RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170911_Barnes_K-W

Kristi Barnes

Gentlemen: I respectfully comment as follows: I have a boatslip and a vegetative permit and the corp has been firm but reasonable in my dealings. I think the proposal to not allow storage of sporting equipment on docks is not reasonable if you have a secure Locker. I have a metal locker with lock which is handy for skis, etc. I don't object to disallowing the buoys as I have seen how they are in the way and not kept in place. No objection to the solar rule. I think the vegetative permit procedure should stay as in current plan.. respectfully, Randy Bruton 479-244-6467

Please use this form to respond to provide your comments on the draft revised Table Rock Lake Shoreline Management Plan and the draft Environmental Assessment. The draft revised Shoreline Management Plan and Environmental Assessment may be found on the web at <https://go.usa.gov/xN92n>. Please also include any comments you may have regarding the 2014 Table Rock Lake Master Plan. The 2014 Table Rock Lake Master Plan may be found on the web at <https://go.usa.gov/xN92n>. Feel free to take an extra form and sent it back later to the address listed below. **Comments must be submitted by August 30, 2017.**

Your Name/Organization: Kevin Cervellere
Address: 106 Celebration Cove, Unit 241
BRANSON MO 65616
E-mail: kcervellere@att.net **Phone:** 417-839-0096

Please circle the number that best represents your opinion of the draft documents: Revised Shoreline Management Plan, draft Environmental Assessment, and draft Finding of No Significant Impact:

1 2 3 4 5 6 7 8 9 10
Strongly Disapprove Strongly Approve

What are the most important factors that affect your opinion of the draft Revised Shoreline Management Plan?

I have to deep concerns: 1) Removal of electrical service on existing docks and it's impact on the viability of the dock structure, and ability to maintain boats in those slips. (expense to owners to remove existing service, install new service, maintain new service, dock structure not designed for additional weight, boats in many docks are of a larger size that require constant power (ie: CO monitors, refridgerators, and because of the draws to the power the need for constant power that solar docks cannot provide). Safety on our lake is mitigated by the 5 year annual inspection, TRL is a very safe lake concerning electrical leakage.
2) Buoys Removal - While this may be a cost saver for the MO Hwy (Water Patrol), the existence of thousands of tourists that are novices on the lake make removing the buoys very dangerous to life and property damage.

What are the most important factors that affect your opinion of the draft Environmental Assessment and draft Finding of No Significant Impact prepared for the Shoreline Management Plan Revision?

The shoreline usage looks to be in line with good practices.

Comments on the 2014 Master Plan: My hope is that the plan will be revised to grandfather in the existing docks, and they they keep the buoys on the lake that provide the protection of life and property.

The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170911_Cornelison_A-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The original directive was flood control AND recreation.. You (the Corps) haven't done so well on the primary and now you want to destroy -the secondary directive as well.

"Let us try" ? You should try harder. Please request that Gen. Semonite campaigns for public office since his interest in politics is so obvious.

20170911_Cox_J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

James Cox

Table Rock Lake Shoreline Management Plan Revision, Environmental Assessment, Master Plan Comment form.

Opinion of the draft documents, 1 strongly disapprove.

Solar Power is a waste of money and should not be forced on dock owners.

Having a plan to limit boats on the lake when it is not even close for a need is a waste of every ones time and efforts.

Flood control should be the Corps first concern. Since 2008 you have FAILED. After it has rained for a week and the lakes are above normal levels, it is a little late to release water. You should look at private property losses instead of farm land and crops that are far less costly.

It is my understanding you have several generators at the Table Rock Lake Dam that has been down for over a year. If true that is where the resources used for the shoreline management plan should have been spent.

The Army Corps of Engineers should be building flood control solutions, Not managing the Lakes.

20170911_Dick_B

Please leave the plan the way it was.

Subject: [EXTERNAL] Table Rock Lake Proposed Shoreline Management Plan Comments

As a general comment, with over 70% of the Table Rock Lake shoreline protected the mission for providing recreational development is limited to a small percentage of shoreline. For over 25 years our family has owned property near or on the lake and the areas we use have not seen any increase in any negative environmental impact like erosion on paths to our docks. We believe the Corps has effectively managed the shoreline to protect the lake and there is no need for increased regulation in the future. Specifically we would like to comment on the following proposed changes:

- * Requirement to convert all electricity on docks to renewable and remove existing power.
 - * As a lake with one of its missions to produce electricity it is irrational to imagine the docks on the lake could not use the power generated. Converting to alternative energy sources would require storage of chemical batteries on every dock, cost owners millions of dollars to buy new power systems and remove all existing power infrastructure. The power used on the docks for a few lights and lifting a boat up out of the water has to be insignificant. In addition, generators are going to be required to be used during certain periods of heavy electrical use or cloud covered times. This creates another additional burden for owners to purchase, transport and store these. This requirement does not provide any benefit to the recreational mission for the lake or to the environment.
- * Requirement for no powered vehicles on Corps property
 - * Given the distance from the docks to private property the inability to use powered vehicles to transport equipment, supplies and people to and from the docks is another example of placing undue burdens on the public and discourages use of the lake. Vehicle restrictions like remaining on the path, not causing erosion, etc are fair and reasonable but a ban is over burdensome.

The current management plan has been adequate and successful in meeting the Corps objectives. These additional restrictions are overly burdensome, will cost owners and communities thousands if not millions of dollars, negatively impact property values and discourage the use of the lake. We would

request the Corps not increase the restrictions, burden and expense of using the lake and allow the public to enjoy the lake as the stated and authorized mission intended.

Thank You

I believe you do need to do something about wake control with the Wake Board Boats and the Cruisers creating large wakes that are beating up our Dock. We had a 45 ft houseboat in our dock 16 slip dock and it would bounce around like a rubber duck. The Wake Buoys do not work for the area that we are in because of our location.

20170911_Dixon_L-WA

Please leave things the same we don't have enough freedoms as it is I can't camp anymore because the camp grounds are closed don't close off access to the lakes where I can't fish or go for rides on our boat. Rethink what you are trying to do. I don't have money to go to theme parks. But having a lake close by is wonderful. If you don't restrict our use.

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170911_Faulkner_N-W

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

1. Since when does the Corp feel they have a right to control storage unit contents?
2. Will the Corp arrange for cost control of the proposed solar panels and their installation.

3. Corp acting like a dictator, not like a public servant paid for by the public.

4. Who will pay for the damages to the docks and boats by removing the no wake buoys.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Ron Gillespie

I sincerely appreciate your efforts to safeguard this great resource we call Table Rock Lake.

I believe that the current plan in place now does a good job of that and these additional proposed restrictions will adversely impact the residents, businesses and tourists.

- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I was born on Schooner Creek by what is now Kimberling City in 1944. I watched the dam being built. I rode the ferry that crossed the river at Kimberling City. When the rains came and the old bridge slowly disappeared from sight. I remember how clear the lake water was in the 60's and 70's. I was one of the first kids to jump off the new bridge from the very top. I now live on Little Indian creek by Lampe. I

20170911_Gregg_E-WA

watched sea tow drag shuttles busses out of the lake this spring and seen a lot of debris that was never recovered, I watched the water quality drop to the point, i am almost afraid to swim in it. Some parts of the lake seem worse than others. Little Indian Creek is worse than other parts of the lake at times. It seems that your agenda for the lake is totally misplaced because the water quality reminds me of the Mekong Delta.

Thank you

Edgar W. Gregg

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Edgar Gregg

Requiring dock owners to convert to solar energy is a unnecessary burdensome expense. At lease grandfather current docks and continue require periodic inspection to insure safe operation.

Trent Hebing

U.S. Corps of Engineers
Little Rock District (Table Rock Lake)
Little Rock, Ar. 72203

September 11, 2017

Dear Sir:

The following are my comments on the management plan for Table Rock Lake Shoreline:

(1) Shoreline in front of private individual docks for personal use must be cleared of weeds and brush for Safety reasons. Dead trees, logs, tires, trash washed ashore by high water-floods should also be cleared for Safety reasons, unless the Corp wants to take over that job.

