## Appendix B

Boater Survey Report

This page intentionally left blank.

This appendix describes the Beaver Lake Boating survey administered to recreational boaters at Beaver Lake following the summer 2016 boating season. Section B. 1 describes development and administration of the survey. Section B. 2 provides the survey questionnaire that was administered. Section B. 3 presents the basic frequency of response for each question and Section B. 4

## B. 1 User Survey Development and Administration

## B.1.1 Survey Design and Approval

To avoid overburdening the public with federally sponsored data collections, the Paperwork Reduction Act (PRA) of 1995 requires that U.S. federal government agencies obtain Office of Management and Budget (OMB) approval before requesting or collecting most types of information from the public. In accordance with the PRA, OMB approval must be obtained prior to collecting federally sponsored data in any situation where 10 or more respondents, within a 12-month period, are involved. The questions are standardized in nature whether they are delivered in-person, on the telephone, or online.

The Beaver Lake Boating Survey was submitted to OMB under the Interagency Generic Clearance for Federal Land Management Agencies Collaborative Visitor Feedback Surveys on Recreation and Transportation Related Programs and Systems (OMB control number 0596-0236). The generic clearance was submitted jointly to help the signatory Federal Land Management Agencies, including the Bureau of Land Management, U.S. Fish and Wildlife Service, National Park Service, Forest Service, and Army Corps of Engineers, improve transportation conditions and recreation and resource management. The FLMA clearance was designed to collect information about visitors' perceptions, experiences, and expectations, with respect to transportation conditions, services, and recreation opportunities at various FLMA locations and across areas that could include multiple locations managed by different FLMAs. OMB approval is still required for each survey requested to be administered under the FLMA clearance.

Survey questions related to these topics have been compiled for use in designing surveys submitted under the FLMA clearance, use of which helps to streamline the approval process. The OMB approval process requires identification of which questions in the proposed survey are taken from the previously compiled questions. Questions that are not in the collection are allowed, but the source for these questions must be clearly identified (e.g., are they new or are they taken from a previous survey that has been approved by OMB ), and these questions must be reviewed and approved by OMB.

Pulling from the question collection, 21 questions were selected to determine respondent characteristics, assess visitor experiences, and characterize trip behaviors. One non-compendium question was asked from a recently expired OMB Clearance (0710-0001). The questions were combined into a survey instrument with an accompanying cover letter. Experts in graphic design and development of publicly distributed materials were involved in designing the cover letter in an effort to improve the response rate.

Pre-testing and consultation were conducted with five volunteer participants with no specific background or training in survey research methods or analysis (i.e., representative of the public, rather than survey experts). Specifically, the individuals were asked to complete the questionnaire and then asked a series of debriefing questions to elicit their feedback on the practical utility of the study, questionnaire/respondent burden, quality and clarity of the questions and instructions, and
ways to minimize respondent burden. Comments were incorporated into the final instrument. Time to complete the survey ranged from 5 to 9 minutes.

The survey was offered through two mediums: online and paper copy via a mail out/mail back method. The online survey was hosted at surveygizmo.com. The online survey was tested on a variety of operating systems and hand-held, personal devices to ensure those who preferred to take the survey online could access and complete each question. No Personally Identifiable Information was maintained during the survey process.

The final mail out survey instrument approved by OMB is provided in Section B.2.

## B.1.2 Photo Simulation Question Development

A question was allowed by OMB that simulates maximum acceptable impact using photo simulation of a scale of watercraft density. This method has been widely used in the parks and recreation assessment field for simulating hiker and vehicular traffic that is acceptable to visitors. The method has been applied in numerous boating capacity studies as well. The photo simulation is effective for collecting evaluative information about use levels that are higher and lower than the current, existing lake use levels. The goal of the photo simulation is to provide a foundation for careful assessment of the reasonable range for social carrying capacity at Beaver Lake.

The survey Question 18 asked respondents: Please review the boating conditions depicted in the photos below. Which photo shows the maximum number of boaters you could see at one time on Beaver Lake without thinking it was too crowded?

To develop the photo images that correspond to the question, a photograph was taken at Lost Bridge Marina while no boats were present, as shown in Figure B-1. Using Photoshop, the buoys and ropes were removed from the photo. GIS was used to estimate the number of acres present in the use area of the photo (Figure B-2). Boats were then added to simulate a range of reservoir use levels per Table B-1. Results are provided in Figure B-3.

