RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am especially concerned about safety issues at the lake and how the docks play a part in this process. I believe that removing NO WAKE BUOYS would be a HUGE MISTAKE -- they play a very important role in keeping speeding boats away from docks and folks that might be swimming nearby or just bringing a

20170901_Bohmont_E-WA

boat out of a slip. Without the NO WAKE BUOYS there would be significant increase danger to 'life and limb' and also added wear and tear on docks that would be unnecessary.

IN ADDITION -- NOT ALLOWING CARTS to be on corps land -- would eliminate many from being able to enjoy the lake, their docks and to get to boats, as many folks have walking and health issues that would preclude long walks on the steep hills near the lake.

THIRD - not allowing tubes, fishing equipment, chairs, etc. to be stored on a dock would again nearly eliminate their use as many folks could not bring these items each time they wanted to visit the dock and enjoy the lake.

FOUR - Removing power lines from docks and converting to alternative energy is simply not necessary, nor is it in any way financially reasonable. There has never been an electrocution problem at Table Rock Lake and the existing inspection requirements are very adequate to continue this fine record.

DON'T TRY TO FIX SOMETHING THAT DOES NOT NEED FIXING -- SIMPLY FOCUS ON ITEMS THAT ADD REAL VALUE TO ALL INVOLVED. REMEMBER, THAT THE PEOPLE FUNDING THE CORP OF ENGINEERS ARE THE SAME TAX PAYERS THAT OWN PROPERTY AND DOCKS ALONG THE LAKE -- LETS KEEP THE QUALITY LAKE WE HAVE. The existing guidelines have done a great job creating the wonderful lake as it exists today -- and also will do so in the future.

One area not mentioned - would be to be more concerned about the hundreds of septic tanks along the lake that are not operating properly and require that they be fixed, along with smaller towns that have improper 'runoff' into the lake or into streams and rivers that dump into the lake !!!

While other of the 'restrictive policies' seems really unnecessary -- these Four items that I mention seem to be totally counter to lake safety, dock safety, personal safety and the enjoyment of the lake. The

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Eldon Bohmont

Re: Proposed Shoreline Management Plan for Table Rock Lake

To Whom it May Concern:

The residents of the Mano Community, located within walking distance of Big M Park, request the Corps leave well enough alone.

There are already many restrictions on use of the lake, and many more on homeowners. Many residents who live in the Mano Community have had property for over 20 years. They have worked to improve their small portion of lake front, thus promoting beautification of the shoreline for everyone.

Yes, some of us are newer members of the community and have our work cut out for us from the last flood. Just getting rid of all the debris along the shore is not an easy task. Then to make matters worse, one isn't supposed to do any cleaning, burning unless OK'd by the Corps. One would think the Corps would be grateful for all the help, but it seems that is not the case.

The new plan is very restrictive. Dock owners have spent tens of thousands of dollars just to have a slip. They have a cupboard for the "toys". Why is that so wrong? Of course people drive vehicles to the docks. Why not. You would. The lake was to have been for "the people", but somewhere, somehow, that has all been forgotten.

The new management plan even gives the Corps the right to limit who can and who can't use the lake.

The "silent majority" is requesting, leave the present management plan in place. It has enough restrictions. Please put the new plan in the trash where it belongs.

Thank you for listening,

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Putting in solar power would be cost prohibitive to everyday citizens who don't make an immense amount of money.

The restricts we have on the lake are sufficient and the last thing we need is more government intervention.

20170901_Owens_A-WA

Leave the policy as is.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Alexa Owens

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I feel that the proposed changes would make the lake much more dangerous. Please do not jeopardize the safety of our citizens ,especially the children. This is a very ill-conceived plan!

20170901_Preuss_D-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Don Preuss

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The impact of these changes would be both a financial and economic disaster both for slip owners and people who come here to enjoy the lake. What is in place now is sufficient and adequate. Electricity will always be needed for lighting, heaters, lifts, etc. I don't believe solar lighting is capable of handling

this. We as boat and slip owners are already supporting the Corp with fees, permits, license, etc. Leave well enough alone.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Carol Reynolds

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The proposals listed are draconian. They have the effect of prohibiting many lake property owners of managing and using their own property. There is no good reason to make these changes and they place a hardship on nearly all property owners in the area. I am strongly opposed to this over regulation of property that belongs to the people. Do not do this.

20170902_Casey_K-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Kathy Casey

We have been residents here for 15 years. The current plan is working well and not over crowding the lake. The water clarity has improved over the last few years unlike our Lake of The Ozarks peers. Please table these changes without further discussion from the current residents that care for the lake and its economic future as well as the environment.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170902_Kirby_J-W

I am assuming that solar requirements for the lights on the docks will have to have battery backup, I could see where this would be present a contamination/pollution issue with batteries if they come into contact with water. I am not in favor of this change.

With respect to the number of docks/slips currently on the lake, I feel that lowering or keeping current limit of docks/slips will protect the environment of Table Rock Lake. I believe the corp has managed the lake and surrounding water shed very well to this point. I don't wish to exclude people from using the lake but more is not always better.

