Other Comments

Corps. should not take 50' buffer nor should they prohibit use of existing bed-line zoning.

What are the most important factors that affect your opinion?

1. Keeping the quiet life style found on Clevenger Cove and Table Rock Lake in general.
2. Keeping boat wave action and damage within Clevenger Cove to a minimum; any significant wave increase would increase damage to the 12 slip community (Clevenger Cove Dock Association) dock of which we are owners of 1 slip.
3. Keeping the ecology as it is and not degrading it to the detriment of the excellent bass and crappie fishing found in the cove.
4. Keeping boat noise to a minimum. Noise from commercial facilities would be undesirable.
5. Reducing boat traffic to a minimum thereby limiting the amount of water pollution.
6. Keeping boat traffic, especially of large craft, to a minimum which maintains a reasonable level of safety for all water activities including water skiing, tubing, kayaking/canoeing, fishing from small craft, and swimming/scuba-diving.

Other Comments.

The proposed commercial and density expansion near the east end of Clevenger Cove would be detrimental to the cove in general. The east end is very shallow with many sunken cedars which make for excellent fishing. There is significant wildlife to be seen in this area as I often note when kayaking and fishing from my kayak or runabout. Any expansion of this area would require dredging to give adequate depth to increased power boating and recreational use; this would have ecological consequences. Alternatively commercial dock expansion on the west end of the Stonecroft property peninsula area would require that boating facilities (commercial docks) would be built into the center of Clevenger Cove creating lots of noise, congestion and frank ugliness to this peaceful cove.

Increased boat traffic in the Clevenger Cove caused by expansion of the eastern end of the cove as well as Paradise Point and Emerald Point would cause this once peaceful cove, where some come to water ski and tube, into an area that would become similar of the overcrowding seen in of parts of the Lake of the Ozarks. I do not want Table Rock Lake to become as crowded as Lake of the Ozarks.

Were these proposed expansions within Clevenger Cove to become fact this cove could become frankly dangerous for small power boats and paddle craft due to increased traffic. As it currently is, Table Rock Lake has too few enforcers of boating laws to cover all current needs. We have had difficulty getting enforcement to control boats that come into our cove who disregard "no wake zone" buoys by slowly cruising close to shore in order to create large waves for "wake boarding".

It is important that development of this lake be carefully and conservatively managed. Keeping water quality, a beautiful peaceful atmosphere and maintaining the balanced ecology of the area should be the Corps of Engineers' primary concern; not its commercial development. We would recommend that Alternative 2-C be adopted

Table Rock Lake Revised Master Plan and Environmental Assessment

Please use this form to provide your comments on the draft revised Table Rock Lake Master Plan and the draft Environmental Assessment (EA) and potential impacts of the alternatives. The Draft Master Plan and EA may be found on the web at <http://www.swl.usace.army.mil/Missions/Planning/TableRockMasterPlanUpdate.aspx>. What are the most important factors that affect your opinion? 1) The 50 ft. Vegetative Management classification along the shoreline with no grandfathering of current land conditions, 2) Increasing the areas of Environmentally Sensitive & Wildlife Management classifications causing lack of future growth.

Other Comments Our preference is to keep the land use classifications as they currently exist. There is enough land for residential and environmentally & wildlife friendly uses. The regulations to-date have done a very good job of managing the needs of all parties. These proposed alternatives will have a adverse (negative) impact on the communities that live off of many of the Table Rock vacationers & part time residents as they will be forced to go other places than Table Rock. They would no longer be able to enjoy the lake as they do today.

What are the most important factors that affect your opinion? The item of the most concern is the proposal to create a 50' buffer around the lake.

Other Comments The other items of concern are the Corps proposal to prohibit the use and development of boat dock zoning. I believe this proposal, in Plan 2-D, will have a negative effect on real estate value surrounding Table Rock Lake.

Comments may be submitted via mail, email, or fax with attention to: Dana Coburn, Chief, Environmental Branch, Planning and Environmental, USACE, Little Rock District, P.O. What are the most important factors that affect your opinion? _____

- The Corps should not create a 50-foot vegetative management area. This would prevent any mowing, etc. within 50 feet of the 915 mark – regardless of having a history of mowing, trimming, etc.
- The Corps should not take any action that would prohibit the use and development of existing boat dock or “red line” zoning.
- The Corps should not take any action that would negatively affect real estate values of properties around the lake. Any action that would limit property owner’s ability to protect their lake view and/or access would devalue their property values and our economy.

Other Comments

Actions as proposed would decrease interest in Table Rock Lake and the value of property in the entire area of Southwest Missouri and North Arkansas. The Corps should not use “clean water” as an excuse for trying to make Table Rock like many other projects, i.e., Bull Shoals, Norfolk.

Everyone wants clean water and to protect the environment, the same is being accomplished without returning the area into a wilderness.

| Strongly Disapprove | | | | | | | | | Strongly Approve |

What are the most important factors that affect your opinion? _____

- The Corps should not create a 50-foot vegetative management area. This would prevent any mowing, etc. within 50 feet of the 915 mark – regardless of having a history of mowing, trimming, etc.
- The Corps should not take any action that would prohibit the use and development of existing boat dock or "red line" zoning.
- The Corps should not take any action that would negatively affect real estate values of properties around the lake. Any action that would limit property owner's ability to protect their lake view and/or access would devalue their property values and our economy.

Other Comments

Actions as proposed would decrease interest in Table Rock Lake and the value of property in the entire area of Southwest Missouri and North Arkansas. The Corps should not use "clean water" as an excuse for trying to make Table Rock like many other projects, i.e., Bull Shoals, Norfolk.

Everyone wants clean water and to protect the environment, the same is being accomplished without returning the area into a wilderness.

Please circle the number that best represents your opinion of the Preferred Alternative – Alternative 2 “Balanced Use”:

1	2	3	4	5	6	7	8	9	10
Strongly Disapprove									Strongly Approve

What are the most important factors that affect your opinion? _____

- The Corps should not create a 50-foot vegetative management area. This would prevent any mowing, etc. within 50 feet of the 915 mark – regardless of having a history of mowing, trimming, etc.
- The Corps should not take any action that would prohibit the use and development of existing boat dock or “red line” zoning.
- The Corps should not take any action that would negatively affect real estate values of properties around the lake. Any action that would limit property owner’s ability to protect their lake view and/or access would devalue their property values and our economy.

