RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170908_Alcocer_S&D-W

Steven & Diane Alcocer

Requiring solar or wind power on the docks is a terrible idea. If the economics work people will naturally convert without being forced to by over reaching regulations.

- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

As a slip owner on a fixed income having to convert to wind or solar power would truly be a financial hardship. I believe the corps should be more worried about old septic systems that are leaching into Table Rock Lake than banning electricity on the lake.

20170908_Brueckner_J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

JoAnn Brueckner

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

If it's not broken don't fix it. I've heard this many a time in my 60 plus years on this earth. Praying our Army Corp of Engineers staff located here on Table Rock Lake will be able to convince " Little Rock higher ups" that they are doing fine just the way things are now!! My question is why don't our Marinas have to have encapsulsted foam on all their docks?

20170908_Busen_J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Jennifer Busen

I do not accept that the changes you are proposing will in any way protect the original mission of the Table Rock lake area or enhance in any way the entertainment use of the lake. I see no benefit to the property owners, nor the users either economically or ecologically. My family and friends have used Table Rock Lake as our annual destination for fun, family and recreation for over 50 years and hate to

see what will happen if the core gets it's way with these unnecessary politically correct decisions. I vote no to these changes.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Linda Chappell

Please, please, yes I will beg, DO NOT put these proposed guidelines into effect..... how can you limit the amount of users on the lake or tell us what we can or can't store on our own docks???

This is an over-reach of ACOE.

20170908_Chestnut_J-WA

PLEASE re-think this and conclude that these are outrageous and will harm the popularity of Table Rock Lake and the Branson area.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Joy Chesnut

I feel that the excessive new regulations will generate more violations. Keeping the current status quo on the SMP is an adequate system that is easily regulated by the Corps of Engineers. With the new SMP, the COE does not have the manpower to oversee these new regulations as they currently have a hard time keeping up with the regulations we have now.

20170908_Durham_M&S-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170908_Eddy_S-W

Susann Eddy

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I also object to not issuing any more permits to build natural looking stairs down slopes to the docks. Average age of our slip owners is probably at least 60 and it is getting harder to get up and down these steep rocky slopes. I myself just turned 70 and have 2 artificial hips. I believe that any changes to the electrical codes should only be for new added docks, the ones already using and are wired for electric

co. Power should be grandfathered in, as they have been inspected and approved. I think permits should be continued for vegetation management to individuals who wish to do a little cleaning up of brush which could possibly be a fire danger to houses. There is no danger of local wildlife not having room to coexist with us here. Old trees dying from the high water levels are starting to fall all over the corp area. A little high water and they will be floating all over the lake again. Thank you for taking this into consideration!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Alan Edelbaum

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Removing the no wake bouy would be very dangerous for swimmers. I am a lakefront onwner and slip owner. You need to relax shore access for lakefront ownership.

Why is it that the corp believes all of these changes are necessary for the betterment of the lake & those of us that live on & use it? Why is it the existing regulations have to be changed? Your changes are so, once again, burdensome on the people. How is the corp going to enforce these changes? It's not able to enforce rules that you've already made. Nothing is more sickening that watching government over reach

20170908_Gloyna_D-WA

its authority because it thinks it can. If you're confident that these added regulation will provide additional protection for Table Rock then make your reasons known & let the people decide.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Dennis Gloyna

Even though this may seem extreme, I believe these regulations could potentially cause a blighted area in 30 years. If properties can't be sold because of the regulations, and as the homeowners & dock owners grow older and can't maintain their property, they will be left to rot.

20170908_Hanger_R-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

While I understand the some of the reasons for modifying the current plan, the undue regulatory limitations this change imposes would negatively impact those who live, visit, and enjoy the lake. Business and local homeowners would be unable to afford the purposes changes. People who enjoy Table Rock would find more affordable places to visit, as prices would have to rise to support this

20170908_Hembree_T-WA

change, leading to decreased overall spending, jobs, etc in the area. Offer grants or other incentives to encourage purposefull and mindful change.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Tara Hembree

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I own property on the lake. We can not let it turn into LOX. Please save our lake!!!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170908_Hunt_C-WA

Sincerely,

Chris Hunt

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

We spent our retirement money to move to a lakefront home. It is not fancy or expensive, but it is our piece of heaven. Please let us enjoy our view of the lake, do not remove buoy's so the cove we live in can be safe for our grandchildren to swim in, without electricity it would take forever for us to operate the lift to get our boat in the water and I do not see a problem with keeping our fishing poles in the little

20170908_Jacobsen_B-WA

storage closets. Also, it would be hard for us to walk back and forth to our little cabin if we could not bring our golf cart. All this means a lot to us and if you took it away it would also devalue our property immensely, plus our ability to use it.

Please leave our lake alone. We take good care of it and our property. We do not need more rules and regulations when there is no problem to begin with.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Barbara Jacobsen

There's no need to change these two restrictive new rules it is fine like it is we own two boats on Table Rock over \$8,000 a year and see no need for change

- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

We have been lake front property owners in Shell Knob (Barry County) for nearly 20 years and have been coming down to the lake for over 40 years staying at resorts before we purchased property. In addition to our own property, my parents also have a lake front property close to ours.

