What are the most important factors that affect your opinion? We think it is important to allow moderate economic growth in order to keep the area vibrant
We are strongly apposed to the 50 ft. Vegetative Management area Other Comments We discussed the 50 ft vegetative management area with 3 different Corps employees & Received 3 different answers.
We moved to our home less than a year ago and paid a premium to obtain a lot that could be mowed down to the water. We do not feel it is fair to impose. The so foot vegetative management Rule.
We feel there will be negative economic consequences if no increase in low-density Recreational area is allowed.
thank you for giving us the apportunity to express

What are the most important factors that affect your opinion? vegetation buffer is our main concern. The video says up front, this is not to address Regional water quality, Shore line management, nor water level management, Yet the basis of some of the conclusions water quality is one of the factors given for the vegetation buffer. I find it interesting that per the video the public was concerned about, water quality, safety and recreation. Hard pressed to find anyone that would not agree. From my conversations with Congressman Long's office the focus groups didn't have the vegetation buffer presented until the end and the proposal as presented was not supported by the groups.

To apply the vegetation buffer yard at the 915 elevation makes no sense due to the fact the lake shore line varies to greatly in topgraphy. The 50 ft could be a relatively small area on a steep bank vs many feet on a long point. What is the purpose? the plan was not supposed to address water quality then buffer is used as a reason for the buffer. You can't have it both ways. The area where I have home is prone to be hammered with debris after flooding events, not just trees limbs etc, old tires, trash that looks like it comes from a land fill. If the shore is allowed to grow into brush it makes it nearly impossible to clean up the trash. We have hauled loads of trash off the shore trying to help keep the lake clean, each year we over seed the slopes to keep erosion to a minimum. By maintaining the shore line with grass to act as a filter to protect silt from intruding. In my particaluar case, small children play on the gravel bar/grassy areas near the lake, if this area is allowed to grow up, snakes will pose a risk to small children grass trimmed neatly will be a far side better at achieving the desired goals that everyone wishs, clean, safe water for recreational uses, just as the video says. One more issue that distrubs me greatly about the video. The lady that says we don't want to be another lake of the Ozarks, I don't either, however I feel that her speech attempt to infer that we we don't do this, we will be another Lake of the Ozarks. Even though claims that she lives in the area, she must be ignorant of the existing rules of the Corp of Engineers. The current mortorium on the docks seems a bit much too, as it has hurt local business that make their living building and replacing old worn out docks on the lake. A policy was in place previously and it worked, use it and stop penalizing those that wish to improve or replace the docks. I urge the plan to allow property owners to take care of the shore line in a fashion that allows those areas to be taken care of, addressing the problems previously outlined above. No funding, makes me wonder why the effort without knowing where the money would come from, maybe Congressman Long will know.