Other Comments

Actions as proposed would decrease interest in Table Rock Lake and the value of property in the entire area of Southwest Missouri and North Arkansas. The Corps should not use “clean water” as an excuse for trying to make Table Rock like many other projects, i.e., Bull Shoals, Norfolk.

Everyone wants clean water and to protect the environment, the same is being accomplished without returning the area into a wilderness.

Real Estate Property Values

Other Comments

I support 2-D only. The Corps should not create a 50' buffer or vegetative management area around the lake. The Corps should not take any action that would prohibit the use and development of existing boat dock or red-line zoning. The Corps should not take any action that would negatively affect real estate values of properties around the lake.

I support 2-D only. The Corps should not create a 50' buffer or vegetative management area around the lake. The Corps should not take any action that would prohibit the use and development of existing boat dock or red-line zoning. The Corps should not take any action that would negatively affect real estate values of properties around the lake.

What are the most important factors that affect your opinion? I STRONGLY OPPOSE THE 50 FT BUFFER, SO I WOULD PREFER OPTION 2D.

Other Comments

I WOULD HOPE THE CORPS WOULD CONTINUE TO ALLOW REASONABLE VEGETATIVE MANAGEMENT AROUND THE LAKE IN ORDER FOR PROPERTY OWNERS TO ENJOY ACCESS AND VISIBILITY TO THE LAKE. EVEN IN "ENVIRONMENTALLY SENSITIVE" AREAS.

EXISTING BOAT DOCK ZONING SHOULD NEVER BE TAKEN AWAY.

Dear Donna Ceburn

I write you in regards to the proposed alternative #2 plan. My wife & I have owned a [redacted] at N.umbering In [redacted] for the last (10) years. We enjoy the lake and all that it offer's. our home is in [redacted] across the river from [redacted]. it was a (5) hour drive one way, but we love the drive, the garden area, the lake and all that it offer's.

our condo is right on the lake, we have a beautiful view of the lake, the N.umbering Bridge and how it's a history. us and our family love walking down to the lake's edge, sitting on the big flat rock's, speaking in the water & having a family fun. to change any of this would be a terrible thing, especially for the people who come from all over the country to enjoy the lake, bring their business to the area and the state.

My wife and I are in our mid -70's, saved our money invested in the area, so us and family could enjoy it all.

to turn these developed areas into wilderness would be heart breaking. In the last (10) years we have been at Table Rock lake making sure changed to how hurt the environment in anyway. we and family would not be able to use it as we do now for fear of snakes, ticks, bugs etc. that would use it as home in these conditions. we have a big investment in this area, would love to enjoy it in our retirement years

Respectfully,
Glen

What are the most important factors that affect your opinion?

I support Alternative 2D. NO Vegetation Management Change. Our LAKE LOOKS VERY NATURAL in the current plan. You should not create this 50' Buffer. It will greatly affect our property values negatively AROUND OUR LAKE.

Other Comments

I Also would hate to see you do away with ADDING additional boat docks (on the lake, by doing buoys with red line zoning. Its a big lake and can easily support additional docks). People are moving to our Area to enjoy our LAKE. Enjoyment is increased tremendously when you can walk or golf cart to your boat AND NOT have to drive miles to get to a MARINA.

What are the most important factors that affect your opinion? This option most reflects the "as is" option.

Other Comments The Alternative 2 option that is most consistent with my desires is 2D –
I own a boat dock on the shoreline in front of my home. I presently have a vegetative permit and am permitted to have a controlled pathway to the shoreline. My access is very steep and have positioned natural rocks for safe footing to access the dock. The pathway also discourages venomous snakes from contact with humans since the pathway creates an open, exposed area.
My concern is the 50ft vegetative zone created with Alternative 2 other than 2D would not allow me to maintain the safety of my family and guests. In reviewing the master plan I noticed the Alternative 2D has no significant negative environmental impacts other than "Aesthetic" which is at best a subjective aspect. The safety of my family is my greatest concern.

2D would be the choice of ours. We bought our home due to the view of lake + the lot property sits on with gentle walk down to lake.

Other Comments

Under the proposed Alternative 2, property value would drop drastically, who would want to be on the lake and have to fight off snakes over time they try to make down to the lake through the forest, due to Revised master plan, it has been great for 60 yrs. I have no problem with limiting growth or not allowing any new development to clean lot to lake. Current owners should be grandfathered in.

I think it would be devastating to current property owners if it goes through as you recommend, unless they want to pay high home prices the value that will be left with the Revised Master Plan.

What are the most important factors that affect your opinion?

I don't like Vegetative Management for the residential areas. I would prefer **2D**

Other Comments

The balanced plan seems to reduce development in all ways, not really "balanced". Since my family has a house there, the one thing that affects us is vegetative management and we want to still be able to mow down near the water.

What are the most important factors that affect your opinion? *Down a home and a private dock on the Lake, I want to keep the value of my investment and not have the lake turn into the Ozark's Lake, however I believe there should be no vegetative management around the lakeshore. I want Alternative 2D*

Other Comments

I would like to see Shell Knob city prosper, it looks like it is in an economic decline. We hope for new businesses to want to open. Lake accessibility may not have any or little effect on this.

Another Marina located between Campbell Point and Big M Marina would be nice. I think these 2 marinas are too far apart.

More restaurants is the only other thing I would like to see. The ones we go to are not handling the crowds of patrons they have.

No BigBoats No new dock permits, keep water clean

What are the most important factors that affect your opinion? The addition of environmentally sensitive areas to the soft vegetative management area

Other Comments my preference would be 2c. If one of the goals of this plan is to keep Table Rock Lake from becoming another lake of the Ozarks, then commercial growth must be curtailed. Living on the southern end of Table Rock Lake, where there is little commercial development, is something I consider ideal. I feel the northern end of the lake, in & around Branson, is over developed. There must be consideration of the fact that so much of that development is not currently used because it has already been overbuilt. This development must surely affect the water quality of the lake. I like to go out in our boat, primarily for fishing, just as much as everyone else, but I want the water to be as clean as possible. We must be good stewards of our beautiful Ozarks.

