part of this master plan is to make provisions for the water level before it gets out of control.

Another concern is that we would ask that any monies derived from leases, permits, etc on Table Rock Lake be used at Table Rock Lake and not put into any general fund. If this were publicly known, we believe the mindset of the patronage would more favor Corp ideas.

The Corp should also be more visible. There are a LOT of permanent residents who reside around the lake. Maybe a once or twice yearly 'town meeting' with a Q&A time also scheduled; maybe discuss a progress report or what the Corp is lobbying for. If the Corp and the residents worked hand in hand, more would get done. Basically, the Corp needs to make the public more aware of what is going on.

Thanks again.

Table Rock Lake Master Plan Revision and Environmental Assessment

How would you like to see Table Rock Lake in 20 Years? I have been around this area all my 67 years of life, owning three homes in this area and feel the lake is being maintained well. My hope is to see a continued effort to keep the water quality as it is or even improved if possible. One of the ways this could be accomplished is by keeping a close watch on the quality of Springfield Missouri's water treatment. I would also like to see the shores lined with fewer cedars, as they are the weed of the forest and will kill any other tree except another cedar close by. In another 20 years the banks will be covered with only cedars and we will no longer have the native trees along the shores of Table Rock Lake. If you need proof of this problem you need look no further than a short walk into the woods along the shore where you will find many dead oaks and other native tree with cedars chocking them out.

What about Table Rock Lake is most important to you? Water quality and shore line protection but this does not mean rules that push people away for enjoying living close by. While I don't want the shores showing too many boat docks I don't feel we are even close to that point yet. I welcome controlling the size of boats upon our waters but I don't have the answers as to how this can be accomplished. Controlling the size of slips is a good start, however it should be all slips not just the privately owned slips.

What is one thing that could be done to improve the lake? One thing I see that would improve Table Rock Lake at this time is to improve and reopen Joe Bald Park as well as some of the others that have been closed. This would allow more visitors to enjoy the lake. I do understand most of the closed parks would need improvement in waste water treatment for the restrooms. It is also important to control the lake uses age so as not to overuse and pollute.

Additional Comments on the Master Plan Revision or about issues that should be studied: At the meeting in Reed Springs High School you could see that the groups in control including the Army Corps were overwhelmed by the turn out. It was also clear that, while it would have been difficult to control, the people in the audience expected to have some interaction about what the possibility were in making the best plan for the area but were only given the chance to write short notes on sticky notes.

If the Army Corps is truly interested in knowing what the people want to see happen with Table Rock Lake or any other Corp run lake, how about putting one or two civilians on the planning board and given the common people a chance to have an input. This could also change the general public's feelings that the Army Corp is going to do whatever they want without regard to the people's wishes. This was one of the reasons for the large turnout in Reed Springs Missouri on November 28th. Something needs to be done to renew the confidence in the Corp in this area.

Subject: Master Plan comments

I had the opportunity to be at the Reed's Springs Master plan meeting earlier this month. I appreciate the error that is being made to keep all of us who live on the lake informed as you work on revising the master plan for Table rock lake and area.

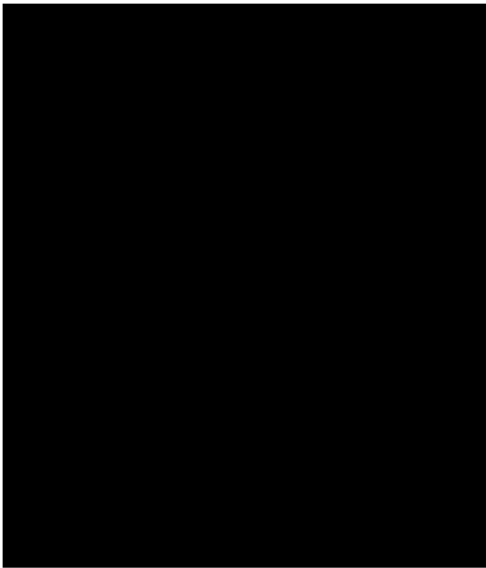

There was one comment that that confused me during the presentation and I was wondering if you could clarify for me. During the presentation they were describing the different land classifications options. The comment that confused me was in relation to these classifications about the Cow Creek area. It was said, as an example, that due to the deep cove opportunities in Cow Creek there might be some timber management opportunities that could be considered as part of the plan.

This Timber comment brings back a comment from the George Bush era where he tried to sell off some of the Mark Twain forest, including areas around the cow creek area to fund some of the federal projects that he had at that time. Of course this was blocked by our attorney general and was later dropped as an option.

Can you clarify this comment as it relates to the Cow creek area and what Timber Management means? I live on cow creek and work out of my home. Our families enjoy the lake and the Cow Creek area both for water play and fishing. Any projects that would ruin water quality, increase the traffic into the cove or destroy the beauty of the ara would not be well accepted by myself and all those who live in Cow Creek.

Thank you in advance for your help with this issue. I am just not sure what timber management has to do with any of the master plan activities.

Thanks again

Comments on Master Plan Revision

I live on [REDACTED] which is at the end of [REDACTED]. Many local people use this road to launch or remove their boats since the next nearest point to do this is Baxter boat dock in Lampe or the old ramp in Viola. There has always been a problem since this is not an "official" boat launch. Some people want it closed and off limits. Some would like to use it to launch their fishing boats to go fishing for a couple of hours in the morning or evening before work without having to travel an extra 20 to 30 minutes each way to get to a launch. I have been in the area since the 1990's and people have been using that road as a launch. New homes have been built in the last 5 to 7 yrs and that is when the controversy began.

Some people also use this for camping and partying all night. That is when it became a problem. The home owners along the shore get upset at the mess that is left and the noise. It is not the boat people that launch and leave, it is the people who do not have boats that camp and stay. Sometimes they are day campers, sometime night campers.

It would be nice to have this designated as a launch only area and a no swim area that way it would stop the partying and the mess and still allow the boaters to launch and go. Since I live away from the site and have a dock slip it really wouldn't matter to me if the road was closed off or not but I do think it is a good launch area for the fishermen to use.

Thank You for Your Time and Consideration,

Subject: Revenues associated with TRLake

Dana

I attended the Master Plan revision/Scoping session at Keeter Center in Branson last week on behalf of the city of Branson. Two figures were given regarding the economic impact associated with Table Rock Lake. I did not get those numbers written down in time but I believe one of the figures was 3 billion in revenues in Stone and Taney County?

Could I get a copy of the PPT that was used at that session, and/or the figures associated with economic impacts of Table Rock Lake? I am responsible for sharing the information with my supervisors who could not attend. Thank you.

Dana,

I am a 53 year old woman who has been enjoying Table Rock Lake since the age of 7. I own a condo, a boat slip and a boat. My biggest fear is that Table Rock will eventually become another Lake of the Ozarks. I support the way the corps of engineers has preserved the shoreline by prohibiting building too close to the water, and the tree cutting restrictions. I also support the limitations on docks. I would like to see a restriction on the length of boats allowed on the lake. There are many boats on the water that are too large for the lake, that are really more suited to being on the sea. The loud engines on some and the big wakes on most take away from the quaint feel of the lake.

I also worry about water pollution, but I know everyone does. We must keep the lake clean!

How would you like to see Table Rock Lake in 20 Years: Continue to improve the water quality of the lake for both fishing and recreational use

What about Table Rock Lake is most important to you: Lake Safety & Water Level Control

What is one thing that could be done to improve the lake:

With the lake levels as low as they are, the lake has shown the existence of stumps just below the water line, when the lake is at the 915 elevation. Many of the same areas receive boat and jet ski traffic (Pulling skiers & tubers) that the operators are not aware of how dangerous these areas can be. Can the Corp develop procedures to allow lake residents (with Corp approval) to contract the cutting off or pushing over these stumps to improve area safety? With leaving all the stumps at the bottom of the lake it still preserves fish habitat.

Require those groups who sponsor fishing tournaments to require the boats participating in the tournament to travel under some maximum allowed speed. Multiple groups of boats moving from one area to another or leaving / returning to docks at an excessive high rate of speed create a potential hazard to the participants and the public using the lake.

Thanks,

Coburn, Dana O SWL

My family owns three lakefront lots adjacent to Joe Bald Park. The original owner of two of our lots had a dock as did one of the neighbors and they were anchored in front of our lots, but the docks were sold prior to our ownership. We have inquired about putting a dock in front of our property and have been told that docks are not allowed in the buffer zone. Since Joe Bald park hasn't been open to the public for over 15 years we would like to see the buffer zone restriction removed.

Thanks for your consideration,

Thanks

[REDACTED]

that has eroded our shoreline and has surfaced boulders that were not on the shoreline when we purchased our resort. In the spring of 2008 we had flood waters that were much higher than normal. Along with the water being so much higher than usual, wake surfing was increasing in popularity. With the 3 foot waves that come with the wake surfing the our shoreline was severely eroded & our topsoil washed into the lake. We had to haul in soil to replace what we lost to erosion before we could replant grass. This happened a second time with the flood in 2011.

The large waves make it dangerous for our customers to swim off our swim deck. When incoming waves are 2 foot high, children and small adults are often thrown into the deck. Our new swim deck is 20 above the water and at times the waves wash across. We would like to see this water sport prohibited in small coves & kept in the main part of the lake, or prohibited completely. In order for this to be feasible, it would be necessary for the lake to have more water patrol available to enforce the water rules. I realize this would open a new can of worms.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Maintain the clean water, continue to allow recreational use and enjoyment, develop enterprise zones whereby businesses could lease shoreline for economic development (similar to Branson Belle), continue dock development and lake access with common sense approach, in respect to maintaining the beauty of the lake.

What about Table Rock Lake is most important to you? Maintain the clean water while continuing to allow economic growth.

What is one thing that could be done to improve the lake? Improve septic systems around the lake to maintain our clean water.

Additional comments on the Master Plan Revision or about issues that should be studied:

Table Rock Lake is the crown jewel of the Ozarks and we certainly want to maintain it's pristine state for future generations to enjoy. Equally important we need to use a balancing act with the local economy and future development around the lake to be good economic partners with local business and governments who all depend on area revenue to survive. Also, the decision process to release water during a flood needs to be revised. A "common sense" approach to release water sooner would mitigate downstream destruction. The current shoreline management plan needs to continue until you have funds to "rewrite"

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean & pristine water where recreational use and enjoyment of lake sports are allowed for the benefit of the public as well as zones allowed whereby businesses could lease and individual home owners can have lake access and docks.

What about Table Rock Lake is most important to you? Maintaining clean water while continuing to allow economic growth.

What is one thing that could be done to improve the lake? Enforce septic tank regulations and also monitor & prohibit any kind of discharge into the lake from any detrimental source.

Additional comments on the Master Plan Revision or about issues that should be studied: Table Rock Lake is the "jewel" of the Ozarks and should be maintained in pristine for generations to enjoy. Equally important is to use a common sense approach w/ local people as well as promote future development around the lake to be good economic partners w/ local business & government who all depend on area revenue to survive. Also, the release of water during a flood event should be reviewed & revised to better control flooding instead of releasing all at once or shutting down all at once. Also, Turkey Creek in Hollist needs to be dredged maybe to 1982-1993 levels as it has silted in due to water flowing from both ends. Permitting should not be shut down

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012. because you don't have funds to "rewrite" a plan. The plan as it is needs to continue until you have funds to do something else!

December 14, 2012

Planning & Environmental Division, Environmental Branch
Department of the Army-Little Rock District Corps of Engineers
P. O. Box 867
Little Rock, Arkansas 72203-0867

Attention: Dana O. Coburn, Chief, Environmental Branch:

Dear Planning & Environmental Division:

In response to the Army Corps of Engineers recent announcement that they are considering a revision the Table Rock Lake Master Plan and seeking input, we have the following suggestions.

Turkey Creek, located in Hollister and specifically adjacent to Business Hwy 65 and St. James Street as it goes through Hollister needs to be dredged at least to where it used to be in 1992-93

This silting seems to be the result of water flowing from both directions carrying debris and then this debris settles and drops into Turkey Creek. People used to canoe Turkey Creek and that is not possible now. There are actual islands and not much creek. This silting has made flooding of our buildings and businesses so much more likely and therefore has contributed to making renting commercial building space very difficult due to our location along the bank of Turkey Creek. Not only would it help our business, but dredging would be beneficial to the numerous businesses and homes along Turkey Creek.

The other suggestion to the Plan is that when it is raining and raining and raining, that the water be constantly let through the Dam instead of holding until water is about to go over the Dam and then releasing. We feel that if the water had been released constantly and consistently the whole time it was raining, the major flooding along Lake Taneycomo, as well as on down through Arkansas and down to the Gulf may not have been as bad as it was.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

A clean lake for everyone to enjoy -
including dock development & lake access.

What about Table Rock Lake is most important to you?

Clean water & economic growth -

What is one thing that could be done to improve the lake?

Improve septic systems near the lake

Additional comments on the Master Plan Revision or about issues that should be studied:

We need to ensure that the lake is maintained so that it can be enjoyed many years to come. We need to also allow the lake to benefit the local area financially - as many local businesses depend on it to survive.
Also flood water should be released sooner to prevent downstream destruction.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: MATRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Table Rock Lake Master Plan Revision and Environmental Assessment

Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

- maintain clean water
- septic systems improved

What about Table Rock Lake is most important to you?

- Recreation & economic development
- Clean water
- Preserve natural beauty

What is one thing that could be done to improve the lake?

- stricter "littering" laws -
- improve septic systems

Additional comments on the Master Plan Revision or about issues that should be studied:

Prevent future flooding -

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Keep a clear, clean water that can be enjoyed by future generations.

What about Table Rock Lake is most important to you? The clarity of clear water.

What is one thing that could be done to improve the lake? Monitor all septic systems.

Additional comments on the Master Plan Revision or about issues that should be studied:

I am a native of this area; use to float the White River, gig suckers at night, and watched Table Rock Dam being built. I'm proud of Table Rock Lake and the drainage area. We must keep it clean and beautiful. We need to do a better job of releasing water downstream in case of high water. To slow down water distribution.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

We approve of the limit on docks to community only with approved access and a parking lot. We like the greater presence of patrol to control drinking. The crackdown on old septic tanks is good, because without good water quality, anything we do will be in vain.

What about Table Rock Lake is most important to you?

Most important is the safety of those using the lake and those living on it. We approve of no overnight camping & no campfires on the Corps land.

What is one thing that could be done to improve the lake?

We would like to see Joe Bald Park land maintained, staffed and approved for short term overnight camping, with firepits & picnic tables. People cannot afford motels & restaurants for a lake vacation.

Additional comments on the Master Plan Revision or about issues that should be studied:

Please keep working on noisy boats using Table Rock. Also, what about limiting each fishing organization to only one tournament per year on Table Rock. Even with catch & release, tournaments have depleted fish populations.

Maybe that land could be leased to a private company, if not able to be funded by public funds.

December 13, 2012

My family has lived in the Turkey Creek Valley of Lake Taneycomo for three generations and experienced all of the floods. My grandparents looked expectantly to the building of Table Rock dam. All three generations of us were at the ground breaking ceremony with Dewey Short. The primary purpose of building Table Rock and other White River dams was for flood control. Recreation was a byproduct and the last objective of these projects. Flood control below Table Rock dam is what I would like to have input on.

All of the useable land in the Turkey Creek Valley is in jeopardy of flooding from Turkey Creek. The creek reaches the backwater of Lake Taneycomo at the Business Hwy 65 Turkey Creek Bridge, 700 feet above sea level. The geologic effect of abruptly stopping flowing water allows for sediment to drop from suspension. This is compounded during normal high and flooding water with much more sediment. In the last 20 years, the flooding has been exponentially exasperated by the extreme development in the upper Turkey Creek Valley with no thought of water retention. The U.S. Army Corps of Engineers has been requested to help with this matter and the response was a refusal. This allowed continued blasting of rock mountain sides with expanded run-off and no retention. In high water conditions, the sediment also builds up below the Business Hwy 65 Bridge due to elevation of water and flow rates.

This principal is in place for every tributary of Lake Taneycomo affecting the valley property of said creeks. Actually, Lake Taneycomo impounded 99 years ago and is a "dead lake" rapidly filling with gravel and sediment. The halting of the dredging by Table Rock Asphalt Construction Company, resulted in increased sediment fill in Lake Taneycomo itself.

In my lifetime I have witnessed the floor of Turkey Creek rise by 10 feet or more in spots. Large islands have formed with Sycamore and Box elder trees on them. In the last 2 years a new island has formed with weeds on it. These islands highly impede the flow rate in high water. The massive filling of the flood plain of Lake Taneycomo from the railroad bridge to Roark Creek on the Branson side has impeded the flow rate, resulting in higher flood elevation up stream in the lake and its tributaries. The Turkey Creek Valley includes numerous residences and more than 50 businesses providing jobs for our community. The areas of Hollister on the National Register of Historic Places are encompassed in the Turkey Creek Valley.

A two-fold solution does not seem too complicated. Dredging of sediment and gravel would lower the level of Turkey Creek and increase flow rate. The material dredged would have an economic value, could be done with minimal cost and access to the Creek is available. The loss of a few softwood junk trees, sycamore and box elder, is not a drop in the bucket compared to the massive loss of hardwood trees in the upper valley development causing increased erosion. These hardwood trees include numerous species of Oaks, Hickory, Walnut and Cedars. The enforcement of existing laws of retention in the solid rock mountains of the upper Turkey Creek Valley water shed is vital to our future and the future of the area.

Table Rock Lake Master Plan Revision
and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on a Master Plan revision. Each question has a number (1, 2, 3) next to it.

How would you like to see Table Rock Lake in 20 years? Continued Good Managed Wetland For All to Enjoy - CURP Does Great At Present time - Need More on Lake Commercial Agreements - (Services, Restaurants, Resorts) Accessible From Lake, Docks, Marina.

What about Table Rock Lake is most important to you? Good Shoreline Management And Communication Between Owners and Corp - Quality Clear Water - Still to Be Best Lake in Country - Better Maps for Areas -

What is one thing that could be done to improve the lake? More Commercial Development w/ Lake Access - Year Regular Corp input meetings maybe one or two times year w public - Regulate High Density Areas -

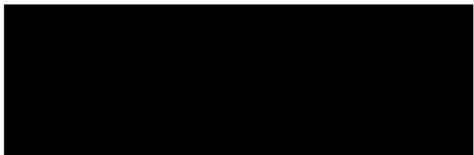

Additional comments on the Master Plan Revision or about issues that should be studied:

Is there going to be any public participation with TASK Force type setting to communicate and discuss issues being considered during the study & development of "New Master Plan"

I sincerely want to participate if possible volunteer my time to attend meetings and hope to help work w/ you during plan development
Please contact me via email or phone

Respectfully [Redacted] See Attached Additional Info
Comments may be submitted via mail to [Redacted] Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 607, Little Rock, AR 72203, Fax: (501) 324-5605, Email: on M
M4TRMP@usace.army.mil, Website: http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

12/14/12

Dana Coburn, Chief
Environmental Branch, Planning and Environmental
Little rock District, U.S. Army Corp of Engineers
PO Box 867
Little Rock, Arkansas 72203

Dana

Please accept this as my request to be volunteer for helping assist in anyway during the development of the New Master Plan for Table Rock Lake.

I am hoping that there will be chance for you to work with a taskforce including the public during your development of the Master Plan -- I would believe that a task force would be able to help communicate between the Corp and The Public as well as help discern any issues.

I do not want to create any issues but help develop and have input during the process -- maybe the taskforce might become a liaison between the Corp and Public working together.

My qualifications to be interested participant include:

Over 40 year part-timer to the Shell Knob and Table Rock Area
Currently almost 2 year full-timer living and working in Shell Knob and surrounding areas

Own home, Lake home and part of 2 slips in 6 Slip Dock in Shell Knob

Own Two businesses River Runners Service Company
 Shell Knob Car Wash

As of 8/1/12 -- Realtor -- C J R Tri Lakes

Please let me know how you are going to proceed with my request and if there will be some avenue for me to participate.

Respectfully,

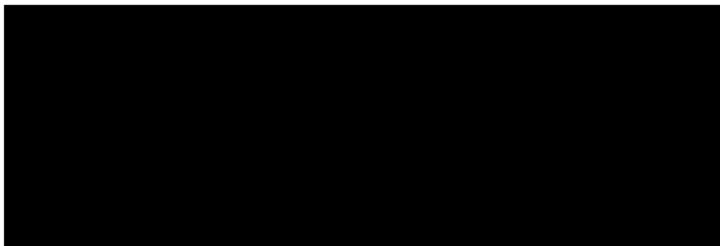

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Maintain Water Quality and manage Lake Levels To prevent 100 Year Floods from occurring every 5 Years.

What about Table Rock Lake is most important to you? Prevent Table Rock Lake from becoming another "Lake of The Ozarks." Restrict or control Commercialization. Maintain & protect fish & wildlife habitats. Also maintain waters to allow for family based water recreation.

What is one thing that could be done to improve the lake? Establish Restrictions on boat sizes, limits on "Cigarette" type boats. Establish and enforce noise ordinances on loud boats. Establish controls on operation of PWC's.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

How would you like to see Table Rock Lake in 20 years? Beautiful clean water, great fishing, well kept shoreline (free of dead trees still standing or fallen, wood, trash), safe boating, limit on speed of boats during day, limit on length of boat (faster & bigger the boats the more wear & tear on shoreline & boat docks) and good working relationship with the corp.

What about Table Rock Lake is most important to you? Clean water & great fish/wildlife habitat

What is one thing that could be done to improve the lake? Let us keep the shoreline clean, so when the lake rises like it did when it crested at 934 that logs/branches/trash were not floating in the lake for weeks that hurt docks, boating, fishing, economic development. The Shell Knob area lost so much revenue that spring, along with the rest of the lake. Boat docks were totally surrounded with debris for weeks and you couldn't even get your boat out, but really didn't want to.

Additional comments on the Master Plan Revision or about issues that should be studied: The meeting at Reed Spring High School was our first since we have owned lakefront property since fall of 2006. There were around 800 people there and really nothing was said except fill out the form. That could have been requested on the postcard that was sent out. The post it note idea with that many people was pointless, no wonder people started leaving. Waste of time, gas, and effort to be there. Make meetings informative, have interaction, be prepared, be professional!!!

Army Corps of Engineers
Little Rock District
P. O. Box 867
Little Rock, AR 72203

Attn: Dana Coburn

Subject: Table Rock Lake Master Plan and Shoreline Management Plan

As a resident near the Cow Creek public ramp, I wish to advocate for the rezoning of the shoreline in the cove adjacent to the current Boy Scout Camp and the new public boat ramp at Cow Creek

The campground at Cow Creek was closed years ago, along with several others, due to reduced activity and increased cost of repair and upkeep. The current shoreline zoning is based upon the usage in the 1970s when the campground was entirely used and managed by the Corps with a positive cash flow. It is time to formally admit that this property will never be reclaimed for this previous use as a Corps of Engineers Campground. Once this logical decision is made, the rezoning can proceed. The Boy Scout Council in Springfield, Missouri has a long term plan for an aquatics adventure program exclusively for older scouts, including plans for the accompanying property improvements at the camp to support the program, some of which are already proceeding (i.e. shower and bathroom improvements completed, structures have been reroofed, and a planned expansion of the picnic pavilion with an outdoor BBQ kitchen, awaiting Corps approval.)

Changing the use from "High Density" to Low Density" and rezoning of this area will allow for the procurement of dock permits for both the Boy Scout Camp and the Wood Ridge Estates and Cow Creek area residents currently requesting approval for boat slips.

The addition of a community dock with boat slips in the Cow Creek cove will increase the local property values, aid in lot and home sales, and foster new housing construction. All of which provides jobs, not just for dock builders, but for tradesmen and retailers as well. Approval of the rezoning is a big step toward economic development in the local area and likely will have minimal adverse impact on the lake or the cove itself.

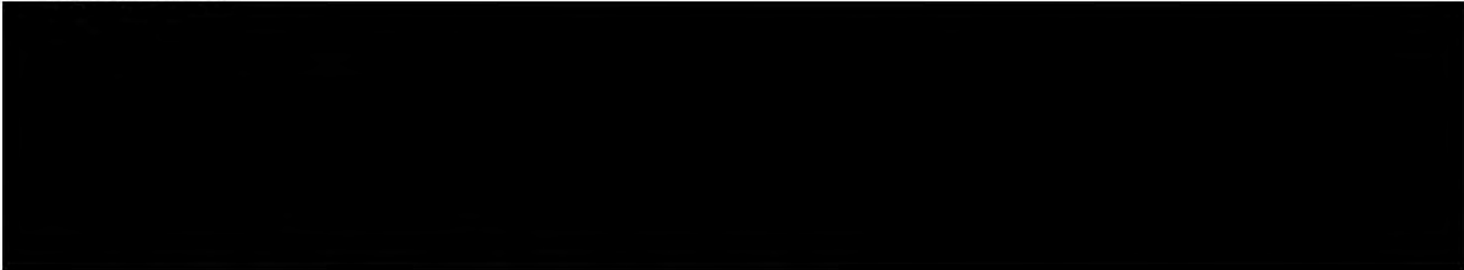

Sincerely,

Table Rock Lake Master Plan Revision and Environmental Assessment

How would you like to see Lake Rock in 20 years?

1. Improved safety

- Removal of downed trees + branches.
- Improved appearance
- Removal of hazards in the lake by removing trees in the water that are seen when the lake is low (like Now!) but not visible when water is high.
- Require "No Wake" zones within 100 feet of all docks.

What is most important?

- Visual appearance of dock area + dock pathways.
- Areas should have a major clean-up + removal of dead trees + branches.
- Area should look like a national park + not the city dump.

What one thing could be done to improve the lake?

- Corp of Engineers could require "No Wake" zones within 100 ft. of docks
- Improve appearance by removal of old dead trees + branches.

December 4, 2012

To whom it may concern:

I am writing this letter in response to the email from the U.S. Army Corps of Engineers regarding the updates for TableRock shoreline maintenance and regulations.