(2) Number of boats on the water is not as big of a concern to me as BOAT SIZE on a small lake.

(3) Can not afford expense of solar panels; however, Corp may wish to provide that service to individual dock owners free of charge.

(4) Corp must provide and maintain wake buoys - not on docks, but in water for Safety of people in and out of water.

I was there when Table Rock Lake was White River! I feel that I have a voice. Remain true to the people!

Sincerely,

Margie Planchon Hort
604 Valley View Drive, Midleboro, Md.

Please take a look at your drastic changes being proposed, as a young woman with a family who has a home on the lake and a private dock slip, I can't imagine some of these changes happening. You would kill the Branson area financially also. You would kill memories being made by families daily, like mine for 30 years now.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

No changes, please. There are none needed now or in the near future.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170911_Jeffers_K-WA

Sincerely,

Kathy Jeffers

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I have no complaint with requiring future dock owners to use solar/wind power, but unnecessarily mandating existing docks to be changed, even with a ten year deadline, is simply draconian. The solar power industry is constantly evolving and still far too expensive. Changing over now risks missing much improved & less expensive products sure to come in five to seven or so years, & waiting til then creates

20170911_Jones_M-WA

a likely logjam of deadline compliance. Once solar products become better/cheaper, dock owners will begin to replace their electric systems voluntarily to take advantage of solar savings. The Corp is simply jumping the gun with an awful mandate to force a change that will occur on its own without the economic trauma sure to be caused.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Michael Jones

There are so many things to complain about . Just leave things alone. Next thing you know ,you'll be handing out tickets for peoples day on the lake. Why don't you allow shoreline clean up, burning after flooding mandatory instead having to get YOUR PERMISSION TO CLEAN AND BURN. YOU are part of the problem ,of our lake growing dirty. Rules, rules, rules. WE NEED NO MORE RULES,AND GOVERNMENT

20170911_Katz_R-WA

CONTROL. If you want solar power go for it... YOU PAY FOR IT. try working more at the drug trafficking on our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Roxy Katz

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I have some concerns regarding your new proposed Shoreline Management Plan. I feel you already have enough restrictive rules for the lake and that the existing plan is working and does not need to be changed. I believe your time and manpower would be better used in monitoring and controlling the lake level rather than making more rules that to me have no rhyme or reason. I realize you have no control

20170911_Lyman_D-WA

over rain but I think a better job could be done on releasing water from the lake system so that we don't have as much damage, killing of trees, erosion and devastation to the area. The 100 year floods seem to be coming every couple years. Your help is needed to ease these disasters. Please keep the existing plan...thank you for your consideration.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Diana Lyman

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I also object to not allowing dock owners to store equipment in a dock locker!! We just bought one and it's extremely convenient and secure!! Our dock isn't close to our cabin and so we would have to carry, skis, tubes, life jackets, wake boards, etc each and every time!! I feel that eliminating these storage units

20170911_Mccall_K-WA

will only result in people leaving these types of items all over the dock which would be another difficult matter to police!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Kevin Mccall

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170911_McMillian_K-W

Kimberly McMillian

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Limiting capacity to the lake would only create problems. Local businesses that survive on the heavy traffic during warm weather days would suffer.

20170911_Miller_B-WA

Removing electricity and requiring other means of power would be very costly to homeowners. If the government wishes to remove electricity then perhaps aid and/or affordable solutions need to be created for homeowners on the lake with docks.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Brittany Miller

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Table Rock is a beautiful lake that we are very proud of and believe the current plan is working and is fair. The proposed new rules will be a financial burden on many dock owners and the removal of no wake bouys would create more unsafe protection of docks. In fact more bouys should be allowed to further the safety of the lake in those areas. Folks have spent thousands of dollars for storage lockers on

20170911_Sapp_M-WA

docks which have always been allowed. Is the Corp going to buy those back from the owners? Our lake is beautiful with its current vegetation permits in place and should be allowed to continue. Please Please Please listen to everyone's comments and realize we all want to keep our lake beautiful and safe. The current regulations are working.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Michael Sapp

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

We have had property on The Lake for over 16 years and really Enjoy things the way they are and really see no reason to change anything at all. As I see it the changes listed above would not improve anything in our area and would just put more Regulation on using The Lake. Maybe a suggestion would be to require New Docks to install Solar Power as opposed to making everyone change to it as that will be a

20170911_Scranton_R-WA

Major Hardship for a lot of people. We personally have had Solar on our dock for the last 16 years and really believe that it is the way to go. Most people take a lot of Pride in dock ownership and take care of their property as needed. And upgrade things when needed. Please reconsider the changes you propose as I really don't see the need.

Thank You!

Robert Scranton

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Robert Scranton

I am concerned with all the regulations you want to impose on the people using our great lakes in Missouri, that it will turn out to be like the restriction put on us using our public lands. There are fewer people using the public lands because the only way you can go on them is either horse back or walking.

- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

You beauracratc assholes, get a life. If its not broke, don't fix it. Been here since 1965, back off !

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170911_Travis_J-WA

Sincerely,

Jim Travis

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I object to all of the above

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170911_Webster_J-W

Sincerely,

Jennifer Webster

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I think that the Corps of Engineers needs to supply some data on where these idea came from and why they are so pertinent. I do not believe that a majority of people who live in the lake, own property and or docks, and people who just visit the lake would ever propose anything like this. I would say less than 5%. So, please don't impose something that is not supported by the majority of people who are a part of

20170912_Altis_Z-WA

this community. a better program would be water quality management, preventing waiste from getting to he lake from the Springfield area... that's something that would improve the quality of land and preserve it for years to come.

Please do not do these things that are proposed. It will hurt our community

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Zach Altis

Table Rock Lake is beautiful and we enjoy our many visits to our condo on the lake. I have not noticed any problems with the current situation on the lake. I see no logical reason for instituting the changes that are being proposed. Please don't institute a group of changes just for the sake of change, or to justify your jobs.

20170912_Bahnsen_R-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Robert Bahnsen

While I appreciate the Corps of Engineers and their hard work, I do not understand the adversarial stance that has been taken against the people who love our lakes the most - dock owners. We have, within the rules and regulations of the corp, constructed and enjoyed our docks, taught our children and grandchildren to be stewards and advocates for the lake and nature. We all have a vested interest in

20170912_Beeler_C-WA

protecting the lake and our investments. The changes would create such hardships that most would not be able to comply. As a citizen and dock owner, I feel that these changes are detrimental to the future of the lake, arbitrary and capricious.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Cynthia Beeler

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Do not punish us by over regulating. We have paid top dollar for our slips and homes. Further restriction regarding the slips and shoreline devalues our investment, and thus provide further financial hardship on owners. Let's keep this out of the courts and work towards amicable outcomes that are mutually beneficial to all.

20170912_Briwn_D-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Debbie Briwn

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170912_Brock_A-W

Subject: [EXTERNAL] Table Rock Lake Shoreline Management Plan

Dear Table Rock Lake SMP/MP/EA Project Manager,

My wife and I are dock slip owners on Table Rock Lake and I am the current President of my Homeowners' Association in Kimberling City, Missouri. Our subdivision is located on the shores of Table Rock Lake and half of our homeowners have property that adjoins USACE property. I have several comments and concerns with the proposed changes to the Shoreline Management Plan which I will outline in the list below.