We were all taught as kids if it is not broken, do not try to fix it. This is a prime example of government bureaucracy trying to get their dirty little hands into everyone else's business. Leave well enough alone and stop trying to change things that do not need to be changed before we end up with another twenty five dollar light bulb that used to cost twenty five cents scenario. Your proposal is ludicrous at best and

20170902_Priest_K-WA

out right illegal and detrimental at it's worst. Please do the right thing and stop these proposed changes and maintain the current Shoreline Management Plan in place.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Keith Priest

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The undertaking of changing all docks over to Solar Power in 10 years would be a Major financial burden on the Slip owners and would have a major impact on the companies that now install Solar Power . I believe solar Power is good but 10 years is not right . I feel that the vegetation rules are good where they are . Changing the rules to five years between dock changes is to long , I could see maybe 2 year

20170902_Schad_G-WA

rule . In regards to fishing equipment , tubes and etc being outlawed on docks is going to far . I understand about keeping docks looking good and not like a junk yard . More rules may be needed but not total outlawed . If boats with porta - potties and holding tanks are outlawed on the lake then a good percent of boats won't be allowed on the lake . If people are dumping waste then more better rules are needed but to outlaw the boats is wrong . In regards to outlawing all Golf Carts , ATV , etc from Corp Property would put a major burden on the high quantity of older retired people having access to there boat dock , There should be rules allowing for passenger transporting to the dock but not OUTLAWING . Driving to dock location and then back should be allowed but would agree that NO trail riding that would destroy natural should be . To limit the amount of boats on the lake (give me a break) , so I guess the Corp does not want progress in the area . The government is supposed to be by the people for the people . I see the new Corp plans to be by the people of the government for them selves . I think you the Corp of Engineers should go back to the table and rethink your new rulings

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Gary Schad

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170902_Smith_C-W

Dear Corps of Engineers,

I do not feel that any changes to the current plan are necessary. I have been using Table Rock lake for over 50 years for recreational purposes, this is a wonderful place for my family to use for boating. If I

20170903_Bach_R-WA

had to ask the Corps to work on area of the lake it would be water quality. The water quality has deteriorated in the last ten years.

Thank You

Robert M. Bach

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Robert Bach

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170903_Jagiella_U&J-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I object to not being able to store all of my fishing equipment or boat equipment in the dock boxes.
I object to not being able to use my ATV to go to my dock.
Since when does the Army have the authority to control private citizens from using a public Lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

John Lawrence

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I object to the requirement of solar or wind power for all docks. This requirement not comes NOT EVEN five years after the requirement of electrical inspections and quick disconnects for docks that your staff could NOT answer questions regarding their installation or exactly what was required. I would assume that this new requirement is so that you can further regulate out of existence all private docks and force

20170903_Nichols_J-WA

instead the use of commercial docks only. It seems insane that you also wish to regulate the storage of fishing gear on a dock. Why? Is the Corps of Engineers going to work with all the local municipalities surrounding Table Rock so that larger garages and more storage sheds can be built? The building of more storage on land will exasperate the run off situation into the lake. The insanity of your proposed new rules slaps every boat and dock owner with extra financial strain. Is the Corps of Engineers getting a kick back from some solar company??

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Janet Nichols

Subject: [EXTERNAL] comments on plan

We have boated on Table Rock for 20 years, have owned a permanent home on the waterfront in Kimberling City, Overlook Subdivision for 13 years, and also own a boat in a slip and 2 seadoos in a slip.

My opinion on the Master Plan:

1. Community docks should not be as low as 2 slips, only allow new docks of 10-20 slips
2. Do not require present NO Wake buoys to be removed. Many swim from their docks and this warns boaters to slow down and be safe when a buoy is visible. The signs on the dock saying NO Wake will not make the same impression on boaters, especially the weekend boating visitors to the lake.
3. Solar panels for electricity should not be required on present docks. To require them on newly constructed docks may be a good suggestion.
4. Do not allow boat access (lake carrying capacity) to increase 60%, promote a lower goal. Increasing the number is the aim of Real Estate sales and development. We do NOT need another Lake of the Ozarks! Allow for some additional slips, working on 10-20% increase in the next 20 years.
5. I agree with the vegetation permits being non-transferable and an aim to let the vegetation along the lake go back to the natural state, other than paths that are now monitored by the Army Corps
6. Boats with Porta-Potties should be allowed on community docks. There are regulations in place that limit dumping and establish dumping stations. Many new popular boats of 24-28 ft length are automatically equipped with Porta-Potties, but they are never used. Owners will not abuse the regulations regarding dumping.
7. Floating mats, wake boards, Stand UP Paddle boards, tubes and chairs should be allowed on a dock if they are securely tied down. The placement of them is usually negotiated by the present slip owners and dock board. Fishing equipment should be kept in individual dock storage compartments.

Thank you for making and keeping Table Rock Lake a wonderful asset to the Ozarks.

I am opposed to all your proposed Shoreline Management Plan for Table Rock Lake. I believe that your mission is the preservation of the Table Rock Lake shoreline. If this is the case, instead of implementing all these new unnecessary regulations why don't you just manage the lake level better to prevent shoreline erosion? I have owned a home on Table Rock Lake for 27 years. In the lakes 60 years or so

20170903_Yuhas_J-WA

history, the lake level has reached historic high levels 3 times in the last 10 years. The highest level prior to these 10 years was when the lake was initially filled. Allowing the lake levels to rise to such high levels so many times in the last 10 years has resulted in the death of many shoreline trees and plants. These denuded shorelines were then susceptible to runoff and further erosion from subsequent rains. Even today, the bare shorelines where NO DOCKS OR HOMES EXIST testify to the poor coordination of lake level maintenance. You may say you can not control the amount of heavy rainfall, but I have closely monitored the lake levels prior, during and after these recent 10 year historic rains/lake levels. You have ALWAYS been slow to allow egress of lake water from the damn until it is too late and then you justify your right to raise the lake levels because you have the right to do so. Your mismanagement in planning for lake level rises has contributed the MORE SHORELINE EROSION than any boat docks or home construction. THE MAJORITY OF THE TABLE ROCK LAKE SHORELINE HAS NO BOAT DOCKS/HOMES and the barren 15-20 feet of shoreline exposing the dirt and allowing for further erosion is your responsibility and the fault lies with you. Enacting stricter boat dock/shoreline regulations will not undo the damage your lake level mismanagement has done to the shoreline of Table Rock Lake. Don't blame the recreational boat dock/lake home users for shoreline erosion and hide behind your mistakes with stricter regulations. Your proposed regulations are unjust and unnecessary!!!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