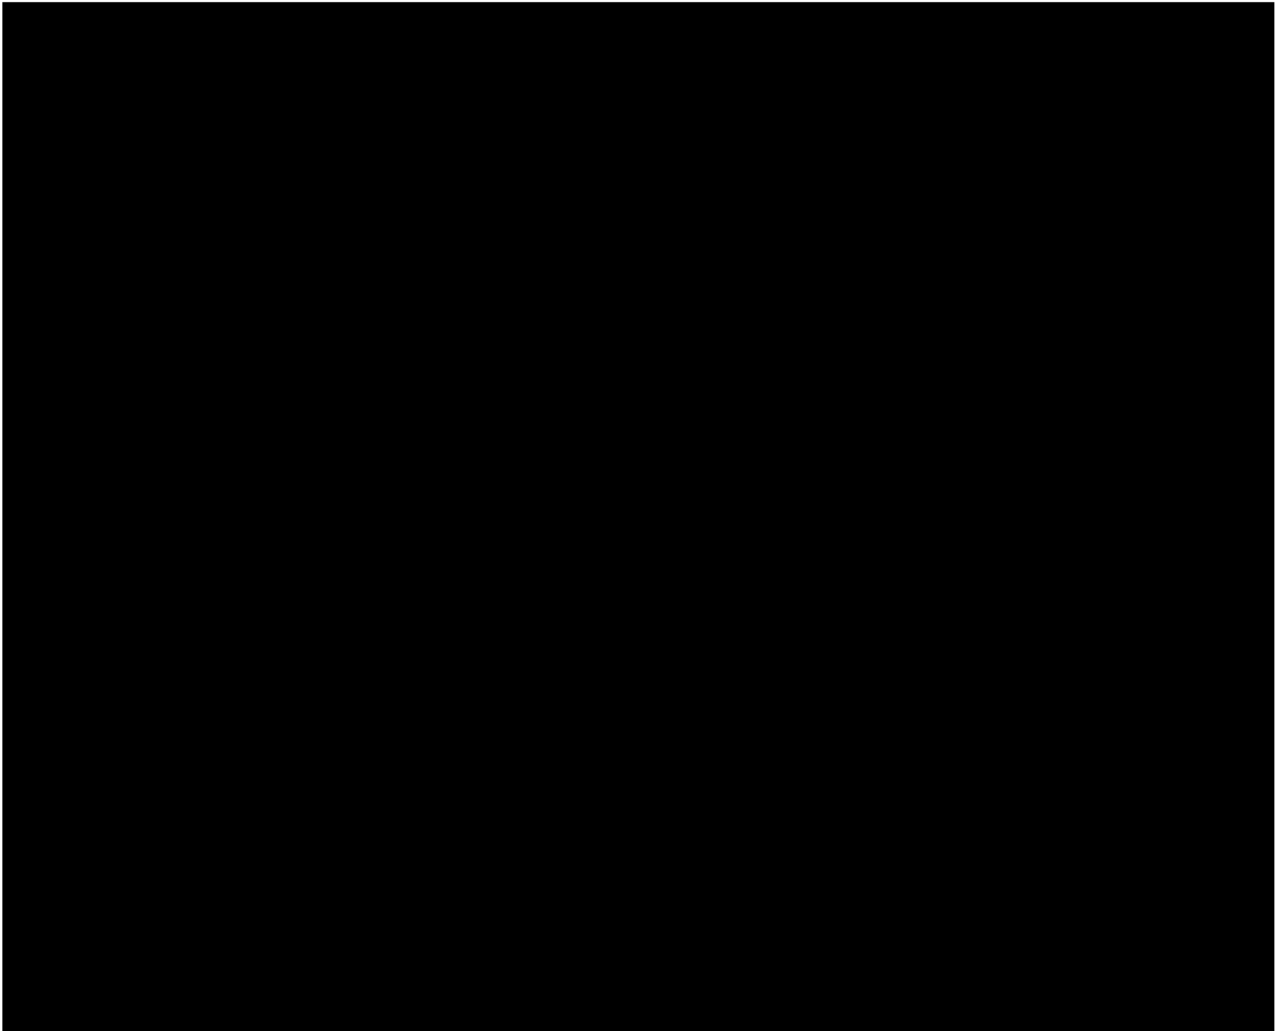

My husband & I purchased a small lakefront resort just south of Point 21 on the lake in November of 1999. In the years to follow the boats have become larger and larger and so have the waves that go with these large boats. Our most serious concern is the erosion of the shoreline on our beloved lake, caused in large part by the newest recreational water sport called wake surfing. This sport causes 2 or 3 foot waves that has eroded our shoreline and has surfaced boulders that were not on the shoreline when we purchased our resort. In the spring of 2008 we had flood waters that were much higher than normal. Along with the water being so much higher than usual, wake surfing was increasing in popularity. With the 3 foot waves that come with the "wake surfing" the our shoreline was severely eroded & our topsoil washed into the lake. We had to haul in soil to replace what we lost to erosion before we could replant grass. This happened a second time with the flood in 2011.

The large waves make it dangerous for our customers to swim off our swim deck. When incoming waves are 2 foot high, children and small adults are often thrown into the deck. Our new swim deck is 20" above the water and at times the waves wash across. **We would like to see this water sport prohibited in small coves & kept in the main part of the lake, or prohibited completely.** In order for this to be feasible, it would be necessary for the lake to have more water patrol available to enforce the water rules. I realize this would open a new "can of worms".

Another suggestion we have is to put new restrictions on the distance from the docks that we can put our no wake buoys. (we realize this is a Water Patrol issue). As a resort owner, we feel somewhat responsible for our customers boats, which are continually pounded with the large wakes in our cove. We would like to see the rule for buoys to be rewrote to our keep boats, swimmers and dock safe. If the rule was changed to buoys being **200 feet from the dock**, it would certainly help. When this rule was made back in the 70's the boats were much smaller and less powerful. This change would allow us to protect our customers boats and pwe's. Thanks.

Respectfully,

12/4/12

To: Dana Colburn, Chief
Environmental Branch
USACE Little Rock District
P.O. Box 807
Little Rock, AR 72203

Our family began vacationing at JRL in the middle 60's. It was a wonderful experience. The water was so clear we ~~also~~ saw fresh water jelly fish. You could be on the water for hours and maybe see one or two other boats. Your favorite fishing spots were always available for you.

Sadly, that has all changed. The influx of visitors has increased yearly. The quality of the water has diminished.

I realize you cannot stop people but believe you can implement changes to improve lake conditions.

We have lived permanently at JRL since the late 90's. We are fortunate to have our own private dock which we

share with a neighbor.

On many occasions we have been sitting on our dock while boats run back and forth repeatedly pulling wake boards and tubes. They fail to plane out their boats and create large waves which weaken and damage your dock and boat lifts. The waves make it almost impossible to enjoy swimming in front of your own property.

Some boaters fill large bladders with water which they pull behind their boats creating larger waves for wake boarders. I believe this practice should be against the law. The waves also create wash from the banks of the lake which affects the clarity of water.

I also believe there should be "No Wake" ^{signs} in many of the creeks and coves.

We are located on Rock Creek in the upper portion of IRL, closer to Beaver Dam.

We do not have the large expanses of water prevalent in the Table Rock Dam area. Large boats are destructive to the terrain and to the property of homeowners. I request you cannot turn back

3.

the hands of time, but believe changes
are needed to protect our wonderful
lake.

Business on the lake should
be held to strict rules regarding
sewage disposal.

New residences should have to
comply with rules regarding
septic systems.

You have a huge job ahead
of you and we sincerely hope
you are successful in your plan
to keep TPL from becoming
another God forbid, Lake of the
Ozarks.

Sincerely,

[Redacted Signature]

to whom it may concern

my folks live on the lake; my boat & seadoos are on the dock by their home; i am appalled at the corps and their self righteousness concerning certain things regarding " my " lake -----
-- after all, every spring, the corps reiterates that this lake " belongs " to the people, yet everytime i turn around, the corps passes another rule prohibiting me from enjoying " my " lake -----
to wit:

you forced me to remove my grill from my dock; you told me it was a danger; yet at the same time, you told me i could leave my grill on my boat; please, pray tell me the reasoning here !! you would rather have my grill situated by my gas tank on my boat, and NOT on my swim platform, surrounded by cement !! this past year, i was not allowed to cook brats or hot dogs for my wife and kids on my dock; you deemed me unfit to regulate a hot surface on my dock; unbelievable !!!

you told me i could retain my seadoo lifts when my dock was replaced, but i was not allowed to retain the walkway between the seadoos !! again, where do we come up with these illogical rules !! how would i be able to access my seadoos without being able to walk between them to get on them !! unbelievable !!

you told me i was not allowed to have an ice machine on my dock; WHY NOT !!!!! i was told it would have a semblance of my living on the dock !! what does an ice machine have to do with " living " on the dock; us slip owners like to have cold drinks during the summer without having to lug down heavy bags of ice; unbelievable !!

now to the state of the lake itself; the corps does a horrible job of mismanaging the lake levels, year in, year out ---- this past year, you allowed too much water to drain from the damn, causing the lake to plummet to dangerous low levels; i can name over 10 people who had " beached " their boats due to levels that were not marked with buoys; this seems like something the corps should be responsible for -----

i have been told countless times over the years that tablerock lake was originally built to stabilize water levels over 4 different lakes; i totally understand this; i have also been told that the lake belongs to the people; this is 2012; the monies derived from tourism regarding the lake, and the monies derived from condos, and restaurants, and retail outlets on th lake, make me wonder if the corps is really in touch with the modern times;

get off your high horse, and return the lake to us who want to enjoy the lake for what it is; a recreational wonderland !!

the corps has the worst reputation among lakers i have ever witnessed in my 25 years of being on the lake; it's time you reviewed your own selves, and start listening to those of us who use it on a weekly basis -----

Subject: dock information

I called on friday and was called back in reference to my dock and wanting a permit for a swim platform to be added to our dock #0006815 and was told since I was in a red zone and grandfathered in that we would not be permitted for one and I was wanting some more clarification on this please and if that would be something that will be changed once you are all done with this knew master plan? We have many elderly people in my dock that just like to set and watch the water and they are not able to do that very easy the way our dock is now and they where wanting a swim platform to just be able to partake in the scenery around our lovely lake.

Secondly I also ahve another question and I don't know if this needs to go to you or someone else. Is there something that could be done about one of the owners on my dock that doesn't pay his dues or money for his portion of the dock? Can a fine be assessed and if he doesn't pay his slip be taken from him? They do not ever use them and many have asked to purchase them from him but he will not reply or help with his portion of the up keep and dues for permits or electricity or things.

Thank you

A few comments on revision: I am 78 and in 20 years I will be 98. I would like to see some changes now. Mainly, water level should not go below 9'10 so we could have fishing in the Flat Creek area year around. I have a slip in a dock on Flat Creek by the bridge and can't get my boat off the slip and can't even fish off the dock. Would also like to have clean water which means Springfield won't be able to dump their sewage in the lake anymore. Other than these two complaints, I think the Corps has done a great job. Roger H. Goetz

We would like to see a limit on the size of boats on the lake. The wake from large boats can be quite dangerous and also destructive to docks and the shoreline.

Subject: new perspective

i am emailing you my views as we were unable to attend any of your meetings.

overall i think the corps does a good job of keeping the lake beautiful for all to enjoy and would not want to see that change in the future.

my two concerns that i would like to see addressed are as follows;;;;;

1)-- that only the owner of a slip can moor their boat in that slip, alot of familes now a days share a vacation house and all come down at diffrent times to enjoy the lake with their boats----or people that live on the lake have family come down for a visit with their boat we are not susposta let any boats but the one that is registered in that slip to me this is a silly rule ----especially since no one adheres to it or the fact that you do not have to have a boat to buy a slip

2)the subject of vacation rentals who own a private two stall dock--we should be able to let the people who are renting our home use the dock JUST LIKE RESORT OWNERS DO!!!!!!! we pay taxes --just like resort owners,, we are considered comercial property and pay comercial real estate taxes ---just like resort owners do!!! we have bunines licences --just like resort owners do!!!!1 we would be willing to pay any fees to the corps ---just like the resorts do

when your rules were set up over 20 years ago there were no such thing as vacation home rentals, but now this is a valaid way people spend their vacation and it seems that the lake would look nicer if people could put thier boat in a stall rather then putting it up on the lake shore

Subject: Table Rock Lake Plan

My wife and I are in our early fifties and have enjoyed Table Rock Lake since we were young kids. We live in Springfield, Missouri but have a cabin on the lake near Baxter that we visit every chance we get, year round. The issues that are important to us are as follows:

1. Water Quality - more can be done in the area about residential and commercial run-off , sewer systems and septic tanks.
2. Noise - from loud boats.
3. New home construction - the design and layout of many homes to not blend in well with the natural surroundings.
4. Silt - Many of the coves that we have visited for years are filling with silt.
5. Too many docks! Most community docks in our area have not been full for years!

Thanks for your consideration,

Subject: Tablerock Lake Master Plan

Hi,

My suggestions on the Master Plan:

1. Water Quality
2. Put a limit on the number and size of boat docks.
3. Limit on Boat Size and Speed.
4. More shoreline clean-up.
5. Improve fish habitat.
6. Make sure large new developments like Indian Ridge have financial backing to complete the project.
7. Better marking of lake hazardous area. There is a gravel bar close to Point 7 that is not marked and is very hazardous when the lake is low.

Best Regards,

Subject: Master Plan

Attn: Dana Coburn

It is time for the Master Plan to be updated and all things considered.

The docks can become to large for their area and too over populated.

I own a slip in a 12 slip dock in the cove behind the island off Highway 39 in Shell Knob. There are two docks on the highway 39 side of this cove and many surrounding the strip that belongs to Twin Rivers. A lot of the slip owners have bought up land in the area with the plan to petition the corp to enlarge the two docks. Please do not do that...a 24 slip dock is way to large for this small area and the cove is not suited for the large boats they want to house on the docks. They are also wanting 30 foot slips. There is no room in the small parking area now during the busy times of the year. It is my understanding they were submitting this in advance of Dec 1 so they could get it rushed thru.

There should be a size restriction on areas like this and also on the length of slips. When the water is low as it has been in the past few years both docks have suffered damage and if they are bigger and longer then they will just be a threat to each other as both docks have been hit by high winds and had cables break in the past. They have come very close to colliding in past storms.

So please do a good job on the revised Master Plan and leave room to take all areas in to consideration.

It should be more that a profit making scheme for those few.

Thank you .

Subject: Table Rock Master Plan Review

Dear Sir:

You have done an outstanding job of managing this facility for over 50 years. Keep up the good work. Don't let commercial interests override your good management practices.

The impoundment was not created to further commercial interests, as you well know. Keep it pristine clean and it will be a jewel forever. Resist encroachment. Resist over crowding. Restrict access. You have allowed ample commercial docks. Therefore, I suggest that you restrict the number of private docks. This will maintain the aesthetics of the shoreline. This will also allow you to control pollution points on the lake.

I know you will be under a great deal of pressure from commercial and political sources, but this lake does not belong to the nearby commercial interests, nor even those who own land near the lake. It belongs to the American public to enjoy and should be protected for generations to come. If you need my testimony, I will be more than happy to appear.

Subject: Table Rock Lake Master Plan Revision

To Whom It May Concern;

Here are some of the revisions that I feel need to be considered on the new Master Plan

- (1) Marinas and resorts should adhere to the same guidelines as private and community docks
 - (A) Encapsulate their docks
 - (B) Limit satellite docks

- (2) Protect water quality
 - (A) Monitor effluent
 - (B) Limit number and size of tournaments

- (3) Water run off
 - (A) Work more closely with county planning and zoning to monitor developers

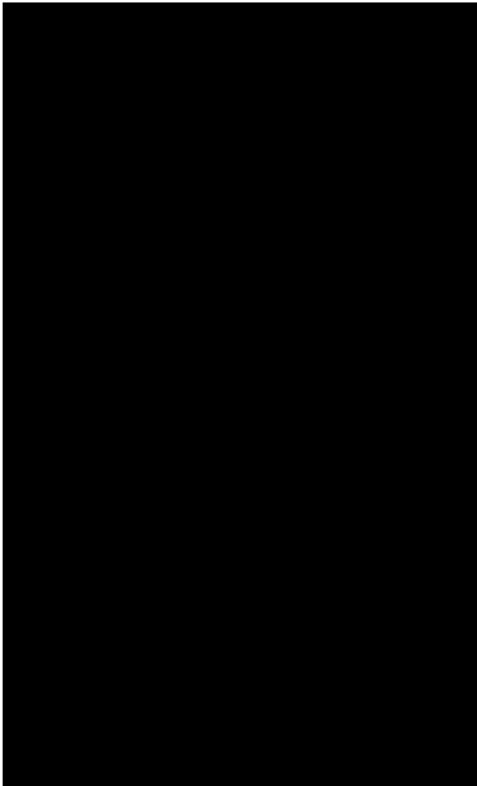

- (4) Keep and maintain existing campgrounds
 - (A) National park lands should not be sold to private entities

- (5) Limit size of boats and the wake they generate so that the lake can be utilized for everyone's pleasure.

Let me say that I have lived here for thirty years and although I have seen the lake change I have to say that I feel comfortable with the way the corps has monitored the lake. However, that does not mean that we can ignore the repercussions of growth and not look at better ways to manage it.

I was disappointed in the public meeting that was held at Reeds Spring High School. The turn-out was fantastic - that should tell you that you have a lot of tax payers who are concerned with the lake and how their money is being spent to maintain it. The format of the meeting left a lot to be desired. We expected to get some solid information from you and then perhaps to have an open question and answer period. We did not expect to write on sticky notes and have them put on large sheets of papers hanging on the walls, where they could not be seen or read from our seats. It was like first grade. Everyone that I spoke with after the meeting was very disappointed. We hope that that meeting was not an example of how the master plan will be dealt with.

Thank you for the opportunity to express my feelings.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Less expanded, cleaner water, better control of lake levels

What about Table Rock Lake is most important to you?

We use the lake for recreation and fishing

What is one thing that could be done to improve the lake?

Better control of lake levels. The flooding did a lot of damage in 2011 and the drought since then has caused a lot of problems too.

Additional comments on the Master Plan Revision or about issues that should be studied:

The lake levels should be kept as close to 917 as possible. They should not be generating electricity when the lake gets below 915. Also, they should generate or release if there is a good chance of a flooding rain to keep the lake from getting too high. Be proactive instead of reactive. Letting the lake get to 935 in 2011 was irresponsible. Generating when the lake is low (900) is also irresponsible.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Subject: Table Rock Lake

Thank you for being diligent in preparing for the future of Table Rock Lake and the surrounding area. The Lake itself has had a dynamic positive impact to our area. There are many existing systems that are successful and working well. There are other regulations in place that prohibit positive, managed growth. This time set aside to review is imperative for Table Rock Lakes Master Plan for the future.

The presence of Table Rock Lake and its provision for the opportunity for Water Recreational activities has a positive impact on the entire infrastructure/success of businesses in the Lakes Region. Table Rock Lake supports not only fishermen but large numbers of people & families that enjoy water recreational activities. This supports and increases the demand for hotel accommodations, resorts, campgrounds, condominiums, restaurants, shopping, boat rental, increased profits related to fuel needed. . . the list goes on.

Due to the specific location of Table Rock Lake and it's proximity to a major vacation destination, Branson, it is not surprising that there is a high % of repeated & increased visits throughout the year. This naturally lends, to a lake lover, the desire to own lake property. Many use as a 2nd home initially and plan on making it their future retirement residence. It is imperative that systems are in place to support this positive impact, interest and lifestyle. It is also important to meet the needs of the specific shore locations so that the lakeside lifestyle can be realized with ease. Without the proper / reasonable systems in place the entire plan and progress dissipates. .

The current challenge is that the system/restrictions in place cripple this prospective plan. There is a barrage of unrealistic requirements that has a negative impact on the lake area as a whole. It defies the fulfillment of the desire to own lake property and boat slips and stifles the demand and values of the real estate itself. Everyone should take time to be informed and to consider. . . "What is the future for Table Rock Lake and the Property and Businesses in the surrounding area?"

Note the following specific concerns needing modification to maximize use patterns.

The Current Red Line Zoning Areas.

Table Rock Lake has many fingers creating fabulous coves with a large range of sizes. Small Cove areas should be able to have red line zoning that suites that specific space Modification should be made because the current requirement for the #of 20 boat slips required in a dock prohibits the max. potential of these smaller locations and discriminates against the property owners intent for a private boat slip. This maximum use of the opportunity must be available to residences in more locations. Consider this: .Dock approval is figured with a 1/3 cove restriction. The size of the dock and # of slips is made based on the cove space available. If the space allows for an amount under 20 slips than the adjusted size and # of slips should be determined to fit that specific area and approval granted. This would allow for docks with less then 20 slips.

The current restrictions force many lake side property owners to either trailer the boat, (many residential/rental areas restricting the parking of trailers creating additional problems) or consider the option of leasing space in a marina. This option may or may not be desirable or convenient. A lease option forces a person to invest in a space they will never realize ownership to. This scenario is not reasonable to many of those desiring to own a lake home.

The current limit of 2 slips per property owner creates additional challenges to those owning more than 2 types of water vessels.

In addition there is the challenge of having the length restriction on slips (30') with the exception of a Marina slip.

This would be better served if based on the actual space in that specific location where there would be opportunity for larger or smaller vessels rather than trying to have everyone conform to a specific boat length formula.

The Marinas on Table Rock Lake are wonderful. They are providing and supporting many demands. There are certain obvious conditions that would & should apply to service / manage this type of facility. The inconsistency is to set more restrictive requirements for other docks. For instance, the required space that the Marina's are required to have between docks is much less than other docks. ie. 40'-45' approved for Marina Docks and a min. of 100' for private docks is required for the amount of space between docks.

This space approved for a Marina dock placement space should certainly be sufficient for all docks.

Docks of every kind should follow a consistent reasonable set of guidelines based on the space that is available in the specific area and the services provided.

The Buffer Areas around the Marina's/Parks have to be considered. Very puzzling is the involvement of Government in a non-government business. The Marina's are privately owned and operated. All of the profits/revenue goes to their Marina business. The Parks and the Marina businesses do not own the land that is buffered. The Buffer areas push out other opportunities around the Marina's and Parks. Why is this happening?

Take Kimberling City, Mo. for example. Due to the expanse of property that is affected by the Marina and the Park Buffer Areas much of this area is choked out for red line zoning approval. This stifles the potential for much needed improvements and future growth opportunities. Kimberling City straddles the highly traveled highway 13 that, at a minimum, connects Springfield Mo. Arkansas and Branson, Mo.

It is considered to be a main vein and has not been able to support the past demands let alone the future demands and opportunities.

Please do not blatantly disregard but rather become aware of the challenges and make the modifications needed.

Review and adjustments to Buffer Areas and approval for much needed red line zoning is a move in the right direction!!

Another concern is the protection of the water itself. The real violators to water quality are obvious. These areas should continue to have a high level of concentration and monitoring. The most obvious..concentrated and continued efforts requiring clean up of tributaries feeding into Table Rock Lake and protection against toxins & waste dumping into the water.

Proper disposals for public services surrounding the Lake should continue to be monitored and upgraded.

There is a misconception that recreational usage is violating the water quality. The reality is, there is little actual negative impact.

Proper manufacturing standards for water vessels are regulated. Individuals are more inclined to honor the laws regarding pollution than ever before. There has been much public awareness and most want to protect not violate the water quality. The people enjoying the lake want to enjoy it for generations to come.

Last but not least is the demand for a lake side community developer to have boat registrations in advance prior to the dock being approved and built. This entire process is completely unreasonable and defeats the ability of both the developer and the prospective property owner to move forward. There are NO assurances of the approval and placement of the dock(s) . As a result the lake side lifestyle is challenged by the lack of confidence on either party that all the advance requirements will be fulfilled timely. This kills the

opportunity to realize the basis of the Lake Side Community Life Style and success of current & future Table Rock Lake Properties.

Allowances for upgrades to existing docks should be encouraged.

It is an unrealistic expectation that all Boat Slip Owners attend a meeting in person. Technology is readily available to accommodate exposure to everyone, where they are.

To summarize:

- 1- ELIMINATE THE MARINA/PARK BUFFER AREAS.
- 2 ADJUSTING AND MAKING EQUAL/CONSISTENT THE PRIVATE DOCK REQUIREMENTS TO THOSE FOR MARINA'S & RESORTS
- 3- APPROVE TO INCREASE THE RED LINE ZONING FOR LOW IMPACT RESIDENTIAL PROPERTY
- 4- MAXIMIZING THE ACTUAL FORMULA OF 1/3 SPACE OF COVES. TAKING AWAY THE 20 SLIP REQUIREMENT AND APPROVE TO ADJUST THE AMOUNT OF SLIPS REQUIRED THAT STAYS IN COMPLIANCE WITH FORMULA. THIS ALLOWS FOR DOCK APPROVAL WITH LESS THAN 20 SLIPS FOR SMALLER BUT SUFFICIENT COVES.
- 5- CHANGING THE CURRENT GUIDELINES AND CREATE NEW GUIDELINES FOR DOCK APPROVAL OF PRIVATE DOCKS, SLIP OWNERS, AND DEVELOPERS. THIS ALLOWS FOR GUIDELINES THAT ARE REASONABLE, ACHIEVABLE AND EASIER TO MANAGE. WITH THIS CHANGE, BOTH DEVELOPERS AND PROPERTY OWNERS CAN HAVE CONFIDENCE THAT A BOAT DOCK WILL BE APPROVED, BUILT AND INSTALLED!

Trusting that the awareness of the current challenges and the suggestions will be discussed & considered.

Looking forward to the changes & results for Table Rock Lakes future! Table

Comments. Thanks and have a good day.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? As the most pristine lake in the nation.
A place where people want to live, work, retire and vacation. Balancing the interest of property Owners,
Vacationers, Commercial - Business Owners and Fishermen. With all who use the lake and it's
facilities. Keeping in mind that Property Owners and Business Owners are most often the ones who
maintain the lake

What about Table Rock Lake is most important to you? Water quality. The ACOE should work to
minimize pollution of the lake from whatever sources, towns, businesses and individuals.
Requires coordination with other governmental agencies. Some sort of intergovernmental
agreements.

What is one thing that could be done to improve the lake? In cooperation with the State of Missouri
control the number and size of boats on the lake. However pollution should be the number one
priority.

Additional comments on the Master Plan Revision or about issues that should be studied:
The ACOE should work to improve their working relationship with property Owners around the
lake. Keep in mind the ACOE are caretakers of the lake that belongs to the citizens of the nation.
Being mindful the lake along with Branson is the economical engine engine for the area. What
happens with the lake impacts lots of people. The ACOE should what ever possible to contribute
to the orderly/managed growth of the area.
I appreciate the opportunity to express my opinion in the development of a new master plan. thank
you.

Subject: Lake Rule Revisions - My Take on It.

Here is my take on this matter:

I borrowed some of this text, deleted some and added some. Please read and consider my side of the story.

I fully understand and preach that the rules that are in place now. That is what keeps the lake so beautiful. We certainly don't want here what Lake of the Ozarks has.

The Current Red Line Zoning Areas.

Table Rock Lake has many fingers creating fabulous coves with a large range of sizes. Small Cove areas should be able to have red line zoning that suites that specific space. Modification should be made because the current requirement for the #of 20 boat slips required in a dock prohibits the max. potential of these smaller locations and discriminates against the property owners intent for a private boat slip. This maximum use of the opportunity must be available to residences in more locations. Consider this: Dock approval is figured with a 1/3 cove restriction. The size of the dock and # of slips is made based on the cove space available. If the space allows for an amount under 20 slips than the adjusted size and # of slips should be determined to fit that specific area and approval granted. This would allow for docks with less then 20 slips. AS a side note:

Four years ago we bought property in the Aunts Creek Resort Condo Assoc. At the time we purchased the cabin and we also bought two slips. The dock at that time was a 100 yards away. The Corps required the dock be moved to a different location in the cove because of the already mentioned requirements (Keep in mind that the dock had been in the former location for 20 years or more). Guess where they moved the dock to.....directly in front of our cabin, completely destroying our lake view that used to be dock free. We recently bought property in another location because this dock view is not what we could tolerate.

The current limit of 2 slips per property owner creates additional challenges to those owning more than 2 types of water vessels. We have a ski boat and two PWC's and would really like to have a pontoon boat as well. But, because of the two slip limit as it stands now it just won't happen.

In addition there is the challenge of having the length restriction on slips (30') with the exception of a Marina slip. What am I supposed to do with two PWC's. They are 10' long each and fit side by side perfectly in a slip but as it seems as it is now I have to trailer them each night and each visit. I am the type of person that won't leave any vessel in the water. Besides, I don't understand the logic of why you care what size boat goes into a slip. I paid for a slip, so what if I am going to keep a 15' boat in it even if it is a 30' slip. Most likely that was the only slip available close to my cabin.

Another concern is the protection of the water itself. The real violators to water quality are obvious. These areas should continue to have a high level of concentration and monitoring. The most obvious..concentrated and continued efforts requiring clean up of tributaries feeding into Table Rock Lake and protection against toxins & waste dumping into the water.

Proper disposals for public services surrounding the lake should continue to be monitored and upgraded.

There is a misconception that recreational usage is violating the water quality. The reality is, there is little actual negative impact. Proper manufacturing standards for water vessels are regulated. Individuals are more inclined to honor the laws regarding pollution than ever before. There has been much public awareness and most want to protect not violate the water quality. The people enjoying the lake want to enjoy it for generations to come.

