

DESCRIPTION OF MASTER PLAN LAND AND WATER CLASSIFICATIONS

HIGH DENSITY RECREATION

--Lands intended to be developed or are currently developed for intensive recreational activities for the visiting public including day use areas and/or campgrounds.
--These could include areas for commercial concessions (marinas, comprehensive resorts, etc.), and quasi-public development.

PROJECT OPERATIONS

--Lands required for the dam, spillway, switchyard, levees, dikes, offices, maintenance facilities, water intakes, and other areas that are used solely for the operation of the project.

LOW DENSITY RECREATION

--Lands with minimal development or infrastructure that support passive public recreational use (e.g. primitive camping, fishing, hunting, trails, wildlife viewing, etc.).

NO ALLOCATION

--Lands currently not classified which will need to be classified during update of Master Plan.

WILDLIFE MANAGEMENT AREA

--Lands designated for stewardship of fish and wildlife resources.

RESTRICTED (WATER)

--Water areas restricted for project operations, safety, and security purposes.

ENVIRONMENTAL SENSITIVE AREA

--Areas where scientific, ecological, cultural or aesthetic features have been identified.
--These areas must be considered by management to ensure they are not adversely impacted.
--Typically, limited or no development of public use is allowed on these lands, however public use which does not adversely impact these lands (fishing, hunting, wildlife viewing, photography, etc) is allowed.
--No agricultural, grazing, or mowing for residential/commercial uses are permitted on these lands unless necessary for a specific resource management benefit, such as prairie restoration.
--There are public utilities (i.e. power lines, roads, etc.) that may be found in ESA land classifications; this can be taken into account under the "limited development for public use" in ESA.
--Future right-of-ways for public utilities in ESA will be considered and reviewed on a case by case basis.

OPEN RECREATION (WATER)

--Those waters available for year-round or seasonal water-based recreational use.