20170908_Kuhlman_D-WA

Nothing is broken and nothing needs to be changed. In the 20+ years of coming down to the lake we have never felt that the shoreline was in jeopardy or turning into "The Lake Of The Ozarks" which we would never want. Yes Baby Boomers (which is me) are moving down to the lake but with the large population due to retire it is expected. We plan to retire at the lake and your suggested changes are harmful. What is driving a golf cart to our boat dock hurting anyone? I won't be able to carry our fishing and drink cooler when I am in my 60's without this. Nothing is harmed by parking a golf cart on Corp property. The solar option is a nice idea but expensive unless you are willing to pay for it. Vegetative permits should remain as they are. We take pride in our property and would never harm the water. This is our land and our safe haven. You have done a great job for 20+ years and making change "for the sake of change" is not in anyone's best interest. We respect all you do, but the suggestions have really gone to the extreme with little merit to back them up.

Thank you

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Doug Kuhlman

- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I really don't believe it's your right to yell us we can't store ski's or fishing gear in our dock lockers. Really!

20170908_McDannold_K-WA

As for doing away with wake markers this will just cause more damage to docks and boats eith the wakes because boaters will not see signs on docks until it is to late.Does this apply to marinas? I bet not. If you want to test this donut at Lake of the Ozarks

As for solar it would not be enough power to get multiple boats up. We had 5 boats go out to watch the fireworks o we labor day. With solar we would of not had enough power to lift all of our boats according to a solar sales person

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Keith McDannold

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Subject: [EXTERNAL] Comments to Table Rock Lake SMP

To: Corps of Engineers - Projects Management Division

Thank you for the extension to comment, so we could have the time to further research the proposals in the new Shoreline Management Plan for Table Rock Lake.

As a small lakeshore resort on the Southeast side of Table Rock Lake, located close to the main channel and across the lake from large resorts (Big Cedar & State Park Marina), we are grateful to have been allowed the opportunity to submit our comments to the revised Shoreline Management Plan.

While most of the revisions uphold the divisions goals to why the Shoreline Management Plan is being revised, we would like to provide our comments to three main proposed plans that seem to lead to longer-term negative impacts, and that do not uphold the positive goals of the new plan.

To be as clear as possible with presentation of facts and reasons, we have illustrated these three main areas of concern by providing the plan detail, the reason for concern, the foreseen impact, and in some cases recommendations for new consideration. Thank you for your time and review.

Areas of Concern and Suggestion for the revised Shoreline Management Plan for Table Rock Lake:

20170908_O'Brien_M

1. No-Wake buoys for private docks. Existing no-wake buoys removal by Dec 2020.

We very much disagree with this portion of the plan for the following reasons, and would like the Corp to consider other recommendations.

Reason: Safety and security of visitors & residents, as well as residential and dock property

Negatively impacts: Visitation in the long-term, growth in recreational services

As visitation and lake traffic increases, all partners and stakeholders need to make the right decisions to ensure the type of visitation increase is in the best interest of the areas long term growth, and continues Table Rock Lake's reputation as a top destination for wholesome family tourism and fishing recreation. In addition, the new plan should discourage, and not encourage, the type of visitation that may cause safety concerns, damage, harm and negative impact on long-term growth.

The current placement of no-wake buoys works well today as a navigational visual for all water craft to use caution and consider distance near public and private docks. The current buoys do deter the majority of boaters from coming too close to docks where swimming may occur and do deter boaters from creating unnecessary large waves that can cause damage to lines, docked boats and floating facilities. However, as the number of visitors to the lake increases, so will the number of inexperienced boaters - many of whom do not own and who rent water craft on the lake and who cannot judge safe distances. With our facility being near two major boat and jet ski rental facilities, we do see that it is the rental craft drivers who most ignore or misunderstand (due to inexperience) no wake precautions with buoys and signage, especially on weekends and holidays. In addition to more watercraft rentals, the lake has more recently seen more large jet engine watercraft traveling at extremely high speeds in coves with private docks. (Just recently, we personally watched the very jet boat which made recent news headlines driving fast and erratically in our own cove the day it capsized.) Also in our experience, no wake dock signage is even less effective than no wake buoys for these types of boaters.

In the short-term, removing the no wake buoys for private docks will encourage fast speeds around private docks which further risks the safety of guests swimming near docks, the security of dock lines and boats housed in slips, and even the safety of inexperienced boaters themselves who tube and travel too close to docks. No wake buoys are informational, visual signage, just like speed limit signs on streets and highways. One cannot hope everyone knows the laws of distance, and will obey them, and expect small dock signage will be seen.

In the long-term, as highspeed traffic near docks increases, and if buoys are removed, it will discourage our visitors who frequent our lake over others (e.g., Lake of the Ozarks) for its safety and beauty, as they lose confidence in the safety of their families and their watercraft on Table Rock Lake.

Other Recommendations to Consider:

No Wake Coves: Removing no wake buoys around private docks seems to be a bit in direct conflict with the proposed allowances of more boat docks and more boats. We understand the allowance in the plan of more docks will create more buoys to navigate. However, it is the private boat docks that are most impacted from the commercial boat dock rental businesses, where it appears buoys will still be permitted. If the main concern is limiting buoys, we would suggest a review of certain coves and areas that can become a NO WAKE COVE, with buoys perhaps only marking the entrances to the coves to slow boaters and discourage reckless or fast speeds near these docks.