Last but not least is the demand for a lake side community developer to have boat registrations in advance prior to the dock being approved and built. This entire process is completely unreasonable and defeats the ability of both the developer and the prospective property owner to move forward. There are NO assurances of the approval and placement of the dock(s) . As a result the lake side lifestyle is challenged by the lack of confidence on either party that all the advance requirements will be fulfilled timely. This kills the opportunity to realize the basis of the Lake Side Community Life Style and success of current & future Table Rock Lake Properties.

Let's be honest here.....you know what's going on...names of friends with boats volunteer to put their name on the list even though they have no intention of actually buying the slip. It's just a matter of getting around the rules.

Allowances for upgrades to existing docks should be encouraged. I wanted to add a platform to my slip to sit a table or lawn chairs on but in order to conform to the current rules it would have cost a fortune to have drawings made up and signed off by a licensed architect. Getting the doc association and neighboring slip owners would have been the easy part. Actually, I still agree with neighbor approval and doc assoc. approval.

It is an unrealistic expectation that all Boat Slip Owners attend a meeting in person. Technology is readily available to accommodate exposure to everyone, where they are.

Attention Dana Coburn, Chief,

Environmental Branch, Planning & Environmental , USACE, Little Rock District

PO Box 867

Little Rock, Ar. 72203

email: M4TRMP@usace.army.mil <<mailto:M4TRMP@usace.army.mil>>

I own a Lake home in the Pinnacle Shores development just 2 miles south of the Kimberling City Bridge. I was recently informed that you are open to receiving comments regarding issues in and around Table Rock Lake.

What I would like to see changed

1. Boat owners should not be required to attend meetings in person. I work in Wichita Kansas and drive down to our lake home a couple of weekends per month, but highly unlikely I could attend a meeting in person, email, or conference call should be sufficient for boat owners unable to attend meetings in person.
2. Requiring a new development to have registered boat owners for slips prior to a dock permit being issued does not make sense. When I was looking to purchase a home in Pinnacle Shores, it was a brand new development with room for 100 homes, but only had 3 model homes at the time and only one dock with 2 slips. A prospective lot/home buyer seeing only 2 slips for 100 homes would be very concerned that there would be enough slips for those who might make a substantial investment in buying and building a home. Who would want to take a chance and build a \$600,000 home and then discover there was no slip for your boat? However, if the developer was allowed a dock permit for 40 initial slips for the 100 lot development, that would give a prospective buyer some peace of mind that they would have the opportunity to own a slip when they purchased a home. On the other hand, if a developer obtained a permit for 40 slips and the slips were not sold within 48 months, the developer should have to make a case as to why the un-purchased slips should remain available or forfeit a permit for the unsold slips.
3. We noticed, after the recent floods of the last couple of years a large amount of pollution and debris coming in to the lake from the tributaries (in particular around the Shell Knob area), it was disgusting and dangerous. Steps should be taken to minimize and control such pollution and debris from future large rainfall and flooding.
4. Allow better access for persons of limited mobility to private and community docks. Requiring natural material and a winding 3 ft. wide path to a dock prevents access for all boat owners and guests, makes for dangerous travel by foot when the "natural" mulch material is damp, and results in a tremendous amount of soil erosion in to the lake during period of rain. A brown colored asphalt path suitable for driving a golf cart type vehicle on all the

way down to the dock ramp, would allow for access to those persons with limited mobility, limit the possibility of injury from slipping on wet mulch, would limit soil erosion from rain or snow fall and would blend in as well as the natural mulch material (and would not end up floating in the lake after a rain).

5. More citations issued to reckless PWC operators.

6. Space between private community docks at 45' (same as marina's). There is no need to take up more shoreline, just to push the docks further apart.

What I do not want to see changed

I would not want to see every foot of shoreline lined up with docks like Grand Lake in Oklahoma. THAT LOOKS TERRIBLE. We love the beauty of Table Rock Lake and would not want it to be cluttered up with docks everywhere the eye could see.

Thank you of your time and attention to these important issues.

Dana Coburn, Chief, Environmental Branch, Planning and Environmental

Let me start by saying the web site, <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm> was not available today when I tried to access.

Anyway on with the issue at hand. My first comment is that I'm glad this is finally occurring. It is so long overdue that you are 20 years behind before you even begin. You have a very difficult task ahead of you and I wish you well.

As you've mentioned in your initial communication, the population and visitor usage of the project has increase well beyond initial projections. As such, the shore usage is well behind the need. At a minimum, you must consider the relaxation of the marina and private dock permits that are allowed. Obvouisly, this will require a revamping of the zoning which is currently outdated. Major consideration should be given to the planned communities (subdivisions, townhome and condo complexes). Jusification for this position has to do with the minimum standards that are required to build and maintain these complexes. Those standards will and can be made to include docks that are specifically used for those communities. This will ensure that maintenance and up keep will be ongoing and thus the shoreline astetics of the lake will be maintained.

Anyone in opposition to additional docks doesn't understand the finacial picture that supports our government and ultimately the Corp of Engineers. As I'm sure you know, it's all about the money to the people at the top.

Allowing a controlled increase of docks with minimum standards of construction and up keep will increase the property values of the area dramatically and ultimately the Corps annual income. The plan should spell out specific financial increases the Corp will experience through permit applications and an up keep inspection fee (I believe this would be new. All docks permits (new and current renewals) should require up keep inspections every 2 to 3 year with the charge to be determined by the cost to perform the service (hourly rate, travel time, etc.) by the Corp. Doing so will not only finance the inspection process, but should provide additional funds for other projects as well.

It appears that the number of access points (ramps, campgrounds, etc.) are sufficient. My only issue with the ramps is that some people claim theirs is private. If the ramp is on Corp controlled property (that all ramps) they should be accessible to all tax paying people. No one owns a ramp on Corp property except the Corp.

Lastly, this process shouldn't even be started unless it can be completed (funding and all). To so without funding is a waste of tax payers money and time.

Someone must be held responsible and accountable for getting this completed. Using a lack of funding as an excuse is just that, an excuse. Everyone should stop thinking like the government and start thinking like a business person. Find a way to convince those above that the funding is critical for the safety of the public and the well being of the project. It also will result in increased funds for the government and the Corp.

Feel free to contact me if you have any questions or comments regarding my comments.

Sincerely

Coburn, Dana O SWL

Subject: table rock lake master plan revision

After going to the meeting at Reeds Spring HS and listening to a few locals and gathering my ideas, I have came up with some ideas and comments.

- 1) What ever is done to the lake and what ever direction the corps is going to go with the revision, it is paramount that fishing, boating and recreation be protected. Being a avid fisherman and 32 year resident of Stone County, fishing is my life and I do not want decisions made that will affect the opportunity to fish.
- 2) Props to the corps for not allowing any new boat docks on the lake for a year. Boat docks are nice and they provide some jobs, but I do not want the lake to look like Lake of the Ozarks. No more 20 stall docks and/or dock houses on the lake.
- 3) I live on the Upper James River and one thing that is a bit of a nuisance is the fact that from the Y Bridge to the Cape Fair Marina, there is really no public fishing access. The stretch of the river is very important of the economy of the state due to the White Bass run in the spring and paddlefish (grabbing) season. I would like to see the corps obtain land and build a public access ramp above the mouth of Flat Creek. I think this would allow anglers such as my self more access to the lake and a better opportunity to fish the upper end of the lake.
- 4) Adding brush piles to the lake has had a dramatic impact on the size and numbers of fish in the lake. Just last Sunday, Dec 2nd I caught a 15" crappie above the Virgin Bluff and have also caught various other species such as LMB and SMB that are in the 5-6 lb. range. I think that the Corps of Engineers and the MO Dept of Conservation should continue to line the banks with brush piles and various other structures. I enjoy fishing these "fish attracters" and I am sure that tourists love fishing them as well.
- 5) I am completely against allowing a company to have water rights to the lake. I know that the water could be beneficial, however, if a company is getting water from the lake, it is possible that it would put more restrictions and regulations on the lake that could have adverse effects on the fishing and access to the lake.

Bottom line, protect fishing, boating and swimming in the lake. Protect the water quality, but do not do so as to sacrifice the recreational opportunities found here in Southwest Missouri.

Thank you for your time,

Concerned, careful, and active citizen

To: CESWL-TR Master Plan SWL
Subject: input master plan

We have lake front property and a boat dock on Table Rock Lake. We attended the meeting and wanted to give our input on the lake master plan.

We live in the cove of point 21. this is a very popular ski cove and at the end of the cove they have named it party cove. We get a lot of boat traffic.

We have found that the wake board boats that fill their ballis with water make huge waves that damage the shore line and our boat dock. The boats go extremely slow so people can "surf" the wave, they come right next to the buoys in our cove and cast huge waves. My parents place is across the cove from us. They own a lot of land and we are watching their shore line is erode terribly, they are only allowed one buoy for both of their docks and own land all the way down across from Fish-N-Fun. I believe this type of recreation should not be allowed on the lake or they should be only allowed in the main channel going down the middle. We are not against having wake boarders and skiers as they go fast enough not to do as much shore eroision and dock movement.

We should also limit the size of boats allowed on this lake, due to their waves. We do not want this lake to turn into a Lake of the Ozarks.

We are also not in favor of new restaurants on the water.

We are very concerned about the water quality of the lake.

Thank you for taking our input into consideration as you draw up the plan.

Sincerely,

Subject: The future of Table Rock Lake

To whom this may concern:

Thank you for allowing us to add input into the decisions made that will affect this beautiful lake.

I live in Wichita, KS so it is a five hour drive for us to visit this lake. We have had a house lakeside for almost to years. I can tell you that it is worth the drive. We like the fact that we can find an isolated cove with no boat docks and it feels like we are the only ones on the water. We like the fact that we are not rocked off the water by 30 foot plus boats. We don't like the trend of people putting loud speakers on their boat. We usually don't like the music and it is rude and un-neighborly. We like to listen to our own music when parked on the water and are very cognisent of other people around us. We like the tranquility and peacefulness that Table Rock has to offer. I know that there will be change and growth. I believe you are asking if we want rapid change and growth or slow change and growth. I am advocating slow change and growth. Actually, no change and growth to be truthful. When Table Rock Lake takes on the attributes of Lake of the Ozarks, we will no longer be driving from Wichita, KS to southern MO.

Notice, I am not addressing any specific issues. I feel that you do understand my position on growth and development.

Subject: Master Plan Revision Email Address

Clearly, your data shows much greater recreational use than anticipated in previous planning documents.

The primary objective for management of the shoreline including lake levels in Table Rock should be for recreational use.

Flood control and hydropower production should be secondary objectives.

This may not be in alignment with past USCOE management objectives, but it certainly should be for future management of Table Rock.

I trust the revised management plan will reflect the current reality of high recreational demand and anticipate of even greater demand in the future.

I look forward to reviewing the draft plan when it becomes available.

Kind Regards,

Subject: Tablerock Master Plan Comment...

Dana Coburn:

I appreciate the opportunity to comment on the Tablerock Master Plan. I was pleased to be able to talk to you and other representatives at the Reed Springs HS event.

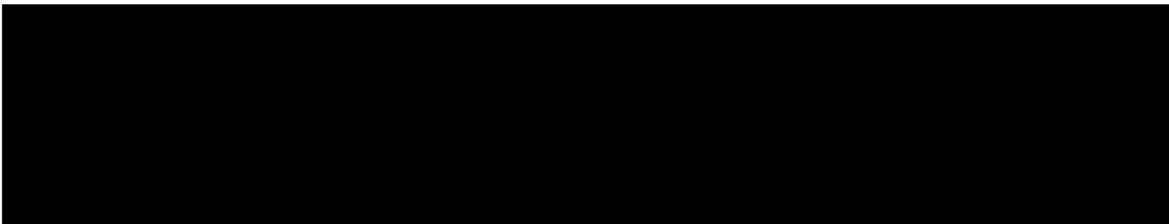

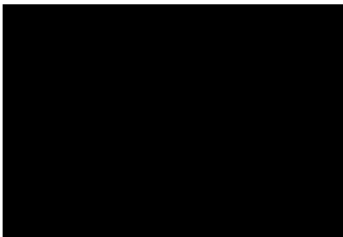

As was presented, clean water is the primary concern of the Master Plan and Shoreline Management. My concern is the Kimberling City Waste Treatment Plant which is very close to the lake. As I understand it is several feet above the lake capacity line, but only by several feet. Treated water is released into the lake.

I have had the opportunity to tour the facility and talk to DNR officials about the operation of the plant. It seems to be well managed and monitored; however, its location makes it a poor location.

During the 2011 flood, the treatment plant did not flood, however, the road that the trucks use to remove waste materials did flood. With the 2012 tornado, the waste treatment plant sustained minor damage from this F1 tornado. If either of these events in the past 2 years were more severe, what would the risk have been to the lake?

To have a waste treatment plant so close to the lake is adding risk to potential damage to the lake. I have been told that Kimberling City does not have the funds to move the facility, but maybe with a joint effort the Corps and the City can find the will and the means to move the facility.

Again, thanks for the opportunity to comment.
If I can provide additional information, please feel free to contact me.

I live on point seven of Table Rock Lake so of course I am concerned about the health and welfare of our beautiful natural resource. I am not sure about what type of input you are seeking but in our little neck of the woods, I have noticed two things that concern me. First, in our area, there is a consistently smelly waste treatment plant, and a septic tank which occasionally spews into the air like a hose. These things makes me worry about the cleanliness and health of our lake. Secondly, there is a certain type of boat which I have heard called both a cigar boat and a cigarette boat, which travels at a high rate of speed and is extremely loud. They race by our house and can be heard for miles in both directions. I believe their high rate of speed is dangerous to other watercraft and their noise pollution is a public nuisance and inconsiderate of others. Thank you for your attention and consideration.

Army Corps of engineers, little Rock District
P.O. box 867
Little Rock, Ark. 72203
Attention: Dana Coburn

To Whom It May Concern:

I would like to make the following comments concerning the scoping of the Table Rock Lake master plan revision project.

1.

As stated in the current plan, the Table Rock Dam project was authorized by a public law according plans contained in other congressional documents. In order to understand the original legislative purpose and intent for which the project was being approved, those documents should be provided for public review, either electronically, or in person at corps offices. Reviewing this original information should be within the scope of the master plan revision plans in order to prevent regulatory creep.

2.

It is clear from Table Rock Lake design plans, and the current master plan, that maintenance and public access requirements were intended to be met by the large area by the Dam and the other 24 or so designated public use areas and the state park. 16 U.S.C. 460d authorizes the Corps to construct and operate recreational facilities (parks) at it's projects, but most certainly does not authorize the Corps to operate the Table Rock project as a park. It would seem that current law specifies that new parks be developed and maintained by non federal entities under a mandatory 50% construction cost share.

3.

I believe there is a well established right of an adjoining land owner to go from his property to the navigable waters of the US and moor his boat next to his property. Since 3050 acres were claimed in the riverbed, there is no doubt that the waters of the project were considered navigable. Absent a designation that project waters are no longer navigable, and there exists a prohibition against public use of the average 100 foot strip of government land along the shore line, this right must remain.

4.

In a prior case against the Corps(United States v. Richardson, 204 F.2d 552 (1953)) petitioners alleged that the Corps had a "Field Practice" of taking more land then was authorized in order to create land for purely recreational use. Concerning this practice

1.5
1.5

General Sturgis, former Chief of the Corps, admitted to a congressional subcommittee that "it would have been very embarrassing to have justified his [the secretary's] certification of public need for all this particular taking.

Hearings on Army-Interior Reservoir Land Acquisition Policy before a Subcommittee of the House Committee on Government Operations, 85th Cong., 1st Sess., 422 (1957).

It is absolutely clear from this case, that no one in 1957 believed that the Corps was authorized to take property from unwilling sellers for purely recreational use. On this point, it is believed that the Corps plan for the acquisition of real estate for the Table Rock Lake project stated that because of the dual purposes (electricity generation for the production of nitrates and recreation) the take line established for electricity generation should be and was extended inland 200 horizontal feet. It should be within the scope of the master plan revision to investigate and correct past errors.

5.

The regulation used to establish the current shoreline use permit system originally applied only to public works projects where the land surrounding the project was entirely owned by the government. A case study of land use for recreation etc. by the Coastal Zone Resources Corp, D.25.25 concluded that virtually all of the land lying contiguous to the 936 isoline (top of the flood control pool) is held by the private sector. This study certainly indicates that the current Corps regulatory scheme may not be appropriate. However, were the Corps to implement similar standards and safe guards (standardized administrative appeals process etc.) used in its navigable waters permitting system, any harm would be inconsequential.

6.

Preparation of the current shoreline management plan was obviously not guided by the current master plan and is clearly not consistent with it. The master plan establishes designated areas (zones color coded red) allocated for recreation high-intensity use by the visiting public. This zoning classification includes areas for parks, and marinas and presumably, large community type docks. Only private docks are allowed in the areas allocated for recreation low density (zones color coded yellow) classified areas. Therefore, the shoreline management plan's inconsistent zoning scheme and community docks only policy should be considered as arbitrary and capricious from the start.

7.

It seems pretty well settled that the government cannot demand, as a condition for issuing a private dock permit to an adjoining land owner, that the land owner must allow public access across his property, unless and until the government provides just compensation. Further, the requirement that an adjoining land owner must construct a dock larger than is needed for his own equipment is contrary to the Corps own regulations concerning private shoreline use. Corps personnel and documents often say that every member of the

public has the opportunity to own a boat dock or slip on table Rock Lake and that there is no private property on the shoreline of the Lake. The problem with this position is that the 100 or so feet of Corps property along the shoreline is completely surrounded by private property. Once again, if the government wants to guarantee a slip owners right to access his slip, it must pay for it.

Sincerely:

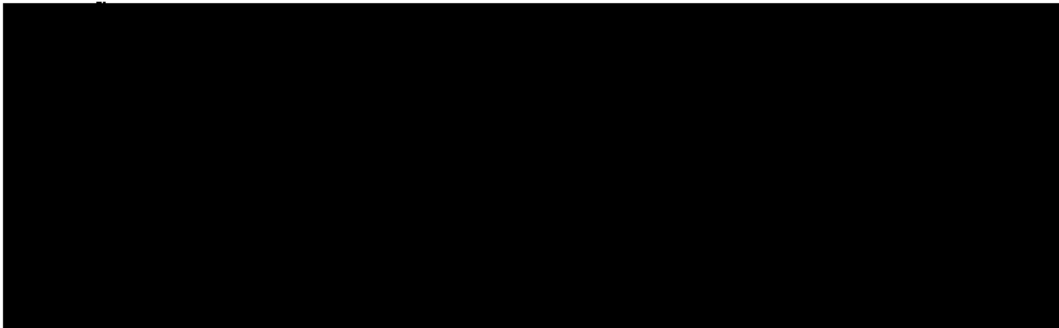

Little Rock Dist, Corps of Engineers

I do appreciate all that the Corp has done to preserve the beauty of nature of Table Rock Lake. I really would like to see a limit on new docks on the lake. The letter I am enclosing is not asking for a new dock, only to have this six slip dock status changed from commercial to community. And again a dock has been at this above location since 1978. This is a copy of a letter submitted to the Branson Office and explains in detail my concern and request when the new SMP is considered.

Any considerations to my above appeal would be greatly appreciated

RE: Dock Lease DACW03-1-03-1073; Quail Cove Resort; Table Rock Lake - Conversion Program

I am appealing the zoning restrictions of the lease area where the above dock is located, more specifically the marina buffer area for this dock. This dock is located on a very small lease area in the buffer zone and is the only area this request affects. I understand it is grandfathered in as a "commercial dock." I am requesting the lease/zoning for this six slip dock be changed to "community dock." I have been a resort dock owner on Table Rock Lake since 1980 and have always complied with any Corp request and always passed dock inspections, etc.

I have owned the Quail Cove Resort and dock lease # above since 1994. This resort was formerly known as Stan and Del's Resort with dock lease # DACW03-1-83-400. The dock lease # was DACW03-1-93-597 and in 2003 changed to the above lease #. There has been a dock in this location since 1978. I am past retirement age and would like very much to retire and sell Quail Cove Resort and keep the dock as located. It is only a six slip dock and I have contacted the closest Marina - Campbell Point Marina - and the owner of the Marina is in no way interested in obtaining it as a "satellite dock." I have used two slips for personal use as resort owner and would like to continue to do so. I have a buyer interested in the Resort property who would want two of the slips and I know that the other two slips could be sold to individuals if the resort were closed.

I was told by you that we gave up our once in a lifetime right to change from commercial to community when we upgraded by selling the old six slip wooden dock and by replacing with a the new six slip dock in 1994. I was never advised that I relinquished any one time right to change designation from commercial to community dock status. I was never provided any documentation on this subject. I do not ever recall that this was explained to me or have I seen any documentation that we were made aware of this before the sale of the old dock. The enclosed copy of the bill of sale dated 7/30/98, transferring ownership of the old wooden dock states the permit was not part of the sale. You will notice the bill of sale states the lease number was used only to identify the structure. The older wooden dock was sold by me and my deceased husband, without a permit and the new owner had secured the needed permit.

My home is located on the property adjacent to the dock. Loss of the right for the dock location would be taking away personal property that I purchased, maintained, and paid personal property taxes on annually. It would greatly reduce the value of my property. The resort is currently in operation but my hope is to have the option of closing and retiring at this present location with the dock converting to a "community dock" and obtaining two slips at said dock for my personal use and selling the other four slips.

Shoreline Management Plan for Table Rock Lake, Section 4-03 paragraph (2) (b) states "construction of replacement docks or relocation of docking facilities with restricted limited development areas will be considered on a case-by-case basis."

I am well past retirement age and needing to retire for my health. I will appreciate any consideration you can give me with this request. for a conversion for this dock lease. I appreciate your time and our discussion last Monday.

Respectfully,

[REDACTED]

[REDACTED] This is based on a copy of a letter that previously conveyed to the COE...

It is hard to briefly express all the positive thoughts that I have related to Table Rock Lake and its prominent effect on our community.

I live in a house with a breathtaking view of the lake and those who use it for recreation, enjoyment, and improvement of the quality of life. It is a remarkable important constant part of my family's home life.

The lake is a constant driver of visitation and economic activity. In tourism terms, it is an "independent me-to" attraction. An independent attraction is one, which by definition would drive a substantial amount of visitors to travel 4 hours to enjoy it if it sat by itself. The Branson area has three such independent attractions, Table Rock Lake, Silver Dollar City, and the theater industry. The intrinsic benefit of Table Rock Lake is that it is insulated from many outside pressures that would negatively affect a private commercial independent attraction over time.

The Ozark Mountain Legacy initiative identified the importance of **actively and relentlessly protecting and enhancing our natural environment. It also identified the importance of fun and family fun.** The lake was prominent in this community discussion and initiative. I have attached the Legacy document for your review.

Positively, the present Congress and Administration have shown a substantial willingness to support tourism. One example is the creation of the public-private Corporation for Travel Promotion established by Congress. This support atmosphere is key as changes are made to COE Lakes

Corps of Engineers is doing well:

1. **The local COE has a good understanding of the needs and dynamics of the nearby community.** They have acknowledged the importance of tourism. They have done their best within substantial existing guidelines and limitations to be an asset to the Ozark Mountain visitor and resident.

2. **The local COE has an unwavering commitment to the structural integrity and safety of the dam and its facilities.** It appears that they are using thoughtful long term planning to extend the useful life of the infrastructure.

3. **The local COE does a good job of trying to apply many broad regulations and policies to a lake that is uniquely utilized by the Ozark Mountain visitor and resident.**

4. The local COE has been forward thinking in its communication for future budget limitations and increased utilization.

5. The local COE has kept water quality and the importance of water quality top of mind for the community through its actions and communications.

6. The local COE has been mature enough to react appropriately publicly when the COE goals do not match the local public need.

I reviewed the recent COE Recreation Strategic Plan of April 2011 as well as the Shoreline Management Plan. I applaud the COE for recognizing that there will need to be future changes. **I was struck by the power of the phrase "linking people to water."** That is an easily explainable, memorable guide to action. This, in conjunction with the concept of balancing environmental sustainability with lake access helps to set criteria for actions.

Below are my thoughts as well as suggested strategy.

1. The local COE should review and develop a more comprehensive and creative local communication plan in cooperation with other government agencies. Input from recent flood and water management events should be reviewed to begin this process.

2. I would create or enhance the position of volunteer coordinator. Work with the community and our visitor base on specific projects that result in lake benefit and decreased costs.

3. Strengthen the relationship between Table Rock Lake and Fort Leonard Wood (and other military installations in the Ozark Mountain visitor base area) to encourage utilization of the lake and surrounding facilities by military personnel and veterans. Do this in partnership with local tourism businesses.

4. Some development areas do not logically complement the land properly with their size and location. Small tweaks can make utilization better. Trails should be added, Where the land allows designated accessways should be created that would satisfy increased population and demand for lake recreation. The ground rules from 50 years ago do not apply today in many cases. Those logical adjustments should be made.

5. The dry storage model of today does not work financially. It is designed to accommodate large numbers of boats with very little market to make the concept successful. It must be changed in scope.

I suggest the following strategy based on my experience and the documents that I reviewed.

It is apparent that as the U.S. population increases, the balancing act between environmental sustainability and the public's desire for lake access will continue to become a larger and larger issue. This issue is exacerbated by the continued limits of funding. **It is also apparent that, in general, a set of consistent standards, rules, regulations and policies are applied to a set of over 400 lakes that act very differently economically, environmentally, and functionally.** The system is not ideal to be able to maximize and enhance the effect of each lakes needs. In this case, consistency creates inefficiency because the needs are not consistent. **The flexibility that is given today is not extensive enough and not encouraged enough to make any real national substantial change.** (I can give you examples where changes need to be made today that would be helpful).

Table Rock Lake has all of the elements that make it a good candidate to become a beta test lake for a creative way of embracing change. **The goal would be for Table Rock Lake to become the National example of success in creative public-private partnerships in decision-making and facilities.**

Create an advisory group made up of private business and government representatives who are interested in the lake, local COE leaders, and district COE leaders.

Give them real authority to be creative in ideas and discussions.

Give them three purposes:

Ask them to **design the relationship between the lake and the stakeholders** if they began with a blank sheet of paper.

Combine Shoreline Management and Recreation Planning into one area and integrate the two into a cohesive program to "Link people to water." This would require a philosophic change that Shoreline Management enhances Recreation and is a form of Recreation planning. (I can give you examples of how I think this integration could work if you would like).

Develop new suggested ways to generate revenues from the lake that could be used to support the programs, projects and missions of the lake.

Then;

Apply the current practical realities to the resulting priorities, ideas, and discussions.

Develop a five year plan that implements the best and most important changes and ideas. Bring flexibility closer to the local level for implementation.

Evaluate and distribute the results to other lakes for possible implementation.

A wise saying..."If you embrace change, you can control it. If you resist change, eventually, it will control you."

I believe this process takes advantage of a great opportunity to effect positive change for a long time.

I very much appreciate you asking for input. I will be happy to discuss at the meeting and as you have need.

Attn: Dana Coburn

Subject: Table Rock Lake Master Plan and Shoreline Management Plan

As a resident near the Cow Creek public ramp, I wish to advocate for the rezoning of the shoreline in the cove adjacent to the current Boy Scout Camp and the new public boat ramp at Cow Creek.

The campground at Cow Creek was closed years ago, along with several others, due to reduced activity and increased cost of repair and upkeep. The current shoreline zoning is based upon the usage in the 1970s when the campground was entirely used and managed by the Corps with a positive cash flow. It is time to formally admit that this property will never be reclaimed for this previous use as a Corps of Engineers Campground. Once this logical decision is made, the rezoning can proceed. The Boy Scout Council in Springfield, Missouri has a long term plan for an aquatics adventure program exclusively for older scouts, including plans for the accompanying property improvements at the camp to support the program, some of which are already proceeding (i.e. shower and bathroom improvements completed, structures have been reroofed, and a planned expansion of the picnic pavilion with an outdoor BBQ kitchen, awaiting Corps approval)

Changing the use from "High Density" to Low Density" and rezoning of this area will allow for the procurement of dock permits for both the Boy Scout Camp and the Wood Ridge Estates and Cow Creek area residents currently requesting approval for boat slips.