John Yuhas

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170904_Breazzeal_M-W

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Everyone understands the need for some regulations around the lake. I have and will continue to attempt to get someone's attention in Jefferson City to the fact that the Corps is out of control. I live a half mile from the Dam and most of us that are in the area would like to know the purpose of the huge building full of offices at Dewey Short, the need for all the RV sites near the Dam for the retired Corps to

20170904_Cash_Tra-WA

stay for free. Along with many other stupid decisions they make around the lake, yet can not seem to get anyone to properly repair the driving service of the Dam. Maybe if there weren't so many unnecessary salaries and free RV sites you could afford repairs and maintenance on the small campgrounds that have been closed simply because you don't want to maintain them. Everyone's watching you now, time to do your job, give these areas back to the people that are paying for them instead of locking us out of them because you think it's yours! I like the statement at the end about helping you protect our rights to use these areas, that's funny, trouble is your not your locking us out. And then when we do want access to some areas you charge us to enter the property that our taxes have paid for, rediculous!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Tracy Cash

Army Corp Engineers has always been an far over reaching entity. ALL Corp properties should be openly accessible to all US citizens free of charge immediately as OUR tax dollars for these projects and the salaries of those who built them. ANYTHING the corps of engineers does to this lake should be at the

20170904_Cash_Tre-WA

discretion of those who live there and use it most frequently. The corps DOES NOT have MY permission to do anything to this area without that approval.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Trevor Cash

As a lakefront property and dock slip owner, I am concerned about the access to our dock. It is hard enough to walk down the rocky slope as it is. Please don't take away our parking lots next to the docks. Also, we need reliable electricity to power dock lifts and lights for nighttime use. If we have several cloudy days, solar power will not provide the needed electricity. We also need the no-wake bouys that

20170904_Heine_N-WA

keep the speeding boats out away from the docks. Swimming by the docks will become very hazardous if the bouys have to be removed. A sign on the dock will not be adequate.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Nancy Heine

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Do not change the shore management plan!!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170904_Meyer_K-W

Sincerely,

Kristina Meyer

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Dear Sirs: I am opposed to resorting to solar or wind power for my dock. I am sure you are aware that Table Rock Dam produces electricity without relying on fossil fuels or creating pollution. I have tried solar on my gate at the lake house and it did not work. Not enough sunlight in this area for consistent electricity. I also agree with the above comments, Wayne B. Miles

20170904_Miles_W-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Wayne Miles

I think improvements need to be made I don't feel this is the correct way to do it. The water has become nasty dirty. There used to be programs or slogans to remind people to keep the water clean such as DON'T DO IT IN THE LAKE, KEEP IT CLEAN. While those slogans is not a cure all it is a constant reminder that all of us needs to help. There are docks in need of repair & updating the ones that need it needs to

20170904_Moxham_D-WA

be more closely watched & non renewal & removed if not kept up to reasonable maintenance. Docks with electricity needs to be renewed & inspected more often, Thank you Dale

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Dale Moxham

-I object to financial hardships of removing electricity from the lake. If it works leave it alone. Table Rock lake is a beautiful lake. We don't have any problems with the way it is. We don't need any more laws pertaining to shore line or Boat docks. I do believe Docks should be maintained. If they are

20170904_Rye_W-WA

not maintained. They should be repaired and brought up to standard. If not, they should be removed.
We do need no wake buoys at the docks.

The more laws you put into effect, the more enforcement you will need. Like I said Table Rock is a beautiful and fun lake, Leave It as it is.

If you want to do something helpful. Alcohol seems to be the biggest problem. All adds lead to loading your coolers with beer so you can have a good time and now there are hard liquor and drugs. Please get this under control before you try to make any new laws we don't need.

Thanks for reading my concerns,
Bill Rye

I am encouraged that the public's comments during the process have been acknowledged by the Corps.
Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

William Rye

This sounds like another disaster created by the Army Corps of Engineers. People probably ought to leave and let the corps have it and pay for it themselves. When these lakes in Mo. were first put in they were marketed as a place to take your family for swimming, fishing, and fun. They hardly reflect that anymore, It is all about the Corp and has been for many years. People need to leave and quit paying for

20170904_Vaughn_S-WA

the Corps lakes! Since they really don't belong to the people. That was a ploy to fulfill their agenda and get the people of Mo. to pay for it. Their management skills leave a lot to be desired. You can't even go to a state park there and swim for free anymore. What is the point? Let them have it and let them pay for it!!! What a rip-off. The old timers knew there would be population growth but I don't remember them saying "You are going to pay to put this in and then we are going to charge you to use it and let big businesses trash it so they can generate more income for the government and the Corps, I don't go there anymore there are too many places that are free , beautiful, and don't involve the Corp regulations! So be smart people MOVE! Sincerely Sally Vaughn

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Sally Vaughn

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Did ANYBODY with half a brain even READ the crap you want to do? If they DID they would REJECT this grand plan to DESTROY every thing good about the lake and put a bag over their head to HIDE the shame! This crap is worst than the bright idea of having the MO State "HIGHWAY" Patrol on our lake harassing boaters for NO good reason other than make their quota of tickets. I see NO highways on the

20170904_Waghorn_K-WA

lake! People go boating to get away from stress like officer Green inflicts on people for no good reasons, ever think about the Sheriff dept who are accountable to the people? Who ever drafted this crap up really needs to put down the crack pipe and go get a job flipping burgers.

Best Regards to the people with a brain who oppose this.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Kevin Waghorn

Don't change anything else. It was a mistake to make everyone stop mowing the shore line where there people living. It looks terrible.