Limitations and Increased Patrolling: If a no wake buoy plan of action is taken, there additionally needs to be a larger plan of action to consider the safety of private docks, such as limiting the engine size of boats on the lake (some lakes do not allow jet engine boating), limiting the number of jet ski rentals, and increasing patrolling of coves across from and near to rental areas to discourage reckless boating.

Overall, we surveyed our current customers on the no wake buoy idea and every single one said the same... "not a good idea" and appeared very concerned with this proposal.

2. Allowing permits of docks with 1-20 slips.

We disagree with this portion of the plan for the following reasons, with the following recommendations:

Reason: The current plan calls for the increase of too many docks/slips already, and would dramatically increase the number of small docks, primarily with 4 or less slips.

Negative impacts. A large number of small docks with less than 4 slips negatively impacts safety of existing docks, the aesthetic beauty of the lake shoreline and natural habitats, and increases the fiscal burden/resources of the Corps to manage and inspect.

In an easy visual review of current docks on the lake, it is the small docks that seem to run the risk of being uncared for, and therefore, break away in heavy storms that cause property and safety risk to well-maintained private docks. In the year, we have experienced the breakaway of two small docks in just our cove area.

The more the allowance of small private docks with less than 4 slips, the more crowded the lake and coves on the lake becomes, decreasing the aesthetic beauty of our lake, and becoming more like Lake of the Ozarks in Missouri, or Tim's Ford Lake in Tennessee, with hundreds of small docks everywhere. As more boating and flooding increases -- as seen in recent years -- so does the risk increase of these small docks breaking lines and floating away, creating more risk to others. Many small dock owners are NOT permanent residents and do not take the precautions necessary to roll in a secure their docks in flooding conditions and upkeep.

Notation: If the new plan to disallow no wake buoys at private docks is in response to the very plan to increase the number of docks, the suggestion would be that the Corp reduce the suggested allowance and number of new docks and new slips.

Finally, if fiscal resources limit the proper management of the current SMP (as stated in reasons for its revision), we ask: Would not increasing the number of small docks actually increase the fiscal burden and time management of the Corps to manage the lake and inspect so many more docks?

Recommendation: Decrease the new plan allowance of slips by at least half, and limit the minimum size of allowed additional docks to minimum of 4 slips, vs. a minimum of 1 slip. This would ensure more ownership in community docks with more responsibility among multiple owners in good maintenance and care of new docks, limit the placement of too many small docks across the shoreline, and hopefully place less burden on the Corps budget.

3. Solar Power - Allow only alternative power sources (e.g. solar). Existing licenses for overhead and underground electric service to private floating facilities will not be renewed after Dec. 31, 2027.

We disagree with this proposal for the following reasons:

Reason: While this plan sounds on the surface to be more environmentally friendly, it is just the opposite and actually can harm tourism.

Negative impacts:

1. Environmental Harm - Unmaintained solar power equipment risks more debris in the lake from wind damage and adds chemical poisoning from dock batteries falling in the water and harming natural lake wildlife.
2. Fishing Tourism - Solar power is less dependable, and runs the risk of negatively impacting fishing craft electric supply needs during major fishing and tournament seasons. Fisherman do not want to stay in faraway slips in the big resorts, but prefer smaller resorts and more private docks to stay close to their crafts.
3. Affordability and dock costs - Solar power conversion is more expensive in equipment and insurance, as well as long-term maintenance to small dock owners vs electricity. This will eventually lead back to negative impact #1 aforementioned.

Deeper explanations:

Safety - It has been our experience that non-permanent residences on the lake do not maintain docks as well as lake business and permanent residences. Electric supply to docks is more than just lighting, but provides needed resources of electricity for watercraft usage. Adding solar alternative power creates more structural maintenance needs on floating facilities, that - according to insurance providers - will create more risk factors for any dock, including:

- * Heavier weight from additional paneling on the floating structure itself
- * Wind and debris risk. Most insurance providers state the risk of solar panel installation in high wind areas due to panel debris becoming unattached with not well secured or not well maintained panels. Unsecured panels blowing off dock roofs adds more dangerous debris into the lake
- * Fire risk. Solar paneling can cause more fire risk to its applied structure due to panel components that may not be fire retardant and risk excessive heating in the summer months
- * Added risk of corrosive material in the lake - As a resort owner we are already using battery powered solar on our property to light areas, and by experience know solar powered batteries have a far much shorter life. A constant need to replace solar batteries on a dock means more batteries will end up being dropped during replacement in the lake. Secondly, docks that are not well maintained and breakaway, or any dock damaged in storms, will result in these batteries being added to the lake.

Unfair costs and treatment toward small owners' vs large businesses - A major concern of this proposal is that it appears to be unfair and discriminatory toward small owners, as there is no requirement in the SMP for big business commercial docks to add solar. The main question here is why is this not a requirement for all docks? Without this explanation, it appears to be placing unfair costs on private owners' vs businesses for no reason.

Too new a source - Solar generated power is too young of an alternative energy source -- with its current imperfections even today in the housing market -- to be considered a mandatory requirement on the

water. The safety reasons aforementioned are easily uncoverable through research with dock builders and insurance companies.