Figure B-1. Photo at Lost Bridge Marina Used as Basis of Photo Simulation.

Figure B-2. Calculation of Acres Present in Photo Simulation Base Photo

Table B-1. Photo Simulation Acres Per Boat

| Photo | Acres | Number <br> of <br> Boats | Acres/Boat |
| :---: | :---: | :---: | :---: |
| A | 100 | 2 | 50.0 |
| B | 100 | 5 | 20.0 |
| C | 100 | 7 | 14.3 |
| D | 100 | 10 | 10.0 |
| E | 100 | 12 | 8.3 |

Figure B-3. Resulting Photo Simulation Question Pictures A-E

## B.1.3 Population Sampling

The target population for the Beaver Lake boater survey is the public who participate in boating recreation activities at Beaver Lake. Target respondents include residents living along the shoreline with private/community boat dock permits, marina slip renters, and public boat ramp users.

The procedure for administering the Beaver Lake boater survey followed guidance found in Dillman et al. (2009). OMB reviewed and approved the survey administration procedures. Because it is not possible to survey every single boater who used the lake in 2016, a sample of boaters was selected to receive the survey, and their responses are assumed to be representative of the population. A sample consists of all units of the population that are drawn from for inclusion in the survey. The sample was drawn based on standard statistical methods, as further described below.

The survey population consists of all the units to which one desires to generalize the survey results. For this survey, the population is boaters on Beaver Lake. A "boater" is defined as an operator of a boat that is placed on the water at Beaver Lake for recreational purposes. An owner could be a single individual, family, or two persons or more who jointly own and operate a boat. The population of boaters at Beaver Lake is estimated from summing the number of private/community dock slips, number of marina slip renters, and estimated number of boaters who launch from public use facilities such as launch lanes at marinas, parks, campgrounds, and end of road access points. At Beaver Lake, there are an estimated 3,473 boaters served by private and community docks and 1,987 marina slips available. An estimated 1,736 of the slips were rented in $2016{ }^{1}$. Including an estimated population for public launch users, the total boating population that currently recreates on Beaver Lake within a year is estimated at 10,000 boaters.

Given the estimated population, the completed number of returned surveys (completed sample) needed to provide statistically significant results can be calculated as given in Equation 1.

$$
N_{s}=\frac{\left(N_{p}\right)(p)(1-p)}{\left(N_{p}-1\right)\left(\frac{B}{C}\right)^{2}+(p)(1-p)}
$$

Equation 1
Where: $N_{S}=$ the completed sample size needed for the desired level of precision
$N_{p}=$ the size of the population
$p=$ the proportion of the population expected to choose 1 of 2 response categories
$B=$ margin of error
C = Z score associated with confidence level (1.96 corresponds to 95 percent)

The required Beaver Lake complete sample size for statistically significant results with a 5 percent margin of error is estimated to be 370 total completed surveys.

To determine the estimated response rate for the survey and thus the needed sample to be drawn, the various sources of boater contact information were taken into consideration. The mailing and email address list that makes up the sample frame for the survey was generated from three sources:

- Corps database of private dock owners
- Mailing address of marina slip renters
- Study participant registration database

There are 3,473 dock owners in the Corps database, of which 2,295 have an address. Eight duplicate owners were found in the database. The database addresses were processed through an address verification tool, and several were found to be invalid. In total, 2,200 dock owners have unique, valid addresses and were included in the sample frame. In total, marina slip rentals for the 2016 season totaled 1,736 . For the marina slip renters, 1,425 total rows of addresses were provided by 6 of the 7 marinas located on the lake. This list was reduced to 1,259 unique, valid physical addresses. The study participant database was developed based on voluntary study registration of users parked at public access areas. That is, from July through Labor Day, vehicles with empty boat trailers who

[^0]were parked at public access areas were invited via a postcard on their windshield to register to participate in the Beaver Lake study. In all, 174 unique registrations were received. Of those, 123 requested to be contacted via email and 50 requested to be contacted via postal mail. One email address was found to be invalid, and no physical address was provided. Thus, the email registrants totaled 122.

Of those who registered to participate in the study, a 50 percent response rate was assumed for those who asked to be contacted via email. That left 309 (370-61) as the target for completed surveys from postal mail-out/mail-back. A conservative 10 percent response rate on mail-out/mailback was assumed. Thus, 3,090 paper surveys were mailed (309/0.10).