As the Dock Captain of a 12 slip dock, I would like to share the two major concerns about the proposed shore line management plans, First, the requirement for converting to solar power is a major expense that is totally unnecessary, If you want to require new construction docks to have it that would be something to consider.

Second, the removal of no wake buoys creates a serious safety hazard. On our dock we have a lot of seniors(grand parents) and small children swimming off of the lakeside of our docks. If there are no "no wake" buoys the waves from speeding boaters could cause serious injury to these people.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I have been using Table Rock Lake facilities for over 50 years. The Corps has done a great job of working with the residents and visitors to Table Rock to maintain the integrity of the lake and the use for which it was intended. Please do not allow these draconian measures to be implemented. The economics of these rules will be devastating. The lake has thrived, and will continue to do so because the local

20170904_Westerman_E-WA

economy will mandate it on its own. Branson and the local area will only survive if the lake is allowed to survive and service the locals and visitors.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Ed Westerman

Please do something to manage the Hugh wakes caused by the increasing numbers of large boat wakes caused by ocean ready boats. Not only are they dangerous for smaller boats, their wakes damage docks and shorelines.

- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I Believe that all dock owners on Tablerock lake do their utmost best to make sure that their docks adhere to the current dock rules and regulations. I DONOT understand the need nor the justification of these new regulations. If it is not broken why are we changing our regulations?

20170905_Carpenter_J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Judy Carpenter

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The withdrawal of electrical service is going to be a substantial detriment and reduction in value of the docks which are currently on Table Rock Lake. The use of solar or wind generated power will be totally insufficient to accommodate electrical use on a dock. Solar panels create additional weight to the top of a dock which would make them top heavy susceptible to damage from wind and in particular

20170905_Childers_D-WA

accumulation of snow and ice. Solar electrical panels are only feasible if you have large bank of batteries and inverters to convert the power. This would add additional weight to the dock. In addition it would place a large amount of lead on the dock and batteries contain a large amount of acid. If a storm or other disasters resulted in damage to the dock it could result in large amount of hazardous material going into the lake. I have been involved in litigation involving residential turbines which generate electricity. These are basically automobile alternators with a propeller. They generally produce about 50% of the electricity which they are rated for. In addition individuals are not going to have adequate electricity to their boats even in the best case scenario. Individuals are going to run generators for electricity for their boat. The overwhelming number of boats on Table Rock Lake operate on gasoline. The generators are going to consume additional gasoline and place carbon monoxide into the atmosphere. If someone dozes off they are going to be susceptible to death by carbon dioxide poisoning.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

David Childers

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I have a houseboat and the solar requirement will not run the electrical requirements of my boat and other owners of our slips. We have discussed this option in the past and there is not enough roof to hold the amount of tiles (and weight) required to keep our dock safe and usable. We have always cooperated with the Corp of Engineers regarding our dock and any improvements or changes you have requested.

20170905_Childers_S-WA

Safety is our primary concern and act accordingly each and everyday. I do not want Table Rock Lake to become the lake for the rich and well born only. We all want to be able to come and enjoy the lake with our boats, kayaks, paddle boards etc. Please do not change the shoreline plan. You will not gain anything and you will lose a lot of respect and support across this state. Out of state visitors bring dollars to communities all around the lake and you will essentially be stopping all of that. Rethink your plan and at least try and understand the common man's joy at being able to come to a beautiful area and spend time with family and friends.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Sue Childers

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The one change that is not mentioned above is the REMOVAL OF "NO WAKE BUOYS". I can not imagine the lake without these buoys, they are a safety factor. No one knows that there is a law already in place for boates to slow down. Placing a sign on the docks will not do the job. I understand the need to keep our beloved Table Rock Lake in the best shape possible but, people living on and around the lake make

20170905_Desch_C-WA

Table Rock what it is today. We have all worked hard to be able to live here and we entered into this lake life knowing what the restrictions were at that time (which were not restrictive or expensive) but these new regulations will stop new growth for the lake area and lake businesses and will hurt the existing residents. We all know about Lake of the Ozarks and no one living in the Table Rock area wants that for our lake. Therefore, everything is going great now. I know the concerns about the growth and how fast this growth is taking place that it is the unknown how that will all play out. Please take into considerations the concerns of us lake lovers and do not apply new regulations.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Carol Desch

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170905_Magee_R-W

Rod Magee

I would respectfully ask that residents and users of the lake be consulted before costly and restrictive measures be arbitrarily put in place. Pumps that use lake water are inexpensive and viable, solar power is not.

20170905_Messerly_E&J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Edward & Joyce Messerly

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Elimination of "No Wake" buoys will create many more dangerous incidents of irresponsible boaters. In addition to those who ignore the buoys now, everyone who has no regard for fellow boaters will be a danger to others. Additionally, high wakes created will cause damage to docks and moored boats.

20170905_Mundy_M-WA

The wording seems to eliminate many uses for dock boxes. If the intent is to prevent fuel spillage, doesn't the existing plan already ban fueling from non-commercial docks?

Restriction of parking for access to docks seems to be a violation of ADA provisions. Boaters with physical disabilities will be prevented from using the lake if they can't easily get to their boat dock.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Mike Mundy

- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

There are too many docks on TRL now and we do NOT need 10,000 more slips. We do need to limit the size and speed of boat on the lake, No jet boats, too much noise. There are too many small 1 and 2 slip docks on TRL now they need to add slips to those small docks but NO new docks. TRL does need to limit lake use by commercial rental boats and jet skis.