Lake/Tourism reputation damage - This proposal WILL have a negative impact not just on the environment, but on the economic dependence of the area on fishing tourism. Fisherman will in the long-term choose not to stay at a place, or fish on a lake/in a tournament, where they cannot depend on the overnight power needs for their motors and batteries.

Due to the busy summer season, we were unable to attend the meetings to understand the reasons needs behind these proposals to which we disagree. We hope that these reasons can be publicly explained on your site, especially if there is strong consideration to move forward, which we hope in the end, the Corps will not.

Thank you for giving us this opportunity to state our disagreements and reasons, which we hope you will see are based on more than just added costs or property values, but long-term impact environmentally and economically to this region.

Thank you for your time and your consideration.

Best regards,

Tommy & Melissa OBrien, owners

Table Rock Lakes SMP/MP/EA Project Manager
Programs and Projects Management Division
USACE, Little Rock District
PO BOX 867
Little Rock, AR 72203

To: Corps of Engineers – Projects Management Division

Thank you for the extension to comment, so we could have the time to further research the proposals in the new Shoreline Management Plan for Table Rock Lake.

As a small lakeshore resort on the Southeast side of Table Rock Lake, located close to the main channel and across the lake from large resorts (Big Cedar & State Park Marina), we are grateful to have been allowed the opportunity to submit our comments to the revised Shoreline Management Plan.

While most of the revisions uphold the divisions goals to why the Shoreline Management Plan is being revised, we would like to provide our comments to three main proposed plans that seem to lead to longer-term negative impacts, and that do not uphold the positive goals of the new plan.

To be as clear as possible with presentation of facts and reasons, we have illustrated these three main areas of concern by providing the plan detail, the reason for concern, the foreseen impact, and in some cases recommendations for new consideration. Thank you for your time and review.

Areas of Concern and Suggestion for the revised Shoreline Management Plan for Table Rock Lake:

1.) No-Wake buoys for private docks. Existing no-wake buoys removal by Dec 2020.

We very much disagree with this portion of the plan for the following reasons, and would like the Corp to consider other recommendations.

Reason: Safety and security of visitors & residents, as well as residential and dock property

Negatively impacts: Visitation in the long-term, growth in recreational services

As visitation and lake traffic increases, all partners and stakeholders need to make the right decisions to ensure the type of visitation increase is in the best interest of the areas long term growth, and continues Table Rock Lake's reputation as a top destination

for wholesome family tourism and fishing recreation. In addition, the new plan should discourage, and not encourage, the type of visitation that may create a negative reputation for the area.

The current placement of no-wake buoys works well today as a navigational visual for all water craft to use caution and consider distance near public and private docks. The current buoys do deter the majority of boaters from coming too close to docks where swimming may occur and do deter boaters from creating unnecessary large waves that can cause damage to lines, docked boats and floating facilities. However, as the number of visitors to the lake increases, so will the number of inexperienced boaters – many of whom do not own and who rent water craft on the lake and who cannot judge safe distances. With our facility being near two major boat and jet ski rental facilities, we do see that it is the rental craft drivers who most ignore or misunderstand (due to inexperience) no wake precautions with buoys and signage, especially on weekends and holidays. In addition to more watercraft rentals, the lake has more recently seen more large jet engine watercraft traveling at extremely high speeds in coves with private docks. (Just recently, we personally watched the very jet boat which made recent news headlines driving fast and erratically in our own cove the day it capsized.) Also in our experience, no wake dock signage is even less effective than no wake buoys for these types of boaters.

In the short-term, removing the no wake buoys for private docks will encourage fast speeds around private docks which further risks the safety of guests swimming near docks, the security of dock lines and boats housed in slips, and even the safety of inexperienced boaters themselves who tube and travel too close to docks. No wake buoys are informational, visual signage, just like speed limit signs on streets and highways. One cannot hope everyone knows the laws of distance, and will obey them, and expect small dock signage will be seen.

In the long-term, as highspeed traffic near docks increases, and if buoys are removed, it will discourage our visitors who frequent our lake over others (e.g., Lake of the Ozarks) for its safety and beauty, as they lose confidence in the safety of their families and their watercraft on Table Rock Lake.

Other Recommendations to Consider:

No Wake Coves: Removing no wake buoys around private docks seems to be a bit in direct conflict with the proposed allowances of more boat docks and more boats. We understand the allowance in the plan of more docks will create more buoys to navigate. However, it is the private boat docks that are most impacted from the commercial boat dock rental businesses, where it appears buoys will still be permitted. If the main concern is limiting buoys, we would suggest a review of certain coves and areas that can become a NO WAKE COVE, with buoys perhaps only marking the entrances to the coves to slow boaters and discourage reckless or fast speeds near these docks.

Limitations and Increased Patrolling: If a no wake buoy plan of action is taken, there additionally needs to be a larger plan of action to consider the safety of private docks, such as

limiting the engine size of boats on the lake (some lakes do not allow jet engine boating), limiting the number of jet ski rentals, and increasing patrolling of coves across from and near to rental areas to discourage reckless boating.

Overall, we surveyed our current customers on the no wake buoy idea and every single one said the same... "not a good idea" and appeared very concerned with this proposal.