All 50 who registered via the windshield postcard and asked for the paper survey were provided with the opportunity to respond. This was done to balance the targeted completed sample for those who access the lake via public launch areas. To draw a sample from the dock owners and slip renters, the valid, unique addresses were organized in an Excel workbook by group. The target was set in proportion to the known population (known $=1,736$ marina slip renters and 3,473 dock owners; target 1,013 marina slip renters and 2,027 dock owners). A random number between 0 and 10,000 was assigned to each address by type. The addresses were then sorted by type and the random number from smallest to largest. The smallest 1,013 random numbers for marina slip renters were selected to receive a survey. The smallest 2,027 random numbers for dock owners were selected to receive a survey.

## B.1.4 Survey Administration

The survey was administered on October 19 and left open for 30 days. Responses received through November 28 were included in the results. The additional time allowed for responses mailed back at the end of the 30-day request period to be counted. The mail out survey included a postage paid, self-addressed envelope. The respondents were also provided the online survey web address for those who preferred to complete the survey online.

Email requests to complete the survey were sent from an email address created specifically for the study (beaverlakesurvey@cdmsmith.com). To avoid or reduce the chance of the email being marked as spam, individual emails were sent rather than a bulk email to all possible respondents. The initial email was sent out on October 19, and email reminders were sent out on November 3.

Responses received through the postal mail were added to the online database using the surveygizmo.com interface. Quality checking procedures were employed to ensure accuracy of entered data. No "undeliverable" surveys were returned, indicating all were received by the target recipients.

## B.1.5 Quality Procedures

To ensure quality and reduce potential error that was possible during the survey administration process, quality discussions occurred between the Project Manager and Program Manager. Potential sources of error were identified, and a mitigation plan was developed.

The greatest potential was determined to be in collection and entry of the surveys received via postal mail. The following steps were taken to reduce and mitigate potential error:

- As surveys were received, each was removed from the envelope and stamped with the date received.
- The same trained technician handled and entered all paper surveys received to reduce potential entry error and ensure consistency in entry.
- Survey responses were recorded per the date received, with the first surveys received entered first, and so on.
- As survey responses were entered via the online survey interface, each paper survey was clearly marked as recorded and initialed by the technician and filed per date received.
- Independent checking was conducted on approximately 10 percent of the surveys. Knowing the IP address of the entry technician, 140 surveys were independently checked and verified. Seven errors in total were found, representing 5 percent of those checked. Entry errors were documented and corrected in the response database.
- A procedure was established for dealing with responses received past the open period. Responses were marked as such and filed per the date received.

Additionally, the online survey responses were checked for quality. In total, 12 responses were removed from the online database. These responses were verified as being duplicate entries from the same IP address. In all instances, it was obvious that the respondent had begun the survey, navigated away from the page, then returned to the survey starting a new entry.

## B. 2 Beaver Lake Survey Questionnaire

This section provides the mail questionnaire. Questions for the online version were exact, with question skipping built into the design.

## SUMMER BOATING EXPERIENCE AT BEAVER LAKE

## U.S. Army Corps of Engineers Survey

Beaver Lake, located in Northwest Arkansas, is the headwaters of the White River. The U.S. Army Corps of Engineers (Corps) is the steward of the lands and waters around Beaver Lake and is responsible for providing the public with quality outdoor recreation experiences.

As such, the Corps is currently examining future management of recreation and natural resources at Beaver Lake. You are invited to participate in a short survey to better understand your experiences and preferences regarding Beaver Lake!

The survey is brief and will take approximately 10 minutes to complete. You can complete the survey online by entering the following address into any web browser http://beaverlake.boater.sgizmo.com/s3/or
 mail back the paper survey in the postage paid envelope provided. The response period will be open for 30 days, so we kindly ask that you complete the survey at your earliest convenience.

If you have questions regarding the survey, please contact the Beaver Lake Operations Project Manager for more information at (479) 636-1210 ext. 1701.

# THANK YOU FOR HELPING WITH THIS IMPORTANT EFFORT TO UNDERSTAND PEOPLE’S EXPERIENCES AND PREFERENCES FOR BOATING AT BEAVER LAKE! 