1. Solar Power Mandate – The proposed requirement to convert all docks to solar power is unnecessary. The cost to do so will cost residents tens of thousands of dollars and the benefits will be minimal at best. Solar power will not mitigate the safety issues with using shore power on a dock. Given the design of the solar power system, the dangers of electricity and electrocution will still be present and equally as dangerous. Furthermore, the aesthetics of using shore power electric lines are not that detrimental to the lake. Massive solar cell arrays on docks will be every bit as damaging to the aesthetics of the lake.
2. Restrictions on Golf Carts and UTVs – I agree that there needs to be restrictions on the golf cart and UTV/ATV traffic on USACE property. However, non-modified stock golf carts do not do a fraction of the environmental damage that UTVs and ATVs do. I believe that to preserve the USACE property best and allow public access, non-modified stock golf carts should be allowed. I believe the best course of action would be to restrict the use of UTVs and ATVs on USACE property. The high speed gearing, off-road terrain tires and overall size of UTVs are very damaging to the environment and obnoxious to others using the lake.
3. Restriction on Dock Lockers and Dock Storage – This proposed regulation is highly unnecessary and would vastly hurt the ability of the public to use docks. Dock lockers and dock boxes that are built into the dock do not damage the aesthetics of the lake. A more sensible regulation would be to require that all items on a dock be stored inside a dock locker or dock box. Requiring that items to stored, rather than left out in the open will help preserve the aesthetics of the lake.

4. Restrictions on No Wake Buoys – I do not support the removal of No Wake Buoys. Removing these buoys would be very detrimental to the safety of persons using the lake and the lake environment itself. Removing the No Wake Bouys in favor of a small sign attached to a dock is not a good solution.
5. Vegetative Removal Permits – I support the changes to the vegetative removal permits. In order to keep the current lake aesthetics, I believe that these changes are necessary.
6. Dock Depth, Slip Sizing and Lake Carrying Capacity– I support the changes that are proposed to the dock slip sizing. Limiting the slip sizes will help to control the boat sizes on the lake. I also support the minimum 8’ depth on new docks. I support the lake carrying capacity requirements and I believe the lake would benefit from a capacity of less than what was proposed.

In addition to these items addressed above, I also have some suggestions for the decision making process on the shoreline management plan. Living on Table Rock Lake, I can see firsthand what are some of the biggest impacts to the environment around the lake. I believe that to preserve the lake for the recreation and beauty that it was intended for, steps must be taken to control the boat traffic and size of boats on the lake. Some of the most damaging activities on the lake is through “wake-surfing” boats and the sizable wakes that they produce. These wakes are dangerous not only to surrounding boaters, but damaging to docks and the shoreline. I believe the USACE should take steps to regulate the size of wake that a craft can produce intentionally and take steps to mitigate the shoreline erosion from excessive boat wakes. In addition to crafts with excessive wakes, steps should be taken to control the noise pollution from crafts with open exhaust and stereo systems. This unnecessary noise pollution from these crafts reduces the overall appeal of the lake to both residents and tourists alike. This mitigation for excessive wakes and noise pollution should start with a higher law enforcement presence on the lake. The Missouri Water Patrol does a fantastic job patrolling the lake, but there is a need for higher enforcement on higher traffic days. Many of the accidents and property damage on the lake could be prevented by simply removing incompetent or impaired operators from their watercraft. I believe that the USACE should focus on working with the Missouri Water Patrol and step up enforcement to increase the appeal and the quality of life and recreation on the lake.

I would like to thank you for your time in considering my comments for the revision of the Table Rock Lake shoreline management plan. I can be reached at this email address at any time for further comment or explanation of my views for Table Rock Lake. I fully support any decisions made by the USACE and continue to enjoy the privilege of living at and playing at Table Rock Lake.

Sincerely and Respectfully,

Mark Brown and Yuanyuan Qu

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I have lived on TRL for more than 30 years and have enjoyed it every year. Please don't ruin it for me by making these outrageous changes. Removing the no wake bouys will damage docks by people who don't know any better. Solar power on the docks?.....when the corps of engineers switches everything they have to solar then we can consider the docks.

20170912_Chandler_D-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

David Chandler

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

If the Corp really wants to improve Table Rock Lake, they would concentrate their efforts on the influx of pollutants from the municipalities feeding the James/Finley river tributaries. Granted this appears to be outside the Corps jurisdiction, but if it put significant penalties for the pollution sent to TBL from those

waste systems the lake would return to the condition it once was in. The proposed changes benefits no one or party that uses TRL.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Stephen Chidrick

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170912_Dobson_M-W

I think Table Rock Lake is fantastic! The changes that are proposed would not in my opinion improve Table Rock Lake. In fact, it is my opinion these proposed changes would actually negatively impact Table Rock Lake. Please reconsider and leave well enough alone.

20170912_Dorrell_C-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Charles Dorrell

The way this is going it is going to create a lot of unhappy owners and guests. This may cause a lot to leave and never come back and find other avenues. This would hurt the area, economy, and the lake in the long run. Things don't need to be so controlling for everything to work out and operate smoothly.

20170912_Dunivan_P-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

COMMENTS ON TABLE ROCK SHORELINE MANAGEMENT PLAN

As a general statement, I feel the plan is an overreach of government interference with the home owners around the lake who have made a major investment in developing the use of the lake and the local communities that surround the lake. In particular I would like to see the following items changed or give the Corps some "wiggle room" for exceptions that may arise:

1. Solar requirements for newly installed dock permit should be implemented immediately so that contractors and issues associated with solar on docks can be identified and corrected before doing extensive retrofitting. More time needs to be given existing dock owners to convert (20 years).
2. Page 13, lines 14-17. This needs to be changed. Floating gear, life jackets, fishing equipment, and other personal gear associated with water activities on the lake must be allowed to be stored on the dock. My wife and I are over the age of 73 and we are not able to haul this stuff down to the boat dock each time we plan to use the facilities.
3. Seniors need to have accessibility to the lake community docks – paved path and/or stone/concrete steps depending on the steepness of the terrain. My wife has already had falls trying to navigate the steep undeveloped terrain to the dock. I don't think the individual(s) who drafted this plan gave any thought to senior access to the lake via community docks.
4. Page 34. ATV access needs to be allowed within some specified number of feet (i.e. 150 feet) of a community or private dock. Based upon the size of the lake, I don't understand why the corps is objecting to this.
5. Fish cleaning areas on the docks with pumped lake water needs to be allowed.

Table Rock Lake Shoreline Management Plan
Revision, Environmental Assessment,
Master Plan Comment Form

US Army Corps
of Engineers®
Little Rock District

Please use this form to respond to provide your comments on the draft revised Table Rock Lake Shoreline Management Plan and the draft Environmental Assessment. The draft revised Shoreline Management Plan and Environmental Assessment may be found on the web at <https://go.usa.gov/xN92n>. Please also include any comments you may have regarding the 2014 Table Rock Lake Master Plan. The 2014 Table Rock Lake Master Plan may be found on the web at <https://go.usa.gov/xN92n>. Feel free to take an extra form and sent it back later to the address listed below. **Comments must be submitted by August 30, 2017.**

Your Name/Organization: DONALD E. HABERLEIN
Address: 1364 LITTLE AUNTS CREEK RD.
KIMBERLING CITY, MO 65682
E-mail: 4don.haberlein@gmail.com Phone: 417-739-1901

Please circle the number that best represents your opinion of the draft documents: Revised Shoreline Management Plan, draft Environmental Assessment, and draft Finding of No Significant Impact:

1 2 3 4 5 6 7 8 9 10
Strongly Disapprove Strongly Approve

What are the most important factors that affect your opinion of the draft Revised Shoreline Management Plan? THERE SHOULD BE NO REQUIREMENT FOR EXISTING BOAT DOCKS TO CONVERT TO SOLAR POWER. THE ELECTRICAL INSPECTION REQUIRED FOR THE RENEWAL OF DOCK USE PERMITS SHOULD BE SUFFICIENT TO INSURE THE SAFETY OF DOCK WIRING. EXISTING DOCKS HAVE ALREADY PAID THE COST OF PROVIDING SHORE ELECTRICITY.