2.) Allowing permits of docks with 1-20 slips.

We disagree with this portion of the plan for the following reasons, with the following recommendations:

Reason: The current plan calls for the increase of too many docks/slips already, and would dramatically increase the number of small docks, primarily with 4 or less slips.

Negative impacts. A large number of small docks with less than 4 slips negatively impacts safety of existing docks, the aesthetic beauty of the lake shoreline and natural habitats, and increases the fiscal burden/resources of the Corps to manage and inspect.

In an easy visual review of current docks on the lake, it is the small docks that seem to run the risk of being uncared for, and therefore, break away in heavy storms that cause property and safety risk to well-maintained private docks. In the year, we have experienced the breakaway of two small docks in just our cove area.

The more the allowance of small private docks with less than 4 slips, the more crowded the lake and coves on the lake becomes, decreasing the aesthetic beauty of our lake, and becoming more like Lake of the Ozarks in Missouri, or Tim's Ford Lake in Tennessee, with hundreds of small docks everywhere. As more boating and flooding increases -- as seen in recent years -- so does the risk increase of these small docks breaking lines and floating away, creating more risk to others. Many small dock owners are NOT permanent residents and do not take the precautions necessary to roll in a secure their docks in flooding conditions and upkeep.

Notation: If the new plan to disallow no wake buoys at private docks is in response to the very plan to increase the number of docks, the suggestion would be that the Corp reduce the suggested allowance and number of new docks and new slips.

Finally, if fiscal resources limit the proper management of the current SMP (as stated in reasons for its revision), we ask: Would not increasing the number of small docks actually increase the fiscal burden and time management of the Corps to manage the lake and inspect so many more docks?

Recommendation: Decrease the new plan allowance of slips by at least half, and limit the minimum size of allowed additional docks to minimum of 4 slips, vs. a minimum of 1 slip. This would ensure more ownership in community docks with more responsibility

among multiple owners in good maintenance and care of new docks, limit the placement of too many small docks across the shoreline, and hopefully place less burden on the Corps budget.

3.) Solar Power – Allow only alternative power sources (e.g. solar). Existing licenses for overhead and underground electric service to private floating facilities will not be renewed after Dec. 31, 2027.

We disagree with this proposal for the following reasons:

Reason: While this plan sounds on the surface to be more environmentally friendly, it is just the opposite and actually can harm tourism.

Negative impacts:

1. Environmental Harm - Unmaintained solar power equipment risks more debris in the lake from wind damage and adds chemical poisoning from dock batteries falling in the water and harming natural lake wildlife.
2. Fishing Tourism - Solar power is less dependable, and runs the risk of negatively impacting fishing craft electric supply needs during major fishing and tournament seasons. Fisherman do not want to stay in faraway slips in the big resorts, but prefer smaller resorts and more private docks to stay close to their crafts.
3. Affordability and dock costs - Solar power conversion is more expensive in equipment and insurance, as well as long-term maintenance to small dock owners vs electricity. This will eventually lead back to negative impact #1 aforementioned.

Deeper explanations:

Safety – It has been our experience that non-permanent residences on the lake do not maintain docks as well as lake business and permanent residences. Electric supply to docks is more than just lighting, but provides needed resources of electricity for watercraft usage. Adding solar alternative power creates more structural maintenance needs on floating facilities, that - according to insurance providers - will create more risk factors for any dock, including:

- **Heavier weight** from additional paneling on the floating structure itself
- **Wind and debris risk.** Most insurance providers state the risk of solar panel installation in high wind areas due to panel debris becoming unattached with not well secured or not well maintained panels. Unsecured panels blowing off dock roofs adds more dangerous debris into the lake
- **Fire risk.** Solar paneling can cause more fire risk to its applied structure due to panel components that may not be fire retardant and risk excessive heating in the summer months
- **Added risk of corrosive material in the lake** – As a resort owner we are already using battery powered solar on our property to light areas, and by experience know solar powered batteries have a far much shorter life. A constant need to replace solar batteries on a dock means more batteries will

end up being dropped during replacement in the lake. Secondly, docks that are not well maintained and breakaway, or any dock damaged in storms, will result in these batteries being added to the lake.

Unfair costs and treatment toward small owners' vs large businesses – A major concern of this proposal is that it appears to be unfair and discriminatory toward small owners, as there is no requirement in the SMP for big business commercial docks to add solar. The main question here is why is this not a requirement for all docks? Without this explanation, it appears to be placing unfair costs on private owners' vs businesses for no reason.

Too new a source – Solar generated power is too young of an alternative energy source -- with its current imperfections even today in the housing market -- to be considered a mandatory requirement on the water. The safety reasons aforementioned are easily uncoverable through research with dock builders and insurance companies.

Lake/Tourism reputation damage – This proposal WILL have a negative impact not just on the environment, but on the economic dependence of the area on fishing tourism. Fisherman will in the long-term choose not to stay at a place, or fish on a lake/in a tournament, where they cannot depend on the overnight power needs for their motors and batteries.

Due to the busy summer season, we were unable to attend the meetings to understand the reasons needs behind these proposals to which we disagree. We hope that these reasons can be publicly explained on your site, especially if there is strong consideration to move forward, which we hope in the end, the Corps will not.