This study is being conducted by CDM Smith, a contractor, on behalf of the U.S. Army Corps of Engineers.
The public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Washington Headquarters services, Executive Services Directorate, Information Management Division, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350-3100 (0596-0236, expiration 11-30-17). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. PLEASE DO NOT RETURN YOUR RESPONSE TO THE ABOVE ADDRESS.

Please reference this map when answering Question 2a and Question 7

## Beaver Lake Boater Survey

## A. User Characteristics

1. Do you own a residence located within $1 / 4$ mile of the Beaver Lake shoreline? (Circle one)
2. Yes (If Yes, please answer Question 1a)
3. No (If No, please continue to Question 2)

1a. Referencing the map included with this survey, please mark the lake zone number below indicating where along the shoreline this residence is located. (Circle one)

| Zone 1 | Zone 2 | Zone 3 | Zone 4 | Zone 5 |
| :---: | :---: | :---: | :---: | :---: |

2. What are the City, State, and Zip Code of your permanent residence?

3. Do you engage in any boating activities on Beaver Lake? (Circle one)
4. Yes
5. No

If No, please skip to Section C, Questions 19-22 and then return this survey in the envelope provided. Characterizing those who are not boating on Beaver Lake is very important to the overall results of the study, so please respond even if you do not boat on Beaver Lake.
4. How often do you engage in boating activities on Beaver Lake? (Mark one)
( ) Less than once per year
( ) 1-5 times per year
( ) 6-10 times per year
( ) 11-15 times per year
( ) 16-20 times per year
( ) 21 times or more per year
5. How many years have you been boating? (Round up) $\qquad$ Years
6. How many years have you been boating at Beaver Lake? (Round up) $\qquad$ Years
7. During a typical boating trip on Beaver Lake, please indicate the primary area where you do most of your recreation activities. Use the map included with this survey as a reference. (Circle only one)

| Zone 1 | Zone 2 | Zone 3 | Zone 4 | Zone 5 |
| :---: | :---: | :---: | :---: | :---: |

8. Please provide the type and size of the primary boat that you use at Beaver Lake and whether this boat was trailered to the lake or launched from the lake.

| Boat Type (Mark one) |  | Boat Size (Mark one) |  | Was this boat transported (e.g., trailered or car/truck roof) to the lake, kept at a marina on the lake, or rented/borrowed? (Mark one) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\square$ | I don't know |  | less than | $\square$ | Trailered/transported to the lake |
| $\square$ | Runabout/Speedboat |  |  | $\square$ | Kept at a marina on the lake |
| $\square$ | Ski or Wake Boat | $\square$ | 16-20' |  |  |
| $\square$ | Fishing boat/bass boat |  | 21-28' | $\square$ | Kept at my private or community at dock |
| $\square$ | Pontoon boat |  |  | $\square$ | Kept at the resort I stayed at |
| $\square$ | House boat |  | 29'+ | $\square$ | Rented |
| $\square$ | Cabin cruiser |  |  | $\square$ | Borrowed |
| $\square$ | Sailboat/Sailboard |  |  | $\square$ | Other |
| $\square$ | Personal Watercraft (e.g. Jet | Ski) |  |  |  |
| $\square$ | Rowboat/Kayak/Canoe |  |  |  |  |
|  | Other |  |  |  |  |

9. In general, what percent of your time do you spend on the following activities while recreating on Beaver Lake? (Consider time spent getting to or moving between fishing locations as "Fishing")

Fishing
Cruising
Swimming
Water Skiing
Relaxing/Sunning in boat (stationary)

Other activities
$\qquad$ \%
$\qquad$ \%
$\qquad$ \%
$\qquad$ \%
$\qquad$ \% \% ...please describe $\qquad$
(BE SURE THE TOTAL = 100\%)

## B. Management Questions

10. Is there a problem from too many boats on Beaver Lake? (Circle one)
11. Yes, there is a problem
12. No, there is not a problem

If Yes, please indicate how serious of a problem there is from too many boats on Beaver Lake. (Circle one)

| Minor Problem | Moderate Problem | Serious Problem |
| :--- | :--- | :--- |

11. How safe are boating conditions on Beaver Lake? (Circle one)

| Not at All Safe | Slightly <br> Safe | Somewhat <br> Safe | Very <br> Safe | Extremely Safe |
| :---: | :---: | :---: | :---: | :---: |

Please describe any safety concerns you have:
$\qquad$
$\qquad$
$\qquad$
12. How serious of a safety problem is the number of boats on Beaver Lake? (Circle one)

| Not At All <br> Serious | Slightly Serious | Moderately Serious | Very Serious | Extremely <br> Serious |
| :---: | :---: | :---: | :---: | :---: |