What are the most important factors that affect your opinion? I support 2-D only.

Other Comments There is no logical reason to create a 50' buffer for vegetative management around the lake. As a realtor this negates much of the reasoning for owning lake front property, would negatively impact real estate values for properties around the lake.

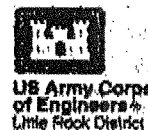

I also feel that the existing boat dock and red line zoning should not be changed to prohibit use + development. This would have a negative impact on the already distressed dock builders of the area ultimately impacting the local economy.

Thanks.

Subject: Table Rock Master Plan
To: MATRMP@usace.army.mil

U.S. Privacy Act 5 USC 552 (b)

First of all I want you to know how proud I am to be a resident of Table Rock Lake and to have the management of the Corps of Engineers. I have seen the situations at other lakes--- and do not find them to be as well managed as we have here. I also understand the need for change but would like to suggest that change in blanket forms causes much consternation by the residents as well as not always being the best way.

I have owned residences at Table Rock since 1983 and have been at my present location since 1989. I would offer that the 50 foot vegetation management to not be fair in that many areas are bluffs,, national forest, or lands that are not inhabited. Those should have different restrictions that those in a "housing" development should be treated more similar to those lands around resorts.

When shoreline areas are not maintained we always see an increase in the destruction of private property by rodents in particular and other animals as well. I have a friend nearby that is in a similar area and had raccoons inhabit and destroy parts of their boat's interior over the winter. They were one of three individuals who had this unfortunate circumstance last winter. We a large increase in feces from the animals on our dock as well as an increase in mice trapped in our garages and houses. These always increase during the times that the land is not manicured as well as the rest of the year.

I also have young grandchildren that I fear having unkept weeds as we see rats, numerous snakes and increases in other animals who increase their habitat in those areas. Rabies, tick fever, and other diseases as concerns that mostly are avoided by having the vegetative permit to maintain those areas as well as having a better visual sighting of these animals when maintained.

There are also reports that manicured areas do not have an increase in erosion but instead have an improvement over uncontrolled weeds as erosive impediments. The gentle slope in our particular area also decreases the runoff as opposed to steeper areas of the lake-- a perfect example being across the lake where a waterfall develops when we have a rains of any significance.

I realize that Option # 1 is really an option that I would prefer but also recognize that if any change is necessary it may not be the one that will work. I would opt for Option # 2D. This would give the Corps that help that it may require and me the vegetative permit that I feel that I am best served by. I would also be amenable to a permanent grandfathering of existing vegetative permits as I realize that this is not the best option for some people, reflecting the wishes of people who have declined to get them thus far. Again blanket suggestions probably don't work for everyone and this would be a way to please the most people and start the changes that the Corps desires.

Sincerely,

U.S. Privacy Act 5 USC 552 (b)

What are the most important factors that affect your opinion? I disapprove of pulling low-density rec. areas out and adding more unclassifieds to environmentally sensitive. The description of low-density allows for trails, camping & low impact activities that I believe are important. Don't want a 50-foot veg. management classifica - Weedy, unsightly shoreline will discourage cleanup on shoreline by residents & visitors.

Other Comments

I realize this is a fine balancing act, but -- your Balanced Use plan takes away too much of the land for low-impact, enjoyable use of the outdoors, at a time when we need to encourage walking, exercise.
It seems to reduce opportunities & places for rec. use - not what people said they wanted.

I prefer No action as a plan. I feel the Corps, working with the powers it has, & with existing lake quality advocates & groups, can continue to protect the lake.

My vote is for "No Action"

Dana Coburn -

Fax: 501-324-5605

As a property owner on Table Rock Lake I have serious concerns about the Corp of Engineers, Alternative #2 regarding the possible revision to Table Rock Lake Master Plan and express my support for Alternative #1.

Alternative 1 is No Action: Land use classifications would stay the same as they are now, no shoreline areas would be designated as Vegetative Management, and there would be no revisions made to respond to changed conditions.

Please explain by what authority the Corp of Engineers can take land which it does not own without just compensation for the land and just compensation for properties located on the land?

With Regards,

What are the most important factors that affect your opinion? I am for plan 2 D only. Best protects the lake and real estate values. Allows people to enjoy the lake while being responsible.

Other Comments The Corps should not (a) create a 50 ft buffer or vegetative management area around the lake (b) take an action that would prohibit the use and development of existing boat dock or red-line zoning (c) take any action that would negatively affect real estate values of properties around the lake.

What are the most important factors that affect your opinion? Adding a 50' buffer -

When public spoke of "water quality" majority meant pollution from James River Arm & septic that seeps to lake & city waste treatment facilities that discharges into lake -

Other Comments

Suggest increasing dock fees, shoreline leases & cost for vegetation permits to offset management expenses & salaries.

Its vital to the economic growth of the area that the public be allowed to allow vegetation permits & have access to their docks & boat slips.

What are the most important factors that affect your opinion? I own property on Table Rock lake and currently comply with a now-down permit issued by the COE. My family, pets, visitors and neighbors frequently enjoy this area for recreation while appreciating the beauty and wonders of the lake. I believe if this property can

Other Comments not be maintained as it is now it would curtail our access to swim, fish, admire the landscape and greatly reduce the overall enjoyment we can experience here.

I do not want the lake to become overpopulated and polluted as some lakes have but I feel the answer is to control new, additional growth of construction not to penalize those who already support and abide by the rules enforced when our property was purchased.

What are the most important factors that affect your opinion? _____

Other Comments I SUPPORT 2-D ONLY. THE CORPS SHOULD NOT CREATE A 50' BUFFER OR VEGETATIVE MANAGEMENT AREA AROUND THE LAKE. THE CORPS SHOULD NOT TAKE ANY ACTION THAT WOULD PROHIBIT THE USE AND DEVELOPMENT OF EXISTING BOAT DOCK OR RED-LINE ZONING. THE CORPS SHOULD NOT TAKE ANY ACTION THAT WOULD NEGATIVELY AFFECT REAL ESTATE VALUES OF PROPERTIES AROUND THE LAKE.