Thank you for giving us this opportunity to state our disagreements and reasons, which we hope you will see are based on more than just added costs or property values, but long-term impact environmentally and economically to this region.

Thank you for your time and your consideration.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am very concerned about the removal of the buoys. I think you are asking for trouble and many deaths.

I think people should have the right to keep their equipment in their lockers.

20170908_O'Connor_C&T-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Cathey and Tom O'Connor

Subject: [EXTERNAL] Comment Table Rock Lake Shoreline Management Plan

Table Rock Lake SMP/MP/EA Project Manager Programs and Projects Management Division,

My comment is the solar power on existing docks. Will you allow for structure changes for the addition of battery storage for the use of the dock? Without using a existing slip. Also, the grounding of the dock after the solar power has been added to the dock? You still have to ground the dock because of the electrical current is very advent on the dock. Electrocutation will occur if you do not ground the dock. The high water brings in large trees that are dead on the shoreline, if they are not cleaned up they cause a danger to boats, docks, people, and shoreline animals, how will this be address in the New plan?

Thanks

I personally believe the current rules are restrictive enough. I would like to see them loosened rather than tightened. Many dock owners are cooperatively owned by retired people on a fixed income. I, myself, cannot afford to convert to solar electricity. Also, I would like to see some change in community vegetation permits. As long as it doesn't add to erosion problems, I can't see why a little extra mowing

20170908_Quick_D-WA

would hurt anything. It would enhance the visual beauty of the community as well as the lake itself. Don't get me wrong, I think Table Rock is a beautiful lake and I wouldn't want to see anything destroy the water quality. Try to do what people actually want. Don't change things just to prove you can.
Thanks, Darrell

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170908_Royster_H-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

It's B.S. bureaucratic overreach. The money people spend to live near this lake, and support this lake, will be seriously jeopardize. I will not put up with it, and will leave.

20170908_Smith_J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Of personal concern is the conversion of all docks to solar at a tremendous expense to dock owners. Current inspections are adequate to ensure safety at much less expense.

20170908_Smith_P-WA

Also I wholeheartedly object to the corps arbitrary limiting of users and carrying capacity on the lake.
The enjoyment of a Lake built with taxpayer money should not be limited!

I am encouraged that the public's comments during the process have been acknowledged by the Corps.
Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Pam Smith

Most people on are barely making ends meet!

There is no way they could afford to do what you are asking! Remember Lakers are the ones they keep the business is going if you don't have them then you really have a problem ! Also are storms are pretty intense solar panels would not last !

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170908_Ward_B-W

Brandon Ward

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I feel it is not safe to not have the NO WAKE BUOYS in coves and around marinas. There are tons of people who rent boats and do not know the rules of the lake. Signs like you want are too small and people will not notice them. Going solar is a joke, the amount of \$\$\$\$ that we are going to have to spend is not cost effective, and the storage of batteries will get in the way on walk ways not to mention

20170908_Young_J-WA

the acid that could potentially leak into our beautiful waters. In addition please do not limit the amount of boats that are allowed on the waters. Our lake is very big and beautiful and we want out of towers who vacation to be able to spend there time and money locally.

Thanks for your time, John Young

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

John Young

I would rather you attack the constant deterioration of the quality of lake water through phosphorous run of in the rivers feeding the lake. As a long term resident, I experienced the surface visibility of 26

20170909_Ashley_A-WA

feet. Now, I can't see my ski at times. I also feel that the rules of use preventing unaware driving of tubers should be developed.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Allyson Ashley

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170909_Buchholz_S-W

Steve Buchholz

i totally object to any and all changes on table rock lake. it is a great place to live and most people that live here cannot afford the changes you want. this is a retirement community. we just want to enjoy the lake and what we have. please do not make this a place that is unaffordable. there has been no problems the way it is. why change this? we're all happy and content.

- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I'm happy that the Corps is concerned about the lake, but most of these rules are ridiculous, and some are unenforceable. Reference to the solar vs electricity, we have an electrical engineer on our dock who tells me that there is a device that is relatively cheap that floats in the water and can detect electrical current. This seems like a viable alternative to the solar issue. Has anyone considered the theft issue?

20170909_Dempsey_T-WA

These batteries are expensive, and I'm sure that theft will be a major issue for dock owners. As these batteries are stolen, boat owners will not be able to use their boats. No wake buoys need to stay in place. Without them, not only will docks be damaged, but the risk of hitting a swimmer or another boat go way up. I would rather the Corps limit the size of the boats that can use the lake. Every week I see or encounter huge 45 foot and over boats create massive wakes and endanger other boaters.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Tom Dempsey

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170909_Hager_G-W

Gwen Hager

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Buoys are a nice reminder for unknowing boaters to be courteous. Not allowing vegetative permits would make the lake appear a mess and limit shoreline use for those without boats. The lake was meant to be enjoyed by everyone, not just boat owners. Not allowing dock modifications could result in docks appearing blighted.

20170909_Hanger_T-WA

I would ask the Corp to revisit the use of commercial waste cans above the flood plane . Those who used these were taking responsibility for there waste. Also the use of port-a-potties should be looked at for the same reason.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Thomas Hanger

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170909_Latimer_C-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Solar power needs to be installed only if the existing power has a failure then given as an option for repair and not dictated to install.