13. How much do private docks interfere with your use of Beaver Lake? (Circle one)

| Do Not Interfere <br> at All | Slightly <br> Interfere | Somewhat <br> Interfere | Seriously <br> Interfere | Tremendously <br> Interfere |
| :---: | :---: | :---: | :---: | :---: |

14. How much, if at all, has the noise from other boats reduced your enjoyment of Beaver Lake? (Circle one)

| Not at All | Slightly | Somewhat | Quite a Bit | Extremely |
| :---: | :---: | :---: | :---: | :---: |

15. How likely is it that the presence of too many boats would cause you to avoid your favorite parts of Beaver Lake? (Circle one)

| Not at All Likely | Slightly Likely | Somewhat Likely | Quite <br> Likely | Extremely Likely |
| :--- | :--- | :--- | :--- | :--- |

16. Which of these statements best describes your expectation for the number of boats on Beaver Lake? Please refer to your last outing on the lake when answering this question.
(Mark one)
( ) I saw ABOUT AS MANY boats as I expected to see that day
( ) I saw MORE boats than I expected to see that day
( ) I saw FEWER boats than I expected to see that day

16b. Please indicate the date of your last outing:
$\qquad$ (month) $\qquad$ (day) $\qquad$ (year)
17. Which of these statements best describes your preference for the number of boats on the lake? Please refer to your last outing on the lake when answering this question. (Mark one)
( ) I saw ABOUT AS MANY boats as I wanted to see that day
( ) I saw MORE boats than I wanted to see that day
( ) I saw FEWER boats than I wanted to see that day
18. Please review the boating conditions depicted in the photos below. Which photo shows the maximum number of boaters you could see at one time on Beaver Lake without thinking it was too crowded? (Circle one)

| A | B | C | D | E | Idon't think it looks crowded in <br> any of the photos |
| :---: | :---: | :---: | :---: | :---: | :---: |

Please continue to the next page

## C. Basic Demographics

19. What is your gender? (Mark one)
( ) Female
( ) Male
20. What is your age? (Mark one)
) Under 18
( ) 18-24
( ) 25-44
( ) 45-54
( ) 55-64
( ) 65+
21. Please indicate the highest level of education you have completed? (Mark one)
( ) Less than high school
( ) High school graduate/GED
( ) Vocational or Technical School certificate
( ) Associates Degree
( ) Some college
( ) Bachelor's degree
( ) Graduate degree or professional degree (MA, MS, PhD, JD, MBA etc.)
22. Which category best represents your annual household income (before taxes) last year? (Mark one)
( ) Less than \$24,999
( ) \$25,000-\$34,999
( ) \$35,000-\$49,999
( ) \$50,000-\$74,999
( ) \$75,000-\$99,999
( ) \$100,000-\$149,999
( ) \$150,000-\$199, 999
( ) \$200,000 or more
( ) Do not wish to answer

Thank you for taking the time to complete this survey. Your responses are important and will help inform the future management of Beaver Lake.

Please return your completed survey in the postage paid envelope provided.

## B. 3 Beaver Lake Survey Responses

After removal of duplicates, a total of 1,461 responses were received. This represents a 45 percent response rate ( 1,461 received of the 3,212 administered). A total of 202 responses were completed online and 1,259 were received via postal mail. With the 1,461 surveys that were received, a general Margin of Error for any question where the ratio of response is $50 / 50$ is calculated as $+/-2.6$ percent. Of the survey responses received, 10 were partial completions for a completion rate of 99.3 percent.

The basic frequency for all responses are provided below.
Response Counts

| Completion Rate: | 99.3\% | Complete | 1,451 |
| :---: | :---: | :---: | :---: |
|  |  |  |  |
|  |  | Partial | 10 |
|  |  |  | 1,461 |
|  | Count | Percen |  |
| Complete | 1,451 | 99.3 |  |
| Partial | 10 | 0.7 |  |
| Total | 1,461 |  |  |

Do you own a residence located within 1/4 mile of the Beaver Lake shoreline?

| Value | Percent | Count |
| :--- | :--- | :--- |
| Yes | $69.5 \%$ | 980 |
| No | $30.5 \%$ | 430 |
|  | Total | 1,410 |

Referencing the map below, please mark the lake zone number indicating where along the shoreline this residence is located.

| Value | Percent | Count |
| :--- | :--- | :--- |
| Zone 1 | $26.2 \%$ | 252 |
| Zone 2 | $17.5 \%$ | 169 |
| Zone 3 | $32.0 \%$ | 308 |
| Zone 4 | $16.8 \%$ | 162 |
| Zone 5 | $7.5 \%$ | 72 |
|  | Total | 963 |

What are the City, State, and Zip Code of your permanent residence?

