What are the most important factors that affect your opinion?

The Corps should not create a 50-foot vegetative management area. This would prevent any mowing, etc. within 50 feet of the 915 mark – regardless of having a history of mowing, trimming, etc.

The Corps should not take any action that would prohibit the use and development of existing boat dock or "red line" zoning.

The Corps should not take any action that would negatively affect real estate values of properties around the lake. Any action that would limit property owner's ability to protect their lake view and/or access would devaluate their property values and our economy.

Other Comments

Actions as proposed would decrease interest in Table Rock Lake and the value of property in the entire area of Southwest Missouri and North Arkansas. The Corps should not use "clean water" as an excuse for trying to make Table Rock like many other projects, i.e., Bull Shoals, Norfolk.

Everyone wants clean water and to protect the environment, the same is being accomplished without returning the area into a wilderness.

What are the most important factors that affect your opinion? _

The Corps should not create a 50-foot vegetative management area. This would prevent any mowing, etc. within 50 feet of the 915 mark – regardless of having a history of mowing, trimming, etc.

The Corps should not take any action that would prohibit the use and development of existing boat dock or "red line" zoning.

The Corps should not take any action that would negatively affect real estate values of properties around the lake. Any action that would limit property owner's ability to protect their lake view and/or access would devaluate their property values and our economy.

Other Comments

Actions as proposed would decrease interest in Table Rock Lake and the value of property in the entire area of Southwest Missouri and North Arkansas. The Corps should not use "clean water" as an excuse for trying to make Table Rock like many other projects, i.e., Bull Shoals, Norfolk.

Everyone wants clean water and to protect the environment, the same is being accomplished without returning the area into a wilderness.

What are the most important factors that affect your opinion?

Water quality and visual appeal through limits on dock construction and regulation of loud boats to increase auditory appeal in line with an atmosphere of the lake as a pristine natural environment.

Other Comments

Most residents and visitors state that they chose to come to this lake because of the clear, calm water, noncongested boating, and the unspoiled scenery along the shoreline. This scenery is rapidly decreasing. Developers are aware that property is in demand where the view is of the lake and the forests, not many scattered docks. Examples with such views are at f^{US Privacy Act 5 USC 552 (b)} especially in US Privacy Act 5 USC 552 (b) Road, where 5 large homes have been under construction during the last six months in a half mile area. If the abundance of the lake's treed shoreline is marred by increasing docks, the special appeal of this lake decreases, in turn negatively affecting economic development. Visitors will then choose pristine Beaver or Bull Shoals Lake for vacation homes.

Thus my suggestion to continue the lake's appeal is Alternative 2, with the 50 ft Vegetation Management area. But do not allow many new 20 slip docks in cove after cove that will decrease this appeal; instead encourage the commercial areas to build dry boat storage facilities near the lake or build them near Army Corps Parks with access ramps. The Corps could collect a fee from these concessions to assist in lake improvement costs. The cost to the individual who only uses their boat 3-5 times per year, which is true for many in our area at Overlook, would be considerably less than the cost of purchasing a slip.

All residents and visitors must work to keep the quality of the lake high by decreasing runoff, and water and air pollution; do not allow homeowners to mow grass completely down to the water's edge, and control the decibel level of the larger speed boats, many of which have a 'captain's choice switch' but prefer not to use it. The Army Corps should strictly enforce their existing regulations.

US Army Corps of Engineers Little Rock District