The addition of a community dock with boat slips in the Cow Creek cove will increase the local property values, aid in lot and home sales, and foster new housing construction. All of which provides jobs, not just for dock builders, but for tradesmen and retailers as well. Approval of the rezoning is a big step toward economic development in the local area and likely will have minimal adverse impact on the lake or the cove itself.

Sincerely,

Table Rock Lake Master Plan Revision and Environmental Assessment

Re: Table Rock Lake Master Plan

My opinion and primary concerns needing to be addressed.

1. Water quality resulting from shore line construction and sewage treatment surrounding the lake.
2. Limiting the size of boats allowed on the lake. The larger and faster they get the "common" man's fishing and recreation activities become subject to high risk
3. Reduce the number of bass tournaments allowed on the lake. Participants, by their own admission, admit that a minimum of fifty percent of the fish they catch die before or shortly after release.

Thank you for the opportunity to voice my opinions.

TO: Ms. Dana Coburn

My comments regarding the US Army Corps TRL revision of the Master Plan:

How I hope Table Rock Lake will develop in 20 years

Upscale commercial areas should be developed on the lake. Boating and road traffic should have more choices for restaurants and facilities on the shore line. Private commercial developers should be involved to achieve this goal.

Importance of Table Rock Lake to the area.

The natural beauty of the Ozarks has been enhanced by damming the White River and the lakes have become an important destination for tourists and residential development. The resulting economic stimulus to the local area has been very important. The challenge of governing a multi-state lake has yet to be solved, particularly in the area of water quality.

One thing that could be done to improve Table Rock Lake.

More local control of the governance of the lake. The Corps' involvement should be more or less limited to engineering aspects of the lake and local entities should have influence in determining the lake's usage and management.

Comments

There is no need for two "master" plans: Lake Master plan and Shore Line management plan. Visionary aspects and guidance for the lake should include the shore line in the TRL master plan. Therefore, it is recommended that the Lake Master Plan be developed along the lines that were presented at the public hearings and include the shore line.

A written procedure should be the instrument used for shore line management. Enforcement would be more effective if such a written document specifies the regulations necessary to control usage and protect the public interest.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Clean water, clean
unclogged shoreline, great fishing. I hope that TRL
will be a great tourist destination for fishing and recreation.
I hope the shoreline will not be cluttered with docks
one after another. Shoreline vegetation and trees to show
the beautiful Ozarks.

What about Table Rock Lake is most important to you? boating safety, clean
water, good fishing.

What is one thing that could be done to improve the lake? better shoreline management,
regulate dock permits and enforce regs.

Additional comments on the Master Plan Revision or about issues that should be studied: I feel
that whatever the C.O.E. does to revise the "master plan"
for TRL, the big emphasis should be on how these regulations
should be and can be enforced. Yes, the "budget" may be. Will
need to reflect more officers, but - if you do not plan to
enforce your regulations - then they will be a big joke. Just as
they are now. Please consider regulating dock permits so that
TRL does not end up looking like Lake of the Ozarks. We need
cleaner water, safer recreation regs and better enforcement
of all of these regulations. Tough job on a limited budget.

Chief Dana Coburn,

I was notified of your meeting in Shell Knob on Thursday, 29 Nov 12. I am currently deployed with the military but would like to email my comments.

I currently own property in Shell Knob, located across highway 39 from Pizza Hut with approximately 900ft of lakefront property in the cove (Map 13 of 63, Plate 11, Sec. 15, approx. lat/lon of property is N 36.37.5, W 95.77.1).

According to old plates, the property is currently zoned for no docks. The property is located in prime location for a commercial business or residential with access to the lake via a Courtesy or Residential dock permit.

Visitors and residents of the Shell Knob community are restricted due to current zoning plans. In order for the community to continue to grow and be a beneficial factor to the Corps of Engineers Table Rock Lake Master Plan, continued input and expansion of the current limits need to be considered.

For the betterment of the Shell Knob community and with the current projection of visitors to be 40 to 50 million annually for recreational activities, expansion for economic development in this area would be highly beneficial.

I welcome any questions or comments you may have for me concerning this subject.

V/c,

HOW WOULD YOU LIKE TO SEE TABLE ROCK LAKE IN 20 YEARS? The Top Recreation Lake in the U.S. All Forms of Recreation in Harmony)

WHAT ABOUT TABLE ROCK LAKE IS MOST IMPORTANT TO YOU? Fishing & Water Recreation with Pristine look!!

WHAT IS ONE THING THAT COULD BE DONE TO IMPROVE THE LAKE? It's a GREAT Bass Lake, BUT variety is a key for a GREAT destination fishing lake. #1 would be a GREAT Walleye population more would come for Walleye fishing than BASS.

ADDITIONAL COMMENTS ON THE MASTER PLAN REVISION OR ABOUT ISSUES THAT SHOULD BE STUDIED:

1st: Better variety fish population

2nd: Boater Recreation Improvements & safety

To reach above or any improvement for the lake, you need better & stronger bond between the local TRAVEL industry & corp. (meetings, votes, etc) Local travel industry is the driving force for this lake. Control & Restrictions are a must but too many will drive people away. Water purity, levels etc. are obvious for any successful lake.

Here are my suggestions for Table Rock Lake

#1. More in tune with nature than it is now

#2 The natural beauty and tranquility

#3 Enforce all applicable rules and regulations

NOISE - exhaust and stereo equipment

Residential and commercial sewage systems

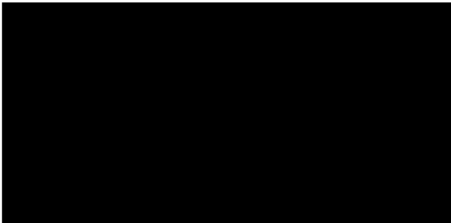

Residential and commercial chemical use

Boat wakes

#4 PWCs used to be a major annoyance but now it is the new breed of wake board boat with ridiculous stereo systems and huge wakes (sometimes augmented by ballast tanks). Enjoying the lake in very small craft is almost a thing of the past except in winter months.

How would you like to see Table Rock Lake in 20 years?

Clean and clear. Cleaner shoreline. Steel docks, no wood docks.

What about Table Rock Lake is most important to you?

Stable water levels. Big boats to be held liable for their wake damage they cause when they drive right by the boat docks.

What is one thing that could be done to improve the lake?

Debris kept out of the lake by allowing people to clean up their shorelines.

(note: case sensitive)

Thank you in advance for joining in with your voice. We trust it will be loud enough to be heard and changes will be made.

Thank you for being diligent in preparing for the future of Table Rock Lake and the surrounding area. The Lake itself has had a dynamic positive impact to our area. There are many existing systems that are successful and working well. There are other regulations in place that prohibit positive, managed growth. This time set aside to review is imperative for Table Rock Lakes Master Plan for the future.

The presence of Table Rock Lake and its provision for the opportunity for Water Recreational activities has a positive impact on the entire infrastructure/success of businesses in the Lakes Region. Table Rock Lake supports not only fishermen but large numbers of people & families that enjoy water recreational activities. This supports and increases the demand for hotel accommodations, resorts, campgrounds, condominiums, restaurants, shopping, boat rental, increased profits related to fuel needed. . . the list goes on.

Due to the specific location of Table Rock Lake and it's proximity to a major vacation destination, Branson, it is not surprising that there is a high % of repeated & increased visits throughout the year. This naturally lends, to a lake lover, the desire to own lake property. Many use as a 2nd home initially and plan on making it their future retirement residence. It is imperative that systems are in place to support this positive impact, interest and lifestyle. It is also important to meet the needs of the specific shore locations so that the lakeside lifestyle can be realized with ease. Without the proper / reasonable systems in place the entire plan and progress dissipates. .

The current challenge is that the system/restrictions in place cripple this prospective plan. There is a barrage of unrealistic requirements that has a negative impact on the lake area as a whole. It defies the fulfillment of the desire to own lake property and boat slips and stifles the demand and values of the real estate itself. Everyone should take time to be informed and to consider... "What is the future for Table Rock Lake and the Property and Businesses in the surrounding area?"

Note the following specific concerns needing modification to maximize use patterns.

The Current Red Line Zoning Areas.

Table Rock Lake has many fingers creating fabulous coves with a large range of sizes. Small Cove areas should be able to have red line zoning that suites that specific space Modification should be made because the current requirement for the #of 20 boat slips required in a dock prohibits the max. potential of these smaller locations and discriminates against the property owners intent for a private boat slip. This maximum use of the opportunity must be available to residences in more locations. Consider this: .Dock approval is figured with a 1/3 cove restriction. The size of the dock and # of slips is made based on the cove space available. If the space allows for an amount under 20 slips than the adjusted size and # of slips should be determined to fit that specific area and approval granted. This would allow for docks with less then 20 slips.

The current restrictions force many lake side property owners to either trailer the boat, (many residential/rental areas restricting the parking of trailers creating additional problems) or consider the option of leasing space in a marina. This option may or may not be desirable or convenient. A lease option forces a person to invest in a space they will never realize ownership to. This scenario is not reasonable to many of those desiring to own a lake home.

The current limit of 2 slips per property owner creates additional challenges to those owning more than 2 types of water vessels.

In addition there is the challenge of having the length restriction on slips (30') with the exception of a Marina slip.

This would be better served if based on the actual space in that specific location where there would be opportunity for larger or smaller vessels rather than trying to have everyone conform to a specific boat length formula.

The Marinas on Table Rock Lake are wonderful. They are providing and supporting many demands. There are certain obvious conditions that would & should apply to service / manage this type of facility. The inconsistency is to set more restrictive requirements for other docks. For instance, the required space that the Marina's are required to have between docks is much less than other docks. ie. 40'-45' approved for Marina Docks and a min. of 100' for private docks is required for the amount of space between docks.

This space approved for a Marina dock placement space should certainly be sufficient for all docks.

Docks of every kind should follow a consistent reasonable set of guidelines based on the space that is available in the specific area and the services provided.

The Buffer Areas around the Marina's/Parks have to be considered. Very puzzling is the involvement of Government in a non-government business. The Marina's are privately owned and operated. All of the profits/revenue goes to their Marina business. The Parks and the Marina businesses do not own the land that is buffered. The Buffer areas push out other opportunities around the Marina's and Parks. Why is this happening?

Take Kimberling City, Mo. for example. Due to the expanse of property that is affected by the Marina and the Park Buffer Areas much of this area is choked out for red line zoning approval. This stifles the potential for much needed improvements and future growth opportunities. Kimberling City straddles the highly traveled highway 13 that, at a minimum, connects Springfield Mo. Arkansas and Branson, Mo.

It is considered to be a main vein and has not been able to support the past demands let alone the future demands and opportunities.

Please do not blatantly disregard but rather become aware of the challenges and make the modifications needed.

Review and adjustments to Buffer Areas and approval for much needed red line zoning is a move in the right direction!!

Another concern is the protection of the water itself. The real violators to water quality are obvious. These areas should continue to have a high level of concentration and monitoring. The most obvious..concentrated and continued efforts requiring clean up of tributaries feeding into Table Rock Lake and protection against toxins & waste dumping into the water.

Proper disposals for public services surrounding the Lake should continue to be monitored and upgraded.

There is a misconception that recreational usage is violating the water quality. The reality is, there is little actual negative impact.

Proper manufacturing standards for water vessels are regulated. Individuals are more inclined to honor the laws regarding pollution than ever before. There has been much public awareness and most want to protect not violate the water quality. The people enjoying the lake want to enjoy it for generations to come.

Last but not least is the demand for a lake side community developer to have boat registrations in advance prior to the dock being approved and built. This entire process is completely unreasonable and defeats the ability of both the developer and the prospective property owner to move forward. There are NO assurances of the approval and placement of the dock(s) . As a result the lake side lifestyle is challenged by the lack of confidence on either party that all the advance requirements will be fulfilled timely. This kills the opportunity to realize the basis of the Lake Side Community Life Style and success of current & future Table Rock Lake Properties.

Allowances for upgrades to existing docks should be encouraged.

It is an unrealistic expectation that all Boat Slip Owners attend a meeting in person. Technology is readily available to accommodate exposure to everyone, where they are.

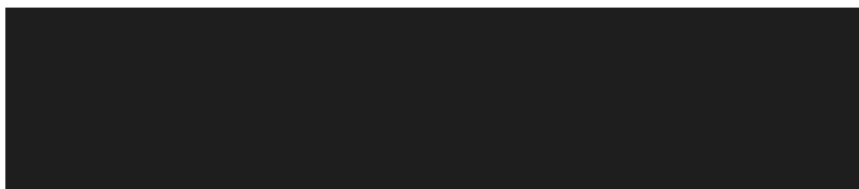

To summarize:

- 1- ELIMINATE THE MARINA/PARK BUFFER AREAS.
- 2 ADJUSTING AND MAKING EQUAL/CONSISTENT THE PRIVATE DOCK REQUIREMENTS TO THOSE FOR MARINA'S & RESORTS
- 3- APPROVE TO INCREASE THE RED LINE ZONING FOR LOW IMPACT RESIDENTIAL PROPERTY
- 4- MAXIMIZING THE ACTUAL FORMULA OF 1/3 SPACE OF COVES. TAKING AWAY THE 20 SLIP REQUIREMENT AND APPROVE TO ADJUST THE AMOUNT OF SLIPS REQUIRED THAT STAYS IN COMPLIANCE WITH FORMULA. THIS ALLDWS FOR DOCK APPROVAL WITH LESS THAN 20 SLIPS FOR SMALLER BUT SUFFICIENT COVES.
- 5- CHANGING THE CURRENT GUIDELINES AND CREATE NEW GUIDELINES FOR DOCK APPROVAL OF PRIVATE DOCKS, SLIP OWNERS, AND DEVELOPERS. THIS ALLOWS FDR GUIDELINES THAT ARE REASONABLE, ACHIEVABLE AND EASIER TO MANAGE. WITH THIS CHANGE, BOTH DEVELOPERS AND PROPERTY OWNERS CAN HAVE CONFIDENCE THAT A BOAT DOCK WILL BE APPROVED, BUILT AND INSTALLED!

Trusting that the awareness of the current challenges and the suggestions will be discussed & considered.

Looking forward to the changes & results for Table Rock Lakes future!

Subject: Table Rock Master Plan

Question #1

I would like to see more development around the lake not like Lake of the Ozark but more community docks with reasonably access to the docks. It would be nice to be able to go out to eat on the lake, make the permit process and the regulations more reasonable and done in a more timely manner. I would like to see more consumer products and services with lake access.

Question #2

Having something to do beside boat ride and fish. I like to do both but would be nice if there where more recreational opportunity's on the lake.

Question #3

The permit process be more simplified. The usace should be more concern with pleasing the citizens than making there job easier by saying no to everything. In dealing with the usace since 1976 all common sense has disappeared Example parking lot for access to your dock when no body drives a car to there dock. Most of the people that live here are older and what is allowed for access to there dock does not lend to SAFE access. Follow the law regarding the American Disability Act in regard to dock access.

Question #4

The Master Plan should be written so there is both economic development and preserving the natural beauty of the Lake. There has to be a middle of the road answer, nobody want's the Lake to go extreme one way or the other. Please remember YOU WORK FOR THE PEOPLE NOT FOR THE GOVERNMENT.

Subject: Table Rock Plan

[REDACTED]

How would I like to see Table Rock Lake in 20 years? I'd like to see Table Rock at 915 feet above sea level, clean, without large boats, and a shore line free of dead trees.

What about Table Rock Lake is most important to me? Recreation is the primary reason I use the lake. Fishing would be a secondary reason. Therefore, water quality is extremely important. Safety is also important and the reason I would like to see a limit on the size of boats on the lake and a more consistent water level.

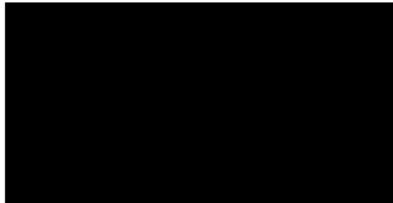

What is one thing that could be done to improve the lake? Septic tank inspections should be required on all home sales around the lake. I think some counties have this, but it should be for all properties.

Additional comments: Large trees are dead all around the lake due to recent floods. These trees should be allowed to be removed without hassle. Large boats create huge wakes that we have had come over the top of our 22 foot pontoon. The large boats are dangerous to fisherman and to water sports.

Subject: Table Rock Master Plan Revision

How would you like to see Table Rock Lake in 20 years? I'd like a lake which has about 50% undeveloped shore line with noise and speed limit for boats.

What about Table Rock Lake is most important to you? Safe, clean water with few or no hidden obstructions and no loud, super fast boats.

What is one think that could be done to improve the lake? Remove most of the stumps when water levels are very low.

Additional comments on the Master Plan Revision or about issues that should be studied: If water quality is an issue, enforce the rules that already exist.

Subject: response Table Rock Lake

Thank you for being diligent in preparing for the future of Table Rock Lake and the surrounding area. The Lake itself has had a dynamic positive impact to our area. There are many existing systems that are successful and working well. There are other regulations in place that prohibit positive, managed growth. This time set aside to review is imperative for Table Rock Lakes Master Plan for the future.

The presence of Table Rock Lake and its provision for the opportunity for Water Recreational activities has a positive impact on the entire infrastructure/success of businesses in the Lakes Region. Table Rock Lake supports not only fishermen but large numbers of people & families that enjoy water recreational activities. This supports and increases the demand for hotel accommodations, resorts, campgrounds, condominiums, restaurants, shopping, boat rental, increased profits related to fuel needed, ... the list goes on.

Due to the specific location of Table Rock Lake and its proximity to a major vacation destination, Branson, it is not surprising that there is a high % of repeated & increased visits throughout the year. This naturally lends, to a lake lover, the desire to own lake property. Many use as a 2nd home initially and plan on making it their future retirement residence. It is imperative that systems are in place to support this positive impact, interest and lifestyle. It is also important to meet the needs of the specific shore locations so that the lakeside lifestyle can be realized with ease. Without the proper / reasonable systems in place the entire plan and progress dissipates. .

The current challenge is that the system/restrictions in place cripple this prospective plan. There is a barrage of unrealistic requirements that has a negative impact on the lake area as a whole. It defies the fulfillment of the desire to own lake property and boat slips and stifles the demand and values of the real estate itself.

Everyone should take time to be informed and to consider.... "What is the future for Table Rock Lake and the Property and Businesses in the surrounding area?"

Note the following specific concerns needing modification to maximize use patterns.

The Current Red Line Zoning Areas.

Table Rock Lake has many fingers creating fabulous coves with a large range of sizes. Small Cove areas should be able to have red line zoning that suites that specific space. Modification should be made because the current requirement for the #of 20 boat slips required in a dock prohibits the max. potential of these smaller locations and discriminates against the property owners intent for a private boat slip. This maximum use of the opportunity must be available to residences in more locations. Consider this: .Dock approval is figured with a 1/3 cove restriction. The size of the dock and # of slips is made based on the cove space available. If the space allows for an amount under 20 slips than the adjusted size and # of slips should be determined to fit that specific area and approval granted.

The current restrictions force many lake side property owners to either trailer the boat, (many residential/rental areas restricting the parking of trailers creating additional problems) or consider the option of leasing space in a marina. This option may or may not be desirable or convenient. A lease option forces a person to invest in a space they will never

realize ownership to. This scenario is not reasonable to many of those desiring to own a lake home.

The current limit of 2 slips per property owner creates additional challenges to those owning more than 2 types of water vessels.

In addition there is the challenge of having the length restriction on docks outside of a Marina.

This would be better served if based on the actual space in that specific location where there would be opportunity for larger or smaller vessels rather than trying to have everyone conform to a specific boat length formula.

The Marinas on Table Rock Lake are wonderful. They are providing and supporting many demands. There are certain obvious conditions that would & should apply to service / manage this type of facility. The inconsistency is to set more restrictive requirements for other docks. For instance, the required space that the Marina's are required to have between docks is much less than other docks.

This space requirement for the Marina should certainly be sufficient for all docks.

Docks of every kind should follow a consistent reasonable set of guidelines based on the space that is available in the specific area and the services provided.

The Buffer Areas around the Marina's/Parks have to be considered.

Take Kimberling City for example. Due to the expanse of property that is affected by the Marina and the Park Buffer Areas much of this area is choked out for red line zoning approval. This stifles the potential for much needed improvements and future growth opportunities. Kimberling City straddles the highly traveled highway 13 that, at a minimum, connects Springfield Mo. Arkansas and Branson Mo.

It is considered to be a main vein and has not been able to support the past demands let alone the future demands and opportunities.

Please do not blatantly disregard but rather become aware of the challenges and make the modifications needed.

Review and adjustments to Buffer Areas and approval for much needed red line zoning is a move in the right direction!!

Another concern is the protection of the water itself. The real violators to water quality are obvious. These areas should continue to have a high level of concentration and monitoring. The most obvious..concentrated and continued efforts requiring clean up of tributaries feeding into Table Rock Lake and protection against toxins & waste dumping into the water.

Proper disposals for public services surrounding the Lake should continue to be monitored and upgraded.

There is a misconception that recreational usage is violating the water quality. The reality is, there is little actual negative impact.

Proper manufacturing standards for water vessels are regulated. Individuals are more inclined to honor the laws regarding pollution than ever before. There has been much public awareness and most want to protect not violate the water quality. The people enjoying the lake want to enjoy it for generations to come.

Last but not least is the demand for a lake side community developer to have boat registrations in advance prior to the dock being approved and built. This entire process is completely unreasonable and defeats the ability of both the developer and the prospective property owner to move forward. There are NO assurances of the approval and placement of the dock(s) . As a result the lake side lifestyle is challenged by the lack of confidence on either party that all the advance requirements will be fulfilled timely. This kills the opportunity to realize the basis of the Lake Side Community Life Style and success of current & future Table Rock Lake Properties.

Allowances for upgrades to existing docks should be encouraged.

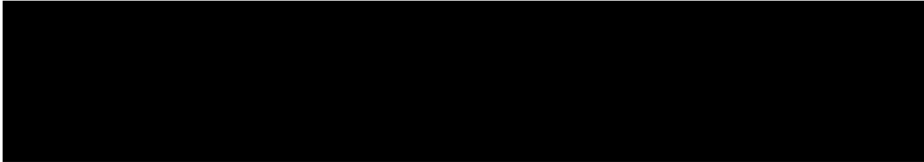

It is an unrealistic expectation that all Boat Slip Owners attend a meeting in person. Technology is readily available to accommodate exposure to everyone, where they are.

Trusting that the awareness of the current challenges and the suggestions will be discussed & considered.

Looking forward to the changes & results for Table Rock Lakes future!

Subject: Table Rock Lake Master Plan Input

Ms Coburn,

Please consider my input below as you revise the subject master plan. I am responding as a individual living full time in a Table Rock Lake front home located in a large subdivision between mile marker 9 and 10 on the James River Arm. I am currently serving as a Stone County executive board member for Southwest Missouri Solid Waste Management District N. Please contact me by email if you have questions regarding the input below. Thanks.

[REDACTED]

Input:

- Improving the lake's water quality is one of the most important issues to address in the master plan. The plan should not only address those things that you can control, but actively support watershed management that directly impacts the lake water quality. The plan should call for collaboration with local, county and state governments to educate developers, businesses and owners on proper erosion control methods, minimizing storm water impact, effective operation of liquid waste treatment facilities (including septic systems) and why these are important to the lake water quality. Provide support to household waste collection and disposal activities for the lake's watershed communities/developments - this could be in the form of educational material, promotional events, etc. Note: most near lake communities do not have access to a household hazardous waste collection and disposal facility - wonder how much of that type of waste ends up in the lake's watershed and/or in the lake?

- Recreational quality on the water: Loud boat noise generated by thru-the-hull exhaust from single and dual V8 engines is obnoxious, unnecessary for this type of water and disruptive to enjoying the natural beauty of the lake. This level of engine noise is not allowed on the roads why would it be allowed on our recreational water? Consider restricting through the hull exhaust boats on the entire lake. There are devises that can easily redirect the exhaust to exit under water, i.e., "Captains Call." Buoy placement for hazardous areas needs to be improved - correct location, monitor that location, buoy lights/strobe for night boating, larger, more visible buoys for boaters unfamiliar with the lake. Indicate hazard buoy locations more prominently and completely on the "Wake Up To Table Rock Lake" map of the lake. Docks - move toward dry docks in congested areas and more public boat ramps; require new docks to be larger - no more small docks. Another way to control dock numbers is to reduce the number of slips owned by a family or individual. Whether the rules are being followed or not, there are many individual/families that own more than two slips - most people game the rules. Not sure how to solve this. Weekly rental houses with docks/slips allow the renters to put boats in a slip owned by the person renting the house/condo. Many are gaming the rules on dock ownership. Many coves are cluttered with small docks which create an unsightly shore line look and detracts from the natural beauty of the lake. Boat size and speed may become an issue impacting recreational quality.

- Recreational quality on shore: Need to do more with Joe Bald Park - add groomed hiking/biking trails. Explore adding hiking and biking trails in conjunction with US Forest Service land (or other public land) and state/county/city land adjacent to the shoreline. Stronger penalties and more consistent enforcement of cutting/clearing trees for a view. Suggest a program to reduce the number of Juniper trees around the lake and replace with

trees that are native to Missouri. The Juniper trees choke out ground vegetation (especially grass) on the shoreline which allows for significant erosion immediately next to the shoreline. This source of erosion is magnified when there is concentrated development adjacent to the shoreline. Recommend the master plan call for collaboration with the Missouri DNR and the US Forest Service to establish a program to eliminate Junipers and restore the shoreline forest with trees native to Missouri that will allow for ground vegetation growth, and natural food sources, i.e., acorns and berries for the shoreline wild life.

I would like to see TRL maintain itself as a recreation and flood control lake. I would like to see this accomplished in a way that minimizes the impacts to its natural beauty (shoreline and water clarity). I would like to see a lake that is not overcrowded or overused. I see the primary elements of recreation as fishing, boating, skiing, swimming, and relaxing on the water.

TRL is important to me because of the recreational opportunities in a place of natural beauty that is not over commercialized or overcrowded.

The CORP has done a good job of regulating the lake to be where it is at today. If it is not already a poster child of what can be accomplished, it should be. Going forward, the CORP will have to increase its problem- solving capabilities to deal with the increasing constraints and expectations. This will require even more thinking.

On the opportunities for improvement side, I see three things: 1) Significant degree of local control. While those in Little Rock, St. Louis, and Washington may have great intentions, they do not know this area. Too often their influence can be in directives that have little applicability and can tie the hands of the local staff or they simply do not listen. 2) Funding stream. Establishing a funding stream with greater local dependence so that "remote control" does not reoccur due to political maneuvers around funding. 3) Determination to solve real problems, not just implement policy. Intellectual laziness can not be acceptable.

The apparent approach being taken by the CORP is to identify the WHATS (3 questions, consultants, revise Master Plan)-an appropriate, necessary step, but only the first of many. The real work will come in HOW this will be implemented. Will the policies serve the Master Plan or will the Master Plan serve the policies? How does one insure the policies serve the Master Plan?

Thanks for listening. [REDACTED]

[REDACTED] I am willing to help.