Which of these statements best describes your preference for the number of boats on the lake?
Please refer to your last outing on the lake when answering this question.

| Value | Percent | Count |
| :--- | :--- | :--- |
| I saw ABOUT AS <br> MANY boats as I <br> wanted to | $72.5 \%$ | 1,016 |
| I saw MORE boats <br> than I wanted to <br> see | $11.3 \%$ | 158 |
| I saw FEWER boats <br> than I wanted to <br> see | $16.2 \%$ | 227 |
|  | Total | 1,401 |

Please review the boating conditions depicted in the photos below. Which photo shows the maximum number of boaters you could see at one time on Beaver Lake without thinking it was too crowded?

What is your gender?

| Value | Percent | Count |
| :--- | :--- | :--- |
| Male | $80.1 \%$ | 1,142 |
| Female | $19.9 \%$ | 283 |
|  | Total | 1,425 |

What is your age?

| Value | Percent | Count |
| :--- | :--- | :--- |
| $18-24$ | $0.2 \%$ | 3 |
| $25-44$ | $11.9 \%$ | 171 |
| $45-54$ | $22.0 \%$ | 317 |
| $55-64$ | $31.8 \%$ | 457 |
| $65+$ | $34.1 \%$ | 490 |
|  | Total | 1,438 |

Please indicate the highest level of education you have completed.

Which category best represents your annual household income (before taxes) last year?

| Value | Percent | Count |  |
| :--- | :--- | :--- | :--- |
| Less than $\$ 24,999$ | $1.3 \%$ | 19 |  |
| $\$ 25,000$ to $\$ 34,999$ | $2.2 \%$ | 31 |  |
| $\$ 35,000$ to $\$ 49,999$ | $4.4 \%$ | 63 |  |
| $\$ 50,000$ to $\$ 74,999$ | $10.2 \%$ | 145 |  |
| $\$ 75,000$ to $\$ 99,999$ | $11.4 \%$ | 162 |  |
| $\$ 100,000$ to $\$ 149,999$ | $15.4 \%$ | 219 |  |
| $\$ 150,000$ to $\$ 199,999$ | $11.8 \%$ | 167 |  |
| $\$ 200,000$ or more | $24.0 \%$ | 341 |  |
| Do not wish to answer | $19.2 \%$ | 273 |  |
|  | Total | 1,420 |  |
|  |  |  |  |

## B. 4 User Survey Discussion and Limitations

To characterize non-response rates, the response to Question 8 - Was this Boat Transported to the Lake, Kept at a Marina on the Lake, or Rented/Borrowed - was checked against the sampled households. Considering the universe of 3,473 private boat dock owners, 814 respondents indicate they access the lake via their private or community boat dock (23 percent representation). Of the 1,736 marina slip renters, there were 411 respondents that indicated that they access the lake via their boat, which is kept at a marina on the lake ( 24 percent representation). Responses from users who access the lake via
public launch sites or other categories (rented, borrowed, or from a resort) is likely underrepresented, with only 192 responses. This category of users is difficult to quantify and target. Responses by access type were checked and responses are noted where there are significant differences between groups of users (slip renters, public launch users, private/community dock owners).

Non-response count for any question ranged between 41 and 60, or under 5 percent, with a few notable exceptions. The question asking for the primary zone where boating activities occurred had a nonresponse rate of 5.2 percent. No difference was measurable between those completing the survey online or via paper mail back. The slightly higher nonresponse rate is likely due to respondents simply not knowing or possibly that they perceived their use as equally distributed between two or more zones. The question asking for respondents to indicate the date of their last outing had a non-response response rate of 8.9 percent. This is likely because the survey was administered in October and the respondents simply could not identify the date.

[^0]:    ${ }^{1}$ Note that these numbers were estimated prior to completion of the watercraft and facility census and thus are only estimates and may not correspond to the counted values.