20170905_O'Brien_T-WA

Danger from solar panels and storage battery's falling in the water is worth the gains from the feel good i used solar electric power. Proposed 30,000 slips equals 30,000 batteries that can and will at some time fall into the lake and may or may not be removed. This is not worth the feel good of using solar power.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Tommy OBrien

I object to not allowing boats with porta-potties or holding tanks unless located at a marina. Waste dumping in the lake should have a stiff fine but not penalize everyone by presuming them guilty simply because they have a boat with facilities. There are not enough marinas to handle all the boats with

20170905_Rees_T-WA

personal facilities on the lake. By the swipe of a pen you will tank the value of larger boats, overwhelming the marinas and creating a waste monopoly.

To work toward your potty goal in a more reasonable way would be to require boat owners with personal facilities to contract with marinas or approved waste extractors for waste removal. This then could create a new cottage industry, promote competition in the market place and bring a higher level of control than already exists.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Tom Rees

I have been living by the lake for the last 4 years and after much research has never had an electrical death on this lake. It just seems new rules are being instituted without much concern for the families that have supported and continue to support the lake. It was obvious at the meetings held with the public the opposition by your community is major.

**Table Rock Lake Shoreline Management Plan
Revision and Environmental Assessment**

Please use this form to provide comments and suggestions about how you would like to see the Table Rock Lake Shoreline Management Plan revised or on the issues that should be studied before a decision is made on Shoreline Management Plan revisions. Feel free to take an extra form to provide to friends or neighbors and send the forms back before April 17th, 2015 to USACE at the addresses below.

(Optional Information)

Name/Organization : Gary Workman

Address: 138 Villa Drive #1
Hollister, Mo 65672

E-mail: _____ Phone: 563-320-6268

We want your input during this update process. Please use this form to provide your comments and suggestions on items to update in the Table Rock Lake Shoreline Management Plan (SMP). Areas of discussion might include: current zoning, current policies on dock and vegetation permits, how could the lake and permits be better managed. Please be as specific as possible.

1. I am concerned about the solar requirement for existing docks. Our dock has 20 slips. An estimate from a solar company was over \$12,000 to convert to solar. At approximately \$500 annual electric bill, this would be in excess of a 20 year payback. Plus the cost of maintenance, and necessity of battery and generator back-up during extended periods of cloudy days would create more environmental damage than the small amount of electricity used for operation. It would not be cost effective for our dock.

2. I am also concerned about restrictions on use of carts and how they will need to be proven for need. As well as the need for regulation on the types of tires necessary for their use. Most utility vehicles do not have turf type tires and they are used frequently for dock maintenance purposes. This would create more costs for slip owners to replace tires/carts

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170905_York_A-W

Amy York

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

While I can understand a restriction on golf carts and ATV's so they an't just run all over Corp property, it makes no sense to restrict them in the common parking areas of community docks as they require far less space to navigate or park. We have 16 slips in our dock, if we all brought cars/trucks down instead of golf carts, ATVs, etc., there would not be enough room for all of the users. And the outlawing of

20170906_Bottom_C-WA

fishing equipment, tubes, wake boards, chairs, etc. being stored in lockers or at the docks just doesn't pass the common sense test. And finally, the idea that lake that generates hydroelectric power would restrict dock owners from using the same is ludicrous. REading some of the proposals in this plan it is obvious it was drafted by someone that has never spent time on a lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Curtis Bottom

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

After taking a look at the new Shoreline Management Plan, I truly wonder where the person or persons who wrote this plan live. It would appear maybe in a cave or high rise apartment in NYC. Some changes are good -- some are asinine. Converting to solar or wind power when the Corps itself generates hydro-electric power seems a bit askew at the least. You have a community of older, lake loving people here

20170906_Bottom_S-WA

on Table Rock, some of which are on limited budgets but make do because they have a great love for Table Rock and the scenery around the lake. Perhaps more consideration for the people who do support the Corps and the lake would be warranted. As for sun bathing on the dock not being allowed, I am at a total loss as to the benefit of this. Here's hoping some unsuspecting otter or goose doesn't take a little nap on the dock and get caught. For as long as Table Rock has been in operation, people have been hanging out on their docks, sun bathing and just visiting. This camaraderie has been going on for years. Does the Corps disapprove of people having family fun and enjoying themselves? One would wonder about this. As for not storing fishing equipment, tubes, wake boards, chairs, etc. on the dock, what on earth is the Corp thinking? Again, this is a family oriented lake and I assumed was built not only for flood control but for families having fun. Has there been way too much laughter and good times going on to suit the Corps? I would agree with not storing dynamite, guns, flame throwers, etc. in the lockers but fishing equipment, chairs and water toys. Come on -- you have to know that is ridiculous. As for no ATVs or golf carts being parked at the lake, I am once again at a loss for words. Really? Let's just all drive an 18 wheeler down there and park it. Yeah, that's much better and less invasive. I just ask that someone with a bit of common sense and reasonableness take a look at what is being proposed and make some amendments. Your regular residents respect and love this lake. I cannot speak for your tourists. Don't punish those who truly love Table Rock.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Shirley Bottom

Draft Opinion: Opinion Rating = 8

Broad Review for maintenance of all relevant issues in management of various initiatives. Thank You.

Suggested comments:

1. Do Not Like the idea to remove bouys around docks. Signs on docks will be ignored even more than the bouys when swimmers or boaters at the dock. It reduces safety; when the goal should be to maintain or improve all safety measures.
2. Actions should be implemented to improve the placement and maintenance of the bouys.
3. Concern is voiced on the possible adverse actions to enforce golf cart usage in and around the docks for people with health issues. More information for licenses should be implemented to assist persons of age who wish to use the lake facilities. The regulations should align with ADA initiatives, not work against these other laws to assist the handicapped boaters and fisherman.

YOUR ASSISTANCE ON THESE MATTERS IS GREATLY APPRECIATED.