No wake buoys need to stay installed that are presently in place.

The speed limit on the lake during daytime hours needs to be set and regulated.

20170909_Neukirch_L-WA

The number of boats cannot be handled fairly with the number of commercial businesses available.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I grew up on this lake and want to say that I was able to take my kids and grandkids there as well.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170909_Rawlings_L-WA

Sincerely,

Landon Rawlings

I do not agree with this. With all these new proposed plans is going to make it hard to get to our docks. And the solar panels is just a bad idea because not all dock owners can afford that. Thank you Caden

ALSO I OBJECT TO REMOVING NO WAKE BUOYS,AND NOT BEING ABLE TO STORE ITEMS ON DOCK,YOU ARE CAUSING HARDSHIPS FOR RETIRED RESIDENTS WHO LIVE HERE YEAR ROUND. NO WAKE BUOYS ARE TO PROTECT OUR DOCKS.VACATIONERS ARE THE ONES THAT CAUSE THE WAKES BY GOING TO FAST.IF THE PROBLEM IS YOU HALF TO RETRIEVE THEM WHEN THEY BREAK LOSE ,HAVE DOCK OWNERS MARK

20170909_Schmidt_M-WA

THEM WITH THEIR DOCK # AND MAKE THEM RESPONSIBLE FOR THEIR OWN BUOYS. BUOYS ARE A MUST HAVE TO SLOW BOATS AND WAVE RUNNERS DOWN. SOLAR POWER IS TOO EXPENSIVE. UNLESS THE CORP WOULD HELP PAY FOR SOLAR. ALSO YOU WOULD HAVE TO HAVE MANY BATTERIES TO STORE SOLAR POWER, UNLESS IT WOULD BE TIED TO THE GRID. THEN YOU STILL WOULD HAVE POWER COMING FROM A ELECTRIC SOURCE. WIND POWER STILL NEEDS BATTERIES TO MAINTAIN ALSO. PLEASE DO NOT CAUSE UNWANTED HARDSHIPS FOR RESIDENTS WHO LIKE LIVING NEAR THE LAKE. IF ITS NOT BROKE IT DOES NOT NEED FIXING. THANK YOU, MIKE SCHMIDT

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Michael Schmidt

- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170909_Strohl_D-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170909_Thompson_B-W

The buoy's serve as a reminder to slow down and preserve the docks, without them it will be a speed zone that can't be controlled. Dock owners need to be responsible for proper placement and maintenance or fined! It's like taking down a stop sign at a busy intersection, people will have no

20170909_Voegeli_B-WA

direction! They are a great reminder for all of us! I can't imagine swimming off of the Dock without a buoy, reminding people that they need to be at idle speed Swimmers will be hit!!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Bonnie Voegeli

My husband and I had a new home built on Table Rock Lake a few years ago. We plan to retire here in approximately 8 years. We would love to have a couple of boat slips. We have 2 boats. The increasing restrictions and hike in prices is making difficult for us to be able to attain a dock or boat slips. We are 2

20170909_Waggoner_J-WA

of many people that love Table Rock and bring others here, we all help support this economy. Please lighten these restrictions so more people can enjoy the lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I don't understand what and why you feel these restrictions are needed or necessary No wake zones are very necessary they keep our coves and boats safe from excessive wave motion from speeding boat traffic Having a vegetation permit is very nice because it helps keep down the tix and the bugs and snakes near our homes that are lakefront Also having a locker on the boat dock it's just so nice you can

20170909_Woodson_B-WA

put all your stuff in there you don't have to carry it back up to your cabin and then back down and back up and back down it's just there for convenience and I don't understand why that should be a problem on table rock lake As far as Solar goes I do understand why this might be needed due to the possibility of electrocution but that can also happen if you have solar as well ,plus when you have a community boat dock it's very difficult to get everyone to have the sort of money that it is going to take to do a solar panel installation . Not only is it expensive but I don't understand the sheer weight of the battery panel added to our boat dock.

Please reconsider and amend these rules and regulations that you're about to place on us thank you

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Bobbie Woodson

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I object to going solar I also object to not being able to the assinine not being able to store fishing equipment in dock lockers I also object to vegetation management you r going to ruin this lake

20170910_Altizet_L-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Linda Altizet

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I oppose removal of no wake buoys. Our dock has several hundred thousand dollars worth of watercraft. Eliminating buoys would allow large boats and wake creating boats to subject our investments to damaging rough water. Swimmers around the dock would be in danger of injury or death from watercraft coming near docks.

20170910_Bouly_C-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Charles Bouly

Please reconsider the changes that have been suggested. Removing electricity from the docks has a huge impact on the people with houseboats. Also is solar really safe for the lake? What happens if/when the solar panels fall into the lake. The batteries could also contaminate the water.

20170910_Brown_H-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Living on Table Rock Lake for 23 years, I have not observed any problems with excessive boat usage of the lake and see no need to limit the number of boats using Table Rock Lake. Seems it would require considerable more time to manage boat usage.