What are the most important factors that affect your opinion?

Don't feel anything should be changed do to it limits people's access to lake adds more buoys, monuments and takes away the beauty of the land & water. Limits a person's ability to build.

Other Comments

Explain what benefits alternative 2 is going to provide or give the land a better purpose

If this is a part of agenda 21 I also highly disapprove

What are the most important factors that affect your opinion? We own 18 acres in area # 3 waterfront property that is subdivided and has power for multiple home development. We do not want our property rights infringed upon further.
The only plan we can agree to is "2D".

Other Comments I find it incredibly selfish of those who have the "I got mine - to heck with everyone else." attitude. Those people should tear down their homes & repurpose their land back to its natural state, if they believe so much in conservation. There are ways to allow every landowner to use their property and not destroy the lakefront environment. There is a multitude of wildlife areas and access to the lake. There is no reason to gobble up private land for more. The lake can easily withstand its current use. There is no need to severely restrict that.

What are the most important factors that affect your opinion? _____

I DO NOT WANT THE VEGETATIVE MANAGEMENT BUFFER.

Other Comments

I would prefer Alternative #1 - No Action. Alternative 2 takes away too much low density land.

If you have to do #2, Alt. #2d - No Vegetative Management Area

The vegetative restrictions are too severe that are in place now. This needs to be relaxed. The beauty of the lake can be maintained

What are the most important factors that affect your opinion? I do not believe the mowing permits should be removed. There is enough rough area (not mowed) to maintain the ecology system. Mowing around docks for access keeps everyone safe. The areas around the lake that are being mowed are not large enough to create problems.

Other Comments The lake provides recreation for a lot of people. I would hate to see to many changes that would devalue property and cause a loss of tourism. Docks that are well maintained with proper flotation should be left alone.

What are the most important factors that affect your opinion? Prefer Alternative #2-D
Do not want 50' buffer zone. Would like to keep property value up.

Other Comments I support 2-D only.
The corps should not create a 50' buffer or vegetative management area around the lake. The corps should not take any action that would prohibit the use and development of existing boat dock or red-line zoning. The corps should not take any action that would negatively affect real estate values of properties around the lake.

What are the most important factors that affect your opinion? My wife and I have been at the U.S. Privacy Act 5 USC 552 (b) address since 1989. Our two children, their spouses, and the six grandkids now along with us use the dock for swimming, boating and fishing. If the area to the dock is allowed to grow wild, the twelve of us, ages 4 thru 66 would walk through knee / shoulder high weeds with ticks and various bugs. This would not be good for anyone.

Other Comments

We are against the Preferred Alternative - Alternative 2, we support Alternative 1, no action. We believe a clean slope to the water is aesthetically pleasing to the eye, from land and water. A well maintained walk to the dock would be safer than walking through high weeds full of rocks. We have invested a lot of money, and time in the dock and the lake house. We hope to pass it on to our children and grand children as they are hooked on the lake, and prefer to keep the rules as is so we can continue to keep the area clean, and protect our investment.

Respectfully,

What are the most important factors that affect your opinion? We would not stay on this lake if changes are made. We spend \$25,000 plus a year in playing on Lake and changes would force us to go to another lake and play. Please make no changes.

Other Comments

Please make no changes to lake property. We will sell property and leave lake if they do. Thanks.

TABLE ROCK LAKE REVISED MASTER PLAN AND ENVIRONMENT ASSESSMENT PUBLIC COMMENT (SUBMITTED AUGUST 28, 2013)

Name: U.S. Privacy Act 5 USC 552 (b)
 Address: [REDACTED]
 Phone: [REDACTED]
 Resort Email: [REDACTED]

Alternative 2 "Balanced Use" Opinion – See Written Explanation

Reviewing Alternative Two (as proposed as preferred) [REDACTED] asked several questions of the Corps of Engineers at the Public Meeting, August 14, 2013 at Dewey Shore Visitors Center. We learned that (a) the Corps suggested that the Northshore Lease Area where the [REDACTED] is currently located be designated a high-density recreation area since the resort limited lease program needs to take into account the requests of our existing registered guests and visiting public at a [REDACTED] and (b) that the area north of Heidler's Laz-E-Daz subdivision was proposed changed from low-density recreation to environmentally sensitive. We were informed that the Corps was not aware that this area was owned by [REDACTED] since 1982, zoned commercial and is the future expansion area for [REDACTED].

Based on the information we received from the Corps of Engineers, *we feel we would have to strongly disapprove* Alternative 2 "Balanced Use" as proposed since (a) the low density recreation area classification is too limited to serve our registered guests and visiting public as we expand; and (b) the area proposed to change from low-density recreation to environmentally sensitive will seriously impair any future growth of Still Waters Resort.

Still Waters would strongly approve Alternative 2 "Balanced Use" with the following changes:

(please see attached drawing)

- (1) Expand the proposed high-density recreation area on the Northshore Lease Area of [REDACTED] U.S. Privacy Act 5 USC 552 (b) to the entire current lease area including the area that was approved for two additional 20 slip docks;
- (2) Change the Southshore Lease Area (Docks A, B, C) from low-density recreation to high-density recreation and expand the high-density recreation area from the [REDACTED] Southshore Lease Area (Docks A, B, C) northwest along the shoreline heading north to a point just south of the first residential dock. We would then propose to expand our leased area to create a safer environment for our employees and registered guests as well as avoid any possible personal injury and congestion in the Northshore Area as [REDACTED] grows;
- (3) The proposed environmentally sensitive area north of Heidler's Laz-E-Daz Subdivision, we would propose be classified as "high density recreation" for the portion that is adjacent to the property zoned commercial currently owned since 1982 and planned for future expansion by [REDACTED].

Other Comments:

(1) [redacted] U.S. Privacy Act 5 USC 552 (b) supports the efforts of the Corps of Engineers to recognize that [redacted] U.S. Privacy Act 5 USC 552 (b) like [redacted] U.S. Privacy Act 5 USC 552 (b) on Table Rock Lake have challenges under current rules to satisfy registered nightly rental guests. The limitations on shoreline classification as well as the limits under the current Marina Buffer creates a negative impression by the visiting boating public who are confused by the rules imposed on resort limited leaseholders. [redacted] U.S. Privacy Act 5 USC 552 (b) is a host interested in serving our registered guests needs. .

