MULTIPLE RESOURCE MANAGEMENT LANDS

LOW DENSITY RECREATION
--Lands intended to be developed or are currently developed for intensive recreational activities for the visiting public including day use areas and/or campgrounds.
--These could include areas for commercial concessions (marinas, comprehensive resorts, etc.), and quasi-public development.
--No new future public requests for shoreline use permits will be granted based upon guidance received to keep private/community use separated from commercial use activities.

ENVIRONMENTALLY SENSITIVE
--Areas where scientific, ecological, cultural or aesthetic features have been identified.
--These areas must be considered by management to ensure they are not adversely impacted.
--Typically, limited or no development of public use is allowed on these lands, however public use which does not adversely impact these lands (fishing, hunting, wildlife viewing, photography, etc.) is allowed.
--No agricultural, grazing, or mowing for residential/commercial uses are permitted on these lands unless necessary for a specific resource management benefit, such as prairie restoration.
--There are public utilities (i.e. power lines, roads, etc.) that may be found in ESA land classifications; this can be taken into account under the "limited development for public use" in ESA.
--Future right-of-ways for public utilities in ESA will be considered and reviewed on a case by case basis.

PROJECT OPERATIONS
--Lands required for the dam, spillway, switchyard, levees, dikes, offices, maintenance facilities, and other areas that are used solely for the operation of the project.

DESCRIPTION OF MASTER PLAN

LAND CLASSIFICATIONS

HIGH DENSITY RECREATION
--Lands intended to be developed or are currently developed for intensive recreational activities for the visiting public including day use areas and/or campgrounds.
--These could include areas for commercial concessions (marinas, comprehensive resorts, etc.), and quasi-public development.
--No new future public requests for shoreline use permits will be granted based upon guidance received to keep private/community use separated from commercial use activities.

LOW DENSITY RECREATION
--Lands with minimal development or infrastructure that support passive public recreational use (e.g. primitive camping, fishing, hunting, trails, wildlife viewing, etc.).
--Low Density Recreation lands may contain Limited Development Areas within the context of the Shoreline Management Plan (SMP) (Note: Distribution of shoreline areas to Limited Development status requires revision of the SMP).

WILDLIFE MANAGEMENT
--Lands designated for stewardship of fish and wildlife resources.

VEGETATIVE MANAGEMENT AREA
--Lands designated for stewardship of forest, prairie, and other native vegetative cover.

FUTURE OR INACTIVE RECREATION AREAS
--Areas with site characteristics compatible with potential future recreational development or recreation areas that are closed. Until there is an opportunity to develop or reopen these areas, they will be managed for multiple resources.
--Currently no lands on Greers Ferry Lake are classified as Future or Inactive Recreation Areas.

DESCRIPTION OF SHORELINE MANAGEMENT PLAN

SHORELINE ALLOCATIONS

PUBLIC RECREATION AREA
--Public Recreation Areas are those areas designated for commercial concessionaire facilities, Federal, state or other similar public use. No private shoreline use facilities and/or activities will be permitted within or near designated or developed public recreation areas. The term "near" depends on the terrain, road system, and other local conditions, so actual distances must be established on a case by case basis in each project Shoreline Management Plan.

LIMITED DEVELOPMENT AREAS (LDA)
--Limited Development Areas are those areas in which private facilities and/or activities may be allowed consistent with Title 36 327.30.
--Modification of vegetation by individuals may be allowed only following the issuance of a permit if the resource manager determines that the activity will not adversely impact the environment or physical characteristics for which the area was designated as protected. In making this determination the effect on water quality will also be considered.

PROHIBITED AREAS
--Prohibited Access Areas are those in which public access is not allowed or is restricted for health, safety or security reasons. These could include hazardous areas near dams, spillways, hydro-electric power stations, work areas, water intake structures, etc.
--No shoreline use permits will be issued in Prohibited Access Area.