What are the most important factors that affect your opinion of the draft Environmental Assessment and draft Finding of No Significant Impact prepared for the Shoreline Management Plan Revision? THE REDUCTION OR ELIMINATION OF 5MPH/NO WAKE BUOYS WILL INTRODUCE SAFETY HAZARDS THAT WILL RESULT IN INCREASED BOATING ACCIDENTS & PROBABLE DEATHS. EASING BUOY RESTRICTIONS AROUND DOCKS SHOULD BE SERIOUSLY CONSIDERED. LIMITED USE & WEEKEND BOATERS DO NOT UNDERSTAND THE RISKS OR DISTANCE RULES REGARDING KEEPING AT LEAST 100 FEET FROM DOCKS.

Comments on the 2014 Master Plan: SEE ALL OF THE ABOVE ALSO: RESTRICTING OR REDUCING THE AVAILABILITY OF BOAT DOCKS AND BOAT SLIPS GREATLY INCREASES THE COST OF EXISTING SLIPS AND REDUCES THE PRICE OF VACANT LOTS BECAUSE FEW HOME BUILDERS / BUYERS WANT A HOME ON OR IN A LAKE AREA WITHOUT SLIPS BEING AVAILABLE.

Comments may be submitted via mail, email, fax or the project website with attention to: Table Rock Lake SMP/MP/EA Project Manager, Programs and Projects Management Division, USACE, Little Rock District, P.O. Box 867, Little Rock, AR 72203.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I truly appreciate the Corps efforts in maintaining Table Rock and its beauty. I have owned property on India Point and have enjoyed the lake and its beauty for nearly 20 years. The existing Shoreline Management Plan for Table Rock Lake is working; therefore, I question the need to create/add a new plan where there is not an issue/problem occurring. Preserving over 85% of the lake shoreline from and

20170912_Hawthorne_B-WA

disturbances is the most significant step to maintain the quality and beauty of Table Rock, and I support that plan that is already in place, and DO NOT support any of the modifications noted above.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Bill Hawthorne

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I also object to restrictions on what can be stored in a dock locker

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170912_Jabara_J-WA

Sincerely,

Jeff Jabara

I would love for you in 'management' to come set on my dock in the summer and see how close the boats come to my buoy that I am now allowed. The boats come as close to it as they can, not having a clue that they are to stay back 100'. Now this being said, what is it going to be like when my kids and

20170912_Knight_S-WA

grandkids, even great grandkids, are swimming and playing in the water, as to how far is a boat going to stay away from the dock.. Come and watch them run over us!!!

What does it matter as to what we store in our lockers on the dock!!!! Water toys and fishing equipment not allowed, oh come on!

Wasn't long ago that you was requesting anyone installing new docks to run the electric in the water rather than up in the air overhead for electric to the dock. Now that was scary getting in the water with electric wires curled up on bottom of the shoreline/dock..

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Sally Knight

I feel the solar power conversion for the docks is unnecessary and a financial burden many could not afford.

The cost associated with removing all electrical, as well as batteries and solar panels is a burden to dock owners. The batteries alone would leave a huge environmental footprint, as well as possible battery acid

20170912_Loudenback_K-WA

in the lake, etc. Long term the cost of the batteries, and their disposal, I don't feel is a good idea and actually creates more problems for the environment than what is needed.

As far as the arbitrary rule to dictate what can and cannot be on private docks and /or lockers; isn't part of why we love Table Rock Lake is for the recreational aspects of being here? Even the marinas have these items on their docks, for lounging, socializing, sport, and recreation. It's part of what makes going to the lake Fun.

The Corps of Engineers has been regulating the docks on a regular basis for years. The current plan has been working. I do not feel like these changes benefit the users of the lake, who love this lake, and I feel the newly proposed management plan is not needed.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Kelly Loudenback

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The Corps intention of shoreline management is admirable but more attention should be given to allowing property owners to assist Corp in clearing flood debris from shoreline. Also, while issues are difficult to define, a major problem appears to be rough water caused by the bigger and faster boats.

Table Rock Lake is approaching safety (of lack of safety) issues for which the Lake of the Ozarks are known for. Thanks for your attention to these matters.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Otto Mertens

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am concerned about restrictions regarding the parking of golf carts by boat docks.

In addition, I am also concerned about any restrictions regarding a properly installed ABYC holding tank.

20170912_Montgomery_J-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

John Montgomery

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I understand the buoy issues however it seems better to fine heavily the people that do not comply to the rules Having alternative energy is very costly and will not make the docks look any better. This appears to be a political thing being imposed upon dock owners.

20170912_Neubauer_B-WA

Not parking your golf cart/vehicle near your dock is crazy. Where on earth do you think we will park or are you wanting everyone to walk?

The docks that look junky fine them. where do you think people will store the stuff they use on the lake. We have dock boxes to keep the stuff out of sight and not make the docks look bad.

I like the Corps and what they do however these new regulations appear to be very political in nature and not good for Table Rock Lake. We love our lake. It brings a lot of revenue to our area. I would like another moratorium on docks as we seem to have a lot of docks already.

Thank you for allowing me to voice my concerns Billie

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Billie Neubauer

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

History has proven that over regulation is never beneficial to a community, a culture or an economy. Just cast an eye on our prisons, penitentiaries and penal system for blatant examples of over regulation. The end result becomes subjective interpretation of rules and regulations rather than objective and very little to show by way of success..

20170912_O'Brien_M-WA

Imposing such stringent, potentially ridiculous regulations on the treasure that is Table Rock Lake can weaken or even kill the tourist industry, wound or destroy job creation, wealth influx and impact our schools (even further) by chasing out a strong, constant tax base. Excessive regulations have negative consequences, bringing about the very things over regulating was trying to prevent. Attempts to cure 'problems that aren't really problems will damage our lake and surrounding communities and seems more like destructive regulation than simply regulation.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Michelle O'Brien

Subject: [EXTERNAL] shoreline plan Table Rock buoys

Hello, I feel that the boat dock "No wake buoys" in the water are extremely important and should be left in place. Too many boats do not read them and its tears up the boat docks and causes more bank erosion. This should include all watercraft including Jet Skies. They make big, tight circles in front of and around boat docks and shoreline to create big wakes. Also its common sense that boat docks have more people around them which includes swimmers and the boat dock buoys help protect no only the people but the docks physical integrity and save unnecessary, un natural premature bank erosion. Please continue to allow the safety buoys and educate the public and allow the water patrol to ticket the violators.

Thank you very much,

Shane

Don't understand how a private business can shut down a state park. The weekend of September 9th and 10th State Park was closed and couldn't use the boat ramp. That's ridiculous when the Corp and State Park to allow this. Especially when taxpayers support this. Also need to enforce the permits that

are in place to remove shoreline vegetation. Especially in remote areas. Get the lake levels down in the winter to avoid the flooding. Getting to be a real financial problem for merchants in Bull Shoals.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Mike Sowders

The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

i am in shock and awe at the proposed changes. This was surely a concoction of someone who hates the lake and has never been here. NO ONE from here would do this.

20170912_Wells_K-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

kellie wells

I have issue with the limit of boats on the lake, I own a lake home on table Rock. If you limit capacity and people who live in the area are going to sell and move, to and area that don't have capacity rules, then what happens to the economy of our area? Maybe you should think about more lake patrol vs trying to man every boat ramp on table Rock. So what happens to our private boat ramps fir the owners in the

20170912_Wood_S-WA

area. We just can't go on the lake when we want? I agree we don't want any change. Who is going to benefit from this?

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

i would add that the city of Branson is going to need the lake to stay as it managed today. There is a new generation of folks that are looking for areas to retire to and or visit several times a year. Branson was built to attract the previous generation and does not offer many attractions to the Boomer generation that is approaching retirement. The lake as it is today is a big draw to this next group of people.