(2) Our interest in high density recreation stems primarily from the fact that there are limitations currently on our ability to serve our registered nightly rental guests. The typical Table Rock Lake visitor is evolving and our registered nightly rental guests have commented that they would like to see at [redacted] U.S. Privacy Act 5 USC 552 (b) (a) parking lot improvements; (b) expanded beach areas; (c) additional free amenities (d) rest rooms at the Still Waters Marina ; (e) hiking trails along the shoreline; (f) courtesy docks; (g) additional nightly rental slips within view and walking distance of their rentals and (h) boat ramp improvements. These are items that have or would have been denied under a low-density recreation designation in a marina buffer zone. [redacted] U.S. Privacy Act 5 USC 552 (b) has an obligation to our employees, our community and our county to fulfill the needs of our registered nightly rental guests.

We are fortunate the public marinas in the 3 road miles on Indian Point run a professional business and our guest as well as theirs stimulate each others business. [redacted] U.S. Privacy Act 5 USC 552 (b) and its registered guest are being denied requests due to the introduction of the marina buffer zone and shoreline land classification. [redacted] U.S. Privacy Act 5 USC 552 (b) intent is only to cater to the needs of our registered nightly guest.

[redacted] U.S. Privacy Act 5 USC 552 (b) also recognizes that public marinas cater to the general public and that the proposed changes might be viewed negatively by those business owners. To clarify our intentions, [redacted] U.S. Privacy Act 5 USC 552 (b) only wants to cater to the needs of our registered nightly rental guests. The vast majority of our customers vacation 1-2 times a year spending thousands of taxable dollars in our community. The [redacted] U.S. Privacy Act 5 USC 552 (b) business model primarily introduces families to Branson, the Ozark Mountains and casual boating on Table Rock Lake. Once a former guest buys a vacation home or becomes a year round boater these former registered nightly rental guests become the long-term customers of a public marina .

(3) Our registered nightly rental guest consistently state a preference to bring their families and boats to Table Rock Lake and want to be able to do all their water activities from one location. The registered nightly rental guest trailers an expensive boat, wants to be able to launch and park their boat in a nightly rental slip in full view of the rental unit they are staying in with a launch ramp and adequate boat trailer accommodations.. [redacted] U.S. Privacy Act 5 USC 552 (b) sees this situation all year long with registered nightly rental guests. For example, a registered nightly rental guest staying in the South Shore accommodation want a South Shore Lease Area boat slip (Docks A-C).

What are the most important factors that affect your opinion? THIS IS GOING TO GREATLY IMPACT OWNERS ALONG TABLE ROCK. CAUSE LARGE LOSSES IN PROPERTY VALUES AND AN OVER RUN OF TICKS, FLEAS, SNAKES AND OTHER PESTS KNOW TO CAUSE HARM TO HUMANS.

Other Comments IT IS STATED ON YOUR WEBSITE UNDER "WHY REVISE THE TABLE ROCK LAKE MASTER PLAN?" THAT "CURRENT VISITATION IS ALREADY AT 40-50 MILLION VISITORS ANNUALLY FOR RECREATIONAL ACTIVITIES."

ACCORDING TO THE BRANSON LAKES AREA CHAMBER OF COMMERCE, BRANSON SAW A TOTAL OF 17.3 MILLION IN 2012, 5 1/2 TIMES LESS THAN YOU LOW NUMBER OF 40 MILLION.

ACCORDING TO THE LAS VEGAS CONVENTION AND VISITORS AUTHORITY LAS VEGAS HAS A TOTAL OF 36,354,469 VISITORS LAST YEAR.

SO YOU SAY TABLE ROCK SEES MORE PEOPLE THAN LAS VEGAS? 5 1/2 TIMES OF BRANSON. WHERE DID YOU GET THESE NUMBERS?

THIS IS A TAKING OF PROPERTY WITHOUT JUST CAUSE OR COMPENSATION!

What are the most important factors that affect your opinion? FEELINGS THAT THE LAKE IS ADEQUATELY MANAGED AT THE CURRENT TIME.

Other Comments I SUPPORT 2-D ONLY. THE CORPS SHOULD NOT CREATE A 50' BUFFER OR VEGETATIVE AREA AROUND THE LAKE. THE CORPS SHOULD NOT TAKE ANY ACTION THAT WOULD PROHIBIT THE USE AND DEVELOPMENT OF EXISTING BOAT DOCK OR RED-LINE ZONING. THE CORPS SHOULD NOT TAKE ANY ACTION THAT WOULD NEGATIVELY AFFECT REAL ESTATE VALUES OF PROPERTIES AROUND THE LAKE.

What are the most important factors that affect your opinion?

I only support Alternative 2-D. In order to not affect property values around the lake, I do not believe the lake should have a 50' buffer, or take any action to prohibit use and development of new or existing docks.

What are the most important factors that affect your opinion? No 50' Buffer
MAINTAIN Vegetation Permits,

Other Comments ANY ACTION BY THE CORP THAT WOULD ADVERSELY Affect property values would impact the economy of the area. Development that is controlled, improvements that are environmentally friendly that allow the area to continue to flourish and grow will help economically which sw no needs and around the lake. We already have enough poverty and unemployment.

What are the most important factors that affect your opinion? The reason for my rating is strongly affected by the proposal to put in a 50' vegetation buffer zone. This buffer vegetation zone will take away from the "lake experience" and in a lot of places will make it look like property that is not maintained, etc.

Other Comments
The vegetation will block lake access, views to the lake, and again will not be maintained and presentable to look "clean". Thinking of the activities that we do down at the lake (i.e. boating, fishing, playing in the lakefront lawn) will all be impacted negatively by any kind of vegetation zone or like methods. It will take away from being able to look out at the lake & enjoy the views because the focus will be on a 50' veggie buffer. Overall, it will take away from all experiences that we will have there in the future and will be dramatically, negatively received and perceived.