20170910_Clark_G-WA

I see no need to require solar on all docks. We currently are required to have each dock inspected regularly by an electrician. I am not aware of any safety issues with the current system. Over regulation is not going to solve any problems and will only cause an economic hardship to our current economy and many limited income retirees.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Gary Clark

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

As a member of the Shoreline Management Focus Group, I was very disappointed in seeing this proposed plan. This was NOT what the members of the Focus Group put forward, but, the wishes only of the COE. I am disappointed in Col Dixon, who promised we would see the document before it was sent

20170910_Clark_K-WA

to the public and we did not. My support in the COE has been destroyed. Here are some reasons this plan should not be approved:

1- The COE apparently does not know that slip owners around this lake do not have funding provided as the COE for capital or operational expenses. Many of these slip owners are retirees and many have financed their slips so putting in the solar requirement may see many placed in hard time.

2- Placing limits on docks being modified. The COE only has to request funds to repair storm damage items but docks that need extensions to walkways to help with damage that could be done in low water, would be in hard times if they experienced storm damage more than 2 times as only 1 would be granted under this CRAZY rule. Would you want docks to be broken on the lake and harm others?

3 - 10 acres for 1 boat...whose study did this come from and will we need to update this plan before 61 years when this capacity would be reached. What study and how did you decide to have solution before a problem existed as your own SMP states TRL may not reach this max. capacity for 61 years. READ IT!

4 - Do any of the COE employees have a boat slip anywhere in a dock? I want to know where they keep items like fishing equipment, tubes, wake boards, skis etc. Why can't these be stored on docks?

5 - No Wake Bouys - Do they not help with safety on this lake? They have been used for years and people have respected knowing before entering a cove that it is a cove with docks and activity. Safety.

6 - Has the COE not noticed that many new boats are built with holding tanks & porta-potties? People have regulated themselves with septic improvements around this lake and they certainly should be able to park their boats with those items on it at their dock. We are responsible people of the public!!!

Marina do have houseboats but we, the public, also have boats just in our own slips.

7 - Turf friendly tires have been allowed to access docks in the past. Did you want to have a medical personnel on COE payroll or do you want to violate the public's privacy to require medical requirements.

We know in the Master Plan it was stated that most people were content with development around the lake & current facilities & recreational opportunities should be maintained on & around TRL. Let's see if the COE, now, will listen and read these, Our, THE PUBLIC, comments.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Kathy J. Clark

For once could you not screw up and screw over the American public.
I have lived here most my life and seems the Corp just does not believe if ain't broke don't fix it!
Everytime they fix something they break it metephorically speaking.

Please don't restrict the use of golf carts to access the dock. I and many other people who like to boat and fish Would not be able to do so. I have a letter signed by the Corp, saying I can use my cart. What happens now?

I feel that the rule changes are to benefit the Army Corp of Engineers. This is ridiculous. Why are they trying to take private docks away and or make you change power supply. Power is power. Limiting the amount of boats on the lake. That will benefit no one. Lets take money out of every ones pocket but the corps.

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

If the Corps takes control of the lake it will cost me more money to launch and/or dock my boat. If every one has to go to solar power on the docks it will cost businesses and homeowners a fortune to switch. As far as I am concerned the Corps doesn't take care of the lake and vegetation now. So why should they be in charge of it completely? Leave Table Rock Lake ALONE! It is fine the way it is..... Maybe someday

20170910_Hatfileld_A-WA

when the Corps learns how to do their job right they can then try to convince people to change a few things.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Arthur Hatfileld

- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Why change something that works perfectly, so you can have further encroachment both on private property, and people's rights. We don't need further governmental help with our way of life.

20170910_Nichols_T-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Tony Nichols

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170910_Owens_M-W

Putting people in a buffer zone due to a campground that has been closed for more than 20 years is insane. We walk and clean up the area more than anyone. The people across the lake can mow. Why can't we? I will contact Roy Blunt and Billy long on this.

20170910_Peacock_T-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Terry Peacock

I request on behalf of the citizens of the state of Missouri and the localities in direct connection to Table Rock and all other MO waterways that any regulations over these waters be decided by said citizens, rather than adopted from or mandated by Federal regulators, namely the EPA. The EPA has been used

20170910_Peyson_D-WA

to take away many rights and freedoms from U.S. citizens and should not be allowed to do so any longer.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

David Peyson

This is completely over stepping. How many regulations are in place now and there aren't enough water patrol to enforce them.? The amount of money it would cost the state would be of great concern to me as well. We all know when there is a deficit in the budget, it would mean raising our taxes.

20170910_Travis_J-WA

The removal of the buoys is ridiculous!!! There are number outs people who don' even pay attention to how close they are to your u and yes ur dock as it is.. For instance just this summer laying on our mat, which is tied to our dock. A boat goes by at a decent rate of speed between the No Wake bout and our mat, which had small children laying on it. Some fools don' t even know what a No Wake means. I believe there might be stricter regulations, as to who can operate a watercraft and stop placing unnecessary regulations on those of us that do abide by the laws. Thank you, Jillian M Travis

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Jillian Travis

- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I go to college in St Louis and my parents live in Hollister Missouri. I look forward to going out on Table Rock Lake when I'm home, it's quality family time. Please don't take that away by snatching the lake away from the people, the lake is the heart of entertainment in this corner of the country. It's the icon

20170910_Walegir_J-WA

of fun. We live and we die, do you really want to take that fun away from hundreds and thousands of people, children included?

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Joe Walegir

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,