Table Rock Lake has been a beautiful and safe place to live and to visit since the 1950's when it was constructed. The regulations do not need to be changed. If the actions, such as changing to non-powerline electrical power on docks, are desired, they can be suggested along with suggestion as to where to find grants and tax credits to pay for them. Dock owners are responsible for the security of

20170906_Brumfield_M-WA

anything personal left on the docks. It should not be a concern of the Corp of Engineers. The lake was created to generate tourism and economic benefits as well as electricity. It has succeeded greatly.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Marcia Brumfield

You are too restrictive now and have too much power. We have been trying to get no skiing buoys for our cove because the wakeboard boats are hurting our dock, but all our efforts have fallen on deaf ears, and now this!?

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170906_Cook_J-W

Jason Cook

I also object to removing floating no wake buoys. Signage on docks will not be sufficient to protect the docks nor swimmers near docks. The buoys are a visual reminder that hazards are present and to slow down.

It is my position the it is incumbent upon the USACE to carefully consider the opinions and wishes of those who utilize Table Rock Lake in the development and implementation of any changes to the Shoreline Management Plan. The importance of open dialogue between the Corps and citizens is

paramount and by acknowledging such thereby creates a mutually beneficial partnership - wherein the interest of all stakeholders is acknowledged and valued.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Edward Gilliam

This is retarded to limit the amount of boats on a lake when what we have had been working fine. Also if Marina's don't he to get solar or loss no wake bours then why would the other docks.

20170906_Heimerman_M-WA

- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170906_Helton_D-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170906_Highfill_N-W

Subject: FW: PUBLIC COMMENT ON PENDING SHORELINE MANAGEMENT PLAN FOR TABLE ROCK LAKE

-----Original Message-----

From: Roger - Irma Howard [<mailto:rogirmlib@msn.com>]
Sent: Wednesday, September 06, 2017 6:03 PM
To: CESWL-Table Rock Shoreline Management Plan Update <CESWL-TableRockShorelineManagementPlanUpdate@usace.army.mil>
Subject: [EXTERNAL] PUBLIC COMMENT ON PENDING SHORELINE MANAGEMENT PLAN FOR TABLE ROCK LAKE

I am advised public comment period has been extended to September 15, 2017. I am submitting the following:

I am a property owner on Table Rock Lake. I have reviewed the proposed rule making under consideration and would like to voice concern on some specific items:

1. ADA-- The Corps appears to be rescinding an existing rule pursuant to handicap access. The Corps current rule allowed "golf cart" access for handicapped persons for ingress and egress at private boat dock facilities. The Corps reasons because no one applied for this 'golf cart' permit, the rule is not needed. The likely reason no one applied is because 'golf cart' access is not a practical method to access the majority of private boat docks, due to buffer rules. This rule should be AMENDED to allow access by ATVs with suitably required turf tires, if necessary, in lieu of standard ATV rough treads. ATVs are currently utilized at all golf courses to perform maintenance and other necessary functions. They commonly traverse tender turf grasses without damage. Surely they could similarly traverse buffer zones. The Corps and golf course managers share in the common goal to limit turf damage. If golf courses utilize these vehicles on manicured turf grasses, the Corps should consider their applicability to provide pedestrian boat dock ramp access. Currently, the Corps falls short in providing practical access to private boat docks by the physically impaired. Currently, many handicapped citizens who live at the lake cannot gain direct pedestrian access to their own boat slips. Properly equipped ATVs will provide desired access for the small percentage of dock slip owners and visitors of owners who are handicapped. The existing rule should not be rescinded, but AMENDED to allow, by permit, direct restricted ATV access to all boat dock entrance ramps.
2. Solar Power- Provisions seeking to impose solar / wind power dependence upon dock owners merits strong reconsideration. Many, many private docks on Table Rock are not physically located to take advantage of the sun's exposure necessary to efficiently energize solar panels. In fact, many docks will be shaded in many instances by trees and other vegetation encouraged by current shoreline buffers. Certainly, the same issue holds true for potential feasibility of wind power. To comply with solar, most docks will require substantial modifications to their roof structures that will likely require elevated and

angled installation of solar panels to capture sun exposure. The impracticality of such construction on existing boat docks screams at the obvious. To comply, the majority of docks will be required to construct the equivalent of wind sails on their existing roof tops. Such imposition increases the structures vulnerability to high winds and increased winter snow and ice loads. Translated- more docks will be torn from their moorings by high winds, and more docks will sink due to increased snow / ice loads and the resulting inability to remove snow. Currently, many docks are saved as heavy snow loads can be removed from sloping dock roofs by shovels. Add the complications of structural sails and infestation of delicate solar panels and the snow shovel option becomes mostly ineffective. How many boats and batteries do we want to sink? I am not an electrician, but I question how many storage batteries will be required to adequately power 20 separate boat power lifts? Where will dock owners put these batteries? Available floor space for heated battery storage room is not readily available, and could easily require increasing the foot print of the dock facility \$\$\$\$. Finally, consider the adverse impact upon the current beauty and appeal of Table Rock Lake. The public has long benefited from the Corps active land management policies preserving and protecting the beauty of Table Rock. Personally, I prefer to see the innocuous and barely noticeable power lines serving our boat docks, as opposed to boat docks adorned with the glaring ugliness of solar panels erected on every square inch of dock roof visible to man. Talk about changing the landscape of the lake, and- after all that hard work to preserve nature's shoreline?? If enacted, this proposal will significantly increase the cost of dock slip ownership on Table Rock. Costs to current owners and prospective buyers alike will be significantly increased. The burden of servicing and maintaining the power supply on docks will shift from the existing utility companies who have exemplary safety records, to groups of well intended dock owners who will not have the safety background brought on site by current utility providers. Does this increase safety for anyone, at any level? This proposed rule cries for total rejection by the Corps.