What are the most important factors that affect your opinion? Water Quality - Safety - No Lake of The Ozarks - the 3 main concerns heard at the public meetings. that means no new marinas on the Lake Residents do not want more & bigger Boats on the Lake! As a scuba Diver on Table Rock the marinas have by far

Other Comments the most garbage & debris compared to any where else second is Resort Docks - Clean water can not be maintained with more marinas & more tourists! You did not mention the city of Springfield - Nixon - Ozark or runoff from Tyson & chicken farms in Arkansas why not?

I am not in favor of the 50 ft shoreline management area - Resorts & Commercial are exempt so you are targeting Residential only - not fair or anti discriminatory. Most Runoff or erosion Does not come from Residential Lawns. Residential Properties do not use near the fertilizers or pesticides that Commercial properties or municipalities Do Do not penalize the Locals for the Profit of Developers. given the Plans presented I am in favor of Plan Alternative #1 No Action - No marinas & no High Density Development. thank you

What are the most important factors that affect your opinion? We do not agree with the fact that no cutting of vegetation would be permitted. It would make it very difficult for Sr. Citizens like us to get to our dock. Watching your step going over rocks is one thing; if they are covered with weeds, would really be hazardous.

Other Comments

We would prefer alternate No. 1. The land use should stay the same.

We feel that your money could be better spent patrolling our lake, rather than upsetting landowners.

What are the most important factors that affect your opinion? The corps should not create a 50' buffer or vegetative management area around the lake. The corps should not take any action that would prohibit the use + development of existing boat dock or red-line zoning.

Other Comments

The corps should not take any action that would negatively affect real estate values of properties around the lake.

Alternative 2 "Balanced Use" Opinion – See Written Explanation

Reviewing Alternative Two (as proposed as preferred) ^{U.S. Privacy Act 5 USC 552} asked several questions of the Corps of Engineers at the Public Meeting, August 14, 2013 at Dewey Shore Visitors Center. We learned that (a) the Corps suggested that the Northshore Lease Area where the ^{U.S. Privacy Act 5 USC 552 (b)} is currently located be designated a high-density recreation area since the resort limited lease program needs to take into account the requests of our existing registered guests and visiting public at a ^{U.S. Privacy Act 5 USC 552 (b)} and (b) that the area north of Heidler's Laz-E-Daz subdivision was proposed changed from low-density recreation to environmentally sensitive. We were informed that the Corps was not aware that this area was owned by ^{U.S. Privacy Act 5 USC 552 (b)} since 1982, zoned commercial and is the future expansion area for ^{U.S. Privacy Act 5 USC 552 (b)}

Based on the information we received from the Corps of Engineers, *we feel we would have to strongly disapprove* Alternative 2 "Balanced Use" as proposed since (a) the low density recreation area classification is too limited to serve our registered guests and visiting public as we expand; and (b) the area proposed to change from low-density recreation to environmentally sensitive will seriously impair any future growth of Still Waters Resort.

^{U.S. Privacy Act 5 USC 552 (b)}

would strongly approve Alternative 2 "Balanced Use" with the following changes:

(please see attached drawing)

- (1) Expand the proposed high-density recreation area on the Northshore Lease Area of ^{U.S. Privacy Act 5 USC 552 (b)} (Docks D and E ^{U.S. Privacy Act 5 USC 552 (b)}) to the entire current lease area including the area that was approved for two additional 20 slip docks;
- (2) Change the Southshore Lease Area (Docks A, B, C) from low-density recreation to high-density recreation and expand the high-density recreation area from the ^{U.S. Privacy Act 5 USC 552 (b)} Southshore Lease Area (Docks A, B, C) northwest along the shoreline heading north to a point just south of the first residential dock. We would then propose to expand our leased area to create a safer environment for our employees and registered guests as well as avoid any possible personal injury and congestion in the Northshore Area as ^{U.S. Privacy Act 5 USC 552 (b)} grows;
- (3) The proposed environmentally sensitive area north of Heidler's Laz-E-Daz Subdivision, we would propose be classified as "high density recreation" for the portion that is adjacent to the property zoned commercial currently owned since 1982 and planned for future expansion by ^{U.S. Privacy Act 5 USC 552 (b)}

Other Comments:

- (1) [U.S. Privacy Act 5 USC 552 (b)] supports the efforts of the Corps of Engineers to recognize that [U.S. Privacy Act 5 USC 552 (b)] like [U.S. Privacy Act 5 USC 552 (b)] on Table Rock Lake have challenges under current rules to satisfy registered nightly rental guests. The limitations on shoreline classification as well as the limits under the current Marina Buffer creates a negative impression by the visiting boating public who are confused by the rules imposed on resort limited leaseholders. [U.S. Privacy Act 5 USC 552 (b)] is a host interested in serving our registered guests needs. .
- (2) Our interest in high density recreation stems primarily from the fact that there are limitations currently on our ability to serve our registered nightly rental guests. The typical Table Rock Lake visitor is evolving and our registered nightly rental guests have commented that they would like to see at [U.S. Privacy Act 5 USC 552 (b)] (a) parking lot improvements; (b) expanded beach areas; (c) additional free amenities (d) rest rooms at the [U.S. Privacy Act 5 USC 552 (b)] (e) hiking trails along the shoreline; (f) courtesy docks; (g) additional nightly rental slips within view and walking distance of their rentals and (h) boat ramp improvements. These are items that have or would have been denied under a low-density recreation designation in a marina buffer zone. [U.S. Privacy Act 5 USC 552 (b)] has an obligation to our employees, our community and our county to fulfill the needs of our registered nightly rental guests.
- [U.S. Privacy Act 5 USC 552 (b)] also recognizes that public marinas cater to the general public and that the proposed changes might be viewed negatively by those business owners. To clarify our intentions, [U.S. Privacy Act 5 USC 552 (b)] only wants to cater to the needs of our registered nightly rental guests. The vast majority of our customers vacation 1-2 times a year spending thousands of taxable dollars in our community. The [U.S. Privacy Act 5 USC 552 (b)] business model primarily introduces families to Branson, the Ozark Mountains and casual boating on Table Rock Lake. Once a former guest buys a vacation home or becomes a year round boater these former registered nightly rental guests become the long-term customers of a public marina .
- (3) Our registered nightly rental guest consistently state a preference to bring their families and boats to Table Rock Lake and want to be able to do all their water activities from one location. The registered nightly rental guest trailers an expensive boat, wants to be able to launch and park their boat in a nightly rental slip in full view of the rental unit they are staying in with a launch ramp and adequate boat trailer accommodations.. [U.S. Privacy Act 5 USC 552 (b)] sees this situation all year long with registered nightly rental guests. For example, a registered nightly rental guest staying in the South Shore accommodation want a South Shore Lease Area boat slip (Docks A-C).