Subject: Table Rock Lake

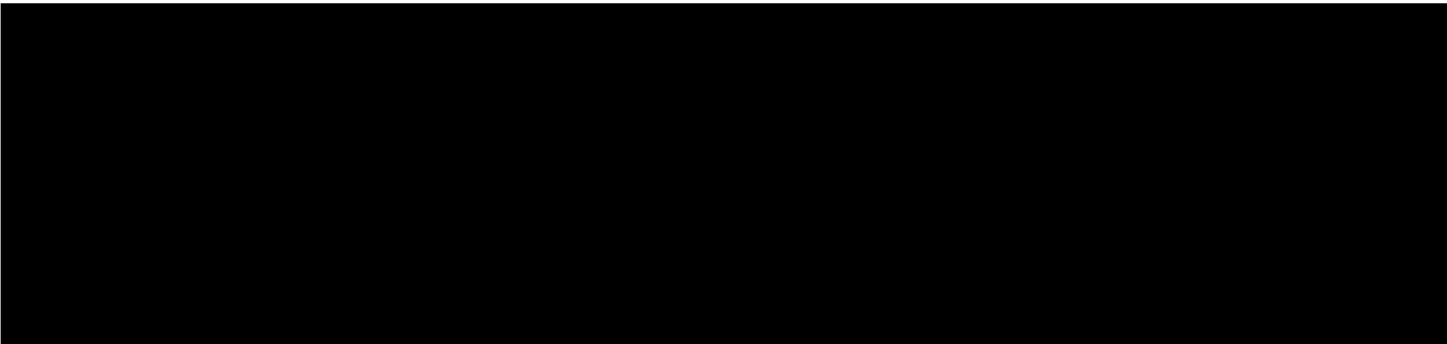

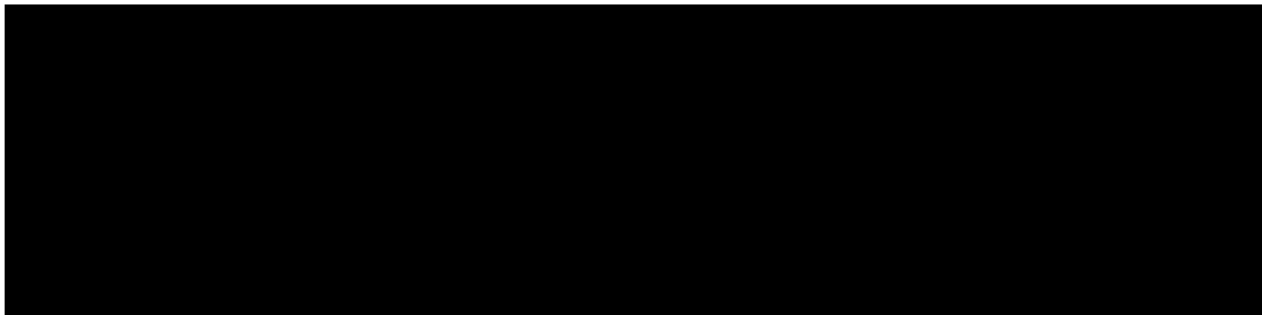

I first started coming to the lake over 40 years ago. Back then a lot of the lake was secluded and quite. Over time the small docks and cabins have become very large homes with big docks. Since moving here 3 years ago, I'm surprised at the number of NEW docks that have been placed on the shorelines. The shorelines are becoming whatever the adjacent land owners want them to be. Some cleared to the water, others parking lots with gulf cart and ATV trails. In some areas even concrete pilings and steps for docks have been put in. No longer public use areas. The scenery has changed from natural wooded areas to large developments with large docks and large boats. What has been done cannot be changed, but are there no limits to shoreline changes? At the rate of change that has been going on, what will the lake look like in 10 yrs, 20 yrs, 30 yrs.

I know water quality should be top priority. But I also feel enough is enough and the shorelines that are left should be maintained in there natural state. I also think clearing of shoreline vegetation should be curtailed.

Subject: TRL Survey

Please allow a larger private boat dock to be allowed for owners of individual condo units at Anchor Point in Kimberling City. Resort owner at Kimberling Inn is not allowing us to use slips and only one dock has been replaced since the Tornado. I realize this is close to the Highway 13 Marina but frankly that is not walking distance. I am old enough that I watched TRL dam being constructed and it seems each decade gets more restricted in use and more difficult to access the lake without paying more and more. I understand with population increase more restrictions occur, however it would be nice if you would relax the rules a little rather than continue your inflexible path.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the address below.

How would you like to see Table Rock Lake in 20 years?

GOOD WATER QUALITY, MORE CLEAN PARKS, LEASE VACANT PARKS INSTEAD OF SELLING TO A DEVELOPER, LAKE POOL RAISED TO NORMAL POOL, ONCE RAISED, KEEP LEVEL CONSISTENT, MORE PUBLIC USE AREAS ON LAKE INCLUDING KIMBERLING CITY TO CREATE MORE TOURISM FOR LOCAL INCOME. THE ABILITY TO REMOVE TREE STUMPS NEAR DOCKS AND WATERWAYS, FOR THE CORPS TO HAVE CLEAR GUIDELINES AND OBJECTIVES SO THEY ARE CONSISTENT ON ALL ASPECTS OF THE LAKE AND SHORELINE.

What about Table Rock Lake is most important to you?

TOURISM AND WORK (INCOME) FOR THE COMMUNITY; WITHOUT THREATENING OR DAMAGING THE LAKE.

What is one thing that could be done to improve the lake?

TO KEEP LAKE LEVEL NEAR NORMAL POOL YEAR AROUND FOR TOURISM AND COMMUNITY INCOME.

Additional comments on the Master Plan Revision or about issues that should be studied:

REMOVE THE DOCK PERMITS MORATORIUM SO THAT THE DOCK BUSINESS STAY OPEN. PERMIT CLEAN VEGETATION NEAR SHORELINES FOR A BETTER VIEW OF THE LAKE.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMIP@usace.army.mil, Website: <http://www.sw.usace.army.mil/parks/tablerock/trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Subject: Master plan revision

Question #1 the lakes' shore lines are good, but would like to have the fallen trees removed so that we see natural stone,caves,and forest areas.

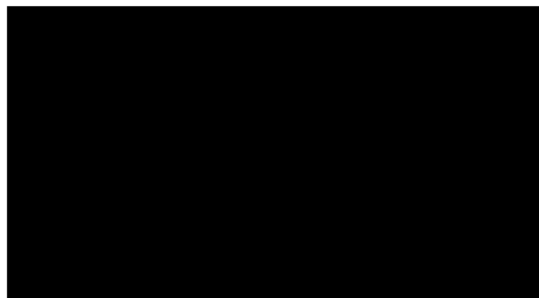

Question #2 clear healthy water, clean shorelines clear of debris and trash.

Question #3 be proactive rather than reactive to making sure that the water doesn't reach flood level. There has to be a better way to evaluate and respond appropriately to rising levels more quickly?

Additional comments:

The size of boats should be limited. The width of many areas of the lake are such that the large boats are destined to erode shore lines, tear up docks, and create unsafe environments for other boaters and fishermen. After all, we are not the lake of the ozarks.

More lake access areas that don't require us to pay to put in watercraft.

Subject: Table Rock Master Plan

Attn Dana Coburn

We write this e-mail as members of the Anchor Point Condominium Owners Association (APCOA) Kimberling City MO. [REDACTED], Kimberling Inn Resort and Conference Center.

Dana,

Due to our location (300 miles from our unit 528 & 529 located on Table Rock Lake) we were unable to attend the meeting dates for comments on the future of Table Rock Lake Plan Revision work, but our REPRESENTATIVE of the Association was ([REDACTED]). Per his correspondence with the association members and your information presented by (the US Army Corps of Engineers Little Rock District Reference Table Rock lake master Plan Revision) my wife and I would like to make the following comments:

We have owned our property at Table Rock Lake ([REDACTED]) sine 1999. Since that time the Kimberling City Sewer Treatment plant was expanded towards the location of our unit. Prior to that expansion most of the treatment plant was hidden by foliage/trees and had a minimum amount of noise. With this expansion we now have more problems with

- 1 - More motor/transformer noise
- 2 - Substantial sewer odor
- 3 - Unsightly view of the sewer water treatment and all the related equipment required to treat the water.

We have been working with the City Of Kimberling, Kimberling Inn and in the beginning (Ourselves for - 4 years) but now the Association is involved in helping to try and correct these problems. In addition it's my understanding that the sewer plant has a much greater capacity to process this waste water material now. With this in mind these problems can only multiply with greater usage which will happen with more building in the community as well as extensive tourist use at the resort during the summer months.

We had our condo for sale for 2 years with real estate agents and no offers. During that time one serious buyer was willing to purchase but after seeing the location of the sewer treatment plant said no way would he buy the property with the sewer plant that close. This has hurt our ability to market the property and reduced the value of our property a great deal because of the Sewer Plant Expansion (Location - Odor - Noise - View).

From your point of view is there anything that can be done via the Corps of Engineers to help in these issues (Location - Odor - Noise - View)?

We realize the location is what it is and we need clean water going into the lake from this facility and are grateful for that, but feel we and others have been taken advantage of because of the expansion of the sewer treatment plant. (HELP)

Sincerely 

Coburn, Dana O SWL

Thank you for being diligent in preparing for the future of Table Rock Lake and the surrounding area. The Lake itself has had a dynamic positive impact to our area. There are many existing systems that are successful and working well. There are other regulations in place that prohibit positive, managed growth. This time set aside to review is imperative for Table Rock Lakes Master Plan for the future.

The presence of Table Rock Lake and its provision for the opportunity for Water Recreational activities has a positive impact on the entire infrastructure/success of businesses in the Lakes Region. Table Rock Lake supports not only fishermen but large numbers of people & families that enjoy water recreational activities. This supports and increases the demand for hotel accommodations, resorts, campgrounds, condominiums, restaurants, shopping, boat rental, increased profits related to fuel needed. . . the list goes on.

Due to the specific location of Table Rock Lake and it's proximity to a major vacation destination, Branson, it is not surprising that there is a high % of repeated & increased visits throughout the year. This naturally lends, to a lake lover, the desire to own lake property. Many use as a 2nd home initially and plan on making it their future retirement residence. It is imperative that systems are in place to support this positive impact, interest and lifestyle. It is also important to meet the needs of the specific shore locations so that the lakeside lifestyle can be realized with ease. Without the proper / reasonable systems in place the entire plan and progress dissipates. .

The current challenge is that the system/restrictions in place cripple this prospective plan. There is a barrage of unrealistic requirements that has a negative impact on the lake area as a whole. It defies the fulfillment of the desire to own lake property and boat slips and stifles the demand and values of the real estate itself. Everyone should take time to be informed and to consider.... "What is the future for Table Rock Lake and the Property and Businesses in the surrounding area?"

Note the following specific concerns needing modification to maximize use patterns.

The Current Red Line Zoning Areas.

Table Rock Lake has many fingers creating fabulous coves with a large range of sizes. Small Cove areas should be able to have red line zoning that suites that specific space Modification should be made because the current requirement for the #of 20 boat slips required in a dock prohibits the max. potential of these smaller locations and discriminates against the property owners intent for a private boat slip. This maximum use of the opportunity must be available to residences in more locations. Consider this: .Dock approval is figured with a 1/3 cove restriction. The size of the dock and # of slips is made based on the cove space available. If the space allows for an amount under 20 slips than the adjusted size and # of slips should be determined to fit that specific area and approval granted. The current restrictions force many lake side property owners to either trailer the boat, (many residential/rental areas restricting the parking of trailers creating additional problems) or consider the option of leasing space in a marina. This option may or may not be desirable or convenient. A lease option forces a person to invest in a space they will never realize ownership to. This scenario is not reasonable to many of those desiring to own a lake home.

The current limit of 2 slips per property owner creates additional challenges to those owning more than 2 types of water vessels.

In addition there is the challenge of having the length restriction on docks outside of a Marina.

This would be better served if based on the actual space in that specific location where there would be opportunity for larger or smaller vessels rather than trying to have everyone conform to a specific boat length formula.

The Marinas on Table Rock Lake are wonderful. They are providing and supporting many demands. There are certain obvious conditions that would & should apply to service / manage this type of facility. The inconsistency is to set more restrictive requirements for other docks. For instance, the required space that the Marina's are required to have between docks is much less than other docks.

This space requirement for the Marina should certainly be sufficient for all docks. Docks of every kind should follow a consistent reasonable set of guidelines based on the space that is available in the specific area and the services provided.

The Buffer Areas around the Marina's/Parks have to be considered.

Take Kimberling City for example. Due to the expanse of property that is affected by the Marina and the Park Buffer Areas much of this area is choked out for red line zoning approval. This stifles the potential for much needed improvements and future growth opportunities. Kimberling City straddles the highly traveled highway 13 that, at a minimum, connects Springfield Mo. Arkansas and Branson Mo.

It is considered to be a main vein and has not been able to support the past demands let alone the future demands and opportunities.

Please do not blatantly disregard but rather become aware of the challenges and make the modifications needed.

Review and adjustments to Buffer Areas and approval for much needed red line zoning is a move in the right direction!!

Another concern is the protection of the water itself. The real violators to water quality are obvious. These areas should continue to have a high level of concentration and monitoring. The most obvious..concentrated and continued efforts requiring clean up of tributaries feeding into Table Rock Lake and protection against toxins & waste dumping into the water.

Proper disposals for public services surrounding the Lake should continue to be monitored and upgraded.

There is a misconception that recreational usage is violating the water quality. The reality is, there is little actual negative impact.

Proper manufacturing standards for water vessels are regulated. Individuals are more inclined to honor the laws regarding pollution than ever before. There has been much public awareness and most want to protect not violate the water quality. The people enjoying the lake want to enjoy it for generations to come.

Last but not least is the demand for a lake side community developer to have boat registrations in advance prior to the dock being approved and built. This entire process is completely unreasonable and defeats the ability of both the developer and the prospective property owner to move forward. There are NO assurances of the approval and placement of the dock(s) . As a result the lake side lifestyle is challenged by the lack of confidence on either party that all the advance requirements will be fulfilled timely. This kills the opportunity to realize the basis of the Lake Side Community Life Style and success of current & future Table Rock Lake Properties.

Allowances for upgrades to existing docks should be encouraged.

It is an unrealistic expectation that all Boat Slip Owners attend a meeting in person. Technology is readily available to accommodate exposure to everyone, where they are.

Trusting that the awareness of the current challenges and the suggestions will be discussed & considered.

Looking forward to the changes & results for Table Rock Lakes future!

Coburn, Dana O SWL

Subject: Response to Table Rock Lake Master Plan Revision and Environmental Assessment. TIME IS OF THE ESSENCE..DO NOT DELETE & PLEASE FORWARD!

Hello!

Below in black text color is a response to the recent correspondence from the Corps. regarding the Table Rock Lake Master Plan Revision and Environmental Assessment.

Please do not disregard the announcement/notification from them but instead, review the challenges below and respond. It is important that this is not overlooked.

It is such a busy time of the year with all of the Holidays! Sometimes it is easy to put things aside to deal with later. It can be hard to allocate the time to set down and draft a response.

The hope is that this response will bring to light some of the issues that need to be addressed. If you wish, you are welcome to copy and paste any/all portions of this draft and modify if desired.

Most importantly is that you are encouraged to respond and it be received by Dana Coburn no later than Wednesday, Dec. 12, 2012.

Forward this to everyone you know that loves Table Rock Lake and wish to enjoy it for years to come.

TIME IS OF THE ESSENCE!!

(note: case sensitive)

Thank you in advance for joining in with your voice. We trust it will be loud enough to be heard and changes will be made.

Thank you for being diligent in preparing for the future of Table Rock Lake and the surrounding area. The Lake itself has had a dynamic positive impact to our area. There are many existing systems that are successful and working well. There are other regulations in place that prohibit positive, managed growth. This time set aside to review is imperative for Table Rock Lakes Master Plan for the future.

The presence of Table Rock Lake and its provision for the opportunity for Water Recreational activities has a positive impact on the entire infrastructure/success of businesses in the Lakes Region. Table Rock Lake supports not only fishermen but large numbers of people & families that enjoy water recreational activities. This supports and increases the demand for hotel accommodations, resorts, campgrounds, condominiums, restaurants, shopping, boat rental, increased profits related to fuel needed. ,.. the list goes on.

Due to the specific location of Table Rock Lake and it's proximity to a major vacation destination, Branson, it is not surprising that there is a high % of repeated & increased visits throughout the year. This naturally lends, to a lake lover, the desire to own lake property. Many use as a 2nd home initially and plan on making it their future retirement residence. It is imperative that systems are in place to support this positive impact, interest and lifestyle. It is also important to meet the needs of the specific shore locations so that the lakeside lifestyle can be realized with ease. Without the proper / reasonable systems in place the entire plan and progress dissipates. .

The current challenge is that the system/restrictions in place cripple this prospective plan. There is a barrage of unrealistic requirements that has a negative impact on the lake area as a whole. It defies the fulfillment of the desire to own lake property and boat slips and stifles the demand and values of the real estate itself.

Everyone should take time to be informed and to consider.... "What is the future for Table Rock Lake and the Property and Businesses in the surrounding area?"

Note the following specific concerns needing modification to maximize use patterns.

The Current Red Line Zoning Areas.

Table Rock Lake has many fingers creating fabulous coves with a large range of sizes. Small Cove areas should be able to have red line zoning that suits that specific space

Modification should be made because the current requirement for the # of 20 boat slips required in a dock prohibits the max. potential of these smaller locations and discriminates against the property owners intent for a private boat slip. This maximum use of the opportunity must be available to residences in more locations. Consider this: Dock approval is figured with a 1/3 cove restriction. The size of the dock and # of slips is made based on the cove space available. If the space allows for an amount under 20 slips than the adjusted size and # of slips should be determined to fit that specific area and approval granted. This would allow for docks with less than 20 slips.

The current restrictions force many lake side property owners to either trailer the boat, (many residential/rental areas restricting the parking of trailers creating additional problems) or consider the option of leasing space in a marina. This option may or may not be desirable or convenient. A lease option forces a person to invest in a space they will never realize ownership to. This scenario is not reasonable to many of those desiring to own a lake home.

The current limit of 2 slips per property owner creates additional challenges to those owning more than 2 types of water vessels.

In addition there is the challenge of having the length restriction on slips (30') with the exception of a Marina slip.

This would be better served if based on the actual space in that specific location where there would be opportunity for larger or smaller vessels rather than trying to have everyone conform to a specific boat length formula.

The Marinas on Table Rock Lake are wonderful. They are providing and supporting many demands. There are certain obvious conditions that would & should apply to service / manage this type of facility. The inconsistency is to set more restrictive requirements for other docks. For instance, the required space that the Marina's are required to have between docks is much less than other docks. ie. 40'-45' approved for Marina Docks and a min. of 100' for private docks is required for the amount of space between docks.

This space approved for a Marina dock placement space should certainly be sufficient for all docks.

Docks of every kind should follow a consistent reasonable set of guidelines based on the space that is available in the specific area and the services provided.

The Buffer Areas around the Marina's/Parks have to be considered. Very puzzling is the involvement of Government in a non-government business. The Marina's are privately owned and operated. All of the profits/revenue goes to their Marina business. The Parks and the Marina

businesses do not own the land that is buffered. The Buffer areas push out other opportunities around the Marina's and Parks. Why is this happening?

Take Kimberling City, Mo. for example. Due to the expanse of property that is affected by the Marina and the Park Buffer Areas much of this area is choked out for red line zoning approval. This stifles the potential for much needed improvements and future growth opportunities. Kimberling City straddles the highly traveled highway 13 that, at a minimum, connects Springfield Mo. Arkansas and Branson, Mo.

It is considered to be a main vein and has not been able to support the past demands let alone the future demands and opportunities.

Please do not blatantly disregard but rather become aware of the challenges and make the modifications needed.

Review and adjustments to Buffer Areas and approval for much needed red line zoning is a move in the right direction!!

Another concern is the protection of the water itself. The real violators to water quality are obvious. These areas should continue to have a high level of concentration and monitoring. The most obvious..concentrated and continued efforts requiring clean up of tributaries feeding into Table Rock Lake and protection against toxins & waste dumping into the water.

Proper disposals for public services surrounding the Lake should continue to be monitored and upgraded.

There is a misconception that recreational usage is violating the water quality. The reality is, there is little actual negative impact.

Proper manufacturing standards for water vessels are regulated. Individuals are more inclined to honor the laws regarding pollution than ever before. There has been much public awareness and most want to protect not violate the water quality. The people enjoying the lake want to enjoy it for generations to come.

Last but not least is the demand for a lake side community developer to have boat registrations in advance prior to the dock being approved and built. This entire process is completely unreasonable and defeats the ability of both the developer and the prospective property owner to move forward. There are NO assurances of the approval and placement of the dock(s) . As a result the lake side lifestyle is challenged by the lack of confidence on either party that all the advance requirements will be fulfilled timely. This kills the opportunity to realize the basis of the Lake Side Community Life Style and success of current & future Table Rock Lake Properties.

Allowances for upgrades to existing docks should be encouraged.

It is an unrealistic expectation that all Boat Slip Owners attend a meeting in person. Technology is readily available to accommodate exposure to everyone, where they are.

To summarize:

1- ELIMINATE THE MARINA/PARK BUFFER AREAS.

2 ADJUSTING AND MAKING EQUAL/CONSISTENT THE PRIVATE DOCK REQUIREMENTS TO THOSE FOR MARINA'S & RESORTS

3- APPROVE TO INCREASE THE RED LINE ZONING FOR LOW IMPACT RESIDENTIAL PROPERTY

4- MAXIMIZING THE ACTUAL FORMULA OF 1/3 SPACE OF COVES. TAKING AWAY THE 20 SLIP REQUIREMENT AND APPROVE TO ADJUST THE AMOUNT OF SLIPS REQUIRED THAT STAYS IN COMPLIANCE WITH FORMULA. THIS ALLOWS FOR DOCK APPROVAL WITH LESS THAN 20 SLIPS FOR SMALLER BUT SUFFICIENT COVES.

5- CHANGING THE CURRENT GUIDELINES AND CREATE NEW GUIDELINES FOR DOCK APPROVAL OF PRIVATE DOCKS, SLIP OWNERS, AND DEVELOPERS. THIS ALLOWS FOR GUIDELINES THAT ARE REASONABLE, ACHIEVABLE AND EASIER TO MANAGE. WITH THIS CHANGE, BOTH DEVELOPERS AND PROPERTY OWNERS CAN HAVE CONFIDENCE THAT A BOAT DOCK WILL BE APPROVED, BUILT AND INSTALLED!

Trusting that the awareness of the current challenges and the suggestions will be discussed & considered.

Looking forward to the changes & results for Table Rock Lakes future!

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? A clean lake which was sensibly managed for development and growth. The natural beauty of the lake was preserved with common sense with easy access to the lake.

What about Table Rock Lake is most important to you? A wonderful place to live and raise a family. A strong economy surrounding the lake.

What is one thing that could be done to improve the lake? Common sense control of the lake, not 100% controlled by the government.

Additional comments on the Master Plan Revision or about issues that should be studied: How to complete a master plan of the lake without shutting down shoreline management and forcing many businesses to close and people to loose their employment. Explain and answer questions about the master plan.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/lrmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

Subject: Master Plan Updates

I commend the USACE for implementing the moratorium on Table Rock Lake activity and re-evaluating the master plan. I have been visiting TRL for the past 20 years and over that time have seen a steady and recently alarming increase in lake use and shoreline construction. At the current rate of development, especially over the past few years, TRL will evolve into another Lake of the Ozarks.

Thanks for making the hard, and probably unpopular decision

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? _____

What about Table Rock Lake is most important to you? _____

What is one thing that could be done to improve the lake? More enforcement of responsibility for wakes from boats that just get bigger every season.

Additional comments on the Master Plan Revision or about issues that should be studied: _____

More consideration for plans to update and replace older docks with new ones. Joe Spradling & Millard Andrews presented a plan to consolidate 2 older docks into one new dock and the plan was rejected even though it would free up shore line (use less than is now being occupied). No new parking space than is currently being used would be needed but plan was still rejected. We like to think a face to face meeting with involved Corps personnel would give us an opportunity to show that our plan makes no changes except improvement in the environment and the 2 existing docks. (OVER)

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.sw.usace.army.mil/parks/Tablerock/Trmasterplan.htm>. Written comments must be postmarked, e-mailed, faxed, or otherwise submitted by December 14, 2012.

After all, a neighbor's dock whose permit expired about 2 years ago on a dock that had been virtually abandoned, broken loose, crashed into my dock and others was given an extension on his expired permit. This same dock was beached due to lack of "Dock Witcher" for over 30 days. Now the Corps is "working with him" to allow this said dock to be replaced.

It seems that those of us who have had good working relationships with Corps personnel and who followed the guidelines should receive more consideration on a minor variance to Corps standard regulations.

Please Reply

Dear Mr. Coburn,

The attached are letters for your review.

Our village is also feeling the pressure of improper shore line use from winter and residents.

Hopefully the village will contact you. If you feel we can work together, we have on file a "no significant impact" study made for Indian Point Shore lines and has been given to the U.S. Corps Table Rock Office by the Ozark Mountain Nature Trail Association.

Also if you request, we have the support of Senator Roy Blunt, Congressman Billy Long and other officials to bring this project to completion as we did in 2004.

Please contact me anytime if you agree.

Sincerely,

November 17, 2012

This is an opportunity for the entire village.

The US Corps is reviewing its master plan for Table Rock Lake. Public meetings are being held Nov. 28, 2012 from 6 to 8:30 pm at the Reeds Spring High School. All zoning and shoreline management will be reviewed.

The Village has a responsibility and opportunity to attend this hearing.

Under today's plan a majority of our village residents (800) cannot access the shoreline except at the public dock. We will have over 1500 residents in 2015. Also visitors at non-dock accommodations have very limited access to the lake. There is only one public boat ramp for the entire village.

Today many residents and visitors access the lake mostly by trespassing over private property to get to the lake. This is a growing problem for many reasons. Hunters, unauthorized use of private docks, equipment damage, and unlawful acts are taking place.

The Village can become pro active and benefit the community as well as meet the US Corps goals to protect our lake and shoreline.

A cooperative effort from some years past between the US Corps and our Village was started to build shoreline access trails and a community park. This then controlled the areas for public use and prevented the unbridled use of shoreline. We began the process by the Village patrolling the Jaques Point area. We significantly reduced drug use and unlawful acts. Our Village maintained the access road and removed trash. Divers, children, families and walkers became comfortable again because they had safe access to enjoy the shoreline. The village lost sight of this project.

A plan to connect the park to our trail system was in place. Also a plan to fill the gap to John the Diver Island was placed before the trustees and discussed in master plan hearings. The new breakwater walkway was a trail extension and allowed further use for controlled shoreline enjoyment.

There is a cost of any project of course. Funding for maintenance would be a Village issue paid for from increased tax revenues that would occur from business sales. Private monies and grants would also support the project.

The negative response of a few residents was carefully reviewed. A similar US Corps project at Lake Norfolk, where in the town took control of an unlawful area, resulted in no crime and improved the entire town quality of life. Projects by towns and US Corps for public use is common and very beneficial.

P.S. Any requests to the US Corps by the Village should be in writing and also ask for a meeting with the US Corps. The deadline is December 14, 2012.

US Army Corps of Engineers

Summary

Throughout the United States all lake and ocean shorelines have been slowly closed to the public. Complete water ways and lakes are now privately controlled with only token, if any, access. Governments, only when prompted by citizens reopen access points and in areas long closed down to the public this results in legal battles and taking of private property. The public has a right to its shorelines. On Indian Point access to the lake has been all but removed from the majority of the residents and visitors. The Village has a public dock that has services. There is a US Corps park that charges fees. There is a public ramp (one). The access at White Wing peninsula has been closed, Rock Lane and the Harbor are now private ramps, "Josies road" is closed, and Resorts are private and protected. With no trails or parking how does anyone in the village plan to enjoy our lake shoreline unless they control the access?