20170913_Baird_E-WA

Increased restrictions and changes to the lake will drive out the dollars that Branson will need to survive.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Edward Baird

Subject: [EXTERNAL] Shoreline plan draft

To Whom it May Concern:

I own a vacation home in the Twin Island Estates subdivision off of Hwy JJ. I also own two slips in a dock near my home. I have read the proposed Shoreline Management Plan and have the following comments:

1. Alternate Power on docks. While I'm not looking forward to the cost to convert, I can tolerate the switch to solar powered docks, provided two things are included: (a) There will be times when a small campsite sized generator may be necessary to use boat lifts - i.e. cloudy days, extreme usage periods, etc. These need to be allowed on the dock and be part of the system, and (b) I'm in favor provided this also applies to commercial docks such as the State Park marina and the Bass Pro marina at Long Creek.

2. No wake buoys at docks. Even though our dock doesn't have a no wake buoy, I'm not in support of eliminating these devices. Each one has a permit number on it, and if mis-used or lost, the owner can in turn be penalized. I also feel that if the Corp wants to think of eliminating these, they should then do something to ban the use of 'wake boats' such as the Mastercraft boats, from the lake. It makes absolutely no sense to allow a boat on the lake that entire design is based on ".how can I make a huge wake", thus destroying docks and for that matter, shoreline. These boats have no place on a lake the size of Table Rock.

3. Equipment and Chairs on Docks. Our dock has a locker for each boat slip. I see no issue whatsoever with storing swimming gear, fishing gear, beach chairs, etc in those lockers and allowing same to be used on the dock.

4. Golf carts driven to dock. If the Corp's intent is to eliminate access to docks by golf carts, I think that is totally unacceptable. I hear that the concern is again damage to the shoreline. Once again, let's eliminate the wake boats that destroy the shoreline rather than golf carts. I wouldn't mind if the intent is just to eliminate the very aggressive off-road vehicles, but not golf carts, that is way too extreme.

5. Limiting access to the lake - I am in favor of limiting the number of boats on the lake by limiting the number of dock slips that are on the lake. Other than limiting dock slips, I'm not in favor of any attempt to control number of launches at a launch site in any given day.

These are my thoughts on the proposed plan.

I am a native of Branson, I grew up here and raised my family here. We have enjoyed all the Tri-lakes and camping areas for 40+ Years, but especially Tablerock. Leave things alone, if it's not broke, it doesn't need fixing !! The last thing we need is over-regulation. As area citizens, our rights and concerns need to be heard and respected. Tourism will be effected as well and we risk the tourist not returning if they are

20170913_Cameron_C-WA

finding they can not enjoy our beautiful Tablerock lake after traveling here to only be turned away. Not a good idea, makes no sense. Not once, even on holiday weekends have I ever seen cause for such a rule, the use of the Lake by all and freedom to do do at will should be left as it has been for decades. Corp of Engineers..back off. You need to stay out of our local business owners, property owners and tax payers, decisions and our rights. Stay in your own lane, and continue to take care of the things you have as before, ie., flood control, storm damage clean up, etc..which you have done a fairly respectable job at for many years. But these new proposals and restrictions will not serve any useful purpose or be for the betterment of our community as a whole.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Cynthia Cameron

- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I've enjoyed this lake for 20 years and feel that the changes proposed would negatively affect the lake and the enjoyment of it by many. Please do not institute these changes.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Quint Flowers

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am for restriction of the number of docks on the lake and the width and length of the slips in those docks. If there is no control we will end up like Lake of the Ozark: huge speed boats, cabin cruisers and a complete loss of natural beauty. I like that there are some restrictions and inspections to maintain safety and natural beauty but not most of the new proposed changes.

20170913_Friedman_C-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Cheryl Friedman

Also, not to be allowed to store fishing gear, water recreational equipment and chairs on the dock is ridiculous.

Slip owners have made a sizable investment, please explain how having chairs, fishing gear, and water recreation toys on the dock harms the environment on or around the lake.

20170913_Gist_K-WA

And taking electricity off all docks ???
There is a Hydro Damn on the lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps.
Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Karl Gist

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I appreciate the Corps of Engineers has a job to do, however without the tourism drawn to the area by the use of Tablerock Lake the damage to the local communities would be devastating. Requiring the elimination of electricity on the docks is an unnecessary burdensome expense on many owners of private slips and business operating on the docks. Wouldn't it be more efficient and less expensive to

20170913_Hendricks_R-WA

have better oversight of the electricity used on the lake? Require inspections of the electrical equipment used on the docks at the expense of owners and the electric companies and mandate requirements that would make the docks and the water safe from electrical issues. Encourage new docks to use solar power when possible, assuming the technology is available at reasonable cost.

In addition, due to the recent flooding issues in the past decade, the number of fallen and dead trees has increased dramatically along the Corps line of the lake. I would suggest the Corps could have an impact on tourism at the lake by issuing limited vegetation permits for owners to clear the timber from the floods. This could be limited to issuance the year or two right after a major flood. The fallen timber creates a boating hazard, causes damage to boats and has the possibility to injure skiers and other persons using the lake on personal watercraft.

The Corps has done an excellent job managing Tablerock lake to date. I hope you are open to the comments and ideas presented by the many responses I'm sure you have received.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Rene Hendricks

Please consider the above mentioned comments. As a home owner of a modest lake home and dock slip many of the changes will price many people out of their dream - a home on the lake. We have existed for many years under the current plan with a safe and pleasant place to enjoy the beauty of Table Rock.

20170913_Hicks_C-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Cheryl Hicks

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The folks who use Table Rock Lake love it dearly & already take good care of it for their children & grandchildren. Please do not go through with this plan. Please continue to work with the local residents, as in the past, to care for the lake & provide a wonderful place for family enjoyment.

20170913_Kirchner_M-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Mary Kay Kirchner

The change to solar is a problem. Because without battery banks on the dock. The boat lifts would not work at night.

Not being able to store water sport or fishing gear on the dock takes away a big part of the advantages of having a slip. Having to lug all the tubes, skies or fishing gear to the boat every time you go out or

20170913_LaCore_R-WA

change from fishing to tubing or skiing. Which for my family can be a couple of times a day would be a big hardship.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Robert LaCore

Adding all of these restrictions would take the fun experience out of just going to the lake for a nice family weekend trip or family vacation. The government does not need to be involved or have say in everything we as Americans do. It will also impact campgrounds as they depend on their guests doing all the things that this just said you can't do.

20170913_Leonard_B-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Brook Leonard

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The new proposed management plan is a shining example of government over reach. Creating so many arbitrary rules and restrictions shows the mindset/product of those coming from our universities (think Green) who believe they have `free rein` to propose such outlandish rules that reveals their lack of common sense; common sense that we appreciated from their predecessors.

20170913_Loeppke_G&R-WA

EXAMPLES:

No restroom facilities on docks or boats
Nothing folks use on the lake/dock can be stored on the dock
Not allowing golf carts or such to get elderly/ disabled to their dock
No conspicuous `no wake buoys`
that keep speeders away from the dock

I am encouraged that the public's comments during the process have been acknowledged by the Corps.
Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Glen & Roxan Loepke

Table Rock Lake Shoreline Management Plan
Revision, Environmental Assessment,
Master Plan Comment Form

Please use this form to respond to provide your comments on the draft revised Table Rock Lake Shoreline Management Plan and the draft Environmental Assessment. The draft revised Shoreline Management Plan and Environmental Assessment may be found on the web at https://go.usa.gov/xN92n. Please also include any comments you may have regarding the 2014 Table Rock Lake Master Plan. The 2014 Table Rock Lake Master Plan may be found on the web at https://go.usa.gov/xN92n. Feel free to take an extra form and sent it back later to the address listed below. Comments must be submitted by August 30, 2017.