What are the most important factors that affect your opinion?

We all do not want a Lake of Ozarks feel at Table Rock Lake -

Obviously we need to protect our Environment while still enjoying our beautiful lake and all it has to offer

Other Comments

We have a house in [redacted] - around from [redacted]

The dock people stay / and we agree / This Cove is getting greater traffic than many areas up the lake --- breaking boats in the East Docks secondary to longer - faster - deeper trough boats so people can surf etc.

The small coves need to have a slower speed, especially as one gets further back into the deeper part of the cove.

Thanks [redacted]

What are the most important factors that affect your opinion? Property Values will go down. (What happens if my home is located within the 150ft. or 215ft.?) There are absolutely no differences in the Potential Environmental Effects between 2 & 2d. People enjoy the walk down to the lake. What will this do to access to boat docks. I am 110% against #2 and I am

Other Comments
99% sure everyone else is as well. What a complete waste of tax payers money in polluting this. If this is forced on us home owners,
What a waste of time & money. If I knew this was going to happen I never & I mean never would have considered Table Rock Lake. #2 makes no sense what-so-ever over 2d. Is this another power thing the corp is trying to force on us home owners ???

A 50' Vegetative buffer around the lake is not required to protect nearby lake, and will really hurt the quality of the lake by not being able to enjoy view views.

I have navigated through the user-unfriendly USACE Master Plan documents. I also read all of the comments posted following the public meetings. Overwhelmingly, public comments were focused on: maintaining the water quality, safety, and environmental sensitivity of the lake; maintaining the peaceful atmosphere of the lake; and reducing the numbers and sizes of boats and boat docks. What happened?

The - Balanced Use -plan will add additional High Density usage to an already overcrowded area of the lake. Map sheets 18 and 23 on the overall site map currently have enough high density recreational usage. Rental boats from the Big Cedar complex, Long Creek complex and State Park Marina navigate towards quadrant 18. Big Bear Resort operates a large dock, as does Paradise Point, Emerald Pointe and State Park Marina. Clevenger Cove (map sheet 18) becomes over-crowded and unsafe. Water quality is threatened. Huge wakes create erosion. The environmental sensitivity is challenged. There are multiple hazards in the cove during low water conditions. The serene atmosphere that brought many residents to the area has been diminishing over the years. Lately, however, because of the current developments, lake traffic has increased at an alarming rate.

Extreme expansion is already underway at Big Cedar, Camp Wilderness (map sheet 23) and Paradise Point (map sheet 18) which will further add to the above sited problems. Once the quality of water, safety, and the environment on and around TableRock Lake is compromised, there will be no turning back. One just has to visit Lake of the Ozarks to witness that over-development and too many boats have severely ruined that lake.

Map sheets 18 and 23 represent areas that should not be subjected to further abuse. Alternative 2 -Balanced Use, adds to that abuse. The northeastern/eastern side of TableRock Lake from the ever increasing State Park Marina to Long Creek appears to already have higher density recreational use than most other areas of the lake. When will enough, be enough? Tourist recreational use may profit a developer, but who will be held accountable for the detriment to the lake? Toxic run-off from acres of parking lots is already making its way into the waters of TableRock Lake. Further development with high density use in such massive measure will certainly have an additional negative effect.

Conservative management of the lake is important. However, I find ambiguity in trying to compare all of the proposed USACE plans.

A plan that enforces NO new high density development should be initiated. The environment should be protected. My choice would be Alternative 2-C.

What are the most important factors that affect your opinion?

I do not like the wording of Extreme, But I do like the Extreme Development Plan because it would Allow the Lake to be fully utilized by everyone.

Other Comments

There is a lot of Shoreline on this Lake that can and should be allowed to be Utilized by all. We should be able to use the lake within limits, but not too many restrictions. This is our lake and look forward to a larger usage by us all.

What are the most important factors that affect your opinion? *As a homeowner near the lake and a business owner in Branson and Branson west I am very satisfied with how things are now - we have a clean, tourist friendly lake. Any actions that make the lake less attractive to businesses makes the lake less accessible to tourists.*

Other Comments

To suggest that taking no action (act 1) would harm the aesthetics and safety of the lake seems like an exaggeration. The lake should be clean and protected but business friendly. we rely on tourists going to the lake.

Thank you

What are the most important factors that affect your opinion? If Alternative 2 is chosen then I would also like 2A and 2D. But Alternative 1 is the best and has worked very well for many years. I vote for Alternative 1. NOT for Alternative 2.

Other Comments

Alternative 2 leads 2D so we can continue to do shoreline cleanup safely. We will NOT do shoreline cleanup if we need to walk through unsafe shoreline.

Also the plan doesn't talk about future or existing boat docks.

Our lake doesn't have the same building and zoning rules as lake of the Ozarks so our lake will never be like lake of the Ozarks

What are the most important factors that affect your opinion?

If Alt. 2 is chosen then I would like to see 2A and 2D but I feel that Alt 1 has worked well so why change.

Other Comments

Also you mention that our lake could end up like Lake of the Ozarks and I disagree we build higher up cause of Corps property lines and our boat dock zoning doesn't allow dock everywhere.

Also in this plan there is no mention of existing or future boat docks.

Another reason I prefer 2D is that vegetation will get to tall which would prevent shoreline clean up.

What are the most important factors that affect your opinion? allowing too much vegetation will hinder lake access especially for handicapped and seniors

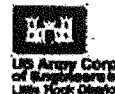

Other Comments The lake is beautiful as is. I always defend the forest because Table Rock is so much nicer than Lake of the Ozarks.

however, changes proposed are way to drastic and I believe its good as it stands now.