Little Rock, AR 72203

Attn: Dana Coburn

Subject: Table Rock Lake Master Plan and Shoreline Management Plan

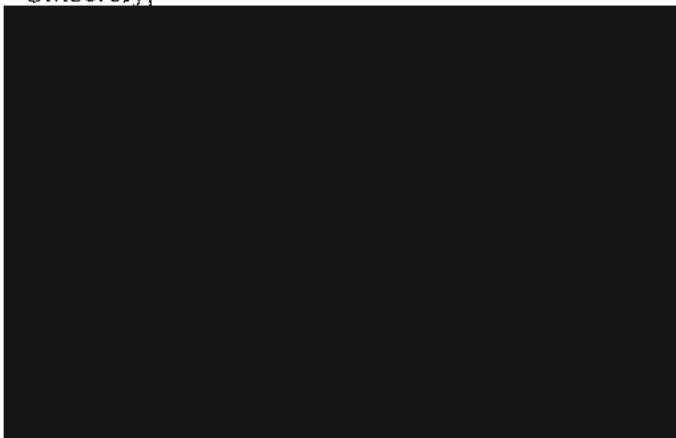

As a resident near the Cow Creek public ramp, I wish to advocate for the rezoning of the shoreline in the cove adjacent to the current Boy Scout Camp and the new public boat ramp at Cow Creek.

The campground at Cow Creek was closed years ago, along with several others, due to reduced activity and increased cost of repair and upkeep. The current shoreline zoning is based upon the usage in the 1970s when the campground was entirely used and managed by the Corps with a positive cash flow. It is time to formally admit that this property will never be reclaimed for this previous use as a Corps of Engineers Campground. Once this logical decision is made, the rezoning can proceed. The Boy Scout Council in Springfield, Missouri has a long term plan for an aquatics adventure program exclusively for older scouts, including plans for the accompanying property improvements at the camp to support the program, some of which are already proceeding (i.e. shower and bathroom improvements completed, structures have been reroofed, and a planned expansion of the picnic pavilion with an outdoor BBQ kitchen, awaiting Corps approval.)

Changing the use from "High Density" to Low Density" and rezoning of this area will allow for the procurement of dock permits for both the Boy Scout Camp and the Wood Ridge Estates and Cow Creek area residents currently requesting approval for boat slips.

The addition of a community dock with boat slips in the Cow Creek cove will increase the local property values, aid in lot and home sales, and foster new housing construction. All of which provides jobs, not just for dock builders, but for tradesmen and retailers as well. Approval of the rezoning is a big step toward economic development in the local area and likely will have minimal adverse impact on the lake or the cove itself.

Sincerely,

** Needs to exclude swimming area as swimmers not dangerous use the boat landing.*

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Remain clean and beautiful with a great place for recreation including fishing

What about Table Rock Lake is most important to you?

Beauty, cleanliness & fishing

Beauty and peacefulness unlike Lake of the Ozarks

What is one thing that could be done to improve the lake?

Stock lake with Stripers and Walleye

Additional comments on the Master Plan Revision or about issues that should be studied:

Septic systems should be monitored especially on incoming waterways

A study of the fishing population, so as to make it easier to catch fish. It seems like bass fishing is the only fishing.

Note: There needs to be a place for swimmers at Cow Creek as they now are dangerously using the landing.

way to report misuse of lake front.

December 13, 2012

Ms. Dana Coburn
Chief, Environmental Branch
Planning and Environment
USACE Little Rock District
PO Box 867
Little Rock, Arkansas 72203

Dear Ms. Coburn,

Thank you for your leadership in regards to the Table Rock Lake Master Planning process and for the opportunity to provide feedback related to the mission of the Master Plan.

I wanted to relate to you that from the perspective of Bass Pro Shops, Tracker Marine and Big Cedar Lodge, we feel strongly that with changes in the use patterns, population density, and development around the lake that the current land classification categories need to be reevaluated and subsequently reclassified.

The Bass Pro Shop's Table Rock Lake properties of Big Cedar Lodge, Top of the Rock, Dogwood Canyon and the new Outdoor Academy are all designated as low density yet Big Cedar Lodge and Dogwood Canyon host thousands of guests from around the world each year. The reopening of the greatly expanded Top of the Rock complex, which will house restaurants, a world class natural history museum, golf courses, a destination cave and a unique public garden, will draw thousands of new tourists and visitors as will the new Outdoor Academy which is under construction. The Outdoor Academy has a mission to expose guests from all walks of life to the great outdoors, teach them outdoor skills and connect them to the land much like Aldo Leopold did decades ago. Major work will also be done at Dogwood Canyon that will continue to draw additional visitors to Table Rock Lake.

The current facilities, and the ones under construction, will create a world class nature/outdoor based tourist destination second to none in the United States and will have a significant economic impact on the Ozark Mountains and Table Rock Lake. This complex of facilities, which are geographically close to one another, will be a location where we can carry out a variety of outdoor recreational opportunities which align with the vision of the Corps of Engineers National Recreational Plan. These facilities will be locations to carry out the programs we develop under the joint partnership memorandum between Bass Pro Shops and the US Army Corps of Engineers.

We would like to respectfully request that in the new Master Plan, the public properties that we own be designated as high density recreation use. As you can see from the land classifications that we have provided for you on the above properties, they are all mostly low density recreation use. Specifically, these properties are Big Cedar Lodge, Bass Pro Shops Outdoor Academy, Bass Pro Shops Long Creek Marina, Wilderness Camping Area, Thunderhead Point, Paradise Point and The Cliffs at Long Creek.

We are working with the Corp of Engineers on our own master plan. Enclosed is a copy that was officially submitted a few months ago. The plan has undergone slight changes. We would love the opportunity to make a special presentation on our master plan to your Project Delivery team. The true impact of our current development on Table Rock Lake will be the great synergy of all of these facilities and the recreational impact it will bring to Table Rock Lake.

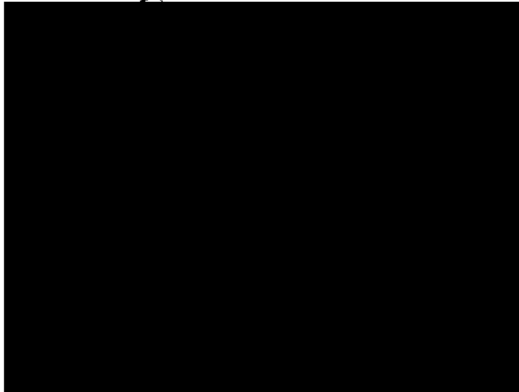

In a review of the land classification categories, we are fairly certain that high density recreation would be the land classification category that best fits the breadth and scope of these facilities/properties. We are somewhat puzzled that private boat docks are not allowed to be a part of this classification. However, we could be misinterpreting the land classification wording. We eagerly look forward to working with you on reclassification. Perhaps the

wording in the classifications can be reexamined and changes and/or additions to land classifications can be made.

Dana, best wishes as your team works through the master planning process. Please let us know if we can help you with facilities as you get to focus group stages and other community meetings.

Thank you for the opportunity to respond on the master plan.

Sincerely,

May 4, 2010

US Army Corp of Engineers
Table Rock Lake
4600 State Highway 165
Branson, MO 65616

As you are aware, we are in the process of developing a long-range conceptual plan for Big Cedar Lodge, Big Cedar Wilderness Club and some adjacent Table Rock Lake properties that will improve the recreational opportunities and services for our guests and destination visitors.

This letter outlines the basic components of the plan with a short explanation of each project that we would like to implement. This conceptual plan is an accumulation of research, staff “brainstorm time”, but most of all it is the voice of our guests as they give us feedback from customer cards, telephone feedback and personal visits with us.

Please also know that we want to work cooperatively with you on these projects. As you look at this master list of projects, you might find some of this would be a great partnership together. Whether we partner with any of these outlined projects...we do want to work with you to showcase this amazing part of the world...and to give our guests a world class experience on this amazing lake we call Table Rock.

We hope these projects can be done under the umbrella of the resort lease, but do stand ready to pursue the concessionaire lease should we all agree that this is an important next step.

We will be ready in 60 days to give you drawings that are more detailed and further information for our master plans. We look forward to your comments and suggestions.

The next few pages of this letter are divided into two sections. SECTION I is our most immediate priority list of projects and those that would fall into the short-range category.

SECTION II is our conceptual plan for the future.

We will be designing the specific elements for these projects soon. In regards to the long-range efforts, we would like to get some feedback from your team.

SECTION I

Big Cedar Lodge

Retail Sales at the Marina

Our number one request for your consideration is to create the opportunity under our current lease contract to sell to the general public at Bent Hook Marina.

Our biggest public relations problem is refusing to sell gasoline, oil, groceries, outdoor gear or other amenities to the general public who are visiting Bass Pro Shops Big Cedar Lodge and affiliated facilities. The current policy is very confusing to our guests and to the general public. The inability to serve the general public is a serious matter for us. This issue is where the majority of our complaints come from and can be an issue on any given day.

Big Cedar Lodge Resort has become a destination for people all over the lake. We host many events at the resort, which draw a destination crowd. Destination type events include our Independence Day Fire Works extravaganza, many festivals and other events, and the daily visits to our restaurants.

We feel the lake travel patterns have radically changed since the origin of our original lease. Significantly more boat traffic is coming into Big Cedar Cove.

The Big Cedar Resort is a destination location. We feel that this destination status is not competing with other marinas in the area, as it brings them potential customers not only for amenities, but for lodging as well.

We would also like to stress that our location offers the general public another benefit not available from all nearby marina's, which is the year round service that we provide on the water. Guest and the general public can count on our facility to be open.

Big Cedar Lodge Cruise Boats

We would like to expand our cruise boat fleet from one to three boats. We envision these tour boats to have food and beverage offerings and be of a very unique and historic design. The new cruise boats would show case for our passengers the wildlife and water features of Table Rock Lake and the rich heritage of the area. We would plan a cruise to the new US Army Corp of Engineers Dewey Short Visitor's Center. This cruise would include a program related to the history and impact of reservoirs and a fish and wildlife component with the Missouri Department of Conservation.

We would offer a variety of cruise packages that would vary by the season and by program offerings. We would also look at a longer cruise to Dogwood Canyon that would return passengers to Big Cedar by Van. We do need to clarify if we need additional permits for the two additional cruise boats.

Swim Beach

Our Guests have been requesting a swim beach for many years. We would like to pursue this option in the near future. The Long-Range Planning Team has identified the space between the launch ramps as the ideal location. To create a very unique opportunity for our Big Cedar guests we would like to locate a mobile AirStream Camper next to the swim beach to serve refreshments.

Big Cedar Wilderness Club

Attached with this letter is our site-map of our long-range amenity plan for the wilderness club guests. The plan is to create a very special outdoor recreational playground for our guests that will connect them to the shoreline and to the water and will set the stage for some nature/conservation messages at the outdoor amphitheater. The plan locates the outdoor recreational facilities, which are designated to be:

- 1) An educational kiosk focusing on Water Quality, The Table Rock Lake Fish Habitat initiative, The More Fish Campaign, The history of Table Rock Lake and Conservation messages from groups like the James River Basin Partnership. (N)
- 2) Outdoor Fire Pit and Amphitheater (I)
- 3) Swim Deck and lifeguard tower (L)
- 4) Restrooms (H)
- 5) Swimming Area (M)
- 6) Beach Volleyball (O)
- 7) Sand Beach (k)
- 8) Additional Docks for kayak, canoes and paddleboats (K)

A Boat Dock and Launch Ramp at Outdoor Academy Property

A boat dock and launch ramp area to access The Outdoor Academy Sporting activities from the water. As well as for guests staying on the property “to get to the water” to engage in activities like Waterfowl hunting. (The details to The Outdoor Academy Area are spelled out in Section II).

SECTION II (Long-Range Conceptual plans)

Recreational Vehicle and Wilderness Camping Area

The goal for this facility is to be a “state of the art” green environmental friendly model for a Green Recreational Vehicle Park and Wilderness Camping Area. The campground design would focus on green and sustainable elements such as waste management, water conservation, RV pad design, and energy conservation.

We envision the conservation elements of this property to be a collaboration of Audubon International (Top of the Rock is an Audubon Signature golf course), The upper White River Basin Foundation, The James River Basin Partnership, The Missouri Department of Conservation, The Department of Natural Resources and Friends of Table Rock Lake.

The outdoor recreation facilities needed to accommodate the off road Camping and Recreational Vehicle guests would be as follows:

1) To establish a “state of the art” Green Boat Dock at the property. The green elements of the boat dock would include construction with recycled materials, the use of solar, posted “best practices” for boat owners for cleaning boats, energy conservation and the establishment of some unique fish habitat structures at the dock site.

We request a maximum slip boat dock permitted under the shoreline management plan for launching and storing the trailered boats while they are in residence and for dock fishing.

2) A swim beach area and adjacent shoreline outdoor recreation area that would accommodate volleyball, horseshoes and other outdoor recreational games.

3) Nature Trails along the shore and in the interior of the property to showcase the ecology of the shore, the glade and the Oak-Hickory climax forest and the plants and wildlife that live in each system. We would like to work at creating a very extensive Fish Habitat area at this property. As well as working with you on a vegetative management plan, that would allow us to take shoreline trees that have died and other trees to create fish habitat.

We would also want to cut the grasses and low growing plants and brush that have grown in this area as we would like this to return to an open recreation area which is designated in our vegetation management plan that we want to review with you.

Dogwood Canyon Nature Park

Courtesy Docks at Cow Creek

The docks at Cow Creek would be used to load and unload passengers on the Big Cedar Lodge/Wilderness Club Wildlife and Water Tour Cruise Boat for a Dogwood Canyon Adventure Experience plus docking space for recreational boaters to experience Dogwood Canyon Nature Park by water. The courtesy dock we need to accommodate a wide variety of boat sizes. The Wildlife and Water Tour cruise boat would focus on showcasing the Wildlife, Water, History, Conservation and the Lore of the Ozarks and Table Rock Lake and would radiate from Big Cedar Cove. The boat is described in more detail later in this document.

Boat Dock at Cow Creek

We are requesting a **Boat Dock** with the maximum number of slips allowed under the Shoreline Management Plan adjacent to the courtesy docks. The *Boat Dock* would give the opportunity to Dogwood Canyon guests to not only enjoy an outdoor recreational experience at the Canyon and Dogwood Creek, but to also, enjoy water-based recreation at the lake. The *Boat Dock* would also be used as a launch for Kayak and Canoe wildlife and recreation excursions.

Paradise Point

Paradise Point is a newly acquired property that will be included in our long-range conceptual plan. We are requesting a review of the current lease to understand the access and recreational allowances for this property. We also wish to discuss, recreational user needs in this area and the property designations in your shoreline map of this area. We would request a ranger visit to understand the full recreational use of this property.

Thunderhead

Boaters and Anglers that have entered Big Cedar Cove, for years have requested a casual place to eat in a relaxing setting with a full view of the lake. We would like to honor their wishes by proposing a very uniquely designed rustic wilderness/Ozark Mountain designed *floating casual restaurant* with snack shack/ burgers/ hot dog and taco bar for Big Cedar Lodge guests and the general public. This would be a great place to tell the story of fresh water reservoirs, the lore of Devils Pools and interesting facts about the history of the Big Cedar Lodge Property. ...including the first conservationists on site...the Osage Indians.

We would also propose at this location a *Thunderhead Dock expansion* to incorporate more Rental Boats and courtesy positions for guests and Table Rock lake Fishing Guides.

We also want to enhance the fishing and recreational offerings at this property by adding a fish cleaning station, creating picnic areas and open shelters (None with plumbing or electricity) and open lawn recreational space for fire pits, volleyball and outdoor games.

As this property is a significant visual point at the mouth of Big Cedar Cove, we would like to establish a vegetation plan for the shore to include native flora and fauna that have an Ozark beauty to them. We would look at Dogwoods, redbuds and wildflowers in open spaces, but also look for plants at the shoreline that would enhance fish habitat and would survive water fluctuation.

We think this area would also be a great location for an outdoor interpretive trail that would connect to Devils Pool Bridge. This would be a great place to tell the story of fresh water reservoirs and the lore of Devils Pool.

The Outdoor Academy Area

There will be different outdoor sporting elements in The Outdoor Academy Area including the *Bass Pro Shops/Red Head World Class shooting Arms Sporting Center, and Lodge*. This firearms facility will offer hands on shooting activities and promote the sport of shooting. The facility will offer shooting opportunities, host shooting clubs, and provide a venue for

promoting shooting sports and shooting safety. Shooting sports activities would include outdoor trap, skeet, sporting clays, archery and a general firing range. Field trails would also be held for bird hunting, dog training and upland game shooting and would include field activities of sporting clays, skeet and trap and archery.

The Outdoor Academy Area will inspire an outdoor, conservation and shooting sports ethic to the visiting guests. These conservation practices would be a high priority and would include the use of biodegradable clay targets and shot shells utilizing non-toxic materials, including steel, bismuth, and tungsten.

Facilities to enhance the Sporting Arms Center would be as follows:

- 1) An interpretive trail designed to showcase the plants and wildlife of the area and strong conservation messages from outdoor legends like Teddy Roosevelt and John James Audubon.
- 2) An ATV trail with an educational message of safety and stewardship of the terrain.
- 3) A boat dock and launch ramp area to access the Outdoor Academy from the water and for lodge guests to get on the water to engage in outdoor activities like waterfowl hunting.
- 4) Fire pit and storytelling areas using the natural grade of this property.
- 5) Very significant wild flower gardens.

Jim, the above project list is our Conceptual Plan for the Bass Pro Shops/Big Cedar lodge properties. I do want to relate a couple of items in closing.

Table Rock lake is a public facility and we believe that Big Cedar Lodge and Bass Pro Shops with our investment in Better Fishing, Clean Water and Green initiatives match the outdoor recreational interests of the US Army Corp of Engineers. We want to work closely with you to make sure we have as a core value in all of the properties a conservation component and opportunities for our guests to learn conservation principles and to be good stewards of our lakes, streams, watersheds and forests. We will also be

teaching them the great opportunities of the outdoors to participate in boating, fishing, hunting and watchable wildlife. We will want to radiate some of the messages in our properties that you will be focused on in your new visitor's center. We also want to make sure these projects are grounded in sustainability as we build the structures...and of course, we want to get them to experience the majestic beauty of the Ozark Mountains.

Thanks for the Great Leadership that your team provides to Table Rock Lake. We look forward to working with you on this plan.

US Army Corp of Engineers – Little Rock District

ATTN: Dana Coburn

Knowing that tourist visitation to Table Rock has so greatly exceeded the current Master Plan, we have these comments for your consideration as you develop a revision.

As homeowners for the past 20 years we have certainly lived, first hand, the increased tourism and the problems that have come with it. Granted, for some entities, the tourism is a profitable situation. Our concern is for #1: the quality of the lake (water), #2: the surrounding wildlife areas, and #3: the safety of

all who live close to the lake, as well as those who visit.

The beauty and serenity of Table Rock Lake is what drew us to the area so many years ago. Since then, several of our family members have also purchased homesites along the lake. We all realize that it is a privilege to own property and boat docks on the lake. We also have suffered much distress because of the increased boating traffic on the lake. Those of us who pay real estate and personal property taxes to Taney County would hope Table Rock Lake be preserved for the next 20 years and more.

Water quality is a major concern. Increased boating traffic diminishes water quality. Tourists show little respect for boating rules and regulations. The availability of "rental boats" adds to the problem. To preserve the quality of the lake water we would suggest several EPA "testings" be performed each year at multiple areas of the lake. This would determine bacterial levels of which the public should be made aware. Water quality is also affected by the increased development along the lake. Hard surface run-off from parking lots, driveways, etc., will eventually make its way to the lake, thus adding pollutants to the lake water. There is also concern regarding proper waste water treatment from septic systems and/or sewage treatment systems. Limiting over-development and additional boat docks would be ways to help preserve the water quality. If adverse testing results are found, steps could be taken to correct the problem.

Good water quality is a must to maintain the ecological balance for fish and other water fowl, as well as securing the future of Table Rock Lake.

Wildlife areas are also important. With so much increased boat traffic on the lake, we fear that habitats are being infringed upon. The noise levels of boat motors, jet skis, and the like, are of course a distress to the homeowners along the lake... but we feel that the wildlife are also affected by the noise. The natural habitat and the many species found in the area have made Table Rock Lake the desired attraction that it is today.

Safety on and around the lake is also of concern to us. Over the past several years, we have felt it necessary to phone Water Patrol because we witness many

violations on the lake. Either most boaters (and many are rental boaters) are ignorant of the safety rules of the lake or they simply choose to ignore them. We are aware that Water Patrol has limited resources to adequately monitor the lake. We would ask that all businesses who rent boats advise their clients about the rules and regulations of responsible boating. We would like to have greater flexibility in adding additional 'no wake' buoys and the placement of such, relative to either the shoreline or floating docks. Wakeboarding has become a

popular water sport. The 'wake' that the boat throws damages the shoreline and also has caused damage to boat docks. We spend a good deal of money every year, repairing the docks because of the waves created by many boaters. There is a need for a greater number of 'no wake' buoys in cove areas where either the cove is narrow or has several boat docks within. There is also a need to have permission for a 'no wake' buoy to be placed farther out into the water. Since most

boaters drive right up to the buoys, and many times skiers will even go inside the buoys, the current distance provided for placement of the buoy does little to protect the shoreline or the boat dock.

These concerns and comments are shared by six families who own separate parcels of property along the lake. We appreciate your invitation to share our concerns with you.

Thank you,

Coburn, Dana O SWL

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? COAST LINE AS IS IT,
FULL POOL, PEACEFUL & RELAXING.

ALL COVES WITH A "NO WAKE" RULE. JUNE THROUGH AUGUST
ALL DOCKS & DOCKED BOATS TAKE A BEATING FROM THE
WAVES & INCONSIDERATE BOATERS, SKIERS & JET SKIERS.

What about Table Rock Lake is most important to you? FISHING, OPEN WATERS,
PEACEFUL, CLEAN WATERS, FAMILY RECREATION

What is one thing that could be done to improve the lake? MORE WATER PATROL TO
CONTROL JET SKIERS & DANGEROUS BOATERS. IT SHOULD BE
A REQUIREMENT THAT JET SKIERS ADHERE TO BOATING RULES.
THERE ARE TOO MANY WHO JOY RIDE AT THE RISK OF OTHERS.

Additional comments on the Master Plan Revision or about issues that should be studied: A
SIMPLE "A, B, C" BOOK OF CORP RULES. THIS IS A 2ND HOME FOR
US & IT'S COMPLICATED WHEN TRYING TO GET ANYTHING ACCOMPLISHED
WITH THE CORP. IT SHOULDN'T TAKE MULTIPLE TRIPS TO THE
CORP TO COMPLETE A TASK.

THERE SEEM TO BE YOUNG CHILDREN ON JET SKIS AND NO
TRAINING OR WATER ETIQUETTE REQUIRED. WE'VE HAD MANY
CLOSE CALLS WITH DARE DEVIL JET SKIERS. YOUNG AND OTHER
THERE SHOULD BE STANDARDS THEY'RE REQUIRED TO FOLLOW.

Subject: Table Rock Lake Master Plan

1. How would I like to see Table Rock Lake in 20 years?

I would like to see the lake continue much in the same manner it has in the past 50 years. I would like managed growth, positive managed development and a continued focus on flood control, power generation and maybe more consideration for recreation. I believe community docks and remote service docks along with marinas are serving the public very well. Private docks don't need to be expanded so as to protect our beautiful shoreline. I think that was a great decision to convert to the community 20 stall dock program and to limit the size of those docks to slips under 30 feet.

Since the boom of the 1990's and the slowing of the economy I don't believe there will be a need for more marinas. Marinas are well spaced and seem to be holding there own. Continue to allow managed growth in concessionaire leased areas and if the public need increases perhaps allow expansion of lease areas to meet those needs. Additionally, allow for new community docks in zoned areas. Additional zoning for docks needs to be well planned but certainly in this economic climate we need to help maintain recreational opportunities or we will cripple the economy here.

2. What about Table Rock Lake is most important to you?

Obviously clean water since Table Rock Lake is the lifeblood of the Tri-Lakes region as it relates to recreation and tourism. However, you must balance the economic factors as well as the environmental ones so we have a balance of each. Without tourism you will not have the resources to protect the lake. This is a situation where you scratch my back, I scratch your back. Honestly the money that has come into this region for environmental concerns has only been made possible because of the high importance of recreation in this region. If it weren't important it wouldn't get any attention or any money. That is a fact and if you discount the value of recreation then certainly we wouldn't need an updated Master Plan. If you stifle managed growth everyone suffers which is why I am adamantly opposed to the way this moratorium has been handled.

Three weeks of public notices before closing down the lake entirely on December 1st was ludicrous. You created a fire storm that didn't have to happen and now because the public doesn't know any better they are trying to push issues which have more to do with shoreline management than the master plan.

I also feel that economically you couldn't have picked a worse time to shut down the lake. The government is borrowing 46 cents for every dollar they are spending but yet you want the funds to complete a master plan and who knows when that funding will be available or how long the lake will be shut down as a result. The demand for more slips has declined in the last several years and yet everything needs to be shut down in order for GPS to be used to map the lake and mark the uses?

3. What is one thing that could be done to improve the lake?

The lake is beautiful, this region is a great place to visit, an even better place to live and we love serving the people who come here to reconnect with their families and leave their hectic lives behind. I love the lake just the way it is but to stop growth is to become stagnant.

The one thing that can be done to improve the lake....the Corps needs to step into the real world and work with their concessionaire partners and look to the future with leaders from the regions and decide together what is good for the lake in the future. Your concessionaires have huge investments in their leased areas. We are not in favor of anything that is bad for the lake. We don't expand on the hope that they will come we build on a demand basis. To make a request very far into the future is nearly impossible. Our crystal ball isn't any better than yours. We might make a request knowing that the need may be 2 or more years in the future not necessarily now. The process is so lengthy we have to put it out there sooner rather than later in hopes to ever get it approved. Instead of acting like you are working against us work with us. Our goals are the same but at least with us you gain the common sense of what it is like to operate and live within your means. We do it every day!!!! Stop spending money that the government doesn't have to spend!

Additional comments;

The Corps has closed so many recreational areas on Table Rock Lake and other lakes as well, I can't imagine that any more need to be constructed. The Corps has spent millions on the recreational areas on Table Rock to now hand them over to the Ozarks Heritage Foundation. I think this was a wise decision because the corps always spent more then was ever taken in at every park they ever had here. It would be foolish for the government or the Corps to spend more millions constructing more recreation facilities to just hand them off someday. Your fee structures are obsolete, you are forced to pay prevailing wage even in an area where the work can be done more reasonably. Over \$800 a sq ft is outrageous for a bathroom or shower house. The Corps should not be competing against small businesses anymore than the State should.

Take care of the assets you have the investments you have already made on the shores and in the water of Table Rock Lake. If more parks are ever needed in the future let private enterprise or the foundation put them in. You need to be better stewards of tax payer money.

Sincerely

Coburn, Dana O SWL

Subject: Master Plan

Master Plan Table Rock
What one improvement should be done?

Better management of water storage

This translates into keeping the lake level within certain parameters using criteria relating to watershed precipitation.

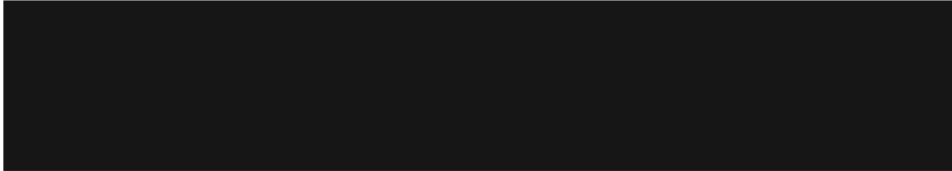

A formula would be established whereby water discharge/usage (for power or drinking water) would be based not only on storage levels but long-range forecasts. It is irresponsible for a U.S. Government entity to totally ignore heavy rain or drought forecasts issued by another Government agency. Somehow limit the change of lake level by no more than ten feet during any 12 month period. This would be a goal for the Corps to adopt, thinking outside the box. Obviously one can not predict rainfall and there are several scenarios when the lake would be down 20 feet, you would want to allow a 20 foot increase. But in the reverse, when the lake is ten feet down, take steps to keep it falling by no more than an additional ten feet during the next 12 months. If your response is: Congress will have to change our mission. Then so be it. Lake users should be your customers and ask us annually what kind of a job you are doing. And yes other entities who "own certain amounts of lake water" should also weigh in on what action to take.