Your Name/Organization: Sheila Mitchell

Address: 5225 S Maryland Ave
Springfield, MO 65810

E-mail: sheilamitchell225@gmail.com Phone: 417-883-4512

Please circle the number that best represents your opinion of the draft documents: Revised Shoreline Management Plan, draft Environmental Assessment, and draft Finding of No Significant Impact:

1 2 3 4 5 6 7 8 9 10
Strongly Disapprove Strongly Approve

What are the most important factors that affect your opinion of the draft Revised Shoreline Management Plan?
My biggest concern is Hidoaway Marina near point 11. It is already drawing in heavy watercraft traffic while zoned as what appears to be High Density Recreation and LDA. If any changes are made to allow it to become a Public Recreation (all alternatives except #3), my boat dock will continue to suffer damages because of increased traffic. It is already dangerous to swim in the cove in front of my dock because of large wakes and boat pilots that don't look for swimmers. I am also concerned about too many boats on the lake, and boats that are too large to the smaller James River Arm. Inexperienced pilots create huge wakes as high as 4'-5' with large cruisers that destroy docks and almost drown people.

What are the most important factors that affect your opinion of the draft Environmental Assessment and draft Finding of No Significant Impact prepared for the Shoreline Management Plan Revision?
SAFETY for individuals, preservation of the environment, and hoping to preserve some quiet fishing time

Comments on the 2014 Master Plan: My overall preference is for Alternative 3 - the no action plan - as mentioned above. Please do not let Table Rock Lake turn into a Lake of the Ozarks with too many boat docks, high speed jet boat races, and people getting killed.

Thank you for allowing us this comment period.

Subject: [EXTERNAL] Comments on the Table Rock Lake Shoreline Management Plan

Below are a list of comments on the revised shoreline management plan in regards to docks

1. I have several issues with the proposed "solar only" power for docks in the future.
 - a. The main issue is the misconception that solar power will be more visually appealing. The even bigger issue is the safety of people on the docks. All solar systems use an inverter to convert DC generated by the solar panels to usable AC power. Therefore you have the same 120/240V AC power available with no referenced ground. Without a referenced ground to the utility system, any electrical fault on the dock most likely will not operate a overcurrent device. Say, for instance, a hot (black) wire comes in contact with the dock steel. With no reference to ground, the dock will become energized at 120V. The first person that touches the dock and ground will become the path for the fault current to flow. This is a very dangerous and potentially deadly situation. I believe this rule should be removed or modified to consider the safety aspects.
 - b. The solution to "a" is to use the neutral as a ground on the dock. If you do, however, no you will have neutral current causing a voltage rise on the dock steel. A much lower value, usually referred to as stray voltage, but still a shock hazard.
 - c. Has the economic impact to the public been considered in this at all? You can connect service to a dock for under \$1,000 from a utility. To install solar system the cost is \$5000 to \$10,000. Also, have you considered all the additional batteries that will be on docks to supply power when the sun doesn't shine?

I respectfully ask you reconsider to protect the safety of the public.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I know the term is Core Lake. But its not your lake its everyone's lake!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170913_Robson_T-WA

Sincerely,

Terence E Robson

Visual pollution for electric? One wire is far less obnoxious than solar panels all over the roof or a windmill. This is a beautiful lake as it is. Why do you want to destroy the lake and the local economy?

Subject: [EXTERNAL] Table Rock SMP comments

United States Army Corps of Engineers

Little Rock, AR

RE: Table Rock Lake SMP comments

Table Rock Lake Chamber of Commerce represents over 400 businesses and organizations located in the communities on the shoreline of the lake, and their employees. Our organization's mission is to promote business success and quality of life by being a leader in economic and community development in the Table Rock Lake area.

To fulfill that mission, part of what we do is promote tourism for the Table Rock Lake area and advocate for our businesses. In that role, it is our responsibility to provide input into the development of the Shoreline Management Plan (SMP).

We believe the U.S. Army Corps of Engineers (USACE) provides an invaluable management service to the lake, and agree with many of the restrictions already in place that protect the public, property owners and businesses. We believe when people say they don't want Table Rock to become "another Lake of the Ozarks" what they mean is they don't want unregulated growth, buildings right on the shoreline, and a large number of bars surrounding the lake. They do NOT necessarily mean that Table Rock Lake should be further regulated, as currently only 12% of Table Rock is even available for dock zoning. Table Rock WILL NEVER become like Lake of the Ozarks because of the protections currently in place from USACE.

We recognize that, according to regulations, the SMP is supposed to be completed every 5 years but also recognize it is dependent on funding. The current plan has not been updated since 1996, so we

20170913_Thomas_S

believe our concern is valid that the next SMP (following this one) could be several years away. The current revision could be one that we have to live with for many, many years.

Based on those considerations, we believe some of the proposed changes are unnecessary. Following are our comment/positions regarding some of the proposed changes.

- 1) We do not have an official position regarding requiring solar power to existing docks; however of concern is the clause addressing existing resorts. It is not clear in the document whether existing resort docks would have to convert, or what changes, if any, they would be required to make in the future. We believe the technology used installing solar power is evolving rapidly and would suggest this proposal should be removed and reconsidered for a future SMP. Solar power does not completely eliminate the threat of electrical shock and battery storage could pose another set of environmental problems. The costs to be borne by slip holders and electric companies serving docks should be considered when weighing the benefits of this regulation.
- 2) The section containing the elimination of the Commercial Remote Service Dock program (CRSD) should be removed. If these are eliminated and the area is not converted to LDA, that reduces the number of available docks to potential businesses around the lake and prohibits development, particularly in areas like Kimberling City.
- 3) One request every 5 years for a dock permit modification is unreasonable and burdensome to dock owners.
- 4) Additional restrictions on vegetative management permits are arbitrary and unnecessary.
- 5) Requiring the removal of existing "No Wake" buoys should be removed from the plan. These do deter boats from traveling too close to a dock and potentially causing a safety hazard from excessive wake. They also serve as markers at night.
- 6) Allowing no personal property other than that which is "essential to the vessel's operation" to be stored on a dock is too restrictive. Outdoor tables/chairs, fishing gear, coolers and other items are adding to the public's enjoyment of the lake, and legislating this will only cost the Corps additional time and money in unnecessary enforcement.
- 7) Requiring boats with a Marine Sanitation Device to be moored in a commercial marina seems arbitrary and too restrictive. Many open bow boats now have sanitation devices and this could be a burden on property owners who have existing slips.
- 8) Decreasing the maximum slip size from 14 x 30 to 12 x 30 seems arbitrary and no explanation is given.
- 9) We object to the carrying capacity (access opportunity) restrictions. Carrying capacity, page 37: "Studies suggest that the maximum boat density for safe boat operation is 10 usable surface acres of water per vessel." What studies are these, and where is the reference? 10 acres per boat seems excessive. Also, if Table Rock is not projected to reach a maximum capacity for 61 years, why is it necessary to include this restriction at this particular time? We feel it is more prudent just to state that when the access opportunities reach 26,000 another carrying capacity study will be done, and we request that the language setting a maximum threshold be removed.

10) Finally, the Changes and Revisions section should be clarified. It is unclear what constitutes "minor" changes that can be approved by the District Commander without the public participation process.

Respectfully submitted on behalf of the Board of Directors,

Sheila Thomas

I hate the way you are allowing the weeds and trees to grow up on the shoreline st Campbell Point. We have boated by several campgrounds around the Branson area and they are neatly maintained!! The rocks that have been hauled in at the boat launch area is horrible!! It has made it to where only one boat at a time can load/unload!! Camping & boating is something our family has enjoyed for years at

20170913_Wendler_J-WA

Tabke Rock!! You all are trying to ruin this valuable family time that we have enjoyed for so many years!!!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Julie Wendler

I believe "if" the alternative energy requirement continues to push forward, existing docks should be grandfathered in. Until a time, solar & other alternative sources are less expensive & proven to be safer (batteries that are required to power them that could leak into the lake) it should definitely not be

mandatory. I was told by a rep of the Corp at a public meeting, they had a learning curve. Table Rock would be horribly impacted with a mass exodus by tax paying residents. Respectfully Ted White

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Please leave things AS THEY ARE.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

20170914_Banaszek_J-W

Sincerely,

Jane Banaszek

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

My concern deals with retrofitting existing dock with solar panels and battery storage to provide electric for lighting and lifts.

