DATA REQUIRED BY THE PRIVACY ACT OF 1974

AUTHORITY The Rivers and Harbors Act of 1894 as amended and supplemented (33 U.S.C.1)

PRINCIPAL PURPOSE Provide the Corps of Engineers with information for contact of the responsible person applying for and/or receiving a Shoreline Management permit. The description of the activity is needed to assure conditions of the permit requirements are met.

ROUTINE USES The information on this application is used in considering the issuance of shoreline management permits on Corps of Engineers projects. This information is collected and maintained at project offices and is used as a basis for issuing permits. It provides auditing information for this program, which has financial involvement.

DISCLOSURE Disclosure of information is voluntary. However failure to provide the requested information will preclude the issuance of a Shoreline Management Permit.

---

CONDITIONS OF PERMIT FOR VEGETATION MODIFICATIONS ON PROJECT LANDS BY ADJACENT LANDOWNERS, NORFORK AND BULL SHOALS LAKES.

1. The following conditions will apply to all requests from adjacent landowners to perform vegetation modifications on public land adjoining their property. The purpose of these conditions is to enhance wildlife propagation, preserve the aesthetic value of the public lands and prevent erosion and degradation of the shoreline.
2. Adjacent landowners desiring to make shoreline improvements must obtain a permit from the Operations Manager before removing vegetation, mowing or making any other alterations to public property. Permits will not be granted to individuals for use of lands allocated as public recreation areas, including their buffers, or on lands allocated as prohibited access areas. Cost for the permit will be \$10.00 for a five-year period. No work shall be performed outside the limits of the permit area as shown on the attached sketch.
3. Pedestrian access paths not to exceed four feet in width, measured at their widest point(s), may be constructed to the lake shoreline. The path must follow a meandering route to prevent erosion and to avoid the need for removal of trees and vegetation. The use permit does not convey the right to construct any structures (steps, bridges, etc.) in connection with the path.
4. Construction of paths and other shoreline improvements will also be subject to the following conditions:
  - a. Only hand-operated tools and non-commercial lawn mowers may be used. The use of heavy equipment, such as tractors and bulldozers, is not permitted.
  - b. Only dead or diseased trees, previously inspected by the Operations Manager or his representative, may be cut. No burning by individuals will be allowed on project lands.
  - c. Flowering trees or shrubs such as Dogwood, Redbud, etc. may not be cut regardless of their size.
  - d. Healthy trees, larger than two inches in diameter (measured at ground level), may not be cut. In certain cases the Operations Manager may restrict the cutting of trees less than two inches in diameter, if it is determined that it would create an erosion problem or similar adverse impact.
5. The limits of vegetation modification will be dependent upon the proximity of habitable structures to the government boundary. An analysis of wildfire hazard will be conducted before issuing vegetation modification permits for fire protection. This hazard analysis rating is adapted from the National Fire Protection Agency (NFPA) standard 299. The actual limits of vegetation modification in each case will be determined by the Operations Manager, or his representative, and defined on the shoreline use permit.
6. The permittee will delineate the government property line in a clear, but unobtrusive manner approved by the Operations Manager and in accordance with the shoreline management plan.
7. All lands covered by this permit will remain open at all times for use by the general public.
8. Permit is non-transferable, therefore, upon change in ownership a permit will be considered in accordance with the criteria contained in the Shoreline Management Plan in effect at that time.
9. All Federal, State and Local Laws apply to the conditions of this permit.
10. The resource manager or his/her authorized representative shall be allowed to cross the permittee's property, as necessary, to inspect facilities and/or activities under permit.
11. The resource manager or his/her authorized representative shall be allowed to cross the permittee's property, as necessary, to inspect facilities and/or activities under permit.
12. Special Condition
  - A. I certify that all facilities and activities covered by this permit are in and will remain in compliance with all Corps of Engineer's regulations and policies.
  - B. By signing this application I certify that I have been informed and agree that any violation of Title 36, Code of Federal Regulations, especially parts 327.2(c) Operation of a vehicle off of an authorized roadway (INCLUDING THE OPERATION OF AN ATV ON A PERMITTED PEDESTRIAN PATH OR ALONG THE LAKE SHORELINE) or 327.14 Destruction of public property (CUTTING, PRUNING OR POISONING TREES OR UNAUTHORIZED MOWING OR GOVERNMENT PROPERTY) may result in revocation of this permit in part or in whole.
  - C. Maintenance of pathway is authorized utilizing hand tools only. Motorized vehicles associated with maintenance activities are prohibited. The existing gravel surface may remain until such time it deteriorates and reverts back to natural surface. Additional gravel may not be added to the paths surface.