Thank you for your active consideration of these concerns.

Roger & Irma Howard

Please put limits and responsibilities to the Wake Board Boats they are eroding our shore lines. These boat owners have no regard for nature or fellow boat owners.

20170906_Lane_M-WA

All boat owners or operators should have a boat safe course and test. Let us remember that the lake is a family place to have fun and mal memories. We need to protect so our future generations have a place for fun an activities. Thank you for your time in this matter.

Misty

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Misty Lane

I also object to the proposed removal of NO WAKE buoys. Living in an extremely busy cove, it would not be safe for us or others to swim off of our docks. We already have issues with people coming too close to the docks. It will also cause more damage to docks. I would like to see something done about the wake board boats. They are swamping smaller boats in the coves with their huge wakes.

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

This proposal is beyond ridiculous which only goes to prove that the mentality and good judgement of the people running our government is nonexistent. Wake up Corp of Engineers, you really do not rule the world! RuthAnn Schavey

20170906_Schavey_R&D-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Schavey RuthAnn & Dale

We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Changing the Shoreline Management Plan with regard to growth of vegetation would be detrimental, not allowing surveillance of the docks and boats. Dock modification only every five years will not allow for new, innovative ideas, materials, or items to be incorporated on the dock which may add to the safety of its users.

20170906_Watters_P-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Pamela Watters

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The carrying capacity and solar changes would be ok.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170906_Welton_M-WA

Sincerely,

Matt Welton

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170906_Wilson_T-W

Timothy Wilson

Subject: [EXTERNAL] Table Rock Lake Shoreline Management Plan - my response

As a family we have enjoyed using Table Rock Lake for our summer recreation and boating experiences since 1972. Now over the years we have added weddings, 10 grandchildren and now 12 great-grandchildren. Our lake group has grown unbelievably. Over those years we camped out at Viola Campground; later stayed on summer trips at resorts and in 1999 bought out first home on the lake. In 2009 we sold that house and bought another home which we built onto and have every summer had family gather at to enjoy Table Rock Lake. Year round our family comes to Shell Knob where we all spend money at local businesses. One neighbor has spent a lot of money remodeling and updating their family home. The other one built a nearly half a million dollar home which they intend to retire to next year. All of us homeowners are very concerned as to retaining the value of our homes on the lake. Some of the proposed changes give us concern as to this lake being as desirable and thus losing value of real estate on and surrounding the lake.

I am enclosing a picture of activities off of our dock last weekend. It demonstrates our concern for removal of buoys on the lake. Our family dock has many young children enjoying the water off our dock. Making memories and family ties are the reason our family likes to come to Shell Knob.

Clean, safe lake water is a concern of ours. We want strict control of sewage disposal but your proposal of no holding tanks will mean that the houseboats won't be allowed on Table Rock Lake. Make disposal for them accessible. I can't imagine they would dump sewage in the lake.

A safety concern is the driftwood that floats out into the lake with every flood which has been pretty often in the past nine years. If left on shore around our docks is a hazard to walk through and a place for snakes to inhabit.

Both my husband and I have disabled tags. We, like a lot of people that enjoy the lake depend on using a golf cart to get back and forth to the dock. That proposal to do away with that mode of transportation would be a problem for many.

Please don't make these changes that you are proposing.

Marcia and Larry Woodard and Family

Taking bowies out of lake by docks for wake control is dangerous to swimmers and more destruction to docks on the lake! In fact some areas need more bowies in coves for safety of skiers and swimming! Skiers come into coves and are too close to each other for the amount of space there is. Need to keep skiers out on main lake.

If you want to make shoreline management more feasible without such opposition from the public, you should limit the size and horsepower of boats. For instance, outlaw boats that are greater than 35 feet with more than 300 horsepower. This would cause larger ocean yachts to leave or downsize, then

20170907_Bumgarner_M-WA

creating smaller wakes across the lake during heavy boating season. In return, your shoreline would deteriorate slower than it is now.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Matt Bumgarner

We want your input during this update process. Please use this form to provide your comments and suggestions on items to update in the Table Rock Lake Shoreline Management Plan (SMP). Areas of discussion might include: current zoning, current policies on dock and vegetation permits, how could the lake and permits be better managed. Please be as specific as possible.

Alternative Fuel for Docks: A solar power system will have failures...requiring generators to suppliment when down. These will generate sufficient electrical power to potentially electrocute someone in the water...defeating one of the main reasons for this change. Also, who is going to inspect and insure that all generators are safe and properly installed? A generator is needed when system is down, insufficient sunlight to charge batteries, etc. The design, installation and purchase of the generator will cost hundreds, even thousands of dollars before the cost of the solar system is taken into account. Currently, dock owners only have to have reliable energy. Now, they must purchase the materials, the designs and the installations from various sources that you do not regulate. Additionally, all of this will require maintenance. THIS CHANGE WILL RESULT IN A TREMENDOUS EXPENSE. Otherwise, why haven't more people done it already.

Alternative fuel for docks - I have recently talked extensively with a solar sales/installer. This was quite revealing. First - Every dock will have to be structurally inspected to ensure that structure will carry the additional loads associated with solar panels...design review. W/o previous data, the load capacity will have to be recalculated...designed! The Corp. requires all changes to docks to be submitted on plans...if they don't exist, they will have to be drawn. I doubt that many of the docks on the lake currently meet the state minimum design loads. For sure, the addition of solar panels will require additional support structure...not for the weight but the wind load implications. All of this will result in thousands of dollars before the actual solar materials and labor are considered. Have one of your engineers review this.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170907_Funk_M-W

Martin Funk

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

My family has been enjoying Table Rock Lake since 1969. Over the years we have found the Corps reasonable and fair to deal with. Unfortunately we feel that the proposed Shoreline Management Plan will be far too restrictive for continued enjoyment.