I would like to note with our nighttime security light in the parking which is on the same meter is only \$13.56 per month.

20170914_Barnhart_C-WA

The numbers I am hearing to convert will cost about \$10,000.00 Just on the surface that take over 75 years to break even. My family has been here since 1971 and have replaced two docks over the past 46 years. The math just does not work out to make any justifiable reason to put this kind of cost on the slip owners.

The two docks I refer to only lasted 30 years.

Then we have the maintenance costs of replacing batteries, solar panels, inverters. Etc. Every 5 to six years. This does not include the risk of acid leaks into the lake, or the likely corrosion to the docks.

However on the high user docks which are leased to the marinas by the Corps of Engineers there may be a feasible solution. I think the numbers should dictate the decision-making you are wanting to impose on the private and community docks.

Thank you for considering my view.

Chuck Barnhart

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Chuck Barnhart

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I can understand the need to control the lake so it doesn't get out of control like Lake of the Ozarks. Limiting the number of docks and locations is a way to do that, but changing the way that the docks are used will unnecessarily upset the dock owners that have owned the property for some time. I can

20170914_Bauer_J-WA

understand the removal of non permanent furniture , grills, sun shades etc, that could potentially litter the lake, but creating a hardship on dock owners is unnecessary

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Joseph Bauer

The lake is a family place. Safe and reasonable storage of personal and community property on the docks should continue to be permitted. changing this rule will have no positive environmental impact and seems to be a personal attack on the residents of Table Rock Lake by the Corps of engineers.

20170914_Bauer_K-WA

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The removal of shoreline pole lights is going to cause thievery on the docks to increase because there will be no light to detur the criminals. Removing all shoreline power to the docks is going to be very costly to the dock owners. the cancellation of vegetation permits will increase the occurrence of the snakes wildlife and vermin to move out of the woods and into the neighborhoods. The limitation of the

20170914_Bauer_R-WA

number of boats on the water needs more explanation of how it will be controlled. There needs to be the allowance of public input prior to putting any new rules into effect. The number of people that are capable of attending the meetings and forums being held can't possibly represent the number of people that these changes will affect. Property owners need to have an opportunity to be heard, whether through mailings or official internet sites.

By making all of these changes property owners will be losing value of their invested properties with a greater economic impact on the surrounding communities. If people cannot comfortably use the lake, communities will lose a lot of revenue. Think about the impact of the area before making decisions.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Robert Bauer

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

The most important factors that affect MY opinion of the proposed draft are twofold: First, my high esteem for the overworked boots-on-the-ground members of the Corp of Engineers and the need to streamline operations and guidelines. I understand that the reasons behind most of the proposed changes has more to do with workload than anything else. It's too bad that the potential solutions

20170914_Bezzerides_J-WA

offered by the focus groups were largely batted away and ignored. My hope would be that the new management could re-visit some of those suggestions with an eye toward making the needed changes in legislation to allow creative solutions. We want to help!

The second factor is my personal experience as a lakefront property owner AND real estate professional specializing in lake properties. I grew up camping in the state park system. My first college major was Forestry. I care deeply about the need for balance between the need to protect nature and the desires of humans to live and recreate on and around the water. We need rules! But it isn't fair to CHANGE the rules mid-stream, when so many thousands of people have invested heavily based on current restrictions.

Speaking of current restrictions, one change I believe IS desperately needed has to do with the outmoded Park Buffer Zone (or whatever the new terminology may be) and the effect it has on the members of the public who live nearby. The location of the park buffer zoning seems arbitrary and without purpose. I've been told that the original design of park buffer zoning was to protect the neighboring communities from the campgrounds, or vise-versa. Looks like that ship has sailed. Without creating a whole new layer of workload for the rangers, why not move to a blanket permit system that sets forth clear guidelines for ALL of the habitable shoreline? And include those folks hunkered down behind the dark green line...

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Janetq Bezzerides

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I live in Kimberling City and feel these above restrictions would impact the area negatively financially. It would negatively impact tourism and financially strap dock owners. If fishing guides have to wait to get on the lake, it would obviously cost them thousands of dollars in income.

20170914_Chandler_R-WA

Please leave the regs as they are making no changes.

Respectfully

Beckie chandler

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Also, the changes to solar energy for existing docks is cost prohibitive for the transition. New docks going forward or rebuilding docks could more easily and cost effectively handle the move to solar power.

20170914_Cheney_C-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Candace Cheney

I know that this probably wont get read, and if it does, it probably wont be taken into consideration. If the entire population of the USA filled out this petition, the Corps would still do what they want. Quit making it difficult for people to live their lives. We have had a cabin on Table Rock since my mom was

20170914_Cheney_R-WA

pregnant with me, and Im 37. I plan on passing it down to my kids someday. Just leave well enough alone.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Ryan Cheney

Start treating land owners at the lakes like partners not as trespassers. Lake property owners have a stake in the lake and keeping it clean, safe and erosion free also.

20170914_Cogdill_J-WA

Electricity has been on docks for years and poses little threat so making rulings to cost dock owners large amounts of money for inadequate power to support their lifts etc. Is unfair and bullish.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Julia Cogdill

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Table Rock Lake is working as it is do not change anything.ate More rules and restrictions will not improve the shoreline or the Lake.Over jurastriction will not help anyone just create more rules and deter people from being able to enjoy it.

The lake belongs to the people and should be available to all.

20170914_Dick_M-WA

By removing the no wake buoys, you are potentially putting swimmers at risk of being hit and possibly killed! Boaters already come in way to close to those out swimming and have no regard for others in the water, removing the buoys would only increase injuries and possible deaths!

20170914_Etter_C-WA

Re SOLAR: We have solar on our 4 slip. if the batteries are not charged we can't even raise our boat(s). Forget trying to play music, or charge boat batteries or even a cell phone. It would be a nightmare for 20 slip docks! Re NO GOLF CARTS: Do you see boaters enjoying their tubes, skis, and other water toys? How are we supposed to get those to our docks - especially if they will NOT be allowed to be kept on docks.

20170914_Foreman_J-WA

WE are charged with maintaining our paths. Do you really think we will abuse our only way to get to OUR docks? Re NO FURNITURE ON DOCKS: If the corps is concerned about too many boats using the lake, then why wouldn't you encourage people to hang out on their docks instead of on the water? HOW MANY OF YOU HAVE NO FURNITURE IN YOUR OFFICE???? Re NO STEPS TO DOCKS: LOOK AT THE NAME OF THIS LAKE! It is called Table ROCK Lake. Heeellllloooo. NO STEPS - and we must carry all of our boating equipment down by hand??? UNSAFE, and frankly ludicrous. Re NO WAKE BUOYS: We have a "sign" posted on the dock by the entrance of our cove. Some boaters either don't see it or pay no heed. Signs on docks are INEFFECTIVE in slowing boats. The only problem with TRL is government officials sitting in an office(full of furniture) "CREATING" a problem. We object to our lake being over-regulated!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170914_Fortin_R-W

Rhonda Fortin

I'm tired if seeing the lake and shorelink being controlled.by just a few people., and access to the lake limited a special in the Kimberling City Mo area of the lake. Thus lake should be acessable to everyone.

20170914_Fritz_M-WA

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Mary Fritz

It's already ridiculous enough that we have to pay to get to use a public lake. And any time you find too many people accessing a spot for free, you want to come in take over and charge to use it. Leave this alone. Greedy is all you are!

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I also object to the proposal that slip owners will not be allowed to store personal belongings (chairs, swimming accessories, fishing equip, etc.) in lockers on our slips.
We have paid a permit fee to have a "no wake" buoy placed in front of our dock. It prevents injury to swimmers around the dock and damage to docks, slips and lifts.