What could be done to improve the lake? Base water usage/discharge management, keeping the level more consistent without wild swings in elevation.

While water quality is an issue, it is outside the jurisdiction of the Corps in most cases.

Subject: Table Rock Lake Master Plan Revision
Attachments: corp Q 12-10-12 docx

How would you like to see Table Rock in 20 years?

For sure water quality is important.

Fishing and wild life

I would like to see the lake used by tourist and the residents. Fishing, Recreation and sightseeing. The area attractions and businesses are here because the lake is here and needs to continue to grow with the area.

What about Table rock Lake is most important to you?

Growth must continue for the area to stay complete with other lakes and recreation areas. The US Corps of Engineers need to continue to restrict and monitor the dock and vegetation. Fire department access for drafting and fire suppression

What is one thing that could be done to improve the lake?

I'm not sure if it is on the federal level, but one thing that Stone County has, when a house sells the septic must pass a flow test, so as long as it is really checked properly. Should help to keep water quality in the right direction, all towns and cities up stream need to be tracked as well!

Additional comments on the Master Plan Revision or about issues that should be studied:

The country is struggling! The goal should be to help the tourist and lakes area economy not put it in a tail spin.

We may have a plan in 12 months does not help our economy as the fed's state they are going to start printing billions of money to stimulate. Please work with us.

I think government agency are doing great at protecting their jobs and programs.

Subject: Master Plan Revision Email Address

My wife and I are raising our family "on the lake" in the Shell Knob area and have lived here for eleven years. We both work away from the lake area and do not have a vested interest in any commercial activities related to Table Rock.

We would like to see a slight increase in the utilization of high density recreational areas as some of these parks have been idled in the recent past. The camping areas and parks are in beautiful settings, but road access to many of these in our area were probably not known to potential tourists. Some of the under-utilized areas could be opened up to restricted commercial development.

We feel that it is important to continue allowing most of the lake to be designated for multiple resource management and keeping environmental sensitive areas to a minimum. It is a man made lake after all, so the ecosystem has already been significantly altered. Vegetative management should be allowed to continue with reasonable restrictions. Almost everyone loves the natural look of our shoreline and it should be kept that way.

We do feel that private dock access has been a little too restrictive at times. The private owners that border government property in our area are mostly elderly and/or handicapped and the terrain is challenging in many areas, so we would like to see more allowances for easy dock access (pathways, stairs, walkways, motorized access, etc...). We think that it would be reasonable to have a slip size restriction on new private floating facilities (30' ?). Larger boats can be kept at marinas. The required minimum distance between private docks should be kept as is or increased for new facilities. The current level of shoreline zoning for private docks is adequate in our area of the lake.

Restrictions to water surface usage should be kept to a minimum with almost all areas designated open recreation. The shoreline is obviously rocky (and not "natural" to begin with) and I have seen little evidence of damage from boat wakes. In my opinion, far more shoreline damage (mainly vegetative) is caused by lake level changes than other factors.

Thank you for your consideration,

December 13, 2012

Ms. Dana Coburn
Chief, Environmental Branch
Planning and Environment
USACE Little Rock District
PO Box 867
Little Rock, Arkansas 72203

Dear Ms. Coburn,

Thank you for your leadership in regards to the Table Rock Lake Master Planning process and for the opportunity to provide feedback related to the mission of the Master Plan.

I wanted to relate to you that from the perspective of Bass Pro Shops, Tracker Marine and Big Cedar Lodge, we feel strongly that with changes in the use patterns, population density, and development around the lake that the current land classification categories need to be reevaluated and subsequently reclassified.

The Bass Pro Shop's Table Rock Lake properties of Big Cedar Lodge, Top of the Rock, Dogwood Canyon and the new Outdoor Academy are all designated as low density yet Big Cedar Lodge and Dogwood Canyon host thousands of guests from around the world each year. The reopening of the greatly expanded Top of the Rock complex, which will house restaurants, a world class natural history museum, golf courses, a destination cave and a unique public garden, will draw thousands of new tourists and visitors as will the new Outdoor Academy which is under construction. The Outdoor Academy has a mission to expose guests from all walks of life to the great outdoors, teach them outdoor skills and connect them to the land much like Aldo Leopold did decades ago. Major work will also be done at Dogwood Canyon that will continue to draw additional visitors to Table Rock Lake.

The current facilities, and the ones under construction, will create a world class nature/outdoor based tourist destination second to none in the United States and will have a significant economic impact on the Ozark Mountains and Table Rock Lake. This complex of facilities, which are geographically close to one another, will be a location where we can carry out a variety of outdoor recreational opportunities which align with the vision of the Corps of Engineers National Recreational Plan. These facilities will be locations to carry out the programs we develop under the joint partnership memorandum between Bass Pro Shops and the US Army Corps of Engineers.

We would like to respectfully request that in the new Master Plan, the public properties that we own be designated as high density recreation use. As you can see from the land classifications that we have provided for you on the above properties, they are all mostly low density recreation use. Specifically, these properties are Big Cedar Lodge, Bass Pro Shops Outdoor Academy, Bass Pro Shops Long Creek Marina, Wilderness Camping Area, Thunderhead Point, Paradise Point and The Cliffs at Long Creek.

We are working with the Corp of Engineers on our own master plan. Enclosed is a copy that was officially submitted a few months ago. The plan has undergone slight changes. We would love the opportunity to make a special presentation on our master plan to your Project Delivery team. The true impact of our current development on Table Rock Lake will be the great synergy of all of these facilities and the recreational impact it will bring to Table Rock Lake.

In a review of the land classification categories, we are fairly certain that high density recreation would be the land classification category that best fits the breadth and scope of these facilities/properties. We are somewhat puzzled that private boat docks are not allowed to be a part of this classification. However, we could be misinterpreting the land classification wording. We eagerly look forward to working with you on reclassification. Perhaps the

wording in the classifications can be reexamined and changes and/or additions to land classifications can be made.

Dana, best wishes as your team works through the master planning process. Please let us know if we can help you with facilities as you get to focus group stages and other community meetings.

Thank you for the opportunity to respond on the master plan.

Sincerely,

May 4, 2010

US Army Corp of Engineers
Table Rock Lake
4600 State Highway 165
Branson, MO 65616

As you are aware, we are in the process of developing a long-range conceptual plan for Big Cedar Lodge, Big Cedar Wilderness Club and some adjacent Table Rock Lake properties that will improve the recreational opportunities and services for our guests and destination visitors.

This letter outlines the basic components of the plan with a short explanation of each project that we would like to implement. This conceptual plan is an accumulation of research, staff "brainstorm time", but most of all it is the voice of our guests as they give us feedback from customer cards, telephone feedback and personal visits with us.

Please also know that we want to work cooperatively with you on these projects. As you look at this master list of projects, you might find some of this would be a great partnership together. Whether we partner with any of these outlined projects...we do want to work with you to showcase this amazing part of the world...and to give our guests a world class experience on this amazing lake we call Table Rock.

We hope these projects can be done under the umbrella of the resort lease, but do stand ready to pursue the concessionaire lease should we all agree that this is an important next step.

We will be ready in 60 days to give you drawings that are more detailed and further information for our master plans. We look forward to your comments and suggestions.

The next few pages of this letter are divided into two sections. SECTION I is our most immediate priority list of projects and those that would fall into the short-range category.

SECTION II is our conceptual plan for the future. We will be designing the specific elements for these projects soon. In regards to the long-range efforts, we would like to get some feedback from your team.

SECTION I

Big Cedar Lodge

Retail Sales at the Marina

Our number one request for your consideration is to create the opportunity under our current lease contract to sell to the general public at Bent Hook Marina.

Our biggest public relations problem is refusing to sell gasoline, oil, groceries, outdoor gear or other amenities to the general public who are visiting Bass Pro Shops Big Cedar Lodge and affiliated facilities. The current policy is very confusing to our guests and to the general public. The inability to serve the general public is a serious matter for us. This issue is where the majority of our complaints come from and can be an issue on any given day.

Big Cedar Lodge Resort has become a destination for people all over the lake. We host many events at the resort, which draw a destination crowd. Destination type events include our Independence Day Fire Works extravaganza, many festivals and other events, and the daily visits to our restaurants.

We feel the lake travel patterns have radically changed since the origin of our original lease. Significantly more boat traffic is coming into Big Cedar Cove.

The Big Cedar Resort is a destination location. We feel that this destination status is not competing with other marinas in the area, as it brings them potential customers not only for amenities, but for lodging as well.

We would also like to stress that our location offers the general public another benefit not available from all nearby marina's, which is the year round service that we provide on the water. Guest and the general public can count on our facility to be open.

Big Cedar Lodge Cruise Boats

We would like to expand our cruise boat fleet from one to three boats. We envision these tour boats to have food and beverage offerings and be of a very unique and historic design. The new cruise boats would show case for our passengers the wildlife and water features of Table Rock Lake and the rich heritage of the area. We would plan a cruise to the new US Army Corp of Engineers Dewey Short Visitor's Center. This cruise would include a program related to the history and impact of reservoirs and a fish and wildlife component with the Missouri Department of Conservation.

We would offer a variety of cruise packages that would vary by the season and by program offerings. We would also look at a longer cruise to Dogwood Canyon that would return passengers to Big Cedar by Van. We do need to clarify if we need additional permits for the two additional cruise boats.

Swim Beach

Our Guests have been requesting a swim beach for many years. We would like to pursue this option in the near future. The Long-Range Planning Team has identified the space between the launch ramps as the ideal location. To create a very unique opportunity for our Big Cedar guests we would like to locate a mobile AirStream Camper next to the swim beach to serve refreshments.

Big Cedar Wilderness Club

Attached with this letter is our site-map of our long-range amenity plan for the wilderness club guests. The plan is to create a very special outdoor recreational playground for our guests that will connect them to the shoreline and to the water and will set the stage for some nature/conservation messages at the outdoor amphitheater. The plan locates the outdoor recreational facilities, which are designated to be:

- 1) An educational kiosk focusing on Water Quality, The Table Rock Lake Fish Habitat initiative, The More Fish Campaign, The history of Table Rock Lake and Conservation messages from groups like the James River Basin Partnership. (N)
- 2) Outdoor Fire Pit and Amphitheater (I)
- 3) Swim Deck and lifeguard tower (L)
- 4) Restrooms (H)
- 5) Swimming Area (M)
- 6) Beach Volleyball (O)
- 7) Sand Beach (k)
- 8) Additional Docks for kayak, canoes and paddleboats (K)

A Boat Dock and Launch Ramp at Outdoor Academy Property

A boat dock and launch ramp area to access The Outdoor Academy Sporting activities from the water. As well as for guests staying on the property “to get to the water” to engage in activities like Waterfowl hunting. (The details to The Outdoor Academy Area are spelled out in Section II).

SECTION II

(Long-Range Conceptual plans)

Recreational Vehicle and Wilderness Camping Area

The goal for this facility is to be a “state of the art” green environmental friendly model for a Green Recreational Vehicle Park and Wilderness Camping Area. The campground design would focus on green and sustainable elements such as waste management, water conservation, RV pad design, and energy conservation.

We envision the conservation elements of this property to be a collaboration of Audubon International (Top of the Rock is an Audubon Signature golf course), The upper White River Basin Foundation, The James River Basin Partnership, The Missouri Department of Conservation, The Department of Natural Resources and Friends of Table Rock Lake.

The outdoor recreation facilities needed to accommodate the off road Camping and Recreational Vehicle guests would be as follows:

1) To establish a “state of the art” Green Boat Dock at the property. The green elements of the boat dock would include construction with recycled materials, the use of solar, posted “best practices” for boat owners for cleaning boats, energy conservation and the establishment of some unique fish habitat structures at the dock site.

We request a maximum slip boat dock permitted under the shoreline management plan for launching and storing the trailered boats while they are in residence and for dock fishing.

2) A swim beach area and adjacent shoreline outdoor recreation area that would accommodate volleyball, horseshoes and other outdoor recreational games.

3) Nature Trails along the shore and in the interior of the property to showcase the ecology of the shore, the glade and the Oak-Hickory climax forest and the plants and wildlife that live in each system. We would like to work at creating a very extensive Fish Habitat area at this property. As well as working with you on a vegetative management plan, that would allow us to take shoreline trees that have died and other trees to create fish habitat.

We would also want to cut the grasses and low growing plants and brush that have grown in this area as we would like this to return to an open recreation area which is designated in our vegetation management plan that we want to review with you.

Dogwood Canyon Nature Park

Courtesy Docks at Cow Creek

The docks at Cow Creek would be used to load and unload passengers on the Big Cedar Lodge/Wilderness Club Wildlife and Water Tour Cruise Boat for a Dogwood Canyon Adventure Experience plus docking space for recreational boaters to experience Dogwood Canyon Nature Park by water. The courtesy dock we need to accommodate a wide variety of boat sizes. The Wildlife and Water Tour cruise boat would focus on showcasing the Wildlife, Water, History, Conservation and the Lore of the Ozarks and Table Rock Lake and would radiate from Big Cedar Cove. The boat is described in more detail later in this document.

Boat Dock at Cow Creek

We are requesting a **Boat Dock** with the maximum number of slips allowed under the Shoreline Management Plan adjacent to the courtesy docks. The *Boat Dock* would give the opportunity to Dogwood Canyon guests to not only enjoy an outdoor recreational experience at the Canyon and Dogwood Creek, but to also, enjoy water-based recreation at the lake. The *Boat Dock* would also be used as a launch for Kayak and Canoe wildlife and recreation excursions.

Paradise Point

Paradise Point is a newly acquired property that will be included in our long-range conceptual plan. We are requesting a review of the current lease to understand the access and recreational allowances for this property. We also wish to discuss, recreational user needs in this area and the property designations in your shoreline map of this area. We would request a ranger visit to understand the full recreational use of this property.

Thunderhead

Boaters and Anglers that have entered Big Cedar Cove, for years have requested a casual place to eat in a relaxing setting with a full view of the lake. We would like to honor their wishes by proposing a very uniquely designed rustic wilderness/Ozark Mountain designed *floating casual restaurant* with snack shack/ burgers/ hot dog and taco bar for Big Cedar Lodge guests and the general public. This would be a great place to tell the story of fresh water reservoirs, the lore of Devils Pools and interesting facts about the history of the Big Cedar Lodge Property. ...including the first conservationists on site...the Osage Indians.

We would also propose at this location a *Thunderhead Dock expansion* to incorporate more Rental Boats and courtesy positions for guests and Table Rock lake Fishing Guides.

We also want to enhance the fishing and recreational offerings at this property by adding a fish cleaning station, creating picnic areas and open shelters (None with plumbing or electricity) and open lawn recreational space for fire pits, volleyball and outdoor games.

As this property is a significant visual point at the mouth of Big Cedar Cove, we would like to establish a vegetation plan for the shore to include native flora and fauna that have an Ozark beauty to them. We would look at Dogwoods, redbuds and wildflowers in open spaces, but also look for plants at the shoreline that would enhance fish habitat and would survive water fluctuation.

We think this area would also be a great location for an outdoor interpretive trail that would connect to Devils Pool Bridge. This would be a great place to tell the story of fresh water reservoirs and the lore of Devils Pool.

The Outdoor Academy Area

There will be different outdoor sporting elements in The Outdoor Academy Area including the *Bass Pro Shops/Red Head World Class shooting Arms Sporting Center, and Lodge*. This firearms facility will offer hands on shooting activities and promote the sport of shooting. The facility will offer shooting opportunities, host shooting clubs, and provide a venue for

promoting shooting sports and shooting safety. Shooting sports activities would include outdoor trap, skeet, sporting clays, archery and a general firing range. Field trails would also be held for bird hunting, dog training and upland game shooting and would include field activities of sporting clays, skeet and trap and archery.

The Outdoor Academy Area will inspire an outdoor, conservation and shooting sports ethic to the visiting guests. These conservation practices would be a high priority and would include the use of biodegradable clay targets and shot shells utilizing non-toxic materials, including steel, bismuth, and tungsten.

Facilities to enhance the Sporting Arms Center would be as follows:

- 1) An interpretive trail designed to showcase the plants and wildlife of the area and strong conservation messages from outdoor legends like Teddy Roosevelt and John James Audubon.
- 2) An ATV trail with an educational message of safety and stewardship of the terrain.
- 3) A boat dock and launch ramp area to access the Outdoor Academy from the water and for lodge guests to get on the water to engage in outdoor activities like waterfowl hunting.
- 4) Fire pit and storytelling areas using the natural grade of this property.
- 5) Very significant wild flower gardens.

Jim, the above project list is our Conceptual Plan for the Bass Pro Shops/Big Cedar lodge properties. I do want to relate a couple of items in closing.

Table Rock lake is a public facility and we believe that Big Cedar Lodge and Bass Pro Shops with our investment in Better Fishing, Clean Water and Green initiatives match the outdoor recreational interests of the US Army Corp of Engineers. We want to work closely with you to make sure we have as a core value in all of the properties a conservation component and opportunities for our guests to learn conservation principles and to be good stewards of our lakes, streams, watersheds and forests. We will also be

teaching them the great opportunities of the outdoors to participate in boating, fishing, hunting and watchable wildlife. We will want to radiate some of the messages in our properties that you will be focused on in your new visitor's center. We also want to make sure these projects are grounded in sustainability as we build the structures...and of course, we want to get them to experience the majestic beauty of the Ozark Mountains.

Thanks for the Great Leadership that your team provides to Table Rock Lake. We look forward to working with you on this plan.

US Army Corp of Engineers – Little Rock District

Subject: Table Rock Lake Master Plan Comments
Attachments: Corps Master Plan Comments.doc

attached is the comment card from Schooner Bay Landing Condominium Association in Kimberling City.

[REDACTED]

How would you like to see Table Rock Lake in 20 years?

Water quality would be better than it is today due to improved sewage treatment in Springfield and communities and private residents along the lakeshore. Point source soil erosion is controlled at unpaved roads leading to resorts, parking areas and boat launches along the lakeshore by requiring gravel, outlet ditching, rolling dips and riprap within the corp take area. Partnerships with communities such as Kimberling City, create Pedestrian/bicycle friendly development along lakeshore.

What about Table Rock Lake is most important to you?

Clean, clear water.

What is one thing that could be done to improve the lake? Reduce point source soil erosion pollution by requiring unpaved roads/parking lots/boat launches next to the lake to be graveled, outlet ditching, rolling dips and riprap

Additional comments or issues to be studied:

Resort/commercial permittees and residential permittees have different rules for lake shore vegetation management. We would like for the rules to be the same for vegetation management, regardless of the type of permit.

There are some docks that are obviously not used/abandoned. These should be dismantled and removed from the lake.

Little Rock AR 72203

How would you like to see Table Rock Lake in 20 years?

Still generating power.
Good fishing.
Boating.
Swimming ok.
Better access to restaurants on lake via boat (need boat dock parking).

What about Table Rock Lake is most important to you?

Recreation such as boating and fishing as well as the power generation.

What is one thing that could be done to improve the lake?

Manage poultry litter better. (mainly from Arkansas)

Additional comments on the Master Plan Revision or about issues that should be studied:

Reduce storm water run off with more "check dams" in streams feeding into the lake.
Fix additional failing septic tanks.
Eliminate Marina Buffer Zones.
Allow more 12-20 stall docks.
Charge more for the Corps five year inspection on dock renewal permit so that Corps is not losing money.
Do not allow for water from Table Rock Lake to be pumped to other Cities and States.
Table Rock Lake is a driving factor for the Economy in the Branson area. Many people move here because of the lake.

[REDACTED] helping us to comment.

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? Maintain the clean water, continue to allow recreational use and enjoyment, develop enterprise zones whereby businesses could lease shoreline for economic development (similar to Branson Belle), continue dock development and lake access with common sense approach in respect to maintaining the beauty of the lake.

What about Table Rock Lake is most important to you? Maintain the clean water while continuing to allow economic growth.

What is one thing that could be done to improve the lake? Improve septic systems around the lake to maintain our clean water.

Additional comments on the Master Plan Revision or about issues that should be studied:

Table Rock Lake is the crown jewel of the Ozarks and we certainly want to maintain it's pristine state for future generations to enjoy. Equally important we need to use a balancing act with the local economy and future development around the lake to be good economic partners with local business and governments who all depend on area revenue to survive. Also, the decision process to release water during a flood needs to be revised. A "common sense" approach to release water sooner would mitigate downstream destruction. The current shoreline management plan needs to continue until you have funds to "rewrite."

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the

How would you like to see Table Rock Lake in 20 years? Clean & pristine water where recreational use and enjoyment of lake sports are allowed for the benefit of the public as well as zones allowed whereby businesses could lease and individual home owners can continue to use shoreline for development + enjoyment of clients + property owners can have lake access and docks.

What about Table Rock Lake is most important to you? Maintaining clean water while continuing to allow economic growth.

What is one thing that could be done to improve the lake? Enforce septic tank regulations and also monitor & prohibit any kind of discharge into the lake from any detrimental source.

Additional comments on the Master Plan Revision or about issues that should be studied: Table Rock Lake is the "jewel" of the Ozarks and should be maintained in pristine for generations to enjoy. Equally important is to use a common sense approach w/ local people as well as promote future development around the lake. to be good economic partners w/ local business + government who all depend on area revenue to survive. Also, the release of water during a flood event should be reviewed & revised to better control flooding instead of releasing all at once or shutting down all at once. Also, Turkey Creek in Hollister needs to be dredged maybe to 1982-1993 levels as it has silted in due to water flowing from both ends. Permitting should not be shut down

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. December 14, 2012

Planning & Environmental Division, Environmental Branch
Department of the Army-Little Rock District Corps of Engineers
P. O. Box 867
Little Rock, Arkansas 72203-0867

Attention: Dana O. Coburn, Chief, Environmental Branch:

Dear Planning & Environmental Division:

In response to the Army Corps of Engineers recent announcement that they are considering a revision the Table Rock Lake Master Plan and seeking input, we have the following suggestions.

Turkey Creek, located in Hollister and specifically adjacent to Business Hwy 65 and St. James Street as it goes through Hollister needs to be dredged at least to where it used to be in 1992-93

This silting seems to be the result of water flowing from both directions carrying debris and then this debris settles and drops into Turkey Creek. People used to canoe Turkey Creek and that is not possible now. There are actual islands and not much creek. This silting has made flooding of our buildings and businesses so much more likely and therefore has contributed to making renting commercial building space very difficult due to our location along the bank of Turkey Creek. Not only would it help our business, but dredging would be beneficial to the numerous businesses and homes along Turkey Creek.

The other suggestion to the Plan is that when it is raining and raining and raining, that the water be constantly let through the Dam instead of holding until water is about to go over the Dam and then releasing. We feel that if the water had been released constantly and consistently the whole time it was raining, the major flooding along Lake Taneycomo, as well as on down through Arkansas and down to the Gulf may not have been as bad as it was.

Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

A clean lake for everyone to enjoy -
including dock development & lake access.

What about Table Rock Lake is most important to you?

Clean water & economic growth -

What is one thing that could be done to improve the lake?

Improve Septic Systems near the lake

Additional comments on the Master Plan Revision or about issues that should be studied:

We need to ensure that the lake is
maintained so that it can be enjoyed many
years to come. We need to also allow the
lake to benefit the local area financially -
as many local businesses depend on it
to survive.

Also flood water should be released sooner to
prevent downstream destruction.

Re: Table Rock Lake Master Plan Revision and Environmental Assessment.

I would like to offer some input regarding the Master Plan for Table Rock Lake and, eventually, the Shoreline Management Plan. My full-time home is a lakefront property in the Lampe/Baxter area. I enjoy the use of Table Rock Lake on a daily basis, and I very much care about the future of the lake, which I strongly believe is dependent upon the lake's water quality.

First, I'd like to offer some relevant points, which follow.

- In March of 2012, Jo-Ellen Darcy, Assistant Secretary of the Army for Civil Works, said the U.S. Army Corps of Engineers will be one of many partners developing a national water trail system as part of the America's Great Outdoor Initiative . She stated, "The Corps will actively participate, working with many local partners, to connect people to the water resources..... The National Water Trails System will recognize and promote local efforts at a national level."
- The number one concern of citizens about Table Rock Lake's future seems to be related to water quality.
- The lake's water quality is the result of activities, primarily human, in and surrounding the lake and the rivers within its watershed.
- Most all of the negative forces resulting from those activities can be mitigated given sufficient stewardship effort and investment by the visitors, residents, businesses and municipalities within the watershed.
- Since Table Rock Lake is not currently utilized as a source of public drinking water, the public's support for those efforts is largely dependent upon their perception of the lake as a quality recreational community resource.
- Table Rock Lake is primarily perceived to be dominated by motorboat users, along with some use by swimmers not related to motorboat activity.
- Paddling, including kayak, canoe, and paddleboard paddling, is one of the very fastest growing outdoor recreational activities in America, as is non-motorized watercraft related fishing.
- Table Rock Lake is not to any significant degree perceived to be paddler friendly. In fact, many area paddlers perceive Table Rock Lake to be generally unfriendly to paddlers, with most public access areas being dominated by motorboats.
- Paddlers, perhaps even moreso than other user groups, are typically dedicated to water quality stewardship efforts

With those points in mind, my input to the updating of the Master Plan for Table Rock Lake is that considerably more effort be made by USACE to accomodate paddlers, thereby increasing the lake's use and enjoyment by that rapidly growing user group, in addition to current user groups.

Respectfully submitted,

Coburn, Dana O SWL

Attachments: Master Plan 3 Questions.docx

Question # 1: How would you like to see Table Rock Lake in 20 years?

I would like to see the lake as a model of a vibrant economic engine for the region. Having said that, the lake itself will not look vastly different than today. The foreseeable/plannable for the future will hold a slow growth in the lake visitations and activities. The pressures that were at the door steps "precession" have subsided. The economy and even the boating public's tendencies have changed dramatically. Vacations are shorter, gasoline prices will continue to limit running time causing people to float or anchor up instead of moving all over the lake but if we don't move forward and press for opportunities to improve and expand the recreation capabilities of the lake we have wasted that use as a resource for the region.

Question #2: What about Table Rock Lake is most important to you?

The availability and diversity of recreation with an assortment of recreational opportunities on the water as well as on the shores of Table Rock Lake. It's heartwarming to fly over the lake and visualize all the people with families and friends enjoying all the varieties of activities. It's inspiring to see businesses and their employees working as hard as they can to see that those people have the most enjoyable time possible. This "Revision" needs to nurture further this theme to better allow the public to experience all we have to offer. If the public did not like what they were experiencing here there are many opportunities for them to go elsewhere or do other things but of course they do not, and that tells us they enjoy what we have to offer here. As with most human beings they want just a little more so this "Revision" needs to improve the conditions for growth of recreation and the tourism industry in the region so they may supply that diversity of opportunities.

Question #3: What is the one thing that could be done to improve the lake?

Utilize the lake as the economic resource it is. The lake is the economic engine of this region like corn is to regions in Illinois & Iowa. Its renewable but must be monitored, managed and utilized. Corn allows us to do many different things with it from food to energy to products used in medical fields. That one resource has many different and important uses. So does the lake. This resource allows us to produce power, control floods, provide drinking water and be the economic engine of this region. Flood control and power generation and drinking water (to a lesser degree) have major structures, policies and allocations that allow and cultivate those uses of the resource. Recreation in all its forms on the lake need to be at a higher consideration in the new master plan. The Corps of Engineers needs to work with local business stakeholders and develop guidelines, to improve the recreation and thus the economics of the area and have that be a larger player in the Mission of the Master Plan.