Please dont allow political activist to take control of our lake.

What are the most important factors that affect your opinion? The elimination of vegetative permits on land which has been grass since before the lake was built concerns us. The possibility of private dock elimination particularly after a loss due to an act of God and the Corps refusal to allow the dock to be rebuilt is even more concerning.

Other Comments
Don't have enough information on ALT 2 yet and believe Corps is moving too quickly. Water quality needs to be addressed upstream with chicken and Turkey growers, Cattle Feed Lots, Agricultural pesticides and Fertilizers, large construction projects discharging large quantities of mud and sand during storms. Your 50 foot buffer will do little to stop those types of pollutants which is the main problem, not my three acre yard.

What are the most important factors that affect your opinion? There are already 3 high density areas on Indian Point, 2 of which serve as and rest areas to the public. The Harbour, which is the third, close not to even though they are high density because there is already adequate amount now especially with State Park only 4 miles away. Big Indian is big enough as it is.

Other Comments

it would make the marina unable to compete with Stillwaters Resort rental and gas due to the fact they can write off marina expense with the number of condos/rooms above them.

Now if you are willing to give Indian Point Marina the campground so we can build a resort, we would have the extra income to be competitive which I don't believe you will allow so how would what you are proposing make any logical sense.

What are the most important factors that affect your opinion?

There are already 3 high density areas on Indian Point. Adding another one makes no logical sense when the 3 are not even at their fullest capacities.

Other Comments

The Harbour, which is a high density area, doesn't take gas or rent boats as if yet because the road is not there and the fact that the State Park Marina is only 4 miles away.

As of today this area from Indian Point to State Park has more high density areas that are in close proximity of each other than any where on Table Rock Lake.

What are the most important factors that affect your opinion? use & capacity for existing businesses

Other Comments There are enough high density areas within a 5 mile radius on Table Rock lake without adding another by allowing Stillwater to have one. How are the existing high density areas expected to operate to their capacity if you clutter the lake with yet another. Stillwater is surrounded by too much residential infrastructure to allow a high density area. It would make the traffic for the people living in that area unacceptable. Another high density area is not needed.

What are the most important factors that affect your opinion? Indian Point is all ready a very high dense area, adding another public marina will only hurt the business of the other marinas in the area.

Other Comments

By driving on land 3 completely different marinas can be reached with only a 15 minute car drive or 10 minute boat ride.
Adding another marina in the Indian point area is impractical and would negatively impact the other marinas that are public.
The Harbor respectfully does not compete with Rock Lake or Indian Point marina because they are aware of how it would effect business.
The closest marinas from Port of Kimberling are Baxter and Indian Point Marina which are easily 10 miles away. The nearest from state park are ~~Indian~~ Rock Lake + Long creek 3 + 5 miles. Indian Point to Rock Lake by water is only 1.5 miles adding another is senseless.

What are the most important factors that affect your opinion?

If any or all of what has been put forth is set in place property values will diminish, the entire area economy will sink far lower than it already is resulting in great amount of devastating hardship. I have not seen any scientific evidence that any of this would improve anything environmentally.

Other Comments

our society has an unfortunate behavioral when it comes to development and also boat docks in our area. People move in from other areas and once they have their home and boat slip their all of a sudden against anyone else being able to do the same. I hope you take that into consideration when reviewing comments and take a more scientific approach to just what the current existing (real) problems are such as sewer and run-off issues. As a large investor of lake front land I would be all for a sensible approach to immediately approaching these issues to protect our water quality. To remove any of the current red line dock zoning would be a financial hardship the lake could not withstand. Please re-consider moving ahead with any alternative other than #1 and streamline your intentions to precisely what immediate problems can be sensibly resolved.

Thank you for your time and understanding.

What are the most important factors that affect your opinion? IF ALT 2 IS THE ONLY OPTION I FEEL 2A & 2D NEED TO BE ADDED TO THE PLAN - I STRONGLY RECOMMEND ALT 2 AS IT HAS WORKED WELL SO WHY CHANGE.

Other Comments 2D IS PREFERRED BECAUSE WHEN VEGETATION GROWS TALL LAKE SHORE CLEAR UP BECOMES ALMOST IF POSSIBLE TO DO.
ALSO IN YOUR PLAN THERE IS NO MENTION OF EXISTING BOAT DOCKS OR FUTURE DOCK ZONING.
THERE HAS BEEN MENTION THAT OUR LAKE WILL BE LIKE LAKE OF OZARK, THAT IS IMPASSIBLE DO TO THE FACT IT IS NOT A PRIVATE OWNED RESTRICTION ON BUILDING TO THE CORP PROP LINE & BOAT DOCK ZONING ALREADY IN PLACE

What are the most important factors that affect your opinion?

Respect for both lake & surrounding environment

Other Comments

We make every attempt to keep a clean environment, especially both flora and fauna. The lake is rich in history and learning with all forms of life, enjoyed by all who love her nature.

What are the most important factors that affect your opinion?

I could not read the maps on line. It is difficult to know if you are for something if the maps are so poor you cannot know what the effect is. The website is poorly done, especially maps.

Other Comments

I did not see anything about curbing the Noise Levels from boats on the lake.

What are the most important factors that affect your opinion?

The increase in the acres classified as "environmentally sensitive" is very important to me. I believe water quality and the aesthetics of the shoreline should be very high priority for the future of Table Rock Lake.

Other Comments

I actually prefer the "Alternative 3 - conservative" choice. I believe reclassifying all low density land to Environmentally Sensitive would result in the long-term sustainability of high water quality and increase the recreational value of Table Rock.

Re: Table Rock Lake Master Plan

Fax No. 501-324-5605

Number of pages: 1

Message: I would vote for Draft No. 3, the conservative plan, but I could live with the proposed plan, Draft No. 2. The lake and its environment belong to the American people, not to the developers. I want the developers involved to provide limited amenities for the convenience of the public, but the least intrusive the better.

Anything that degrades the lake, especially the septic tanks, watch like a hawk. I fully support your efforts to protect this national treasure.