20170907_Hall_J-WA

Please consider sticking to the plan currently in place.

Thank you in advance for your consideration.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

James Hall

I am highly concerned about the proposed changes regarding Table Rock Lake. The solar would be a huge financial strain for many. Tighter restrictions on docks and vegetative permits is equally concerning. Lastly, resorts and marinas should have the same rules as the public. I appreciate all the CORPS does.

20170907_Oestreich_L-WA

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170907_Patterson_C-W

Chris Patterson

Current president says we should have less regulations and if any more regulations are made then some regulations have to be taken away.

Just wondering what regulations are going away? I am for less regulations! Thank you for your time.

Subject: [EXTERNAL] Public Comment

To whom it may concern,

Thank you for allowing my opinion to be heard on the newly new proposed changes.

1. Lights on shoreline above Docks.

You should realize that this is a Safety Issue as well as Security Issue. My family and I constantly use the shoreline at night for fishing and use the lights to light our way to keep us from stumbling and breaking any bones on the many rocks. I also appreciate the safety that I feel around them. Recently there was a sexual predator who had stabbed 2 men just a few miles from our place at Shell Knob. He was hiding in the timbers for 17 days before he was eventually captured.

2. Mandatory conversion to Solar powered docks.

This is pretty hard to swallow, especially for elderly dock owners who already spent several thousand dollars running power to their docks and now, later in life and with less disposable income at their disposal, you are asking them to pay thousands of dollars to switch to solar powered docks. You are still going to have 110 volts on the docks, over water, and now you will be adding battery acid over the water.

And what do we do for supplemental power? For instance, on the night of July 4th when all the boats are out of their slips watching the fireworks show. Then they all come back in about the same time and their batteries run out of power. Some boats are left stranded, floating in their slips, bouncing around from all the wave activity. This could cause serious damage to property. I heard you would let us use generators for alternative power on the docks. REALLY, now you want us to put electrical generators over the water or power cords over the water. Creating a situation where they could be bounced off into the water and cause grave electrical shock. Isn't this what you wanted to avoid?

3. Removal of electrical power from Corp property.

You already inspect our electrical lines and docks at a minimum of every 5 years. Any dangerous electrical situations are being identified at that time and are remedied swiftly, thanks to your inspectors. If you feel your inspectors need more training, that is easily remedied.

4. Flooding.

It seems pretty obvious that ever since Branson Landing opened, Table Rock lake has flooded every other year.

5. No Wake Buoys

REALLY, have you paid attention to these surfing boats and their wake. They can be all the way across the channel and their wake still comes across the lake and rocks the heck out of our dock. So much so, that we had to spend over \$400 to resecure our swim platform to our dock and each slip owner had to install stabilizers to their lifts to prevent damage.

These boats, being clear across the lake, won't be able to read our signs on our docks, but they darn sure will see a NO WAKE Buoy out there.

Maybe you should consider limiting the size of boats on this lake and/or restricting large wake boats to certain unpopulated areas of the lake.

Should you wish to pursue these changes, please consider grandfathering in existing docks and only requiring these changes on new docks and remodeling of older docks.

Thank You,

Gary Reichenberger

I have been using the Table Rock Lake and surrounding Campgrounds for the past 35years. During this time I have seen and been affected by of the management of the Corps. I know families who own property around the lake that also have docks. So I understand how these proposed/planned changes

20170907_Reynolds_D-WA

would have a very devastating financial impact on property ownership. There are always ways to achieve desired changes that will affect so many owners other than imposing changes by force.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Dave Reynolds

We object to your proposed removal of electricity on the lake. If you were to check the age group of slip owners on Table Rock you would find that they are seniors. They are enjoying their retirement and an additional cost of solar panels would become unbearable. We want to enjoy nature not line the pockets of Solar companies.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

We have been boaters at Table Rock Lake for over 35 years, and slip owners at Mellow Oaks Dock for over 22 years. We are very concerned about the proposed changes the Corp is recommending in their Shoreline Management Plan: 1) parking requirements; solar requirements, outlawing fishing equipment, wake boards, chairs, etc from being stored on the dock; limited 16 sq ft of locker space. We believe

20170907_Van Horn_L&S-WA

these new restrictive changes significantly inhibit our ability to use and enjoy Table Rock Lake and our dock. We appreciate the Corps willingness to listen to owners/users comments and concerns and we would be happy to meet with anyone appropriate to discuss our concerns. We love Table Rock Lake. It is part of our family culture and heritage. The family gathering for the 4th of July at Table Rock is as important to my family as Christmas. We want to preserve Table Rock for future generations but do not believe the above concerns to anything to help that preservation; rather they just decrease the enjoyment of using the lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Larry & Sharon Van Horn

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170907_Wells_B-W

Brian Wells

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Hello,

My family has enjoyed TRL for longer than I can remember, well over 50 years. We are deeply concerned that the lake will be over managed with ideas that simply do not make common sense.

20170907_Whitlock_C-WA

Please listen to the areas homeowners and the public when considering changes to a property that very few if any TRL enthusiasts believe will be good for the lake area.

Thank you

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Charlene Whitlock

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

We understand that a resource like TRL needs to be managed and appreciate the job that the corps of Engineers has done for sure.

I attended the meeting at Chateau on TRL and I'm sure you noticed, there was very obvious anger and tension in the room. Missourians are fearful that the Corps of Engineers are preparing to over manage this invaluable resource and ruin it for most, if not all people who have enjoyed the lake for years.

Please consider that the lake is near perfect in most peoples eyes and refrain from over thinking and regulating it.

Thank you for listening,

A home owner on the lake for over 50 years.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Scott Whitlock