20170914_Gauger_J-WA

On our 12 slip dock, 7 of the slip owners are seniors and not allowing golf carts, ATVs to park by the dock prevents these seniors from having access to their boats. When we renewed our permit last year (2016) we had to remove a light from the pole on the shoreline. Again, this presents a safety hazard for people returning to the dock after dark. We paid \$75.00 for a power line to the dock and \$75.00 for the road in our renewal fee!

Personally, I feel the Corps expects us to pay all these fees to be in compliance with the regulations but we are not being allowed to enjoy the benefits we paid for!!

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Jeanne Gauger

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

We would be very much impacted by these proposed regulations . The cost of making our dock solar would make a terrible financial burden on us. Why can't you leave things the way they are ? Why do you look for ways to cause a burden on the people who live on the lake ? Or on people who want to come to the lake to just enjoy . It seems to me that you could use your time in trying to find ways of better

20170914_Johnson_L-WA

management of flooding issues. We have lived on the lake for 20 years. Over 10 years with no flooding. Now the past 10 it floods drastically at least every other year. Why come up with these regulations to place on us at the lake ? Seems to me you need to implement some regulations to stop the flooding of people's homes and docks . DO NOT CHANGE the shoreline management plan.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Lester Johnson

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170914_Keeling_R-W

What are the most important factors that affect your opinion of the draft Revised Shoreline Management Plan?
I am supportive of the Plan's reduction on slip size to 12' x 30'. The size of Table Rock Lake does not support the safe and enjoyable boating with larger water craft. However, the Plan deficient in fully addressing this issue of safe boating and shoreline preservation. The Plan needs to address (restrict) the general use of boats designed to create excessive wakes,

~~What are the most important factors that affect your opinion of the draft Environmental Assessment and draft Finding of No Significant Impact prepared for the Shoreline Management Plan Revision?~~

by auxiliary means, e.g. wake gates ballast tanks. Allowing such water crafts creates a condition of unpredictability for the rest of the boating public. It also reduces the allowable boat density, which will need to be considered in future "boat count" studies. These watercraft have an adverse impact on the shoreline and therefore wildlife as well.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170914_McAuley_N-W

I have been enjoying Tablerock Lake for all my life. It is one of the most beautiful lakes in the country. I thank you all for keeping it that way. However, this plan is totally ridiculous. I really have to wonder who comes up with some of these ideas. I heard capacity limit was so we don't become like Lake of the

Ozarks. Really?? Maybe you should go to Lake of the Ozarks and take a boat ride. Tablerock will never be like that.

Eliminate electricity on docks? Stupid!

Limit fishing equipment storage on dock. Stupid!

I suggest you have an early retirement program and reduce the size of all of your offices and facilities.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Keith Potts

These are our local communities and our small businesses, realtors, home builders, developers, local stores, restaurants, hotels, and all service/labor industries that support all of these businesses. If people retiring cannot secure local close access to a boat slip they will inevitably find another area to retire. The amount of local jobs and businesses supported by our local real estate market is huge and when people

20170914_Prince_R-WA

cannot secure a local close boat slip to where they live, the house will not be built, the lot will not sell, property values will go down lots of businesses and local communities will be effected. Please consider all the local people that count on stable growth and development to be able to make a living.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

TO: The Army Corps of Engineers

FROM: Paul E. Pugner (paul.pugner@gmail.com)

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

1. I object to the carrying capacity as it limits the right to use the lake.
2. I object to tighter restrictions placed upon vegetative management permits.
3. Cedar trees are an invasive plant and have no biological value in the Ozarks. Cedars should be allowed to be cut no matter the trunk diameter thereby allowing the Ozarks native species to thrive.
4. I object to financial hardships of removing non-solar electricity from our dock and adding solar. There are the same hazards with solar as with our existing source for power and the damage to solar by our extreme hail events would only add to the costly change.
5. I object to only one request every five years for dock modification.
6. I object to the 8' depth requirement for any new docks.
7. I object to the loss of 14 foot slip widths.
8. From an ADA point of view, I object that no new licenses will be allowed for stairs or steps.
9. I object that no new No-Wake buoys for docks will be allowed and existing must be removed. Since the Missouri Highway Patrol is responsible for said buoys, they should continue to have the authority to approve ALL wake buoys.
10. It is unclear that when the point of contact changes for a community docks, if having to get a "New Permit" means you have to go through the whole permit process and fee payment again. For example, if I, the point of contact, die the day after our permit is issued for a 5-year renewal, then are you requiring that the designated new point of contact would have to go through the permit process all over again, with the associated costs and fees. Totally unreasonable if this is the case. We should be

allowed to change the point of contact for our community dock as necessary to meet the needs of the community as long as the Corps has a point of contact update from us and is provided updated owner/watercraft information.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake as well as a decline in property values.

I am encouraged that the public's comments during the current process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

///s///

How are you going to say who can use the lake. Is it going to be for the well off or buddy system. However it's done can't be fair to all. The lake was built with taxpayers money. Please leave well enough alone .

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

If any of these restrictions are being considered as a result of insufficient manpower on the part of the Corp to properly manage the existing permits and various uses of the lake as they exist now, then let's have a discussion about how to appropriate the needed funds to allocate additional resources to said

management. Overly restrictive rules and regs are not in the interest on our homeowners, businesses or our communities in general. To the contrary, they will have a detrimental impact on all of them.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Jim Stephenson

We appreciate your diligence and managing our Shoreline and the lake. Table Rock Lake is truly beautiful and serves a lot of purposes for all of us including taxpayers and citizens. If these regulations are made tighter on the property around Table Rock Lake and Table Rock Lake itself our property values will fail and the job of keeping up shoreline will be reduced to taking care of abandoned properties and

20170914_Trapp_N-WA

an element of destructive persons will be who you are dealing with. Let us own the lake with pride with you as our US taxpayers managers and be good for everyone.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

Nancy Trapp

I would like to express for my husband and myself our concern about the new requirements for the docks. The concerns are the buoys and the changing of the electric requirements. I am concerned about the boats coming closer to the docks since we are on the main channel. A lot of wave action effects the dock and shore. The changing from electric to another source would be costly for the slip owners since the dock is less than ten years old. I understand the reason behind changing the requirements but think there should be some leeway for docks that have these same circumstances. We are also concerned about the size of the boats that are larger, loud, and wake boats that are making the lake less enjoyable to use for the people that have smaller boats. This has caused us to buy a boat that is a little larger than our previous light weight 18 ft. boat and to not go out on the lake during the holidays.
Thank you for your consideration of this matter.

RE: Table Rock Lake Shoreline Management Plan

Dear Corps of Engineers Decision Makers,

I am deeply concerned about the drastic changes that are being proposed in your draft Shoreline Management Plan for Table Rock Lake. The community has been very clear in thousands of public comments submitted that we are opposed to over-regulation. We've asked many times for NO CHANGE to be made to the Plan, but there are several items of major concern:

- I object to the carrying capacity as it limits the right to use the lake.
- I object to tighter restrictions placed upon vegetative management permits.
- I object to the new non-transferable grandfathered vegetative management permit rule.
- I object to financial hardships of removing electricity from the lake.
- I object to only one request every five years for dock modification.
- I object to the 8' depth requirement for any new docks.

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.

Sincerely,

20170914_Williams_B-W

Brady Williams

I would ask that the Shoreline Management Plan NOT be changed. At the very least, please do not allow the changes noted above to go into effect. It would have a devastating economic impact and would be detrimental to the public's right to use and enjoy our lake.

Leave the lake alone to much Government involvement is ruining our Great Lakes.

I am encouraged that the public's comments during the process have been acknowledged by the Corps. Thank you for listening. Please continue to help us protect our rights to use and enjoy our beautiful lake.