Additional comments on the Master Plan Revision or about issues that should be studied:

Let me start by saying I did not include water quality in any points to the 3 "Posed" questions put before us. It seems senseless since existing laws, science, initiatives, programs; common sense and enforcement surrounding water quality will guide and shape all potential uses of the resource. If anyone is so naïve that they don't believe that water quality is interlaced to all proposals or answers in the preceding questionnaire they have not thought deep enough or studied the dynamics and thus wasted the opportunity to address and improve the plan to optimize the resource. Also Table Rock Lake will "Never" even closely resemble Lake of the Ozarks due to the policies, management and even location. Those who would attempt to describe Table Rock as being or becoming close to Lake of the Ozarks have not seen the data nor experienced the true differences or understand the dynamics of that lake. While the Shoreline Management Plan itself is not part of the process the essence of it is. As part of the Master Plan provisions and policies must be developed to require the Shoreline Management Plan. Campgrounds must be set up to be self-funding and self-supportive.

IN 20 YRS. I WOULD LIKE TO SEE TABLE ROCK LAKE WITH CLEAN WATER AND CLEAN SHORELINES

IMPORTANT? I LIKE TO FISH, BOAT AND SWIM IN THE LAKE BUT AS I GET OLDER MY MOST COMMON ACTIVITY IS WALKING NEAR THE WATER, GETTING MY EXERCISE WHILE I ENJOY THE BEAUTIFUL VIEW.

ONE THING TO IMPROVE THE LAKE.? INTENSIFY EFFORTS TO KEEP POLLUTION FROM SPOILING THE WATER QUALITY OF OUR LAKE.

ADDITIONAL COMMENTS...THE CORPS DOES NOT HAVE THE FINANCES OR THE MANPOWER TO CLEAN UP THE MESSSES LEFT BY THE RECENT DAMAGE CAUSED BY ICE STORMS, WIND STORMS AND TORNADOES. YET THEY PENALIZE HOMEOWNERS AND CONDO ASSOCIATIONS IF THEY CUT DOWN A TREE WITHDUT PERMISSION. STILL THEY ALLOW OWNERS OF RV RESORTS AND HOTELS, ETC. TO TREAT THE CORPS PROPERTY AS THEIR OWN. I'D LIKE TO SEE IMPROVED PICNIC AREAS FOR EVERYONE TO ENJOY BUT I DDN'T LIKE THE FAVORITISM SHOWN BY THE CORPS.

In 20 years I would like to see that Table Rock Lake has sustained steady growth in lake area visitors, recreational activities, and increased lodging facilities surrounding the lake shores so that everyone can enjoy all that the lake has to offer.

Enjoying a clean lake with my friends and family that either live here or come to visit is very important to me as well as having the option to own a boat slip. Slip ownership encourages people to take ownership of the lake because of the vested interest as a lake home owner, slip owner, and boater. This has a positive impact on the cleanliness of our lake.

Reallocation and zoning of Table Rock Lake will improve the lake environment as well as provide a positive economic impact on the residential community. I feel the Corp needs to open new or unused recreational areas that are currently closed or unused and partner with organizations or companies capable of maintaining and operating these facilities efficiently and environmentally friendly.

The topography of most of the land surrounding the lake has changed minimally since 1975. What has changed is the fact that the topography is no longer a challenge due to the availability of our current resources, knowledge, and equipment capable of building structures on this land. If we can no longer control growth with the topography, we need to research opportunities that will require people to build into the land and environment. Natural colored siding, docks with colored tin, rain gardens, and using recycled materials that are environmentally friendly would allow growth while controlling the visual affects around the lake environment.

RE: Table Rock Lake Master Plan Revision and Environmental Assessment Comments

Dana,

I really appreciate your returning my call last week. When I discovered the web site address in all of the meeting notices wouldn't work, I knew your people would be hurrying around to get a revised address and then try to get the word out to the thousands of people who may want to visit that site before sending in their comments. I gave the new address to a few hundred of our property owners in my monthly newsletter so maybe that helped.

I have talked to several people and their feelings are mostly the same as the ones expressed at the public meetings. They say they just want "clean water and a pretty lake" with as few restrictions as possible. Obviously "clean" and "pretty" mean different things to different people. That is understandable given the size of TRL and the big diversity of land use, i.e. from state and/or federal forest land to agricultural to residential (primary and second homes) to commercial.

First, I want to try to explain this situation as best I can. When the CORPS develops a Master Plan or revises one as in this case, I assume (and hope) such a plan is intended to not be cut in stone but rather be dynamic in nature, allowing for changes depending upon trends in actual and/or planned land use, the general economy and the several pockets of sub-economies. I'm not familiar with how the federal government does things but common sense would dictate such long range plans be developed the way cities do their 20-year Comprehensive Plans which are general guidelines subject to revision. I've helped develop such long-range comprehensive plans for cities from scratch and also helped to revise them and have chaired a city Planning and Zoning Committee and other related functions that dealt with operating within Comprehensive Plans and revising them as necessary. Given the conditions at and around TRL this seems the best approach for all concerned.

We were told for years that when Bull Shoals and TRL were first being planned in the '30's and '40's, the original priorities were only two...flood control and the generation and distribution of electrical power. In the November meeting I attended at the Chateau, the speaker listed two or three other priorities including water-oriented recreation but I believe if that priority exists today, it was added much later if at all. That really doesn't matter now because society has added water recreation to TRL due to the birth and growth of sport fishing, fishing boats and pleasure crafts so those uses must be recognized and dealt with to the satisfaction of all concerned. The new uses that affect TRL and the new uses that TRL affects include the growth in water recreation (boating, fishing and related water oriented activities), primary and second home development, tourism, transportation (new ground, rail and air access) and the increased mobility and leisure time desires of Americans. To complicate matters, the land use in the area encompassing TRL itself and the public and private land surrounding it is not only quite large but is also extremely diverse, making it impractical or impossible to control under a "one set of rules fits all" basis.

TRL, being typical of a lake in a chain of highland reservoirs, has, in its upper reaches, its "river" arms with mixed use including public forest land, agricultural land and scattered residential that may have grown into "lake communities" that support primary and secondary lake homes with relatively heavy fishing activity. Most of these areas are near a public marina/campground, many of which were wisely built shortly after the lake formed. These areas usually include services such as a gas station, convenience store, café, private and/or community docks, etc. Further down these river arms, areas such as Shell Knob and Lampe developed, partly due to state highways with bridges over the lake providing better access from the north and south. Shell Knob has attracted a number of primary and second home owners from Kansas, Oklahoma and other areas due to its highway access from the west and north and the fact that many retired people and vacationers prefer this "quiet" side of the lake. Further down, as the lake widens, at about the 12 mile marker, with good highway and bridge access from the north and south, the Kimberling City area has developed with primary and second homes, resorts, commercial and considerable marina/dock development accommodating many larger boats. This begins the "lower", more developed end of the lake which, together with Branson West, and Reeds Spring provides more commercial development and a K-12 school district making them more appropriate for younger working families with children. This brings us to the "Dam Area". This lower 12 miles of the lake has the most water recreation use. South from the dam, the first few miles of the Long Creek Arm, have commercial, marina and residential development along the easterly bank due to good access from Hgwy. 265. The south side of the lower lake has much less development due to having poorer road access and being farther from commercial and tourist areas.

The north side of the lake from the dam to Kimberling City has the most development on the lake due to proximity to the Springfield population, east - west road access and commercial services. Four miles west of the Branson theater/attraction district on highway 76, the Village of Indian Point is located on a TRL peninsula, at mile marker 3. It has a combination of resort, commercial and primary and second home development. With twenty eight resorts totaling over 1,000 rooms plus a Corps campground, six restaurants, three stores, two public marinas and private docks the

Village of 700 residents accommodates up to several thousand tourists daily. This makes it the largest resort area on the lake. Visitors staying at this area of the lake typically participate equally in both lake and Branson activities. Indian Point is adjacent to Silver Dollar City, an internationally acclaimed theme park with annual attendance over 2 million. It is just four miles west of the Branson theater and attraction district.

Branson, with a population over 10,000, is the largest city contiguous to the lake and is among the top 15 destination tourist areas in the U.S. The area has a full range of facilities and services including a major hospital (soon to be two), 52 theaters with over 100 live shows daily, over 20,000 guest rooms, 200 restaurants, shopping centers, a major convention center, two airports, 2 colleges, several high quality golf courses, and is contiguous to both TRL and Lake Taneycomo which offer water sports as well as both warm and cold water angling. Branson is the "driver" of the area's economic engine, attracting approximately 8 million visitors annually, providing thousands of diversified jobs for residents of both Missouri and Arkansas and producing an annual economy well over \$1½ Billion. The Branson/Lakes Area Convention And Visitors Bureau (CVB) coordinates an annual marketing budget exceeding \$8Million. Over a million dollars of that annual amount is used to directly market the beauty and water-oriented attributes of TRL using nation-wide TV, public relations, social media and other sources. In addition, the CVB works aggressively to attract and sponsor the highest level of professional fishing tournaments, wakeboarding, swimming and other water-oriented competitions to TRL. These activities also generate additional TV shows seen nationally several times each year which attracts even more lake visitors. The Branson/lake tourism business provides facilities and services for both residents and visitors that create a "quality of life" that far exceeds that which is normally found in such a low populated area. For all of these reasons, this area is also growing as a retirement destination. Two things make this area so desirable...its' unique blend of "neon and nature" and its people.

The Corps, being a part of the federal government, does suffer from a public relations standpoint. This was evident in the three public scoping meetings recently held. Just being a part of our federal government these days brings out animosity from many citizens. To some people, the Corps comes across as "we own the lake and we make all the rules". At the other extreme, many people feel "the people own the lake and the Corps works for us". I'm convinced this relationship could be greatly improved with compromise and better communication from both sides.

We each tend to focus on our own areas of responsibility so much that it's often hard to take time to see and understand the big picture. Whether we recognize it or not, this area is operating as a giant public-private partnership consisting of several key players and entities. The Corps is one of the important players in this partnership. Other equally important "partners" are the full and part time residents, those who attract visitors here, those who build and operate the facilities and services that people want and require, and all of us who provide the Ozark friendliness and hospitality that keep our visitors coming back.

I've been visiting and fishing the White River area since before Bull Shoals, Table Rock and Beaver were started so I've seen the development of the lakes and the shoreline use and the surrounding private and public property over a long period of time. I think both the Corps and the private sector have, on balance, done a great job of managing the growth in as orderly a manner as possible.

In summary, I can think of several things the Corps could consider doing that would not harm the lake but would create good will among the public. The following are examples. The master plan could be revised taking into account various "zones" of the lake as previously outlined above. These areas of varying use and intensity have developed over the life of the lake and seem to be what the people want. If the trends in each zone evolve to something different over the next several years, provide a way for that to happen. If the Corps has a problem with future private docks, allow for "community docks" and let them be located and accessed conveniently for those who will use them. Consider more access points to the lake so the public can more conveniently go to the lake without having to trespass through private property. If more launch ramps are needed in certain areas, build them. People do not feel it is right to have to pay a launch fee to use a ramp that was built and paid for 50 years ago. Some of the Corps' administrative procedures could be improved. For instance, there are apparently some inconsistencies regarding the \$4.00 daily boat launch fee. The Corps sign going into the public marina near our resort on Indian Point reads "Area Use Fee Required" "Day - Use Fee \$4.00" instead of "Boat Launch Fee \$4.00. Also, there is no information on the sign stating "seniors half price". We have sent our guests there to eat at the floating café or buy bait, etc. and many have turned around and come back thinking they had to pay \$4.00 just to go into the area to buy a can of worms. If an incorporated city on the lake wants to improve and maintain a small park on Corps property for residents and visitors to access the lake, they should be allowed to do so and required to maintain it to Corps standards. If a small increased minimum flow from TRL dam would greatly enhance the coldwater trout fishery in Taneycomo and such flow could be provided by simply raising the "normal" TRL level by two feet (which I was told would be the amount of water required to supply the minimum flow annually) thus not reducing any water supply for power generation, we should consider doing it. I was told the only things that might be hurt are a few Corps picnic tables. Volunteers would probably move or replace them. If a Corps area daily use fee is not required in one area such a fee should not be required in another similar area. The revised Master Plan should provide for a process of application, review and approval similar to a city's planning and zoning process and it shouldn't take an unreasonable time to process such requests. The Corps should be mindful that unexpected new policies and requirements such as the one-year moratorium can be very harmful to people and the economy. I don't know the particulars of this but to prevent dock construction for a year, without warning, could cost hundreds or thousands of jobs and cause employers, suppliers and developers to go out of business. That is harsh.

Well, there you are. I wanted to try to put this whole situation in prospective and show how a "partnership" of all concerned could lead to improvements and peace among all concerned. I fell in love with the White River area of the Ozarks the first time I saw it in the '40's and love it even more today. I have experience in some of the areas outlined above and would be more than willing to sit with you and help in any way I can to perpetuate the wonder and magic that is this corner of the Ozarks. Thank you.

Table Rock Lake Master Plan Revision and Environmental Assessment

US Army Corps
of Engineers
Little Rock District

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years?

Like it is today. Not covered with
boat docks and marinas.
Clean water
I'm selfish. No more visitors. (not really)
but kind of!

What about Table Rock Lake is most important to you?

Water Quality!! Clean and Clean
Nitrogen in water from upstream runoff
from fertilized pastures. Turning water
green + mossy.

What is one thing that could be done to improve the lake?

Consistent lake level would
be so nice!!

Additional comments on the Master Plan Revision or about issues that should be studied:

Marinas extending too far out from
shoreline.
Kings River Marina takes up to much of
channel when you include the no wake
area.
shoreline
Mowing + tree trimming should be attended
within reason. Case by case basis.

Comments may be submitted via mail, email, fax with attention to Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203, Fax: (501) 324-5605, Email: M4TRMP@usace.army.mil, Website: <http://www.swl.usace.army.mil/parks/tablerock/trmasterplan.htm>. Table Rock Lake Master Plan Revision and Environmental Assessment

Please use this form to respond to the following three questions that will be asked in this workshop. You may also use this form to provide additional comments about how you would like to see the Table Rock Lake Master Plan revised or on the issues that should be studied before a decision is made on Master Plan revisions. Feel free to take an extra form and send it back later to USACE at the addresses below.

How would you like to see Table Rock Lake in 20 years? CLEAN, UNPOLLUTED WATER WITH GOOD ACCESS FOR PEOPLE TO ENJOY THE LAKE + THE OZARK MOUNTAINS

THE DEMOCRATS + OBAMA HAVE ALREADY RUINED CONSTRUCTION, BANKING + MORTGAGE INDUSTRIES --- PLEASE DON'T RUIN THE VALUE OF OUR PROPERTY TOO!!

What about Table Rock Lake is most important to you? HYDROELECTRIC POWER + BOATING / WATER SPORTS / TOURING THE LAKE WITH FRIENDS + BUSINESS ASSOCIATES

WE WANT TO ENJOY THE LAKE -- NOT FILL OUT A LOT OF REDTAPE PAPERWORK

What is one thing that could be done to improve the lake? ALLOW MORE BOAT DOCKS + ALLOW A NARROW 3-4 FOOT PATH TO BE CLEARED TO GET TO EACH PERSON'S DOCK.

Additional comments on the Master Plan Revision or about issues that should be studied:

TOO MUCH RED TAPE + TOO MANY REGULATIONS ALREADY! MAKE THE PERMITS EASIER TO OBTAIN. WE WANT TO PROVIDE EASY ACCESS TO OUR HOMEOWNERS + VACATIONERS TO WELL CONSTRUCTED BOAT DOCKS

THIS LAKE IS FOR THE PEOPLE OF THE USA. ~ NOT THE BUREAUCRATS! OUR TAX DOLLARS PAY OUR EMPLOYEES -- YOU! -- THE CORPS EMPLOYEES -- WORK FOR US -- SO WE SHOULD MAKE THE RULES NOT THE GOVERNMENT! WE DON'T WANT THE GOVERNMENT TO RUIN TABLE ROCK AREA REAL ESTATE.

Dana:

Please find attached comments regarding the master plan update from the Table Rock Lake Marina Association.

Thanks,

DECEMBER 14, 2012

MY NAME IS [REDACTED] I HAVE BEEN THE PRESIDENT OF THE TABLE ROCK LAKE MARINA ASSOCIATION FOR THE PAST 5 YEARS. I AM IN MY NINTH YEAR OF MANAGING THE PORT OF KIMBERLING MARINA. MY FAMILY OWNS PORT OF KIMBERLING MARINA & RESORT, AND I HAVE BEEN INVOLVED IN SOME ASPECT OF THE BUSINESS ALL OF MY LIFE. MY FAMILY AND I RESIDE IN A HOME ON THE LAKE. I WRITE THIS LETTER ON BEHALF OF THE MARINA OWNERS ASSOCIATION, THE MEMBERS OF WHICH, LIKE ME, ARE BOTH RESIDENTS AND BUSINESS OWNERS ON TABLE ROCK LAKE. ALL OF US ARE ACUTELY AWARE OF OUR DEPENDENCE ON THE LONG-TERM VIABILITY OF THE LAKE FOR EVERYTHING FROM OUR HOME VALUES TO OUR SOURCE OF INCOME. WE AGREE THAT UPDATING THE MASTER PLAN IS A WORTHWHILE AND NECESSARY ENDEAVOR THAT WILL AID THE CORPS WITH THE DIFFICULT – BUT ESSENTIAL – DUTY OF DETERMINING THE FUTURE OF DEVELOPMENT ON AND AROUND TABLE ROCK LAKE. THE ASSOCIATION TRUSTS THAT THE CORPS WILL DRAFT THE NEW MASTER PLAN IN THE BEST INTEREST OF ALL BY BALANCING THE WELFARE OF THE LAKE WITH THAT OF THE LOCAL ECONOMY. WE WILL ALL BENEFIT FROM (1) PRESERVING TABLE ROCK LAKE'S WATER QUALITY THROUGH THE USE OF VEGETATIVE BUFFERS AND WATERSHED MANAGEMENT, AND (2) FOSTERING RESPONSIBLE GROWTH IN TERMS OF LAND USE AND DENSITY ON THE WATER.

THE FACT THAT THE LAKE HOLDS SOME OF THE CLEANEST WATER IN THE MIDWEST IS THE PRIMARY REASON FOR THE GROWTH AND POPULARITY THE LAKE AREA HAS EXPERIENCED. MANY GROUPS HAVE TAKEN ACTION TO CLEAN UP ACTIVITIES ON THE LAKE: THE EPA IS REDUCING EMISSIONS ON THE WATER BY REQUIRING NEW MARINE ENGINES TO BE CATALYZED, THE CORPS OF ENGINEERS MOVED FROM METAL BARREL FLOATATION TO BEADED STYROFOAM AND FINALLY TO ENCAPSULATED FLOATATION FOR BOAT DOCKS, EVEN MARINAS HAVE RAISED THE BAR BY VOLUNTARILY CREATING A CLEAN MARINA PROGRAM. ALTHOUGH THESE EFFORTS ARE HELPFUL, THEY ULTIMATELY IMPACT WATER QUALITY FAR LESS THAN THE CHEMICALS USED ON LAWNS AND FARMS IN THE WATERSHED, IMPROPERLY MANAGED WASTE TREATMENT PLANTS AND

- Baxter Boat Dock
- Big Cedar Lodge
- Big M Marina
- Campbell Point Marina
- Cape Fair Boat Dock
- Chateau on the Lake
- Cricket Creek Marina
- Eagle Rock Marina
- Gage's Long Creek
- Indian Point Marina
- Kings River Marina
- Port of Kimberling
- Table Rock Marina
- State Park Marina
- The Harbor

FAILED SEPTIC SYSTEMS ON THE SHORES OF TABLE ROCK AND RUNOFF FROM LAND UPSTREAM. THE ASSOCIATION ASKS THE CORPS TO INTEGRATE MECHANISMS IN NEW MASTER PLAN TO CLEAN UP THE WATERSHED AND CONTROL RUNOFF, FOR INSTANCE, SUPPORT FOR LOCAL GROUPS WHO CREATE NATURAL FILTERS TO CLEAN THE WATER ENTERING TABLE ROCK LAKE, AND COOPERATION WITH OTHER STATE AND FEDERAL AGENCIES TO IDENTIFY AND REQUIRE THE USE OF ALTERNATIVES TO HARMFUL CHEMICALS FOR FARMING AND LAWN CARE IN WATERSHED AREAS.

RESPONSIBLY MANAGING DEVELOPMENT OF THE LAKE AREA GOES HAND-IN-HAND WITH PRESERVING WATER QUALITY AND PROMOTING SUSTAINED ECONOMIC SUCCESS FOR THOSE AFFECTED BY THE LAKE. IT SEEMS LOGICAL TO US THAT MARINAS BE ZONED AS HIGH DENSITY RECREATION AREAS, AND COMMUNITY DOCKS/PRIVATE DOCK AREAS SHOULD BE ZONED AS LOW DENSITY RECREATION AREAS. THE AREAS SURROUNDING EXISTING MARINAS AND PARKS WILL LIKELY PRESENT THE GREATEST CLASSIFICATION CHALLENGE. WHEN PRESENTED WITH AN OPPORTUNITY TO APPROVE OR DENY DEVELOPMENT WITHIN A PARTICULAR ZONE, THE ASSOCIATION ASKS THE CORPS TO CONSIDER CENTRALIZING COMMERCIAL ACTIVITY SO AS TO MINIMIZE THE NEGATIVE ECOLOGICAL IMPACT OF USERS ON THE WATERWAY. MARINAS HAVE A VESTED INTEREST IN, AND ARE REQUIRED BY OUR LEASES WITH THE CORPS, TO PROMOTE THE SAFE USE OF PROPERTY, PROVIDE SECURE ENVIRONMENTS, AND PROTECT BOTH PROPERTY AND THE ENVIRONMENT THROUGH SUPERIOR MAINTENANCE OF FLOATING DOCKS AND ASSOCIATED FACILITIES. MARINAS ARE, BY THE LAWS OF BUSINESS AND THE TERMS OF OUR LEASES, AGENTS OF RESPONSIBLE GROWTH. THE ASSOCIATION ASKS THAT THE CORPS UTILIZE EXISTING HIGH DENSITY RECREATION AREAS BEFORE PROMOTING THE DEVELOPMENT OF NEW AREAS BY EXPANDING EXISTING MARINAS TO CAPACITY WITHIN THEIR LEASED AREAS BEFORE DEVELOPING NEW MARINAS. FURTHERMORE, PRIVATE DEVELOPMENT OF DOCKS AROUND MARINAS SHOULD CONTINUE TO BE LIMITED WITHIN THE MARINA BUFFER AREAS, WITH THE EXCEPTION OF COMMUNITY REMOTE SERVICE DOCKS. THIS LIMITATION PROTECTS AGAINST OVERDEVELOPMENT, WHILE REQUIRING THE SAME STANDARDS OF CARE AS EXPECTED OF MARINAS, WITHOUT FORCING RESIDENTS TO MOOR THEIR BOATS AT A MARINA. AGAIN, DEVELOPMENT CAN BE CONTROLLED WITH MINIMAL NEGATIVE IMPACT ON THE ENVIRONMENT OR THE ECONOMY BY UTILIZING CURRENT HIGH-DENSITY AREAS AND THE ALREADY-ESTABLISHED RULES AND REGULATIONS IN FORCE FOR MARINAS. COMBINE THESE FACTORS WITH THE BUSINESS-SENSE REALITY THAT MARINAS CANNOT EXPAND UNLESS THEY REASONABLY EXPECT TO RENT ALL OF THE SLIPS UPON CONSTRUCTION, AND WE CAN PREVENT THE SCENARIO WE HAVE ALL SEEN WHERE DEVELOPERS INSTALL DOCKS IN THE HOPES OF SELLING LAND.

IN TERMS OF DENSITY ON THE LAKE, WE ALL AGREE THAT WE DO NOT WANT OUR

LAKE TO EVER RESEMBLE THE LAKE OF THE OZARKS. SIMPLE MATH SHOWS THAT WE ARE STILL A LONG WAY FROM THE 1972 PROJECTIONS OF OPTIMUM USAGE SET FORTH IN THE ORIGINAL MASTER PLAN. ACCORDING TO DATA CONTRIBUTED BY THE MEMBERS OF THE ASSOCIATION, TABLE ROCK LAKE HAS NOT YET MET THE OPTIMUM NUMBER OF BOATS ON THE LAKE PER DAY (18,526). OUR DATA SHOWS A MAXIMUM USE OF 30% OF OUR STORED BOATS AT PEAK TIMES AND A NORMALIZED RATE OF 15% ON TYPICAL IN-SEASON WEEKEND DAYS. WITH APPROXIMATELY 18,000 SLIPS ON TABLE ROCK LAKE, THAT MEANS A MAXIMUM OF 5,400 BOATS ARE ON THE WATER AT PEAK TIMES (NOT INCLUDING BOATS TRAIERED AND LAUNCHED ON A DAILY BASIS). THE ASSOCIATION HAS REVIEWED THE LAKE CUMBERLAND MASTER PLAN UPDATE OF 2011 AND WE BELIEVE THAT IT PRESENTS A SENSIBLE APPROACH TO MANAGING LAKE USE. THAT PLAN WAS DRAFTED IN ACCORDANCE WITH THE THEORY THAT OVERCROWDING TENDS TO EXERT A SELF-REGULATING FORCE. WHEN OVERCROWDING IMPACTS USER'S EXPERIENCE, THEY SEEK LESS CROWDED AREAS. BECAUSE OF THE DATA AND PAST MASTER PLAN, WE BELIEVE THERE SHOULD BE AN EFFORT TO RETAIN EXISTING ZONING FOR COMMUNITY DOCKS AND MARINAS IN BOTH EXISTING HIGH DENSITY AND LOW DENSITY ZONING.

IN TERMS OF THE USE OF THE LAKE ITSELF, RECREATION HAS BECOME THE DOMINANT USE OF THE LAKE, BUT THE ORIGINAL MASTER PLAN HAS NO PROVISIONS FOR OPERATING OF THE LAKE WITH RECREATION IN MIND. THE ASSOCIATION RECOGNIZES A NEED FOR THE NEW MASTER PLAN TO INCLUDE A RECREATION POOL WHICH WOULD FOCUS ON KEEPING THE LAKE LEVEL BETWEEN 920 FEET AND 905 FEET DURING THE RECREATIONAL SEASON (MAY 1-SEPTEMBER 30). THESE LEVELS PROMOTE SAFER BOATING SINCE LOWER WATER LEVELS OFTEN LEAD TO UNDERWATER HAZARDS AND HIGHER INCIDENTS OF ACCIDENTS.

THE DRAFTING OF A NEW MASTER PLAN PROVIDES THE OPPORTUNITY TO ENSURE THAT ZONING REFLECTS THE CURRENT USE OF THE LAKE AND FOSTERS RESPONSIBLE, MANAGED GROWTH, ALONG WITH A CHANCE TO IMPLEMENT OTHER NEEDED REGULATIONS, ALL OF WHICH WILL PRESERVE THE WATER QUALITY AND SUSTAIN THE ECONOMY OF THE AREA. THE ASSOCIATION SUPPORTS YOUR EFFORTS TO UPDATE THE PLAN. WE ASK THE CORPS TO FIND A BALANCE BETWEEN PROTECTING THE ECOLOGY OF THE AREA AND PROMOTING THE ECONOMIC DEVELOPMENT THAT WILL KEEP LAKE-LIFE ALIVE FOR GENERATIONS TO COME.

SINCERELY,
